Most recently vice president for programs at ARCO Power Technologies Inc., Dr. Stebbins had served as Deputy Chief of Staff at the U.S. Air Force Systems Command, responsible for Technology and Requirements Planning. In that capacity, he directed the Air Force's Science and Technology Program conducted at 14 different laboratories and was Program Director and chief spokesman for Air Force Project Forecast II.

Earlier Dr. Stebbins served as Commander of the Rome Air Development Center where he directed the Air Force research programs for C3I, electronics reliability and maintainability, and computational sciences and software; as a member of the National Security Council Staff at the White House; and as executive assistant to the Chairman of the Joint Chiefs of Staff.

Dr. Stebbins earned a Ph.D. in Aerospace Engineering Sciences from Colorado University, holds and M.S. and Professional Degrees in Aeronautical Engineering from the California Institute of Technology and was graduated with a B.S. in Engineering Sciences from the United States Air Force Academy.

Logicon is a leader in providing advanced technology systems and services to support national security, civil and industrial needs.

HAUPPAUGE, NY (JAN. 23) PR NEWSWIRE - Robotic Vision Systems, Inc. (NASDAQ: ROBV), a leading supplier of machine vision-based equipment for process guidance and quality control, announced today that Motorola Government Electronics Group has ordered the company's new product, the HR-2000, for automated printed circuit board solder quality control.

Robotic Vision Systems' Chairman Pat V. Costa said, "We expect Motorola's selection of the HR-2000 to support its solder quality control efforts to attract considerable attention throughout the electronics industry. Motorola's international reputation for excellence in manufacturing quality means that its activities, especially in the area of quality control, are closely watched and frequently emulated." In 1988, Motorola was one of the three inaugural recipients of the prestigious Malcolm Baldrige National Quality Award.

RVSI's HR-2000 uses the company's proprietary three-dimensional machine vision technology to rapidly obtain thousands of high-resolution 3-D measurements from each printed circuit board solder joint. This geometric information is used to prevent the occurence of solder defects through trend analysis and statistical process control. Introduced in 1989, the first three HR-2000 units are now installed and operating in the field.

Separately, RVSI announced that it will be demonstrating the HR-2000 at the Nepcon West Exhibition, Anaheim, Calif., in the Marriott Pavillion, Booth No. 8349, Feb. 27 - March 1, 1990.

Robotic Vision Systems, Inc., designs, develops, manufactures and markets advanced three-dimensional vision-based intelligent robotic and inspection systems for industrial and military purposes.

WESTLAKE, OH (JAN. 23) PR NEWSWIRE - Nordson Corporation (NASDAQ: NDSN) joined forces with its exclusive distributor, Sang San Engineering Company Ltd. in Seoul, Korea, to form its first joint venture company -- Nordson Sang San, Ltd. The joint venture, finalized December 28, 1989, includes four shareholders: Nordson Corporation, the largest single shareholder; Messrs. Y.B. Park and B.K. Choi, principals of Sang San Engineering Company, Ltd., an exclusive Nordson distributor since 1987; and Korea Technology Investment Corporation.

Nordson Sang San, Ltd. is responsible for selling, installing and servicing Nordson equipment and systems for applying coatings, adhesives and sealants. The business will be managed by local executives, and will be affiliated with the company's Pacific South Division, which is reponsible for business activities in Latin America, Australia and the Far East, excluding Japan.

The venture was initiated in response to opportunities within the fast-growing automotive, appliance, container, and food and beverage

packaging industries in Korea. "The Korean market is strategically important to Nordson and it is key that we establish a strong market position early," says Donald McLane, president of Nordson's Pacific South Division. "This joint venture will enable Nordson Sang San, Ltd. to grow at a higher rate and serve our customers better than would have been possible with independent organizations."

Nordson Corporation is a major international manufacturer and marketer of systems used to apply high-performance materials -- coatings, adhesives and sealants -- during manufacturing processes. Headquartered in Westlake, Ohio, a Cleveland suburb, Nordson Corporation has over 2,500 employees at seven major U.S. facilities and 17 international subsidiaries. The company had 1989 revenues of $282 million and earnings per share of $3.53.

AUGUSTA, GA. (JAN. 23) PR NEWSWIRE - Bankers First Corp. (NASDAQ-NMS: BNKF) today announced a major corporate restructuring plan that will result in annual savings of over $2.5 million.

The effort calls for streamlining the company's operations, further eliminating redundant staff positions, selling non-strategic banking facilities, and consolidating certain other branch facilities.

Specifically the plan includes:

- The sale of branch banking facilities in communities that are outside the institution's primary markets.
- A work force reduction of approximately 10 percent.
- Consolidation of management and operations functions of the company's northwest Georgia operation into its Augusta operations.
- Consolidation of certain branch banking facilities within

the company's Augusta and Savannah banking operations.
-- Conversion of the company's Athens Federal Savings Bank unit from its current outside data processing service provider to Bankers First Data Services Inc., the company's Augusta-based data services subsidiary.

In making the announcement, H.M. Osteen Jr., the company's chairman commented: "In today's environment, we feel it is prudent to centralize our operations in order to enhance operating efficiencies and improve profitability. This is a shift in our strategic direction from expanding our franchise to one of concentrating efforts in our major markets. We are also committed to providing enhanced services to our customers in our principal markets as demonstrated by our branch expansion in Athens and the addition of drive-in capabilities in our Augusta system."

Bankers First Corp. is a financial services company principally serving the Augusta, Athens, Rossville, and Savannah, Ga., markets with 39 banking offices and 33 automated teller machines. The company's common stock is traded on the NASDAQ National Market System using the symbol BNKF. The abbreviation found in most newspaper listings is "Bankers First."

#90023p0211 01/23/1990 ~PR Newswire

AUGUSTA, GA. (JAN. 23) PR NEWSWIRE - Bankers First Corp. (NASDAQ: BNKF) today announced 1989 earnings per share of $1.06, a 6.0 percent increase over the $1.00 per share earned in 1988.

Net income for 1989 was $4.535 million compared to $4.563 million for 1988.

The company also declared its regular quarterly dividend of $.07 per share. The dividend will be paid to stockholders of record on Feb. 2. The payments will be made on Feb. 15. The company began declaring a regular quarterly dividend with the first quarter of 1989. To date, dividends declared have totaled $.28 per share.

H.M. Osteen Jr., chairman and chief executive officer said: "The 1989 operating results reflect the continued emphasis on reduction of overhead costs. Operating expenses to average assets for 1989 was 2.05 percent, a 10.9 percent decrease from 1988 levels. A reduction in non-performing assets of approximately $10.0 million during the year brought the total down to $37.6 million, or 2.44 percent of total assets at year end. This represented a decline of 20.9 percent in this category of assets, resulting in a positive impact on earnings while significantly strengthening our balance sheet."

Osteen further commented: "Bankers First benefited from improvements in interest rate conditions during the second half of 1989. The net yield on earning assets improved to 2.42 percent in the fourth quarter, a 14 basis point increase over the third quarter, continuing a trend established earlier in the year."

Earnings for the 1989 fourth quarter were $.20 per share compared to $.28 per share for the 1988 fourth quarter. Fourth quarter earnings included provision for loan losses of $1.8 million, approximately $1.0 million greater than in each of the previous three quarters.

The company announced April 17, as the date for the annual meeting of stockholders. Stockholders of record on March 1 will be eligible to vote at the annual meeting.

Bankers First Corp. is a financial services company principally serving the Augusta, Athens, Rossville (Chattanooga, Tenn.), and Savannah, Ga. markets with 39 banking offices and 33 automated teller machines. The company's common stock is traded on the NASDAQ National Market System using the symbol BNKF. The abbreviation found in most newspaper listings is "Bankers First."

NORFOLK, VA. (JAN. 23) PR NEWSWIRE - Norfolk Southern Corporation (NYSE: NSC) announced the election today of Gerald L. Baliles, former Governor of Virginia, as a member of its board of directors.

Born in Patrick County, Virginia, Mr. Baliles received his undergraduate degree from Wesleyan University and his law degree from the University of Virginia. He served in the Virginia Attorney General's office as assistant attorney general and later deputy attorney general. In 1975, he entered private law practice and was elected to the Virgnia House of Delegates. In 1981 he was elected attorney general.

While serving as attorney general, Mr. Baliles was selected as the most outstanding attorney general in the United States by the National Association of Attorneys General.

In 1985, Mr. Baliles was elected Governor of Virginia and began his four-year term in January of 1986. Among his many accomplishments are creating the office of Secretary of Natural Resources, initiating an extensive program of transportation improvement and construction, and promoting the development of international trade for Virginia products and services, including creation of the Department of World Trade.

In 1988, Mr. Baliles' peers selected him to be chairman of the National Gevernors' Association.

Mr. Baliles, who will return to the private practice of law, resides with his family in Richmond.

#90023p0215 01/23/1990 ~PR Newswire

ST. PAUL, MN (JAN. 23) PR NEWSWIRE - 3M (NYSE: MMM) today reported record fourth-quarter and full-year 1989 sales and earnings.

For the three months ended Dec. 31, net income rose 7.4 percent to $292 million, or $1.31 a share. This came on top of a 25.7 percent gain to $272 million, or $1.21 a share, in the same quarter last year. Sales totaled $2.954 billion, up 7.4 percent from $2.752 billion in the fourth quarter last year.

Net income for the year increased 7.8 percent to $1.244 billion, or $5.60 a share. That compared with $1.154 billion, or $5.09 a share, in 1988. Earnings per share increased 10 percent, aided by a reduction in shares outstanding. Per-share earnings are up 65 percent in the last three years; net income is up 60 percent during the same period. Sales for the year totaled $11.990 billion, an increase of 5.9 percent from $11.323 billion in 1988.

Allen F. Jacobson, chairman and chief executive officer, said, "1989 was another successful year for 3M. We achieved higher sales and earnings -- and maintained very good profitability -- in the face of modest U.S. economic growth and negative currency effects.

"We met three of our four aggressive financial goals, and we came very close to achieving the fourth." The results:

-- Growth in per-share earnings hit the 3M target of 10 percent or better.

-- Return on stockholders' equity rose to 23.1 percent, the highest since 1960. 3M's goal is a return of 20 to 25 percent.

-- Return on capital employed was 26.9 percent, up from 26.8 percent in 1988 and just short of the goal of 27 percent or better.

-- More than 30 percent of sales again came from new products - those introduced within the last five years. 3M's objective is 25 percent or better.

Results would have been even better had it not been for strengthening of the U.S. dollar. The company estimates that net income for the year was reduced by about $49 million, or 22 cents a share, due to the change in the value of the dollar compared with 1988.

Jacobson said that 1989 earnings growth was led by the company's Information and Imaging Technologies Sector, which includes magnetic media imaging systems, commercial graphics, visual systems and other businesses.

JACKSON, MI (JAN. 23) PR NEWSWIRE - Patrick Petroleum Company (NYSE: PPC) today reported that it has purchased a 50-percent working interest in the Tenneco Fee No. 1 Gas well, along with additional undeveloped primary reserves in the Bayou Penchant Field, Terrebonne Parish, La. The remaining 50-percent interest in the well and associated reserves was purchased by Patrick's partner in the transaction, Northern Michigan Exploration Company (NOMECO), also of Jackson.

The purchase price to Patrick is approximately $3 million, plus the obligation to drill a development well, with Patrick's portion of the costs being approximately $550,000. Additional payments may be required from Patrick and NOMECO, depending upon the amount of additional reserves discovered by the development well.

Patrick and NOMECO will share equally in the reserves acquired in the transaction, which amount to 7.1 billion cubic feet of gas and 112,000 barrels of condensate. NOMECO will be the operator of the properties.

Patrick Petroleum Company is an independent exploration and production company listed on the New York Stock Exchange since 1976. The company has interests in producing properties and undeveloped acreage in 11 states, including various interests in approximately 510 oil and gas wells located primarily in Michigan, North Dakota, Texas, Oklahoma and Louisiana.

CAPE CORAL, FL. (JAN. 23) PR NEWSWIRE - Heavenly Hot Dogs, Inc. (OTC), announced today that it has completed the acquisition of Dog & Suds, a 24 unit fast food chain specializing in premium hot dogs and old fashioned draft root beer.

Founded in 1953, Dog & Suds is one of the "Pioneer" fast food franchise chains in the Mid-West, focusing on medium and smaller city locations.

Heavenly's President Lee Lanktree stated, "I was involved with Dog & Suds for some time as a supplier and am quite familiar with their stores and proprietary food items." Lanktree continued,

"This acquisition will not only give our company immediate presence in the Mid-Western market, but it will do so with a superior product and extensive name recognition. We plan to develop Dog & Suds quite aggressively in that region and have already begun negotiations with a

number of individual, as well as area, franchise applicants."

Lanktree concluded, "The combination of nationally recognized Dog & Suds Trademarks, patented, state of the art dispensing equipment, and its unique premium product will allow Heavenly to not only expand the sales base of its own stores, but to make significant strides toward developing satellite and institutional food service markets, as well."

Heavenly recently opened three stores in the Ft. Myers, Fla., area, giving the company a total of 27 operating units, contrasted to none at this time last year.

MINNEAPOLIS (JAN. 23) PR NEWSWIRE - Bemis Company (NYSE: BMS) today reported record earnings per share of $1.80 in 1989, up 22 percent from $1.48 in 1988, marking the seventh consecutive year of earnings increases. Bemis' 1989 results reflected success in the company's key packaging businesses, in spite of very competitive pricing and a softer economy.

Bemis Company's 1989 unaudited net income was $47.0 million, up from $39.6 million in 1988. Net sales for 1989 were $1.08 billion, compared with $1.07 billion reported for 1988.

The company's fourth quarter earnings were 56 cents per share, up 19 percent from 47 cents per share in 1988. Net income was $14.6 million, up from $12.6 million in the same period a year ago. Sales for the

comparable periods were $269.0 million in 1989 compared with $270.5 million in 1988.

Howard Curler, chairman and chief executive officer said, "We are very pleased by our 1989 earnings gains and the continued improvement in our operations over the past several years. As we enter 1990 we are continuing our substantial capital program to support the growth of our flexible packaging and pressure sensitive product lines."

Bemis Company is a major supplier of flexible packaging and specialty coated and graphics products. The company's common stock is traded on the New York Stock Exchange.

BETHESDA, MD (JAN. 23) PR NEWSWIRE - Martin Marietta Corporation (NYSE: ML) reported 1989 net earnings of $306,943,000, or $5.82 per share, which

compared with 1988 earnings, adjusted for comparison purposes for two one-time events, of $279.1 million, or $5.25 per share.

As previously reported, 1988 earnings of $358,875,000, or $6.75 per share, are not directly comparable with 1989 because of a $2.55 per share extraordinary prior-year gain from the sale of a computer service subsidiary and a 1988 reserve for the Commercial Titan program which reduced earnings by $1.05 per share.

Sales in 1989 were a record $5,796,182,000, compared with $5,727,482,000 in 1988. Backlog at year-end, also a record, stood at $13.4 billion, up from $11.2 billion at the end of 1988.

Fourth quarter earnings were $73,524,000, or $1.41 per share, vs. $23,714,000, or 45 cents, a year ago after the above-mentioned fourth-quarter 1988 reserve for the Commercial Titan program. Timing differences in the receipt of award fees and the recognition of program performance improvements benefited the fourth quarter more in 1988 than in 1989. Sales in the fourth quarter were $1,623,277,000, compared with $1,535,140,000 in the same period a year ago.

"The 1989 results include excellent gains in sales and earnings by the Astronautics Group and reflect strong margins in the Electronics & Missiles and Materials groups," said Norman R. Augustine, chairman and chief executive. "With a record quality backlog and a diverse portfolio of high-priority national programs, we enter 1990 with continued confidence," Augustine added.

#90023p0232 01/23/1990 ~PR Newswire

NORTHBROOK, IL (JAN. 23) PR NEWSWIRE - IDEX Corp. (NYSE: IEX) today reported it achieved record sales of $220,971,000 in the year ended Dec. 31, 1989, and that income before an extraordinary credit from utilization of net operating loss carryforwards increased to a record $15,108,000.

Sales improved by 10 percent over the prior year while income before the extraordinary credit improved by 42 percent. IDEX acquired its six business units on Jan. 22, 1988, so 1988 results reflected 21 fewer days of activity than 1989.

Net income amounted to $18.1 million, and increased 19 percent over 1988. Earnings per common share, before an extraordinary credit for utilization of net operating loss carryforwards, were $1.30 in 1989 vs. 78 cents in 1988 when there were, on average, 23 percent fewer common shares outstanding. After the extraordinary credit, 1989 earnings per common share amounted to $1.63 vs. $1.43 in 1988.

On a pro forma basis to include operations of the first 21 days of 1988, supplementary earnings per common share, using a basis of 10,807,000 common shares outstanding and presuming the preferred shares redeemed in 1989 had not been issued and were therefore not outstanding, would have been $1.66 in 1989 vs. $1.36 in 1988. Excluding net operating loss carryforwards, supplementary earnings per common share, based on 10.8 million shares outstanding, were $1.38 in 1989 and were 47 percent higher than the 94 cents earned in the preceding year.

Donald N. Boyce, chairman and president of the manufacturer of fluid handling and other industrial products, said results for the year were very much in line with expectations. He noted that income before interest, income taxes and extraordinary credit increased to 19.4 percent of sales in 1989 from 18.5 percent in 1988. He added that the high margins in the IDEX group of businesses resulted from having leadership positions in niche markets, from achieving productivity improvements through capital expenditures, process changes and better facilities utilization, and from striving to maintain the reputation of providing the highest quality products and superior customer service. He also noted that, in 1989, each of the six IDEX business units showed improvements in operating profit over the prior year.

In the fourth quarter of 1989, sales of $53,830,000 were up 1 percent over the prior year, but income before extraordinary credit was up 17 percent from $2,719,000 in the fourth quarter of 1988 to $3,194,000 in 1989.

IDEX maintained the same margin of income before interest, income taxes and extraordinary credit in the fourth quarter of 1989 as in the comparable quarter of 1988, and the improvement in net income for the quarter stemmed from lower interest expense because of debt reduction. Fourth quarter earnings per common share before the extraordinary credit amounted to 30 cents in 1989 vs. 18 cents in 1988 when there were, on average, 35 percent fewer shares outstanding. Using a basis of 10,807,000 shares outstanding, presuming that the preferred shares redeemed in 1989 had not been issued and excluding the extraordinary credit, supplementary earnings per common share would have been 30 cents in the fourth quarter of 1989 vs. 24 cents in 1988, an improvement of 25 percent.

WILLIAMSPORT, PA. (JAN. 23) PR NEWSWIRE - The Department of Environmental Resources (DER) has fined Sera-Tec Biologicals $25,000 for illegal disposal of medical waste from its plasma facility in State College, DER Regional Director A. Paul Franklin said today.

"In October 1988, Sera-Tec Biologicals improperly disposed of medical waste -- including intravenous blood bags, bloody gauze, cotton swabs and tubing -- by placing the material in plain brown garbage bags for pickup by a commercial trash hauler," Franklin said. "This activity was a serious violation of municipal waste management laws and regulations."

The medical waste was discovered by employees of the Clinton County Landfill, where it had been transported for disposal.

DER's strict waste regulations prohibit the disposal of medical waste at landfills unless the waste has been incinerated or sterilized. DER also requires clear identification of medical waste containers.

Medical waste includes a large number of materials that may be contaminated by disease-producing micro-organisms that may harm human health.

SAN DIEGO (JAN. 23) PR NEWSWIRE - Pacific Data Products, Inc. announced today that it filed a registration statement with the Securities and Exchange Commission covering a proposed initial public offering of 3.2 million shares of common stock through an underwriting group co-managed by Montgomery Securities and Cowen & Company. Of the shares being offered, 2.2 million will be sold by the company and 1.0 million will be sold by selling stockholders. It currently is anticipated that the initial public offering price will be between $8 and $9.50 per share.

The company expects to use the net proceeds for general corporate purposes including working capital, product development, marketing and customer support.

Pacific Data Products designs, manufactures, markets and supports cartridge-based system and emulation software products, cartridge-based typeface and font software products, and memory products that enhance the performance of desktop laser printers.

Persons wishing to obtain a copy of the preliminary prospectus relating to this offering should contact: Montgomery Securities, 600 Montgomery Street, San Francisco, Calif. 94111, (415) 627-2000, or Cowen & Company, Financial Square, New York, N.Y. 10005, (212) 495-6000.

A registration statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This press release shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

NEW YORK, NY (JAN. 23) PR NEWSWIRE - Fourteen schools in North Carolina are among 39 across the nation that have been named finalists for RJR Nabisco, Inc.'s Next Century School grants.

The $30 million Next Century Schools fund, announced Nov. 1, 1989, was created to encourage and support sustainable, radical change in kindergarten through 12 public schools.

Almost 1,000 applications were received by the RJR Nabisco Foundation for funding in the first year of the five-year program. Grants of up to $250,000 a year for three years will be awarded on April 1, with preference being given to applicants from North Carolina, New Jersey and Washington, D.C. where RJR Nabisco has operations. At least six N.C. schools will be awarded a grant.

The fourteen N.C. finalists are:

- Asheville High School, Asheville
- North Pitt High School, Bethel
- Glenwood Elementary School, Chapel Hill
- Douglas Byrd Junior High School, Fayetteville
- East Forsyth High School, Kernersville
- North Laurinburg Elementary, Laurinburg
- Lowgap Elementary School, Lowgap
- Park View Elementary School, Mooresville
- H.J. MacDonald Middle School, New Bern
- Catawba County Middle Tech, Newton
- Rosman Elementary School, Rosman
- John Graham Middle School, Warrenton
- Vaughn Elementary School, Warrenton
- North Forsyth High School, Winston-Salem

"The competition was demanding," said Roger D. Semerad, president of the RJR Nabisco Foundation, in a letter to finalists. "We received over 2,500 inquiries and nearly 1,000 proposals from across the nation. We were gratified by this demonstration of interest in the Next Century Schools program. We were equally impressed that literally thousands of teachers and principals took time out of busy schedules to prepare proposals. It is an overwhelming vote of confidence in public education," he said.

Criteria for awarding grants include: prospects for improving student performance; a broad-based commitment to reform shared by parents, teachers and the community as a whole; and a plan for sustaining and

expanding the program once it proves successful. Finalists will recieve technical assistance from the Foundation to complete the next stage of the application process, which must be completed by March 15. Winners will be announced around April 1.

North Carolina is the home of three of RJR Nabisco's four operating companies - R.J. Reynolds Tobacco Co., Planters LifeSavers Co., and R.J. Reynolds Tobacco International, Inc., all in Winston-Salem.

UPPER SADDLE RIVER, NJ (JAN. 23) PR NEWSWIRE - Western Union Corporation (NYSE: WU) announced today that it has established a new, wholly owned subsidiary, Western Union Financial Services, Inc.

Western Union's Money Transfer service, as well as the messaging services provided by the Company to individual consumers, will be provided through this new subsidiary. In addition, National Payments Network, which was acquired by Western Union in 1989, has become part of Western Union Financial Services, Inc. National Payments Network provides a nationwide electronic bill-payment service.

Robert J. Amman, president and chief executive officer of Western Union, said: "Our principal objective in setting up a separate subsidiary for the operation of Western Union's financial services business is to accommodate the company's continued growth in the expanding market for consumer financial services. The new subsidiary is structured specifically to meet the licensing requirements that most states now impose on firms providing financial services to consumers. Also, this new structure facilitates the establishment of relationships with banks, utilities and other organizations with whom we will be working on an expanded basis in the development of our cash-handling businesses such as Money Transfer and Payment Services."

Western Union Corporation provides a broad range of messaging, financial and other services, both domestically and internationally, to meet the specific needs of business customers and individual consumers. Revenues from the Western Union services that have been transferred into the new subsidiary were approximately $310 million in 1989.

GLENVIEW, IL (JAN. 23) PR NEWSWIRE - Kraft General Foods announced today that it is establishing three new corporate functions: sales, operations and technology. The appointments are effective Feb. 1, with each reporting to Geoff Bible, president and chief administrative officer of Kraft General Foods.

Joseph Durrett was appointed senior vice president, sales. In this new position, he will have overall responsibility for the development and coordination of Kraft General Foods' sales policies and procedures. Durrett will also facilitate synergies between the operating groups and assist in maximizing trade relationships.

Robert McVicker was named senior vice president, technology, quality assurance and scientific relations. He will be responsible for worldwide efforts in these areas, including regulatory compliance. McVicker will help ensure that the company is achieving the best technology transfer across all operating units and superior product quality.

Edward Smeds was appointed senior vice president, operations and logistics. He will focus on exploring cross-unit opportunities for efficiencies in manufacturing technologies, capacity, distribution and customer service.

In addition to these newly created positions, Eric Strobel has been named senior vice president, corporate marketing for Kraft General Foods. He succeeds James Morgan, who has been appointed senior vice president, planning for Philip Morris USA. Strobel will continue the development and communication of Kraft General Foods' marketing policies and procedures and to coordinate marketing related activities among the operating units.

Daniel M. Dressel, was appointed senior vice president of human resources for Kraft General Foods, replacing John Tucker who became senior vice president, human resources for Philip Morris Cos. Inc.

Both Strobel and Dressel will also report to Bible. Durrett, 44, was previously president of Kraft USA's Sales organization. Before assuming that position in 1987, he was president of Kraft's Grocery Products Group. He has an extensive background of marketing and sales experience.

Kraft General Foods, based in Glenview, is the multinational food business of Philip Morris Cos. Inc. (NYSE: MO).

#90023p0260 01/23/1990 ~PR Newswire

EDISON, NJ (JAN. 23) PR NEWSWIRE - Crestmont Federal Savings and Loan Association (NASDAQ/NMS: CRES) reported today a net loss of $15,720,000 or

$4.14 per share in its third quarter ended Dec. 31, 1989, compared with net income of $1,597,000 or 42 cents per share in the corresponding period a year earlier. As a result, the company's tangible book value at Dec. 31 1989, was $15.58 per share. For the first nine months of its 1990 fiscal year, Crestmont Federal reported a loss of $15,274,000 or $3.99 per share versus net income of $4,542,000 or $1.19 per share in the nine-month period ended Dec. 31, 1988. The company said the loss in the third quarter resulted primarily from the provision of $13,389,000 for increased general reserves, specific loan losses and writedowns of real estate owned. The company also incurred a before-tax loss of $2,020,000 from the sale of mortgage loans, mortgage- backed securities and investment securities. In addition, a before-tax loss of $2,351,000 from the prepayment of high-rate Federal Home Loan Bank advances resulted in a $1,504,000 or 40 cents per share after-tax loss being reported by the company as an extraordinary item in its third quarter.

"Despite the loss in our third quarter, we continue to exceed the newly mandated requirements for core, tangible and risk-based capital, said Griffin McClellan, president and chief executive officer. Citing a decline in real estate values in its primary market area, the company said it charged off $6,908,000 in loan losses and $1,177,000 in real estate owned, and it increased its loan loss reserve to $12,100,000 at Dec. 31, 1989. At Dec. 31, 1989, after writedowns, Crestmont Federal's nonperforming loans totaled $35,607,000 and real estate owned was $6,645,000. Nonperforming assets at Dec. 31, 1989, were $42,252,000 or 2.5 percent of total assets compared with $44,605,000 or 2.5 percent of total assets at Sept. 30, 1989, the company said. The company said it will continue to closely monitor its real estate loan portfolios and add further reserves in the future as market conditions dictate.

Crestmont Federal previously reported it was implementing a restructuring program to streamline operations, reduce costs and improve customer service. The company plans to emphasize its traditional market area, reduce its level of mortgage-backed securities and sell up to nine offices during 1990. Crestmont's stated goal is to continue to exceed capital standards as it does today.

Crestmont Federal Savings and Loan Association, with $1,657,652,000 in assets, has 24 branch locations and four loan production offices serving the state of New Jersey. Crestmont Federal's common stock trades in the over-the-counter market and is listed on the National Association of Securities Dealers Automated Quotation (NASDAQ) National Market System under the symbol "CRES".

#90023p0265 01/23/1990 ~PR Newswire

VANCOUVER, BRITISH COLUMBIA (JAN. 23) PR NEWSWIRE - The board of directors of Magellan Resources Corp. is reported that two new mineralized zones have been discovered on the Company's Southern Cross property in

Montana.

Pursuant to an agreement signed early last year, Chevron Resources Company (Chevron) has been actively exploring new target areas on the property. Their initial focus on the previously unexplored region surrounding the old Southern Cross mine led to the recent discovery of the Southern Cross West Zone and the previously reported North Star Zone.

The Southern Cross West Zone was encountered approximately 250 feet to the south of the old Southern Cross mine. Drill hole intercepts and structural interpretation indicate that this zone may be more than 400 feet long by about 250 feet wide. Significant intercepts from surface to a depth of about 250 feet are as follows:

Hole No.	From (feet)	To (feet)	Width (feet)	Average Grade (oz. gold/ton)
CGR-10	0	70	70	0.070
CGD-5	210	244	34	0.174
CGR-11	80	170	60(x)	0.033
CGD-4	70	120	30(x)	0.072
	190	234	40(x)	0.050
	234	244	9.5	0.230
CGR-5	45	70	25	0.050
	180	190	10	0.180
CGR-8	195	280	70(x)	0.024

(x In these holes intervals ranging between 5 feet and 30 feet had been mined out in late 1800 to the early 1900's.)

As previously reported in Magellan's news release of Oct. 12, 1989, the North Star Zone lies to the east of the Southern Cross deposit. This zone has been tested over a strike length exceeding 600 feet and a down dip extension of more than 200 feet (from approximately 400 feet to 700 feet). The major hold intercepts encountered are summarized below:

Hole No.	From (feet)	To (feet)	Width (feet)	Average Grade (oz. gold/ton)
CGR-17	465	480	15	0.421
	590	630	40(x)	0.034
CGR-13	675	715	35	0.060
	715	765	50	0.015
CGR-14	430	445	15	0.18
(includes 5 feet at 0.365, enveloped by a lower grade zone)				
CGD-1	566	578	12	0.143
CGR-15	355	365	10	0.270

Results to date strongly suggest that this zone may be considerably larger than the Red Nell ore body previously identified on the property.

NEW YORK (JAN. 23) PR NEWSWIRE - Bristol-Myers Squibb Co. (NYSE: BMY) today announced the appointment of Richard L. Thompson as vice president for government affairs.

Thompson will be succeeding William Greif who is retiring effective March 1, after 25 years of service to the company.

For the past six years, Thompson has served as vice president of government affairs of the Squibb Corp. and, for five years prior to that, as director of Washington affairs for Abbott Laboratories.

Thompson graduated cum laude from the State University of New York at Albany and holds a master's in political science from Syracuse University and a juris doctor from Catholic University.

ARLINGTON, VA (JAN. 23) PR NEWSWIRE - The Bell Atlantic Charitable Foundation is sponsoring a unique educational teleconference broadcast into classrooms nationwide via satellite on Friday, Jan. 26, from 1-2 p.m. EST.

This live, interactive teleconference, "Return to the Moon," will feature Apollo XI astronaut Mike Collins. Designed for students in grades 4-8, the teleconference will teach concepts inherent in space flight, including telecommunications, critical thinking skills, science, and math.

"Return to the Moon" will be held in commemoration of the Challenger shuttle tragedy, which occurred on Jan. 28, 1986. The program will originate from studios on the George Washington University Campus in Washington and will be led by guest educator Dr. R. Lynn Bondurant, chief of educational services at the National Aeronautics and Space Administration Lewis Research Center. The program will be seen by 150,000 students in 750 schools around the nation.

Preregistered classrooms will receive free curriculum materials, including NASA space exploration slides, a Rand McNally moon map and a group-oriented post-broadcast activity called "Planning a Lunar Mining

Base."

The teleconference was made possible by a $25,000 Bell Atlantic Charitable Foundation grant and volunteer support provided by the Telephone Pioneers of America.

According to Bell Atlantic Charitable Foundation President Christopher E. Clouser: "Scientific and technical knowledge are profoundly important to American students and, in fact, to the future of America itself. As an expression of Bell Atlantic's continuing commitment to fostering science and technology education, we are very pleased to work with the Challenger Center on this exciting project.

The Challenger Center was founded in 1986 by the families of the Challenger astronauts to continue the flight's educational mission. The Challenger Center provides teachers and students with innovative and inspirational approaches to learning about math and science in order to prepare the nation's youth for the technological society they will inherit in the future.

"Our first satellite program, 'Return to the Moon,' will be an exciting, highly motivating teaching experience," said Challenger Center President Doug King. "This teleconference is an excellent example of how the corporate, non-profit and educational sectors can join forces to provide a challenging and stimulating educational program."

The Bell Atlantic Charitable Foundation serves as Bell Atlantic Corporation's (NYSE: BEL) primary vehicle for philanthropic contributions, and addresses a range of educational, cultural, economic, and social concerns through its General Grants and Thematic Grants programs.

#90023p0272 01/23/1990 ~PR Newswire

NEW YORK (JAN. 23) PR NEWSWIRE - Mobil Corporation (NYSE: MOB) today reported estimated earnings for the fourth quarter of 1989 of $447 million. This was $15 million, or three percent, lower than the $462 million earned in the fourth quarter of 1988. Estimated earnings per common share were $1.08, compared with $1.12 earned in the fourth quarter of 1988.

On a continuing operations basis and excluding FAS 96 effects of income tax rate changes, 1989 fourth quarter earnings improved 11 percent from the year-earlier quarter. Fourth quarter 1989 revenues were $15.1 billion, vs. $13.4 billion in the same period last year.

Full year 1989 estimated earnings were $1,809 million, $278 million, or 13 percent, lower than the $2,087 million earned in 1988. Estimated earnings per common share in 1989 were $4.40, vs. $5.07 earned last year.

On a continuing operations basis and excluding FAS 96 effects of income tax rate changes, 1989 earnings were 2 percent lower than last year. Full year 1989 revenues were $56.7 billion, versus $54.4 billion in 1988.

In commenting on fourth quarter 1989 results, Chairman Allen E. Murray noted that petroleum operations results were favorable versus the comparable year-earlier period as higher crude oil prices in exploration and producing more than offset lower margins in marketing and refining.

Chemical reported lower earnings in the quarter in line with the worldwide fall-off in petrochemical prices. Despite the downturn in the quarter, however, chemical turned in a full-year result second only to 1988's record earnings.

#90023p0277 01/23/1990 ~PR Newswire

PHILADELPHIA (JAN. 23) PR NEWSWIRE - First Pennsylvania Corp. (NYSE: FPA) announced today that before charges for additional reserves against its loans to lesser developed countries (LDC) and for transactions and expenses totalling $43.4 million associated with the corporation's pending merger with CoreStates Financial Corp (NASDAQ: CSFN), 1989 full-year income would be $67.9 million.

However, after the merger-related charges and a yet-to-be-determined LDC reserve addition, the corporation will incur a loss for the year. Included in the special merger-related charges is a $32.3 million fee payable to Marine Midland Banks Inc. related to the termination of a previous merger agreement. Net income for 1988 was $58.2 million.

Because of recent developments concerning LDC debt, the corporation's strategy as an independent entity would require a reserve against LDC loans of approximately 50 percent.

Consistent with this strategy, the corporation would add $100 million to its LDC reserve during the fourth quarter. At Dec. 31, 1989, the corporation had LDC loans outstanding of $376 million, which is after fourth quarter reductions of $85 million, including charge-offs of $45 million.

The corporation's merger partner, CoreStates, previously has indicated that it has a different strategy for managing such loans, which would

require a larger LDC reserve.

When First Pennsylvania becomes part of CoreStates, it will adopt the CoreStates strategy and will add approximately $80 million in addition to the $100 million already planned.

If, as expected, the merger occurs during the first quarter of 1990, the entire $180 million addition will be charged against the corporation's 1989 earnings, which would result in a 1989 loss of more than $100 million.

The corporation increased its fourth quarter of 1989 domestic loan loss provision by $5 million principally to provide for losses which were incurred at its Virgin Islands branches as a result of Hurricane Hugo and for possible losses attributable to a higher level of non-performing domestic assets (including those in the Virgin Islands).

Domestic non-performing assets were $65 million, 1.5 percent of domestic loans, at Dec. 31, 1989, up from $41 million at 1988 year-end and $52 million at Sept. 30, 1989. Domestic loan charge-offs, net of recoveries, were $22.2 million, .54 percent of average domestic loans, for the 1989 full year, compared to $14.1 million for 1988.

#90023p0279 01/23/1990 ~PR Newswire

VANCOUVER, B.C. (JAN. 23) PR NEWSWIRE - The board of directors of Magellan Resources Corp. (Vancouver: MGS) is reported that two new mineralized zones have been discovered on the Company's Southern Cross property in Montana.

Pursuant to an agreement signed early last year, Chevron Resources Company (Chevron) has been actively exploring new target areas on the property. Their initial focus on the previously unexplored region surrounding the old Southern Cross mine led to the recent discovery of the Southern Cross West Zone and the previously reported North Star Zone.

The Southern Cross West Zone was encountered approximately 250 feet to the south of the old Southern Cross mine. Drill hole intercepts and structural interpretation indicate that this zone may be more than 400 feet long by about 250 feet wide. Significant intercepts from surface to a depth of about 250 feet are as follows:

Hole No.	From (feet)	To (feet)	Width (feet)	Average Grade (oz. gold/ton)
CGR-10	0	70	70	0.070
CGD-5	210	244	34	0.174

CGR-11	80	170	60(x)	0.033
CGD-4	70	120	30(x)	0.072
	190	234	40(x)	0.050
	234	244	9.5	0.230
CGR-5	45	70	25	0.050
	180	190	10	0.180
CGR-8	195	280	70(x)	0.024

(x In these holes intervals ranging between 5 feet and 30 feet had been mined out in late 1800 to the early 1900's.)

The North Star Zone and the Southern Cross West Zone may be contiguous and overlap vertically along their extensions. Initial wide-spaced drilling in these two zones indicates the possibility of up to several hundred thousand ounces of gold. Follow-up drilling is being planned to better define the extent of mineralization in this area. Combined with the previously calculated reserves of 83,000 ounces of gold on Red Nell, these early results indicate a geologic potential for reserves on this sector of the Southern Cross property of more than 400,000 ounces of gold.

#90023p0280 01/23/1990 ~PR Newswire

RICHMOND, VA (JAN. 23) PR NEWSWIRE - Chesapeake Corporation (NYSE: CSK) today announced fourth quarter 1989 net income of $10.3 million, or $.50 a share, down 33 percent from the record $15.4 million, or $.75 a share, earned in the fourth quarter of 1988. Sales for the quarter ended December 31, 1989 were $206.0 million, up 16 percent from $176.9 million a year ago. Compared to the third quarter of 1989, reported earnings were off 17 percent while sales were unchanged.

Maintenance downtime in the pulp mill and power plant at Chesapeake's West Point, Virginia kraft products complex, combined with extreme weather conditions, disrupted operations there during the fourth quarter of 1989. Lower production rates and higher operating costs resulting from these December events negatively affected fourth quarter 1989 earnings by approximately $.10 a share. Overall, the volume of products shipped during the latest quarter, especially kraft and tissue products, was excellent compared to the third quarter, and Chesapeake's investment in inventories dropped by 11 percent. Average price realizations did not change significantly from the previous quarter, but there was some softening in several commodity kraft products grades.

Net income for 1989 was $47.6 million, or $2.31 a share, a decline of 8 percent from 1988's record earnings of $51.5 million, or $2.51 a share.

The 1989 increase in non-cash charges (depreciation, depletion and amortization) and interest expense, largely associated with Chesapeake's major tissue expansion and 1989 acquisitions, amounted to approximately $10 million, or $.30 a share. Net sales reached a record $813.1 million in 1989, up 14 percent from the previous record $711.3 million a year ago. Chesapeake's 1989 EBIT-D cash flow (earnings before interest, taxes, and depreciation), was a record $155 million, up about 3 percent from a year ago.

In 1989, kraft products shipments were 678,000 tons, up 5 percent from 1988, while tissue shipments were 130,000 tons, approximately the same as a year ago. Chesapeake's packaging volume increased by 12 percent and treated wood shipments improved by 14 percent.

J. Carter Fox, president and chief executive officer, said "1989 was the second best earnings year in our history, and during the year we absorbed significant increases in non-cash charges and interest expense, as well as start-up expenses associated with our tissue expansion and our new consumer products company."

Chesapeake Corporation is an integrated paper and forest products company that produces and markets kraft, tissue, packaging, and wood products.

#90023p0282 01/23/1990 ~PR Newswire

KALAMAZOO, MI (JAN. 23) PR NEWSWIRE - Borgess Medical Center has signed the new Blue Cross and Blue Shield of Michigan (BCBSM) participating hospital contract assuring more than 126,000 BCBSM subscribers and their dependents in the six-county Kalamazoo area continued access to top quality, cost-effective hospital care.

Borgess joins 200 other hospitals in the state that have endorsed the new cost control and quality assurance provisions in the BCBSM Participating Hospital Agreement by signing the pact.

The contract was formally signed here today by R. Timothy Stack, president of Borgess Medical Center and Jeanne H. Carlson, BCBSM vice president, Provider Contracting and Administration.

"The contract is designed to reward well-run hospitals while also stressing quality factors," Stack said. "It's the type of contract that healthcare providers will see more often in the coming years," he said.

Carlson said the contract provides hospitals with two unique features: 1.

Financial incentives to reduce or eliminate admissions for cases that do not require hospital care. 2. Additional financial incentives if they meet and surpass quality standards which will be drafted during the first year of the contract with advice from hospitals and physicians.

Carlson added: "The new payment plan recognizes that hospitals range from large, urban teaching hospitals to small, rural hospitals with different cost, use and intensity of care patterns."

"The quality assurance program will not only look at the care that our members receive while they are in the hospital, but also will establish a program to monitor outcomes and reward hospitals which produce quality results," she said.

Under the new cost-containment provisions, Carlson said the maximum payments by BCBSM for a hospital stay by one of its members at Borgess are linked to the average costs of similar-sized hospitals across the state.

"The new basic contract was developed following more than nine months of intense study by BCBSM board members representing management, labor, consumers and providers with the advice from experts in the field and input from hospital representatives from across the state," said Carlson.

It replaces one that has been in effect since 1978. Other provisions call for Borgess to be reimbursed a fixed-payment per case no matter how many services a BCBSM member needs during a hospital stay, or the number of days they must remain in the hospital.

CONTACT: Rude Difazio of Blue Cross and Blue Shield of Michigan, (313) 225-8113.

#90023p0283 01/23/1990 ~PR Newswire

NEW LONDON, CT. (JAN. 23) PR NEWSWIRE - The annual meeting of stockholders of NESB Corp. (NASDAQ: NESB) will be held on Friday, April 27 1990, at 10 a.m. at the Radisson Hotel, New London, Conn. The record date for the annual meeting is Friday, March 9, 1990.

NESB Corp. today issued additional detailed financial information, including balance sheets and income statements, on the company's results for the quarter and year ended Dec. 31, 1989. As previously announced by the company on Jan. 19, 1990, as a result of a special increase in the fourth quarter of $12 million in the provision for loan losses, the company experienced a loss for the fourth quarter of $14.7 million, or $1.90 per share, and a loss for the year ended Dec. 31, 1989 of $48.1 million, or $6.23 per share. For the same period the year before, the company reported a loss for the quarter of $403,000 or 5 cents per share,

and net income for the year of $7.8 million, or $1.01 per share. As previously reported, the loss for 1989 includes $23.5 million as a non-recurring charge in connection with the non-cash write-off of goodwill. The goodwill resulted from the 1988 acquisition of Omnibank of Connecticut, Inc.

The company also reported on the composition of its non-performing assets, which consist of loan past due 90 days (on which accrued interest has been terminated), renegotiated debt and foreclosed real estate (both actual foreclosures and in-substance repossessions). Prior to September of 1989, the company included loans 60 days past due in its definition of non-performing assets. All figures in this release conform to the current definition.

	($ millions, unaudited)		
	12/31/88	9/30/89	12/31/89
Non-accrual loans	$23.0	$77.0	$ 76.9
Foreclosed real estate	1.8	10.4	46.0
Total non-performing assets	24.8	87.4	122.9

During the fourth quarter the company charged-off $21.2 million, of which $16.1 million related to foreclosure proceedings and in-substance repossessions, and $5.1 million was against non-accruing loans. For the whole year, charge-offs were $26.7 million, of which $16.1 million related to foreclosure proceedings and in-substance repossessions, and $10.6 million was against non-accruing loans.

The company reported the following ratios relating to loan loss reserves and various categories of assets.

	(unaudited)		
	12/31/88	9/30/89	12/31/89
Loan loss reserve to:			
Non-accrual loans	40.5%	46.8%	36.9%
Total non-performing assets	37.5%	41.3%	23.1%
Total loans	0.7%	3.0%	2.6%
Total non-performing assets to:			
Total loans	2.0%	7.4%	11.2%
Total assets	1.6%	5.7%	8.6%

In commenting on the report, president and chief executive officer, Robin Honiss, said, "We believe our reserve position, both in relation to non-accrual loans and total non-performing assets, is a prudent one. We have taken strong actions in setting aside our reserves for loan losses and have taken strong actions in setting aside our reserves for loan losses and in charging-off assets. In the process of managing our problem assets, we feel it is important to distinguish between foreclosed real estate, all of which must be marked down on our books to its present net

realizable value, and non-accruing loans, which are carried at original book value, less subsequent write-downs."

The company also reported that total deposits at year-end were $980.0 million, up from $959.9 million at the end of 1988, and that borrowings from the Federal Home Loan Bank decreased by 21 percent to $248.3 million at year-end 1989 from $314.3 million at the end of 1988. The company reported that the brokered deposits component of total deposits decreased during the year by 22.7 percent to $136.4 million at year-end 1989 from $176.5 million at the end of 1988. As a result, borrowings from the Federal Home Loan Bank and brokered CD's, as a percentage of total liabilities, were 28.7 percent at year-end 1989 down from 35.8 percent at the end of 1988, a decrease of 19.8 percent.

Honiss stated, "One of our strategic goals has been to increase consumer related deposits and to decrease our use of non-core sources of funds, such as Federal Home Loan Bank borrowings. We think the changes in our balance sheet show real progress in this direction."

NESB Corp. is a state-chartered bank holding company with assets of $1.43 billion and equity capital of $86.3 million. It operates principally through its subsidiary, New England Savings Bank, which has 24 branch offices is eastern and southeastern shoreline Connecticut.

THOMSON, GA (JAN. 23) PR NEWSWIRE - Allied Bankshares Inc. (NASDAQ: ABGA)

announced today that earnings for the year ended Dec. 31, 1989 were $3,626,000 or $.69 per share as compared to $4,149,000 or $.80 per share for the year ended Dec. 31, 1988.

Fourth quarter 1989 earnings were $669,000 or $.13 per share as compared to $816,000 or $.16 per share for the fourth quarter of 1988.

The company also announced that its directors declared a quarterly cash dividend of $.075 per share payable on Feb. 16, to stockholders of record as of Feb. 9.

The company attributed the earnings decline to an increase in the provision for loan losses of $550,000 in the fourth quarter of 1989 and a decrease in securities gains of $237,000 for 1989 as compared to 1988.

CONTACT: Ben O. Howell Jr., chief financial officer of Allied Bankshares, 404-595-1142.

LANCASTER, PA (JAN. 23) PR NEWSWIRE - Fulton Financial Corp. (NASDAQ: FULT), a $1.4 billion Lancaster-based bank holding company, announced that it had an 8.9 percent increase in earnings in 1989, reporting record income of $19.4 million, or $1.6 million more than the company earned the previous year.

On a primary basis, per-share income was $2.18 compared with $2.01; fully diluted, each share of Fulton Financial common stock earned $2.16 in 1989 and $1.99 in 1988.

Fourth quarter net income was $4.9 million, an increase of $596,000 or 14 percent over October through December earnings a year earlier. Primary per-share earnings were 55 cents and 48 cents, and fully diluted income was 54 cents and 48 cents per share for the 1989 and 1988 fourth quarters, respectively.

(Per-share data have been adjusted for the 10 percent stock dividend declared by Fulton Financial on Dec. 19, 1989, and payable Feb. 2.)

Robert D. Garner, Fulton Financial's chairman, attributed the company's 1989 performance to a 9.9 percent increase in net interest income and a 19.5 percent gain in noninterest income.

For 1989 Fulton Financial achieved a return on average assets of 1.43 percent and a return on shareholders' equity of 16.22 percent.

Fulton Financial operates 48 banking offices in seven Pennsylvania

counties through four banking affiliates and is awaiting shareholder and regulatory approval for proposed mergers with two other Pennsylvania financial institutions.

SARASOTA, FL. (JAN. 23) PR NEWSWIRE - Salvatori Ophthalmics, Inc. today announced that its board of directors has instructed management to seek the listing of the company's publicly traded securities, including its common stock and warrants, on the National Association of Securities Dealers Automated Quotation System ("NASDAQ").

To accomplish the NASDAQ listing, the company intends to register its publicly traded securities under Section 12(g) of the Securities Exchange Act of 1934, through the filing of an amendment to its registration statement with the Securities and Exchange Commission. The company anticipates that this process will be completed sometime during the spring of 1990.

According to information provided by the National Association of Securities Dealers for 1987, the NASDAQ is the second largest stock market in the United States in terms of dollar volume of equity trading. Over 40 percent of the shares traded in the U.S., including over 5,300 securities issued by over 4,700 domestic and foreign companies, are traded on the NASDAQ.

Salvatori Ophthalmics is a broad-based manufacturer of contact lenses for the private practitioner. The company has manufacturing facilities located at Sarasota, Fla. and Lincoln, Neb. The company also owns a 51 percent interest in Wolcon Laboratories, Inc., a Detroit based manufacturer of contact lenses. Salvatori, headquartered in Sarasota, manufactures and markets RGP lenses for daily and extended wear, soft daily wear lenses and a complete array of specialty lens products. The company's common stock and warrants trade in the over-the-counter market.

GLEN COVE, N.Y. (JAN. 23) PR NEWSWIRE - The board of directors of Pall Corporation (AMEX: PLL) has declared a regular quarterly dividend at an increased rate of 14 cents per share, payable on Feb. 16, 1990, to shareholders of record as of Feb. 5, 1990, the company announced today. The new rate is a 16.7 percent increase over the previous rate of 12 cents per share.

Also today, the board of directors elected Heywood Shelley to fill the seat on the board, until the annual meeting of 1990, left vacant by the death of Sidney Krakauer on Oct. 30, 1989. Shelley is a partner in the law firm Carter, Ledyard & Milburn in New York, which has been the company's counsel since 1957. Shelley has served as a director of several other public companies.

Pall Corporation is the leader in the design, production and marketing of fine disposable filters and other fluid clarification products for the health care, aeropower and fluid processing markets. The company's shares are listed on the American Stock Exchange (PLL) and the London Stock Exchange (0668260).

OCALA, FL (JAN. 23) PR NEWSWIRE - Mid-State Federal Savings Bank (NASDAQ-NMS: MSSB) today announced earnings for the first fiscal quarter ended Dec. 31, 1989, of $1,106,000, or $ .52 per share. This compares to net income for the same period of 1988 of $425,000, or $ .21 per share.

Results for the quarter ended December 31, 1989, included $1,115,000 in income attributable to the receipt and contribution to the bank's employee stock ownership plan (ESOP) of the excess assets from the 1988 termination of the Bank's pension plan. Results for the quarter also included $107,000 of expenses related to the bank's previously announced acquisition transaction with First Florida Banks, Inc. Absent the income from the pension plan termination and the acquisition expenses, the bank would have reported income for the quarter ended Dec. 31, 1989, of $98,000 or $ .05 per share.

Under applicable accounting guidelines, the income resulting from the

pension plan termination was not subject to federal income tax since the excess assets were contributed to the ESOP. The bank will incur an expense, which will be nondeductible for income tax purposes, when the excess assets contributed to the ESOP are allocated to the accounts of eligible employees during future periods.

Results for the quarter ended Dec. 31, 1989 compared to the prior year period, were negatively impacted by a decrease of $434,000 in net interest income after provision for loan and investment securities losses, a decrease of $269,000 in income from the sale of excess real estate, and an increase of $207,000 in the loss from real estate operations.

The reduction in net interest income resulted from higher short term interest rates and weak loan volume. The net interest spread during the quarter ended Dec. 31, 1989, was 1.76 percent compared to 1.99 percent during the year earlier quarterly period. The increase in the loss from real estate operations primarily resulted from more aggressive efforts to dispose of foreclosed real estate, as well as increases in the cost of maintaining those assets until they are sold.

Charles E. Harris, chairman of the board of Mid-State Federal, said, "Our reported income for the quarter should not overshadow the fact that the earnings performance from our basic banking business is still inadequate. Our net interest income continues to be adversely affected by the interest rate environment and weak loan demand. In addition, we are continuing to incur substantial costs related to the ownership and disposition of our problem assets.

"On the positive side," Harris added, "we are doing an excellent job of controlling our non-interest expenses, we are making progress in disposing of our problem assets, and we are very pleased that Mid-State Federal already meets and exceeds all of the capital requirements that have been adopted to date under the new thrift legislation which was enacted last August."

Mid-State Federal is a publicly held, federally insured and federally chartered stock savings bank with its common stock traded over-the-counter and quoted on the NASDAQ National Market System under the symbol "MSSB". With its home office in Ocala, Fla., the thrift has assets in excess of $1 billion and operates 26 branch offices within a five county area in west central Florida.

OLD GREENWICH, CT (JAN. 23) PR NEWSWIRE - One of the world's largest international banking institutions, Yasuda Trust & Banking Company, Ltd. of Japan, announced today that one of its U.S. affiliates will provide nearly $80 million in financing to Connecticut-based Collins Development Corporation for two residential real estate projects now under construction in Old Greenwich.

The bank's Greenwich-based affiliate, YTB Leasing, has committed $79.5 million in financing for the two projects: Old Greenwich Gables, a complex of 167 condominium units with prices starting at $270,000; and Victoria, a complex of 24 Victorian style single-family homes priced from $675,000. The projects are located along Forest Avenue on a 17-acre tract formerly occupied by the Electrolux Corporation.

The agreement marks the Japanese firm's first investment in Connecticut, and is believed to be one of the largest financings of a residential real estate project ever undertaken in the state. Yasuda Trust & Banking Company, with assets of more than $287 billion, ranks as the twenty-second-largest bank in the world.

Collins Development Corporation, based in Stamford, has been a major force in Connecticut real estate development since its founding in 1971 by president Arthur Collins. The firms's projects have included office buildings, condominiums, mixed-use developments, historic restorations, and marinas.

Kazuya Miura, president of YTB Leasing in Greenwich, said there were several factors which attracted the Japanese firm to the Old Greenwich projects, the most important being "the tremendous reputation and achievements of Arthur Collins as an architect and developer."

One of Collins' earliest projects was Lyon Farm in Greenwich, an award-winning community of 191 saltbox condominium units on 120 acres of rolling farmland. Initially offered in 1972 at less than $100,000, the Lyon Farm units now sell on the resale market for upwards of $600,000. Lyon Farm is considered one of the finest developments of its kind in New England.

Collins also developed Harbor Plaza, a 725,000-square-foot office complex which also includes retail space, restaurants and a 329-slip marina on the Stamford Harbor.

Other Collins residential projects have included The Common in Old Greenwich, and several waterfront developments combining condominiums and marinas. They include Palmer Point in Cos Cob, Palmer Landing and Schooner Cove in Stamford, and the recently completed Harbor House on the Stamford Harbor.

DENVER (JAN. 23) PR NEWSWIRE - Newmont Mining Corp. (NYSE: NEM) today announced fourth quarter 1989 net income of $81.6 million, or $1.21 a share, compared with a restated $93.8 million, or $1.39 a share, in the fourth quarter of 1988.

The 1989 fourth quarter included an after-tax gain of $63.5 million, or 94 cents a share, from the sale of 26 percent of the company's interest in Newmont Australia Ltd., and an after-tax charge of $10.6 million, or 16 cents a share, as a result of additional charges due to relocating company headquarters to Denver, as well as expenses in the recapitalization planning for Peabody Holding Co. Inc. The fourth quarter of 1988 included net income of $72 million, or $1.07 a share, from discontinued operations. In the 1989 fourth quarter, Newmont's subsidiaries and affiliates contributed income of $64.9 million before tax compared with $59.2 million in the fourth quarter of 1988.

For the year, Newmont had audited net income of $123.9 million, or $1.84 a share, compared with $174.9 million, or $2.60 a share, in 1988. The 1989 results included the fourth-quarter's after-tax gain of $63.5 million on the sale of shares in Newmont Australia. The 1988 results include an after-tax gain of $81 million, or $1.20 a share, from the sale of Dupont shares held by Newmont, as well as net income of $82.8 million, or $1.23 a share, from discontinued operations.

Newmont Mining owns 90 percent of Newmont Gold Co., the largest producer in North America; 49 percent of Newmont Australia Ltd., and 54.97 percent of Peabody Holding, the largest U.S. coal producer.

#90023p0307 01/23/1990 ~PR Newswire

EAST HARTFORD, CT (JAN. 23) PR NEWSWIRE - Alaska Airlines has ordered 20 McDonnell Douglas MD90-30 airliners, powered by quiet V2500 engines, to fly in one of the most noise-conscious regions of the world, the West Coast of the U.S.A. Powerplants and spare engines for the 20 aircraft and for 20 more MD90s, on which Alaska has taken options, are altogether worth US$450 million.

Alaska Airlines is the 12th customer for the internationally-developed 22-30,000-pound thrust V2500 Series. As well as powering the new MD90,

these engines are in service on the Airbus A320 and have been ordered for the A321.

Nick Tomassetti, president of International Aero Engines (IAE) which manages the program, said, "We are very proud to be a supplier to Alaska, an outstandingly successful and respected airline. The selection of this aircraft and powerplant is a significant step towards meeting the social responsibility to reduce airport noise, which we all share.

"For our part, we engineered quietness into the V2500 from the first stroke of the pencil. We brought together into this one engine the new design and manufacturing technologies developed by our five shareholders in their own latest commercial engines," Tomassetti said.

Several features make the V2500 quiet. The big front fan has only 22 of the new wide-chord design blades, 30 percent fewer than the competing engine. Fewer blades make less noise.

The spacing between the fan and the low pressure compressor at the front of the engine, and between the turbine blades and vanes at the rear, also reduce sound. Noise absorbent materials inside the full- length nacelle deadens it still further.

The benefit of this "sound engineering" was demonstrated recently by a V2500-powered A320 at John Wayne airport, Calif., one of the most noise-sensitive in America. It took-off 5,800 pounds heavier than a similar aircraft with older design engines but made no more noise.

The 5,800-pound difference enables the aircraft to carry 24 more passengers and still meet the airport's tough noise rules. Those rules are considered the likely benchmark for future airport noise regulations around the world. Alaska Airlines has daily services at John Wayne and the MD90 will ensure the airline will be quiet operators.

The V2500 has been in service on the A320 with four airlines since May last year. It has completed 30,000 hours of operation. In that time, only one engine was taken to the repair shop, resulting in a very low "shop visit rate" of 0.036 per thousand flying hours, a key indicator of engine reliability.

CONTACT: Alan Brothers of IAE, (203) 280-1812, or (home) (203) 633-5529 or (fax) (203) 525-1586 or (203) 525-4966.

BRYAN, TX (JAN. 23) PR NEWSWIRE - A company-funded, soil- replacement program that will take between six and eight weeks began today at Atochem

North America's Bryan plant.

Arthur Chernosky, plant manager of the Bryan facility, said "We are happy to get this project underway, and are very pleased at the cooperation we have received from the Texas Air Control Board and the Missouri Pacific Railroad. Atochem North America has agreed that it is in everyone's interest for the company to replace the soils."

The program involves removal of six inches of soil from the Missouri Pacific Railroad area starting at Dodge Street and moving approximately 1200 feet in a southerly direction. Atochem North America will replace the removed soil with new soil. Appropriate protective measures will be implemented during the duration of the project.

During the past year, the company has made several other enhancements to the Bryan facility, including paving of the plant yard. According to Chernosky, "We believe these measures are environmentally beneficial and will significantly address issues relating to dust which the company and the Texas Air Control Board have been discussing since September 1988." The Bryan plant has manufactured agricultural products for more than 40 years.

Both the Missouri Pacific Railroad and the Texas Air Control Board have given their consent to proceed with the soil-replacement program. This is a voluntary action by Atochem North America and will cost approximately half a million dollars.

Atochem North America Inc., a $1.5 billion diversified chemicals manufacturer headquartered in Philadelphia, was formed Jan. 1, 1990, as the result of the merger of Atochem Inc., M&T Chemicals Inc., and Pennwalt Corporation. Atochem North America is a wholly owned subsidiary of Atochem S.A., a $6.5 billion chemicals manufacturer headquartered in Paris France.

DENVER (JAN. 23) PR NEWSWIRE - Newmont Gold Co. (NYSE: NGC) today reported fourth quarter net income of $40.2 million, or 38 cents a share, compared with net income of $37.2 million, or 35 cents a share, in the fourth quarter of 1988. For the year, unaudited net income was a record $118 million, or $1.13 a share, compared with $108.1 million, or $1.03 a share, in 1988.

Gold sales during the quarter were 397,800 ounces compared with 309,800 ounces during the fourth quarter of 1988. The price received by Newmont

Gold averaged $389 an ounce in the fourth quarter, down 6 percent from the average of $415 an ounce in the 1988 fourth quarter. For the year, Newmont Gold sold a record 1,467,800 ounces, more than 60 percent above the previous record 895,500 ounces sold in 1988. This volume was the largest of any company producing gold in North America. The increased production was due to an expansion program initiated in 1987 that has nearly tripled production.

Newmont Gold is 90-percent-owned by Newmont Mining Corp. Newmont Gold has 20.5 million ounces in gold reserves--the largest announced reserve position in North America, and operates five mills on the Carlin Trend in Nevada where is has 16 gold deposits.

#90023p0311 01/23/1990 ~PR Newswire

UNION, NJ (JAN. 23) PR NEWSWIRE - The Money Store, Inc., today reported new loan originations in excess of $840 million and an increase in new loan originations in excess of 15 percent.

The Money Store, Inc. operates three lending subsidiaries: The Money Store, the nation's largest independent second mortgage lender; The Money Store Investment Corporation, the nation's largest lender of Small Business Administration (SBA) guaranteed loans for the past seven years; and Educaid, one of the nation's largest government guaranteed student lenders. Founded in 1967, the company's three divisions operate more than 70 offices in 30 states and the District of Columbia.

Money Store President Anthony R. Medici said he expects the company, which originated more than $600 million in second mortgage loans during 1989, to post at least a 20 percent increase in mortgage lending volume during 1990.

In noting the company's banner year in 1989, Medici said the company is looking forward to continued growth during the '90s and to extending its services to consumers in new markets.

"The tax laws, which spurred home equity lending tremendously in recent years, will continue to do so during the '90s as more people become aware of the tax deductible interest offered by second mortgage loans," Medici said. "This upward swing in home equity lending, coupled with our company's entry into new markets and the maturing of markets established in the '80s, contributed to our growth in 1989 and will continue to do so well into the next decade."

Medici noted that expansion in the Midwest, particularly in Illinois, Michigan, Minnesota and Wisconsin, will play a major role in the company's

growth during the '90s, and added that the company plans offices for Seattle and Memphis as well.

Medici added that national recognition of the company as a lending industry leader continues to grow.

#90023p0312 01/23/1990 ~PR Newswire

UNION, N.J. (JAN. 23) PR NEWSWIRE - The Money Store Investment Corporation, the nation's leading lender of Small Business Administration (SBA) guaranteed loans for the past seven years, posted a record year in 1989. The firm received authorizations on more than $166 million in SBA-guaranteed loans nationwide, some $108 million more than its nearest competitor was authorized.

Now entering its 11th year of operation, the company's lending activities increased 18 percent over 1988.

"Our commercial real estate lending operations, one of our strongest market segments, continued to grow at a steady rate during 1989," said Lawrence Wodarski, executive vice president. "We expect that 1990 will continue to see consistent growth in the 10 to 20 percent range.

"We expect our franchise-financing division to increase its lending significantly during 1990 as we reinforce our presence in this growing area of small business expansion. We anticipate our lending to franchise-related businesses will double in the first part of the '90s as franchise related enterprises continue strengthening its position among new business starts.

"We will also see our lending continue to grow with those small businesses that require the more attractive financing terms offered under the SBA loan program. The SBA loan program, which generally offers longer repayment terms and higher loan-to-value ratios, allows smaller growing businesses to retain their working capital and to optimize the efficiency of their cash flow through the longer terms SBA provides," he said.

"Other corporate growth during 1990 will come from expansion of our lending services to new markets, especially in the Southeast," said Wodarski. "We will also be adding new offices and business development specialists in the markets in which we are already established, further strengthening our ability to reach small firms that require financing," he said. He added that the company's Manhattan and Union, N.J. offices moved to larger quarters during 1989 to accommodate this expansion.

According to Wodarski, The Money Store Investment Corp. plans to expand its operations in the Westchester/Orange/Rockland County, N.Y. areas, and to begin serving Connecticut, Maryland, North Carolina and additional Southeastern and Midwestern states during 1990.

Wodarski pointed out the ability to make loans of up to $1 million enabled the company to expand its financing of larger projects, including the higher tiers of franchise funding which includes fast food chains. Fast food franchises often cost $750,000 and more for start-up.

The Money Store Investment Corp. is a wholly-owned subsidiary of The Money Store, Inc., a leading nationwide home mortgage lender. The Money Store also operates another wholly-owned subsidiary, Educaid, a provider of student loans. During 1989, the company's three divisions processed more than $825 million in loans.

GLENVIEW, IL (JAN. 23) PR NEWSWIRE - Kraft USA, an operating unit of Kraft General Foods, announced the realignment of its Refrigerated Products unit into two businesses, Retail Cheese Products and Specialty Products, effective February 1. In addition, there were several other executive appointments made within Kraft USA, all reporting to James Kilts, president of Kraft USA.

"This move will enable us to best focus one set of resources on managing our cheese business, while dedicating other resources to growth opportunities in chilled foods, specialty and Italian cheeses, and new products," said Kilts.

Kraft USA also named Robert Eckert executive vice president and general manager of Retail Cheese Products. He will be responsible for managing Kraft's sandwich, recipe and natural cheeses, as well as cream cheese,

snacks, and spreads.

The Specialty Products Group includes Kraft's specialty cheese businesses, Pollio and Churny; chilled foods; and new products. A general manager will be named shortly for this area.

In addition, Mitchell Wienick was appointed executive vice president and general manager for Kraft USA Grocery Products Group. He succeeds Eric Strobel, who was named senior vice president, corporate marketing for Kraft General Foods.

William Morris has been appointed executive vice president of Sales for Kraft USA, overseeing retail sales for Kraft USA products. He replaces Joseph Durrett, who was named senior vice president, sales for Kraft General Foods.

Ronald Harris has also been named vice president, Kraft USA Technology and Quality Assurance. He will be responsible for setting the direction for Kraft USA Technology and Development programs.

Wienick, 41, was formerly executive vice president and general manager for Kraft USA Refrigerated Products. Before joining Kraft's Dairy Group in 1985 as director of strategy, he had more than 11 years of management experience at Procter & Gamble. Wienick joined Kraft's Refrigerated Products Group as vice president of marketing in 1987.

Eckert, 35, was previously vice president of marketing for Kraft USA Refrigerated Products. Morris, 57, was formerly vice president of retail sales operations for Kraft USA. With more than 30 years experience with the company, Morris became a Kraft Foodservice regional sales manager in 1977 and later vice president and general manager for the East. He returned to the retail business in 1985 as southeast region vice president and then vice president of headquarters sales in 1988.

VANCOUVER, BRITISH COLUMBIA, (JAN. 23) PR NEWSWIRE - Pursuant to Armeno's (Vancouver: ARO) news release dated Jan. 3, 1990, with respect to the exploration program which commenced on its Standard Creek Property, the company announced that Hi-Tec Resource Management Ltd. reported that phase I, consisting of geophysical surveys, has been completed and as a result, nine drill sites in the Piebiter zone have been selected. Drilling on the first hole has commenced and a total of 4,500 feet of drilling is planned using a reverse circulation drill.

The Standard Creek Property consists of 171 claims covering approximately 25.5 square kilometres along the southern boundary of the Bridge River Gold Camp, Bralorne, British Columbia. The property lies along the southeast extension of a major gold bearing structure, the Cadwallader Break of the Bralorne Fault system. This fault system hosts the Bralorne/Pioneer mining complex, 13 kilometres to the northwest. Previously, the company conducted exploration work programs entailing geological mapping, geophysical surveys, geochemical rock and soil sampling and diamond drilling.

Results of these programs include the definition of two areas of primary interest containing potentially economic gold and silver mineralization -- the Piebiter and the Chopper Vein zones. In the Piebiter area gold mineralization appears to be concentrated at and near the contacts with ultramafic rocks locally anomalous in gold. In the Chopper Vein area possible chutes containing ore grade silver mineralization occur within a mineralized quartz vein extending 2 kilometres within the property with chute thickness up to 5 meters.

CHARLOTTE, N.C. (JAN. 23) PR NEWSWIRE - Interstate/Johnson Lane, Inc. (NYSE: IS) today reported a net loss of $958,000, or 14 cents per share, on revenues of $34.8 million for its first quarter ended December 31, 1989.

For the same quarter a year ago, the company reported a profit of $284,000 or five cents per share, on revenues of $35.3 million.

J. Craighill Redwine, chairman and chief executive officer, said the quarterly results included approximately $1.3 million of pre-tax losses incurred by certain specialized fixed-income operations that were terminated in December and January.

"While we are by no means pleased with these results, we have in fact taken steps in a program designed to return our performance to sustained profitability," Redwine said. "Sluggish market conditions are plaguing our entire industry, and we did not choose to wait for the cycle to reverse. As a result, we have assessed the contributions of all of our business segments and feel we can operate profitably."

Interstate/Johnson Lane with capital in excess of $83 million is the largest broker-dealer and investment banking firm headquartered in the Southeast, with approximately 1,300 employees. This includes about 500 account executives serving individual and institutional investors through 73 sales offices in six southeastern states and New York City.

OAK BROOK, IL (JAN. 23) PR NEWSWIRE - Federal Signal (NYSE: FSS) confirms the preliminary 1989 fourth quarter and full year results announced by a major news wire service. The announcement indicated that Federal expects

to report a record fourth quarter earnings of $6.3 million ($.62 per share), or 22 percent greater than last year's amounts. Fourth quarter sales are expected to amount to $107 million, up 9 percent from the prior year.

For the full year 1989, Federal estimates earnings will increase 24 percent to $23 million on a 10 percent increase in sales to $414 million. Earnings per share should increase 23 percent to $2.25 per share. Each of its four operating groups increased their sales and operating income. The return on equity should be in excess of 18.5 percent, up from 17.0 percent in 1988. 1989's strong cash flow enabled the company's year-end debt-to-capitalization ratio for its manufacturing operations to decline to 10 percent, down from 18 percent a year ago. Also, strong second-half incoming orders for the Sign Group and Emergency One (up over prior year amounts by 38 percent and 25 percent, respectively) were principally responsible for the year-end backlog increase to $181 million, 24 percent higher than a year ago (including the $8 million backlog acquired through the purchase of American Eagle Fire Apparatus Co.)

Federal Signal expects to continue to achieve results in line with its financial objectives, based on its assumption of a slow growth economy in 1990. This expected improvement in 1990's results should result in large part from the operations of the Sign Group and Emergency One. As previously noted, the two businesses have had strong incoming orders in the second half of 1989. The recent acquisitions made by these two businesses have contributed significantly to this strength and should continue to do so. Additionally, important programs to enhance the productivity of their operations are in place.

Federal Signal Corp., listed on the New York Stock Exchange, is a manufacturer and worldwide supplier of public safety, signaling and communications equipment, emergency and street sweeping vehicles, parking control equipment, signs and electronic message displays, carbide cutting tools, precision punches and related die components.

#90023p0328 01/23/1990 ~PR Newswire

MINNEAPOLIS (JAN. 23) PR NEWSWIRE - The Minnesota Supercomputer Center and IBM (NYSE: IBM) today announced installation of IBM's most powerful computer as the keystone of a $55 million partnership expected to influence design of the next generation of IBM supercomputers.

The Minnesota Supercomputer Center (MSC) is a private corporation owned jointly by the University of Minnesota and the University of Minnesota Foundation. Its mission is to keep the university on the leading edge of

computing capability.

"The MSC-IBM partnership is another milestone broadening MSC's ability to pursue its mission," said MSC CEO and President John M. Sell. "We recognize IBM's commitment to supercomputing. Our partnership with IBM brings us the new capacity and challenge we need to maintain MSC as a world-class facility."

Centered around a top-of-the-line IBM 3090 supercomputer with 12 interconnected processing units and with a memory capacity of more than five billion characters of information, the center will explore new ways to interconnect even more advanced future supercomputers.

"We're looking forward to working with MSC and the scientific and engineering community it serves," said Carl J. Conti, IBM senior vice president and general manager-enterprise systems.

Supercomputing is the process of solving otherwise intractable problems using leading-edge hardware, software, and communications techniques. Typical problems include simulation or modeling of physical events that are too complex or occur too slowly or quickly or are impractical as physical experiments. For example, supercomputers are used to model galaxy formation, design new molecules and simulate the airflow around hypersonic aircraft.

The ability to perform such operations is becoming more important in a number of critical industries as well as in supercomputing's more traditional science and technology environment.

Under terms of this agreement, IBM supercomputing equipment will be involved in many diverse projects MSC manages for its scientific and engineering customers. The agreement also established MSC as an IBM development partner and their joint work is expected to influence the next generation of IBM supercomputing products.

In addition, MSC will join the IBM information Network and will provide AIX services to IBM customers who use its network. AIX is a UNIX(TM)-based operating system designed to make supercomputers, advance workstations and other data processing equipment operate so that a number of users can perform many computing tasks simultaneously.

BENTON HARBOR, MI (JAN. 23) PR NEWSWIRE - Whirlpool Corporation (NYSE:

WHR) has announced that its majority-owned Canadian subsidiary, Inglis Limited, had consolidated net sales for the year ended Dec. 31, 1989, of $406,216,000 (Canadian), compared to $440,097,000 for 1988. Consolidated net sales for the quarter ended Dec. 31, 1989, were $101,895,000, compared to $114,676,000 in the corresponding period of 1988.

Operations resulted in consolidated net earnings for the year ended Dec. 31, 1989, of $10,769,000, or $2.05 per share, compared to $2,057,000, or $0.39 per share, for 1988. Operations resulted in a net profit of $2,086,000, or $0.40 per share, for the 1989 fourth quarter, compared to a net loss of $4,111,000, or $0.78 per share, in the corresponding period of 1988.

Earnings for 1988 included an unusual gain of $2,062,000 before tax, related to the sale of the Stoney Creek facility. Earnings for 1989 were adversely affected by additional costs of $871,000 before tax with respect to the removal of plant wastes from the Stoney Creek property.

The boards of directors of Whirlpool Corporation and Inglis Limited approved in principle in December a proposal which would result in Inglis becoming a wholly-owned subsidiary of Whirlpool.

The proposal is subject to approval by minority shareholders of Inglis at a special meeting to be held in February 1990.

Whirlpool Corporation is the world's leading manufacturer and marketer of major home appliances. Headquartered in Benton Harbor, Mich., the company manufactures in 10 countries and markets products under nine major brand names in more than 45 countries.

#90023p0336 01/23/1990 ~PR Newswire

NORWALK, CONN. (JAN. 23) PR NEWSWIRE - Great Northern Nekoosa Corp. (NYSE: GNN) today announced preliminary 1989 net income of $321 million, or $5.78 a share, down 6 percent from $341.7 million, or $6.21 a share, in 1988.

For the fourth quarter of 1989, GNN expects to report net income of $52 million, or 92 cents a share, down 39 percent from net income of $85.8 million, or $1.56 a share, for the fourth quarter of 1988. Fourth quarter 1989 results were reduced by 33 cents a share for expenses related to Georgia-Pacific's uninvited tender offer, most of which was related to stock appreciation expense as noted below.

Net sales for 1989 are estimated at $3.9 billion, up 8 percent from sales of $3.6 billion in 1988, and fourth quarter sales are estimated at $934 million, down 1 percent from sales of $944.1 million in 1988's fourth quarter.

Shipments in 1989 of pulp, paper and containerboard from the company's mills are estimated at 4,025,000 tons, down 5.6 percent from shipments of 4,266,000 tons in 1988. Fourth quarter shipments are estimated at 761,000 tons, down 27.7 percent from shipments of 1,052,000 tons in the same quarter last year. Box shipments for all of 1989 are estimated at 17.5 billion square feet, slightly above the 17.4 billion square feet shipped in 1988. For the fourth quarter, box shipments are estimated at 4.3 billion square feet, 4.9 percent above the 4.1 billion square feet shipped in the fourth quarter of 1988.

Fourth quarter 1989 shipments were affected by reduced operations at the company's southern mills caused by freezing conditions. Also in the fourth quarter, the market price of GNN's common stock increased substantially following the announcement of Georgia-Pacific's uninvited tender offer. This resulted in a stock appreciation rights and stock performance units pretax expense of $20.3 million, or 22 cents a share. Earnings benefited from a lower tax rate, which resulted from the fourth quarter realization of investment tax credits and lower effective state

income tax rates.

"Business conditions changed around mid-year, when increasing paper capacity began to affect the supply/demand balance in many of our markets " said William R. Laidig, GNN chairman. "Generally, prices for most of our products had been relatively stable the first half of the year, but weakened modestly in the third quarter and continued to weaken in the fourth. The outlook is a tough call because most of our markets are becoming more competitive. Our performance in 1990 will depend on the strength of the U.S. economy and the growth in demand for our products," he concluded.

#90023p0340 01/23/1990 ~PR Newswire

UPPER DARBY, PA. (JAN. 23) PR NEWSWIRE - Nathaniel D. Gross, president of Bell Savings Holdings Inc. (NASDAQ-NMS: BSBX), the holding company parent of Bell Savings Bank PaSA, announced today that the second quarter ended Dec. 31, 1989, resulted in a loss of $3.8 million after charges of $5.2 million to increase the reserve for possible losses on loans.

This compares to net income of $1.8 million in the same quarter of the prior year. Net loss for the six months ended Dec. 31, 1989, was $3.1 million, compared to net income of $2.6 million for the period ended Dec. 31, 1988.

Net interest income for the second quarter of fiscal 1990, after provisions for possible loan losses, was $2.2 million, compared with $5.9

million for the same quarter a year ago.

Earnings per share for the quarter ended Dec. 31, 1989, were a loss of $1.50 compared to income of $.71 per share, for the same quarter of the prior year. For the six months ended Dec. 31, 1989, per-share results reflected a loss of $1.25 compared to income of $1.05 for the same period ended Dec. 31, 1988.

Total assets at Dec. 31, 1989, were $932.4 million, an 8.6 percent increase compared to total assets of $858.6 million at June 30, 1989.

Commenting on the decrease in earnings, Gross noted that the downturn in the real estate market has affected Bell Savings' loan portfolio, which sustained an increase in the ratio of non-performing assets as a percentage of total loans at Dec. 31, 1989, to 6.2 percent compared to 1.40 percent at Dec. 31, 1988, and 3.02 percent at June 30, 1989.

The net loss for the quarter reflects a provision for loan losses of $5.2 million, bringing the balance of the general allowance to $7.4 million after charging off $1.9 million of loans. The loss for the quarter also reflects a charge-off of interest of $747,000.

Gross said that Bell Savings has adopted a new business plan in response to changing market, economic and regulatory conditions. The plan, which has been developed over the past several months, calls for a reduction in the relative portion of Bell Savings' portfolio represented by construction, land acquisition and development and other relatively high risk loans. Bell Savings has also agreed with federal regulatory authorities to limitations on originations of such loans and on growth. Procedures have also been put into place to improve both loan quality control and collection efforts. Following several years of relatively rapid asset growth and geographic expansion, Bell Savings' new business plan also calls for a period of slower growth and a revamping of its current operations.

Regulations recently issued by the Office of Thrift Supervision require savings associations to maintain new minimum levels of regulatory capital. The new regulations are complex and raise a number of interpretive issues, but management said it believes that at Dec. 31, 1989, Bell Savings' capital exceeded the minimum requirements.

DALLAS (JAN. 23) PR NEWSWIRE - The Dallas branch of Motion Industries Inc. will receive the "Select Supplier" distinction from Campbell Soup Co. tomorrow. The New-Jersey-based Campbell will confer the recognition on behalf of its Paris, Texas, plant.

The presentation marks the first such supplier recognition by the Paris location, and culminates a three-year effort of cooperation between the two companies to enable Motion Industries to meet the stringent requirements of Select Supplier Status.

Campbell awards Select Supplier status to businesses that demonstrate the ability to consistently supply high quality goods and services. The program is part of Campbell's "Total Systems Approach," a systematic approach to

manufacturing excellence. Factors that go into the selection process include:

- commitment to quality in attitude and practice,
- utilization of statistical management techniques to monitor and improve performance, and,
- employee involvement.

Critical to the success of the program is the working relationship between the supplier and the customer. Both parties recognize the benefits of the program as the marketplace becomes more and more competitive.

The presentation to Michael S. Gaffney, Motion Industries' president, and to the company's Dallas employees, will be made by Charles E. Miller, director of purchasing operations for Campbell's domestic operations, along with representatives of Campbell's Paris facility. Paris representatives include: Rodney Flippen, Chuck Balley, Pat McDowell, Jack Blackord, and Victor Abeles.

Motion Industries produces bearings, power transmissions, and fluid power products.

#90023p0346 01/23/1990 ~PR Newswire

CHICAGO (JAN. 23) PR NEWSWIRE - Santa Fe Pacific Corporation (SFP) (NYSE: SFX) recorded a pre-tax restructuring charge of $389.6 million in the fourth quarter of 1989, in order to establish reserves to account for actions taken or to be taken to improve efficiency and profitability at its Santa Fe Railway unit. This charge was the major factor which resulted in SFP reporting a net loss in that quarter of $209.4 million, or

$1.33 a share, compared with net income of $156.1 million, or $.99 a share in the same period last year. The 1988 results included a gain of $136 million on the sale of 56 percent of SFP's pipeline operations in December 1988.

SFP's operating income for the quarter was $205.5 million before the restructuring charge, slightly below last year's fourth quarter of $212.1 million. The rail, energy and hard mineral businesses all reported significant increases. Lower real estate and pipeline results are attributable to a change in SFP's real estate strategy to focus on development rather than sales, and the reduction of SFP's ownership interest in pipeline operations which are now reported on an equity basis.

For the year, SFP reported net income of $14.6 million, or $.09 per share, compared with a net loss of $46.5 million, or $.30 per share in 1988. Losses from continuing operations totaled $195.4 million versus income of $146.7 million in 1988. This change is attributable to lower operating income, primarily caused by the rail restructuring charge, and lower other income net. Also included in net income for 1989 is a $210.0 million benefit, or $1.32 a share, representing the one-time effect of adopting new rules for accounting for income taxes, as prescribed by the Financial Accounting Standards Board. Discontinued operations produced a net loss of $193.2 million, or $1.23 a share, in 1988, principally as a result of a loss on the sale of Southern Pacific Transportation Company.

Santa Fe Railway reported operating income of $67.0 million, before considering the railroad restructuring costs, up about 40 percent from the $47.7 million recorded in the same quarter last year. The railway's operating ratio was 87.9 percent for the quarter, down more than 3 points from the corresponding 1988 period. Revenues improved 3 percent, or $16.2 million, due to a 2 percent increase in carloadings. Operating expenses, excluding the restructuring charge, decreased 1 percent, largely as a result of lower labor and material costs, somewhat offset by higher joint facility, personal injury, outside contracting and fuel costs.

MIAMI (JAN. 23) PR NEWSWIRE - CenTrust Bank (AMEX: DLP), a state savings bank with headquarters in Miami, today stated that the Office of Thrift Supervision's (OTS) suspension of trading in CenTrust securities through Monday, Jan. 29, 1990, represents a continuation of abusive and highly prejudicial tactics by the OTS apparently aimed at forcing CenTrust out of business.

CenTrust said it had been made a target for this specialized enforcement

action by an agency angered by CenTrust's refusal to knuckle under the OTS' improper demands and desperately anxious to show itself now as a tough regulator in view of its well-publicized past failures to act effectively.

CenTrust said that the OTS action was a continuation of a selective enforcement program by the OTS seeking to impose on CenTrust mark to market accounting treatment for its investment portfolio, despite the fact that such treatment is neither required by generally accepted accounting principles (GAAP) nor followed by other financial institutions. CenTrust said that its financial statements have been determined to conform to GAAP by both Deloitte Haskins & Sells and Price Waterhouse for the years in which they were, respectively, CenTrust's auditors, with full knowledge of CenTrust's dispute with the OTS on this issue and that these reports have not been withdrawn. CenTrust also said that its differences with the OTS on this issue and the financial effects of marking its investment portfolio to market on the disputed items are clearly disclosed in its 1989 fiscal Form 10-K. Such disclosure is set out in the auditors' report to CenTrust's financial statements for the year ended Sept. 30, 1989, and are discussed further in the financial statements and elsewhere in the text of the Form 10-K.

CenTrust said that it is the OTS, and not CenTrust, that is misrepresenting its dispute with CenTrust and obfuscating the issues. The OTS order and its accompanying press release conveniently forget that OTS' predecessor carefully reviewed CenTrust's need to adopt mark to market accounting in 1986, and found that it did not need to and that CenTrust's presentation was in accordance with GAAP and that this issue was the subject of a thorough re-examination by the OTS in 1988 and cleared at that time also.

THOUSAND OAKS, CA (JAN. 23) PR NEWSWIRE - Amgen Inc. (NASDAQ: AMGN) announced today that revenues for its third fiscal quarter ended Dec., 31, 1989, were $67,289,000 compared with revenues of $21,308,000 for the same quarter a year ago. Net income was $7,975,000 or $.45 per share, compared with net income of $177,000 or $.1 per share a year ago.

Gordon Binder, Amgen's chief executive officer commented, "We are pleased that physician's acceptance of Amgen's EPOGEN (Epoetin alfa), used in treating the anemia of renal dialysis patients continued to rise during the quarter. We estimate that more than 44,000 patients or approximately 50 percent of eligible dialysis patients are now receiving EPOGEN as part of their normal course of treatment.

Financial results include $10 million of milestone payment revenue, and non-recurring expenses of $10.5 million in research and development milestone costs and a $3.6 million reduction in the carrying value of Amgen's Chicago facility.

Amgen is a multinational biotechnology firm developing pharmaceutical products based on advances in recombinant DNA and molecular biology. The company, located in Thousand Oaks, was founded in April of 1980.

#90023p0352 01/23/1990 ~PR Newswire

ST. LOUIS (JAN. 23) PR NEWSWIRE - Boatmen's Bancshares Inc. (NASDAQ/NMS: BOAT) reported 1989 net income of $129.2 million, or $3.72 a share, compared with $69.8 million, or $2.01 a share, the year before, an increase of 85 percent.

Results for 1988 included nonrecurring merger charges of $47.2 million, or $1.41 a share, recorded at the time of the acquisition of Centerre Bancorporation in December of 1988. After allowance for these nonrecurring charges, 1989 net income increased 10.5 percent.

Boatmen's earned $33.2 million, or $0.95 a share in the 1989 fourth quarter, versus a net loss of $11.6 million, or $0.37 a share, the year

before, which reflected nonrecurring merger-related charges of $41.4 million, or $1.24 a share.

"1989 was a year of accomplishment for Boatmen's, and what we set out to achieve was done," said Andrew B. Craig, III, chairman, president and chief executive officer.

"From a financial standpoint, the significant impact of expense reductions and realization of merger-related economies was partially offset by the margin compression experienced in the second half of the year. Nonetheless, we have established a base for further significant improvement in our financial performance."

Results for 1989 were led by the ongoing cost-reduction program, with operating expenses declining 12.4 percent from 1988 levels (4.4 percent after adjustment for nonrecurring merger expenses).

The executive continued, "In fact, we are ahead of schedule in meeting our goal of $55 million in merger-related savings from the Centerre acquisition." He pointed out that about two-thirds of the $55 million was realized in 1989. "We expect to get the remaining one-third this year, and various measures of our operating efficiency will compare very favorably with industry standards," Craig stated.

"Our trust business was strong throughout 1989," Craig said. Trust fees increased 17.9 percent to $94.4 million from $80.1 million in 1988. Fourth quarter trust fees were up 52.7 percent to $31.3 million from $20.5 million.

During the fourth quarter, Boatmen's made some additional loan loss provision, bringing its domestic reserves for loan losses to $139 million, 1.55 percent of domestic loans.

"This increase does not reflect any deterioration in the quality of our loan portfolio, but rather represents action to bring our loan loss reserve ratios in line with comparable banking organizations," Craig explained. He pointed out that domestic loan losses for 1989 were 0.66 percent of outstandings, in line with expectations. "We are projecting a further reduction in domestic loan charge-offs this year," the executive said.

#90023p0355 01/23/1990 ~PR Newswire

DALLAS (JAN. 23) PR NEWSWIRE - Sun Energy Partners L.P. (NYSE: SLP) announced net income of $19 million, 5 cents per unit, for the fourth quarter of 1989 compared to a net loss of $2 million, or 1 cent per unit, for the like period last year. Revenues were $301 million compared to

$274 million for the like period a year ago.

Excluding net loss on sale of properties, 1989 fourth-quarter income from ongoing activities totaled $31 million compared to a net loss of $13 million for the like period last year. Higher crude oil prices, lower costs resulting from operational efficiencies and higher gas volumes led to the increase. Lower crude oil volumes and a decrease in gas prices partially offset these positive factors.

Average production of crude oil and condensate was 111 MB/D at an average price of $17.97/bbl in the fourth quarter of 1989 compared to 115 MB/D at an average price of $12.10/bbl for the same period a year ago. Natural gas production reported for the 1989 fourth quarter was 740 MMcf/D at an average price of $1.66/Mcf as compared to 699 MMcf/D at an average price of $1.69/Mcf for the 1988 fourth quarter.

The partnership also announced a cash distribution of 34 cents per unit for the 1989 fourth quarter to be paid March 9, 1990, to unitholders of record Feb. 16.

For the year 1989, Sun Energy Partners reported a net loss of $115 million or 31 cents per unit, compared to a net loss of $358 million, or $1.06 per unit, for 1988. Revenues in 1989 were $1.195 billion compared to $1.164 billion for 1988.

Income from ongoing activities for the 12 months ended Dec. 31, 1989 was $93 million as compared to a net loss of $47 million for the same period a year ago. Results for the 12 months of 1989 benefitted from higher crude oil prices, operational efficiencies and higher gas volumes. A decrease in crude volumes offset these positive factors.

The $115 million net loss for 1989 includes a cumulative charge of $199 million for the change made in the method of accounting for capitalized interest costs. The 1988 net loss includes a $327 million charge for the writedown of assets and other matters.

Average production of crude oil and condensate was 113 MB/D at an average price of $16.83/bbl for the 12 months of 1989 as compared to 125 MB/D at an average price of $13.78/bbl for 1988. Average production of natural gas was 732 MMcf/D at an average price of $1.63 per Mcf in the 12 months of 1989 compared to 715 MMcf/D at an average price of $1.64 per Mcf for 1988.

ATLANTA (JAN. 23) PR NEWSWIRE - Georgia-Pacific Corp. (NYSE: GP) today released a memorandum of law demonstrating that Great Northern Nekoosa Corp.'s (NYSE: GNN) motion to enjoin its tender offer is without merit and disregards the sworn testimony of every witness deposed by Great Northern.

Georgia-Pacific's memorandum, filed Friday in Maine Federal Court, was unsealed today at Georgia-Pacific's request.

Examining the full text and context of all documents and testimony relevant to Great Northern's motion, Georgia-Pacific's memorandum debunks Great Northern's allegations of planned asset sales. The memorandum notes:

-- Georgia-Pacific's presentations to its board of directors contain no plan or proposal to divest.

-- Georgia-Pacific's financing for the tender offer does not require or contemplate divestitures.

-- Georgia-Pacific's plan and supporting projections are specifically based on revenues, cash flows and earnings from operating all of Great Northern's assets. These projections, which Great Northern has ignored, demonstrate that the greater financial return to Georgia-Pacific lies in operating Great Northern assets.

-- Each of the Georgia-Pacific officers and directors, as well as bankers and consultants deposed by Great Northern has, under oath, categorically denied Great Northern's allegations and confirmed that Georgia-Pacific has consistently insisted that asset sales are not necessary, not desirable and not part of any formal or hidden plan.

-- Dating from Georgia-Pacific's very first filing with the Securities and Exchange Commission, Georgia-Pacific has fully disclosed its study of various alternatives, as well as its present plans, concerning Great Northern's assets.

#90023p0364 01/23/1990 ~PR Newswire

LOWELL, MA (JAN. 23) PR NEWSWIRE - Comfed Bancorp, Inc. (AMEX: CFK) announced today the introduction of a new refinancing program, "Totally Pointless Refinancing." This new program eliminates all points, requires minimal documentation, and guarantees five-day approvals, including appraisals.

In addition to eliminating all points, Comfed will pay a borrower's legal fees, appraisal fees, document preparation fees, and lender's title insurance fees.

According to Gerald Devlin, senior vice president of Comfed Mortgage Company, "Comfed recognized that a lot of homeowners would like to refinance their mortgages, but are afraid of cost and time, so basically we eliminated both. With our new 'Totally Pointless Program,' refinancing is anything but pointless - it's fast, easy, and affordable."

Comfed developed "Totally Pointless Refinancing" for people who purchased homes with adjustable-rate mortgages, and during the past few years, have experienced significant mortgage payment increases because of rising interest rates. "With 'Totally Pointless Refinancing,' we give homeowners the opportunity to lower their mortgage payments and get out of the roller coaster ride of adjustable mortgages.

Our new program is designed to also help people with higher-rate home equity loans and second mortgages," added Devlin.

Comfed's "Totally Pointless Refinancing" guarantees customers an answer on their refinancing application within five business days. Applicants must only provide limited documentation and have a clean credit history. As an added benefit, Comfed will lock-in an interest rate for 30 days from the date of application.

Comfed Bancorp, Inc. is a $1.5 billion asset holding company headquartered in Lowell, Mass. Through its principal operating divisions: Comfed Savings Bank and Comfed Mortgage Company, the bank engages in residential mortgage lending, loan servicing, and retail banking.

Comfed Mortgage Company maintains a network of 16 offices in five Northeastern states. Comfed Savings Bank operates 30 retail banking offices in Massachusetts and Connecticut. The bank's loan servicing portfolio currently ranks in the top 20 among Thrifts nationwide.

RALEIGH, N.C. (JAN. 23) PR NEWSWIRE - Carolina Power & Light Co. today reported earnings of $4.20 per share of common stock for the year ending December 31, 1989. Net income for the year was $376.1 million.

"A comparison of our company's 1989 and 1988 earnings needs to include the

effect of write-offs required in 1988," said CP&L Executive Vice President Edward G. Lilly, Jr. "Our 1988 earnings were reduced in the third and fourth quarters due to one-time write-offs that were required by regulatory treatment of a portion of the company's investment in the Harris plant."

Earnings per share for the fourth quarter 1989 were 61 cents. In 1988, earnings per share were 44 cents for the fourth quarter and $2.04 for the year. Without the write-offs, 1988 earnings per share would have been 67 cents for the fourth quarter and $3.93 for the year. Earnings for the fourth quarter 1988 were positively impacted by a net 14 cents per share related to one-time accounting adjustments.

Net income for 1989 was $61.1 million for the fourth quarter. In 1988, net income was $43.7 million for the fourth quarter, after reduction of $18.6 million due to a regulatory treatment of a portion of CP&L's Harris plant investment. Net income for the 12 months ended December 31, 1988, was $196.8 million, after reduction of $152.3 million of Harris plant write-offs.

For the year, the average number of common shares increased from 80.4 million to 82.1 million.

DETROIT (JAN. 23) PR NEWSWIRE - The following is a statement by General

Motors President Robert C. Stempel concerning new side-impact standards for automobiles:

"Recent press reports have implied that General Motors was delaying the formulation of an upgraded side-impact standard for cars. This is not correct. We have assured NHTSA Administrator Jerry R. Curry that safety is the most important consideration, and that we will work with him and his staff to expeditiously promulgate an upgraded standard. GM and NHTSA agree that side-impact rulemaking can and should proceed within the timeframe established by the administrator. The agency is continuing to evaluate the BIOSID dummy.

"GM's extensive research -- part of our broad commitment to improve vehicle safety -- is intended to assist NHTSA in setting a new standard that is beneficial in terms of reducing injuries and fatalities in side-impact accidents."

#90023p0371 01/23/1990 ~PR Newswire

MONTREAL (JAN. 23) PR NEWSWIRE - Dominion Textile Inc. (NYSE: DTX) today reported net income of $10.6 million, or $0.32 per share, for the second quarter ended Dec. 31, 1989, compared with net income of $2.5 million, or $0.04 per share, in the corresponding period last year.

Consolidated sales totaled $336.7 million for the quarter compared to $357.3 million in the year-ago period. Sales in the latest quarter were lower because the corporation's interests in its consumer products businesses are no longer consolidated following the sale of the assets of Dominion Consumer Company.

Excluding the $44.1 million in sales from the towel and bedding fashion units from the year-ago period, consolidated sales in the second quarter were actually eight percent higher on a comparable basis.

For the first six months of fiscal 1990, the corporation reported net income of $15.3 million, or $0.44 per share, compared with $0.2 million, or a loss of $0.10 per share, in the similar period last year.

Sales for the six months totaled $684.9 million, compared with $664.5 million a year ago. On a comparable basis, sales for the six month period increased 13 percent from $604.3 million last year.

Charles H. Hantho, president and chief executive officer of the Corporation, said the increased earnings stemmed mainly from improved performance in denim, with contributions from other parts of its

businesses. Demand for denim fabrics and open end yarns in North America remained strong throughout the second quarter. Specialty yarn markets were somewhat softer.

Results from apparel fabrics in Canada improved significantly, related directly to the restructuring of the business announced early last year. In Europe, the Klopman group's business volume remained fairly strong, but operating results were adversely affected by a strong Lira in relation to other European currencies.

Also in Europe, the technical fabrics business and our associated company in denim both continued to perform well. Weak market conditions in some segments of the industrial products business and the strong Canadian dollar affected the performance of that unit.

Hantho said activity has slowed down in a number of sectors of the North American economy and some of the corporation's businesses are currently experiencing weaker demand.

NEW YORK (JAN. 23) PR NEWSWIRE - Merrill Lynch & Co. Inc. (NYSE: MER) today issued the following statement in response to Moody's Investors Service's downgrading of its senior debt:

We disagree with Moody's action because we are confident that our restructuring program will respond effectively to the adverse industry environmental factors Moody's cited as a justification for its action.

The A-1 rating that we held reflected the many financial strengths enjoyed by Merrill Lynch. We believe our restructuring program will further enhance that financial position and lead to significantly improved profitability in 1990 and beyond.

We are pleased that Moody's recognized the restructuring as a positive step, as well as the ongoing strength of our retail and institutional business franchises, and the acceptable level of our risk-adjusted capital.

#90023p0393 01/23/1990 ~PR Newswire

HARTFORD, CT AND BOSTON (JAN. 23) PR NEWSWIRE - Shawmut National Corporation (NYSE: SNC) reported net income for the year ended Dec. 31, 1989, of $201.7 million, compared with $242.5 million in the prior year. On a per common share basis, net income for the year ended Dec. 31, 1989, was $2.68, vs. $3.28 earned in 1988.

"Due to the increased softness in the New England real estate market, the corporation built its reserves for loan losses, which reduced both our quarterly and annual earnings," Shawmut National Corporation Chairman and Chief Executive Officer Joel B. Alvord said. "We are confident in our ability to compete in this challenging environment because of our strong capital position, well-diversified loan portfolio and tight control of expenses. While it is clear that the New England economy is slowing, there are tremendous opportunities for our company, with its competitive strengths, to gain market share."

Net income for the fourth quarter of 1989 totaled $3.9 million, compared with $66.1 million for the same period a year earlier. On a per-share basis, net income for the fourth quarter of 1989 was 5 cents, vs. 88 cents for the fourth quarter of 1988.

For the fourth quarter of 1989, Shawmut National's total loans averaged $19.2 billion, a 4.4 percent increase from $18.4 billion for the comparable 1988 period. Core deposits averaged $14.8 billion for the fourth quarter of 1989, up 2.2 percent from $14.5 billion for the 1988 fourth quarter. The corporation's interest-earning assets averaged $25.1 billion, up 4.0 percent from $24.2 billion for the comparable period in 1988.

For the year 1989, taxable-equivalent net interest income was $996.5 million, vs. $1.0 billion in the prior year. The net interest margin was 4.02 percent, compared with 4.24 percent for 1988. Taxable-equivalent net interest income for the fourth quarter of 1989 was $247.1 million, compared with $260.4 million for the fourth quarter of 1988. The net interest margin was 3.90 percent for the fourth quarter, compared with 3.83 percent in the third quarter of 1989 and with 4.29 percent in the fourth quarter of 1988.

Preliminary figures for nonperforming loans and foreclosed properties totaled $535.6 million, or 2.75 percent of total loans and foreclosed properties at Dec. 31, 1989, compared with $389.3 million, or 2.00 percent at Sept. 30, 1989, and $246.5 million, or 1.32 percent, at Dec. 31, 1988. This increase is attributed to nonperforming commercial real estate loans resulting from the continued weakness of the New England real estate market.

SAN DIEGO (JAN. 23) PR NEWSWIRE - Bank of Southern California (OTC "Pink Sheets") today reported record earnings of $1,102,000, equal to $.81 per share, for the 12 months ending Dec. 31, 1989. This compares with previous record earnings of $725,000 or $.61 per share, for the year ending Dec. 31 1988.

Ronald Bird, president and chief executive officer, said, "Following a decade of service to the San Diego community, 1989 again proved to be another record breaking year. The future of Bank of Southern California, like San Diego, has never looked better."

At Dec. 31, 1989, assets advanced to $132,428,000 compared to $90,474,000 at Dec. 31, 1988, while deposits increased to $121,358,000 from $83,560,000 and net loans rose to $89,370,000 from $65,356,000. "As Bank of Southern California continues to grow and we move into the '90s, we are committed more than ever to giving our community the highest quality of personal and business banking services," stated Bird.

Bank of Southern California offers three conveniently located offices: the Midway office at 3026 Midway Dr.; the Point Loma office at 1004 Rosecrans St.; and the San Diego office at 1620 Fifth Ave.

#90023p0395 01/23/1990 ~PR Newswire

NEW YORK (JAN. 23) PR NEWSWIRE - Warner-Lambert Co. (NYSE: WLA) today announced that it has achieved a major advance in materials science by transforming conventional starch into a biodegradable material with many of the characteristics of plastics. The technology could eventually be used to produce substitutes for a wide range of materials in use today from annually renewable agricultural crops.

At a scheduled meeting with securities analysts here, the company exhibited shaped articles, produced by injection molding, that were made from starch.

Warner-Lambert's chairman and chief executive officer, Joseph D. Williams, said that while the starch research program is in its very early stages, "it does hold promise as an attractive business opportunity." To further explore the technology, the company is establishing a facility at its headquarters in Morris Plains, N.J. "Given the positive environmental and commercial implications of this discovery, we have created a separate business unit to develop the technology to its full potential," said Williams.

Warner-Lambert's new material is a "bio-plastic starch," which the company said it expects to market under the tradename Novon. It is the result of an eight-year research program at the company's Capsugel Division, the world's largest producer of empty hard gelatin capsules. Scientists attempting to develop a more efficient way to manufacture capsules discovered they were able to melt starch without it decomposing. In creating this fundamentally new material, they determined that it had many of the basic mechanical properties of plastics, in addition to the advantage of being biodegradable. Novon has already been used to produce a starch-based pharmaceutical capsule called Capill that is manufactured by injection molding to engineered tolerances.

Ongoing research has demonstrated that the processing of starch in the presence of water may permit a wide range of products to be injection molded. Warner-Lambert scientists are currently working to extend and enhance the properties of the material, as well as determine other applications where Novon could be used as a viable substitute for plastic and other materials.

Resins used to produce so-called "biodegradable" products on the market today are made by using a relatively small amount of starch (5 percent-15 percent) as filler in a petroleum-based resin. In contrast, Warner-Lambert's Novon is made almost entirely from starch.

Warner-Lambert is a health care and consumer products company employing some 33,000 people worldwide.

#90023p0400 01/23/1990 ~PR Newswire

NEW YORK (JAN. 23) PR NEWSWIRE - Warner-Lambert Company (NYSE: WLA)

expects 1989 net income per share to be up 22 percent to $6.10, Chairman and Chief Executive Officer Joseph D. Williams told a meeting of securities analysts today. He said sales for 1989 will be $4.2 billion, a seven percent gain, ten percent at constant currency rates.

Sales gains were achieved in both domestic and international operations and in all three major business segments: prescription pharmaceuticals, over-the-counter health care products and confectionery products. Williams said that on a global basis sales increases demonstrate the balance the company had set as a goal. International sales, representing 46 percent of the company's total volume, were almost $2 billion.

Looking to 1990, Williams said, "We see it as another good year. We're confident that we can attain an increase in earnings per share of at least 15 to 16 percent, as long as we can achieve a sales gain of eight to nine percent.

"It was that sense of optimism that led our board to vote a second consecutive 19 percent increase in our annual dividend rate, raising 1990s to $3.04 a share," he said.

"We continue to be optimistic about our prospects, both short- and long-term," emphasized Williams. "Our 1990 agenda is already crowded with projects geared to future growth."

Among the projects, Williams announced, is a major advance in materials science. The new Warner-Lambert technology involves transforming conventional starch into biodegradable material with many of the characteristics of plastic.

It could eventually be used to produce substitutes for a wide range of materials in use today from annually renewable agricultural crops. The new material is a "bio-plastic starch" the company expects to market under the tradename Novon.

Warner-Lambert will invest more than $1 billion for the first time in 1990 to advertise and promote its products. The company also plans to increase research and development spending by more than 12 percent to approximately $350 million.

"In managing our business for future growth, we introduced a strategy three years ago of investment spending behind such vital functions as research, advertising and sales," Williams said. "During that period, we were able to invest $200 million beyond our original budgets."

CINCINNATI, (JAN. 23) PR NEWSWIRE - Atek Metals Center, Inc. (NASDAQ/NMS: ATKM) announced today its results for the first quarter of fiscal 1990. For the three months ended December 31, 1989, the company reported net income of $139,000 ($0.03 per share) compared to $358,000 ($0.09 per share) for the first quarter of fiscal 1989. Average shares outstanding numbered 3,730,231 in fiscal 1990 and 3,732,231 in fiscal 1989. Revenues totaled $13,543,000 versus $12,839,000 in the first quarter of fiscal 1989.

The company benefited from the strong demand for high performance materials and manufacturing services to construct original equipment and to maintain operating units in the gas turbine and petrochemical markets. The company showed higher shipments in pounds from the Distribution and Metals Service Centers, planned earnings from Polymet Corporation, enhanced coating revenues from CTS, and below plan sales and earnings from XYTORR.

The 21-month instability of raw material prices, especially nickel, continued into the fiscal 1990 first quarter and affected adversely the cost of products sold by the company as well as contributed to pricing variability. Competitive pricing depressed the earnings of Distribution and Metals Service Center.

FINANCIAL SUMMARY

(Dollars in thousands except per share data)

	First Quarter Ended Dec. 31	
	1989	1988
Revenues	$13,543	$12,839
Gross Profit	2,563	2,806
Operating Profit	510	786
Net Earnings	139	358
Earnings Per Share	0.03	0.09
Average Shares Outstanding	3,730,231	3,732,231

Atek Metals Center, Inc. provides high performance materials and manufacturing services worldwide through four related divisions:

- Distribution and Metals Service Centers
- CTS, Inc. -- Specialty Coating Manufacturing Services
- Polymet Corp. -- Specialty Wire Manufacturing and Processing
- XYTORR Corp. -- Research and Development of Vacuum Coating Technology

Atek's primary markets include the aircraft engine segment of the aerospace industry and the petrochemical segment of the chemical process industry.

NEW YORK, (JAN. 23) PR NEWSWIRE - Today Bairnco (NYSE: BZ) announced that its board adopted plans for restructuring Bairnco. Under the plan Bairnco will focus on the management, growth and development of its Arlon, Shielding Systems Corporation and Kasco subsidiaries. Subject to further board action and the receipt of required consents including the consent of lenders to Bairnco, Keene Corporation will be spun off to the Bairnco stockholders as a stock dividend on the basis of one share of Keene common stock for each share of Bairnco common stock. It is anticipated that the dividend will be tax free to the shareholders.

Glenn W. Bailey, chairman of the board and president of Bairnco Corporation, announced that he plans to retire at the end of May when he will be 65 years old. It is expected that Luke E. Fichthorn, III, a director of Bairnco, will become chairman of Bairnco after the annual meeting.

Richard A. Shantz has agreed to become president of Bairnco Corporation upon the completion of the restructuring. Shantz was from 1983 through 1988, president of Kaydon Corporation, and also served as chairman of Kaydon's board until October of 1989.

It is expected that Keene Corporation will initially focus upon the management of its $130,000,000 investment portfolio and on the development of its Reinhold operation which manufactures advanced composite material structures and ablatives for aerospace defense and commercial markets. Eugene R. Anderson, a director of Keene Corporation, has been elected chairman of the board of Keene Corporation and will continue to serve in that capacity.

David C. Bevan, Jr., who is currently senior vice president - finance and administration of Bairnco Corporation, is expected to become president of Keene Corporation at the time of the spin-off of Keene Corporation.

NEW YORK, (JAN. 23) PR NEWSWIRE - Rosenkrantz Lyon & Ross today managed an underwriting of 2,000,000 shares of Roberts Pharmaceutical Corporation (NASDAQ: RPCX) and priced the shares at $6 per share. The gross was 54

cents, the management fee 11 cents, the underwriting fee 11 cents, the selling concession 32 cents and the reallowance 10 cents. The underwriting has been sold and the books closed.

Roberts Pharmaceutical is engaged in the development and commercialization of drugs for use in the treatment of cancer, asthma, cardiovascular disease, endocrine disorders, acute and chronic pain, urinary incontinence and iron overload conditions in the United States and abroad. The company's strategy is to develop drugs licensed to it by other pharmaceutical companies, government agencies and academic and private institutions which have expended substantial amounts of time and resources in product research before granting a license to the company. This product development strategy is designed to reduce the amount of time and resources that the company is required to expend to bring a fully developed drug product to the marketplace. The company is headquartered in Eatontown, N.J.

The following is a partial list of underwriters: Morgan Stanley & Co. Incorporated Smith Barney, Harris Upham & Co., Inc. Allen & Company, Incorporated Prudential-Bache Capital Funding Wertheim Schroder & Co., Inc. Oppenheimer & Co., Inc.

NEW YORK (JAN. 23) PR NEWSWIRE - Home Life Insurance Co., New York, and Richard P. Woltman and his partners today announced an agreement for the sale of Sentra Securities Corp., San Diego, a registered securities broker-dealer. Woltman, the purchaser, is a major shareholder and the president of Spelman and Co. Inc., La Jolla, Calif.

Bill Robinson, CLU, CFP, senior vice president of Home Life, and currently president of Sentra Securities, commented, "Home Life's commitment to focusing our energies on our own agency force and our insurance business resulted in the decision to sell Sentra. We will continue to support our agents' work in the securities business through WS Griffith and Co. Inc., which remains a wholly owned broker-dealer subsidiary of Home Life."

Robinson added that the servicing of the securities business of Home Life's agents will be provided by Sentra Securities. Sentra had been acquired by Home Life in 1986. Sentra, which has about 300 account executives nationwide, has a heavy concentration of brokers in Southern California.

Woltman, who has 35 years' experience in the commercial and investment banking businesses, in 1974 co-founded First Affiliated Securities, which grew to be one of the largest independent full-service broker-dealer firms in the United States.

Sentra has been a leader in the computerization of accounting and back-office service functions and has one of the most advanced systems in the industry, Woltman said. He stated that he intends to operate Sentra as an independent, full-service broker-dealer, although certain support and administrative functions will be combined into a new service company. "I see the independent contractor-type operation -- such as we have at Sentra -- as having a great future in terms of growth and customer service " Woltman commented.

Spelman and Co., established in 1971, is a full-service brokerage firm specializing in municipal and government bonds. Spelman and Co. has approximately 100 account executives in 30 branch offices located throughout the country. Broadcort Capital Corp., a wholly owned subsidiary of Merrill Lynch, Pierce, Fenner and Smith, serves as a clearing correspondent for Spelman and Co. and also clears for Sentra. Spelman performs second-party clearing activities for small, independent broker-dealer firms and also operates an institutional division.

Home Life Insurance Co., with corporate offices in New York City, is a mutual life insurance company founded in 1860. The company has assets of more than $4.5 billion and 2,600 employees nationwide.

#90023p0422 01/23/1990 ~PR Newswire

CHICAGO, (JAN. 23) PR NEWSWIRE - Calumet Industries, Inc. (NASDAQ: CALI) reported a loss from operations for the first quarter ended Dec. 31, 1989 of ($2,715,000), or ($.88) per share, compared to a net loss of ($602,000) or ($.19) per share, for the quarter ended Dec. 31, 1989. Sales for the three months ended Dec. 31, 1989 aggregated $8,303,000 compared with $10,163,000 for the three months ended Dec. 31, 1988.

The major reason for the net loss for the three months ended Dec. 31, 1989 was the continous difference between high crude oil costs and moderately priced finished products. The company continues to experience problems in obtaining the type of crude oil it refines, which resulted in reduced sales and lower utilization of its refinery.

CALUMET INDUSTRIES, INC.

GOLDEN, CO. (JAN. 23) PR NEWSWIRE - Imex Medical Systems Inc. (NASDAQ: IMEX) today announced flat sales and earnings for the second quarter, as expected, with profits up 137 percent and sales up 25 percent for the six-month period ended Dec. 31, 1989.

Second-quarter sales increased by 1.3 percent over the same quarter last year to $1,579,270 from $1,558,671. Six-month sales of $3,434,639 were up 25.4 percent from the prior year's total of $2,738,519. This milestone marks 16 consecutive quarters of profits and growing revenues.

The company achieved a second-quarter profit of $83,019 or 1.3 cents per share versus a profit of $89,621 or 1.5 cents per share for the same quarter last year, a 7.4 percent decrease. Profit for the first half of the fiscal year was $257,257 or 4.1 cents per share versus $108,512 or 1.8 cents per share for the same period last year, a 137.1-percent increase in net profit.

"Results for the second quarter are consistent with our revised expectations announced last month," President Jerry Donahue observed. "In light of the changes we are building into our distribution network and the sooner than expected loss of sales from a major dealer, we are encouraged by the positive effect of increased vascular recorder sales through direct representatives and dedicated manufacturer's representatives." He noted that sales of small dopplers were also stronger than anticipated.

"The market introduction of the revolutionary Imex Lab 9000 in the third quarter should partially offset the continuing loss of dealer revenue in the third and fourth quarters," Donahue continued. "We are excited about the medium- to longer-term worldwide sales prospects for this new product. However, fiscal year 1990 sales for vascular recorder products will be less than our earlier projections in both quarters."

Donahue added, however, that sales for the fiscal year should be significantly stronger than last year, with earnings not likely to exceed

last year. (In the year ended June 30, 1989, Imex posted net income of $622,115 or 10 cents per share on revenues of $6,716,096.) An already strong balance sheet improved as of Dec. 31, 1989; current assets were almost four times greater than current liabilities.

Imex Medical currently has 20 sales representatives marketing its vascular recorder products directly to primary care physicians in the continental United States. The company has begun the process of selecting international distributors in Europe, Japan, the Pacific Rim nations and Latin America, and plans to continue aggressive investment in expanding distribution worldwide. The company also has a separate network of approximately 300 medical-surgical dealers distributing its small dopplers internationally.

The company's products allow physicians to economically perform basic tests, in their office, to determine a patient's risk for stroke or heart attack. The technology incorporated in Imex products determines the presence and extent of a vascular disease known as arteriosclerosis through blood flow diagnosis.

Headquartered in Golden, Colo., Imex specializes in "user friendly" and cost-effective instrumentation for the primary care and office-based physician. The company produces several diagnostic instruments for fetal monitoring and early detection of disease conditions which may lead to stroke, heart attack and other vascular problems.

COSTA MESA, CA (JAN. 23) PR NEWSWIRE - Parker Automotive Corp. (OTC) has executed a non-exclusive agreement with Republic Air Brake Co. (Pty) Ltd. for distribution of CarbonClean products in the Republic of South Africa.

Republic Air Brake, trading as Republic Enterprises and Repairs, was founded by Jim Birch, the former managing director of M.A.G. Brakes (Pty) Ltd. Birch and his associates sold M.A.G. Brakes in 1987 to Echlin Inc., after taking the company to a leadership position in the South African brake engineering industry over the last 25 years.

A member of the Transport Panel of Specialists, Birch actively advises industry and provinces on new and improved transport industry practices, and is well-recognized in the allied field industry, as well as the transport industry.

Parker Automotive's CarbonClean systems are designed to clean virtually any internal combustion engine; from cars to boats and from tractors to farm and construction equipment. The result of the cleaning is a significant increase in fuel economy and performance, and vastly improved exhaust emissions. In fact, in tests performed by a United States Environmental Protection Agency laboratory, the automotive CarbonClean system was found to reduce emmissions by up to 30 percent. Even more intensive testing was performed on the heavy duty diesel CarbonClean system, according to the specifications of the Society of Automotive Engineers and the Maintenance Council of the American Trucking Assoc. Those results showed a 60 percent improvement in particulate emissions, in

addition to significant improvements in fuel economy, horsepower and torque.

The gasoline found in South Africa contains a lead content no longer existent in United States fuel. As a result, fuel system cleaning, such as CarbonClean provides, is even more important in maintaining reasonable levels of emissions in South Africa.

To expedite CarbonClean's entry into the South African marketplace, Birch is working with the country's Standards Companies and Automobile Assoc., who will evaluate the products and provide bona fide documentation to its members. A substantial advertising campaign will support this marketing effort.

Parker Automotive Corp. is headquartered in Costa Mesa. Manufacturing facilities are in Fountain Valley, Calif. and regional sales offices are maintained nationwide. To date, over 2,500 CarbonClean systems are in use worldwide by government agencies, transportation fleets, auto makers, petroleum companies and service franchises.

NEW YORK (JAN. 23) PR NEWSWIRE - Dean Witter Reynolds Inc. and Merrill Lynch Capital Markets, as co-underwriters, announced today the public offering of 1,500,000 shares of common stock of ONBANCorp, Inc. (NASDAQ: ONBK) at $9.75 per share. The company has granted the underwriters an option to purchase up to an additional 225,000 shares to cover over-allotments.

The net proceeds from the sale of the common stock will be added to the general funds of the company and will be available for use in its general business activities, including the financing of future expansion and will provide the capital to support internal asset growth including the origination and purchase of mortgage loans, mortgage backed securities and other loans. The proceeds may also be used to support external growth through acquisitions although the company currently has no specific plans or agreements for such acquisitions.

ONBANCorp, Inc., headquartered in Syracuse, N.Y., is a Delaware chartered bank holding company, which operates through its sole subsidiary, OnBank. ONBANCorp became the bank holding company of OnBank as of Sept. 18, 1989. OnBank offers financial services through 26 locations in the upstate New York communities of Syracuse, Auburn, Rome, Utica, Rochester, Poughkeepsie Binghamton, Buffalo and Albany.

MINNEAPOLIS, (JAN. 23) PR NEWSWIRE - North Star Universal Inc. (NASDAQ: NSRU) announced today that its subsidiary, C.E. Services Inc., headquartered in Grand Prairie, Texas, has acquired Landmark Communications Services of Chicago. Terms of the acquisition were not disclosed.

Landmark Communication Services with revenues approaching $8 million provides specialized technical, refurbishment and storage services on IBM computer equipment. The company's operations are based in Chicago, Ill., and in the United Kingdom.

Miles Efron, president and chief executive officer of North Star Universal Inc. said that C.E. Services' acquisition of Landmark "demonstrates North Star's ongoing efforts to enhance the long term growth of its operating companies through strategic acquisitions."

C.E. Services' president and chief executive officer, C.B. "Pete" Russey, said that the acquisition of Landmark "makes C.E. Services a dominant provider in the United States of third party technical services and refurbishing for IBM mainframe computers and otherproducts." Russey went on to say that Landmark's London operation gives C.E. Services "an excellent entry into the European market."

North Star Universal Inc. owns and supervises the management of businesses engaged in computer cabling and related services, health care services, graphics and other industries. As a parent company, North Star Universal provides resources for the companies' development and growth. North Star Universal also owns a 52.8 percent majority interest in Michael Foods Inc. (NASDAQ: MIKL).

#90023p0432 01/23/1990 ~PR Newswire

HARRISBURG, PA (JAN. 23) PR NEWSWIRE - Gov. Robert P. Casey announced today that contractors have started the cleanup of drums containing hazardous materials at the former Continental Refrigeration Corp. plant near Exton in Chester County.

The Department of Environmental Resources (DER) last August ordered

Continental to secure and properly dispose of about 40 drums containing hazardous solvents.

This week, the company agreed to start its own cleanup of the site at 717 E. Lincoln Highway, West Whiteland Township.

"This is the first example where the polluter is paying the total cost of a hazardous site cleanup themselves," Casey said. "The company had a choice -- they could clean up now or pay DER after a state- financed cleanup."

Continental, which has filed for bankruptcy, did not have a permit from DER to store or dispose of hazardous waste at the plant, which were violations of the Solid Waste Management Act.

DER, under the authority of the new Hazardous Sites Cleanup Act had directed the department's contractor, Ecology & Environment, to conduct a waste inventory at the site in anticipation of state-financed cleanup action.

If Continental had refused to comply with the cleanup order, DER would have taken action under the law which gives Pennsylvania the authority and the funding to cleanup hazardous sites.

A bankruptcy court recently released company funds to finance the safe removal and disposal of the hazardous materials. Environmental Control Systems of Broomall, a contractor hired by Continental, began removal of the drums this week under DER supervision.

The contractor has submitted a work plan to DER for approval to remove the additional drums and containers of hazardous materials at the site in the next several weeks.

Many of the drums contain methylene chloride, a chemical that can cause serious irritation to the eyes, skin and respiratory system.

DER had originally received a complaint about the drums from the West Whiteland Township fire marshal, who expressed concern about easy accessibility to the plant and the safety of students from three schools near the site.

CONTACT: Bette Phelan, 717-783-1116, or Frank Koller, 717-783-7844, both of the DER.

#90023p0435 01/23/1990 ~PR Newswire

VIENNA, VA. (JAN. 23) PR NEWSWIRE - As a result of some softening in the metropolitan Washington economy and a substantial recent slow down in the local real estate market, Perpetual Financial Corporation (NASDAQ-NMS: PFCP, PFCPP) today announced that it anticipates an additional provision to its loan loss reserve and charge-off of foreclosed real estate during the quarter ending Jan. 31 of approximately $15 million pre-tax.

This will result in an estimated loss of $11 million after tax for the quarter. This compares to a net profit of $6 million for the comparable period of 1989.

The additional provision and charge-off reflects management's expectation that the local real estate market will continue to be slow through 1990 and into 1991.

A substantial portion of the amount represents an increase in the reserve related to one mixed use, commercial property in Montgomery County, Md., previously identified by the company as a non-performing asset. Subsequent to our fiscal year end at Oct. 31, 1989, and the release of the financial results for the year then ended, expected payments by guarantors did not materialize. In addition, more recently available information on the financial status of the guarantors caused management to revise estimates of the net realizable value of this credit. Although the office portion of this project is 43 percent leased and the residential portion is 40 percent sold or under contract, management believes the ultimate disposition of this property is long- term and the additional loan loss provision is prudent.

Non-performing assets of Perpetual Savings Bank stood at $121 million net of reserves at Oct. 31, 1989. It is anticipated that non- performing

assets will increase to approximately $151 million (2.5 percent of total assets of $6 billion), net of reserves as of Jan. 31. The reserve for loan losses, including the additional provision, is expected to reach $37 million on Jan. 31, 1990, compared to $29 million on October 31, 1989.

"We believe that higher reserves are prudent during the current unsettled economic climate. This action represents a continuation of our stated policy," said Thomas J. Owen, Perpetual's chairman and chief executive officer.

After the additional loan loss provision and charge-offs, Perpetual Savings Bank will continue to comply with the more stringent capital standards enacted as part of the Financial Institutions Reform, Recovery and Enforcement Act of 1989. Capital of Perpetual Financial Corporation amounts to $315 million ($19.55 per primary share) as of Oct. 31, 1989, the end of the most recent fiscal year.

Perpetual has embarked on a program designed to maximize opportunities in response to the new regulatory environment created by the enactment of the FIRREA legislation. This approach calls for closely controlled growth in the near future and careful monitoring of the mix of earning assets.

As part of this strategy, the company has engaged the investment banking firm of Goldman, Sachs & Co. to advise the board of directors on ways to enhance shareholder value.

Perpetual Savings Bank, with assets of $6 billion, is the largest savings institution in Virginia, Maryland and the District of Columbia.

#90023p0437 01/23/1990 ~PR Newswire

LOUISVILLE, KY (JAN. 23) PR NEWSWIRE - LG&E (NYSE: LOU) earned $3.20 per share of common stock in 1989, compared with $3.70 in 1988. Net income available for common stock was $66.6 million in 1989 and $75.6 million in 1988.

Revenues for 1989 were $677 million, up from $660 million in 1988. A general rate increase effective May 20, 1988; increased energy sales mainly due to load growth in the commercial, industrial, and public authorities sectors; and an increase in the Company's off-system sales accounted for most of the increase.

The Company refunded $2.5 million to electric customers as part of a settlement with the Kentucky Public Service Commission. Earnings for 1989

declined $.07 per common share as a result of the refund. "This settlement has resolved the long-standing issues surrounding the Company's Trimble County generating station and will help the Company promote economic growth in our community and respond positively to an increasingly competitive marketplace," Hale said.

In addition, bitter cold weather in December caused a significant increase in sales of natural gas. However, while expenses related to these increased sales were recorded in 1989, a portion of the associated revenues will not be recorded until 1990. This reduced annual earnings by $.14 per common share.

Also, high customer demand for electricity during the abnormally hot summer weather of 1988 added $.15 per share to earnings that year, as compared with 1989 earnings.

An average of 20,846,720 shares of common stock were outstanding in 1989, up from 20,409,858 in 1988.

As a result of the one-time expenses associated with the Company's reduction in work force and the recording in 1990 of a portion of the revenues associated with December's increased sales, there were no earnings per common share recorded in the fourth quarter of 1989. Earnings per share were $.39 in the fourth quarter of 1988. Net income available for common stock was a negative $90,000 in the fourth quarter of 1989, compared with $8.1 million in the last quarter of the preceding year.

NORTH CHICAGO, IL (JAN. 23) PR NEWSWIRE - Fansteel Inc. (NYSE: FNL) reported 1989 net sales of $168,590,000 compared to $168,492,000 for 1988 after restatement for the December 1989 disposal of the metal products business segment. Net income from continuing operations for the year ended Dec. 31, 1989 of $4,132,000 or $.48 per share was recorded, compared to $3,253,000 or $.38 per share in 1988. Net income of $6,853,000 or $.80 per share was recorded for 1989 versus $2,152,000 or $.25 per share in 1988. Included in 1989 was net income of $2,721,000 or $.32 per share from discontinued operations versus a net loss from discontinued operations of $1,101,000 or $.13 per share in 1988. A net gain from asset dispositions, net of plant shutdown costs, of $5,018,000 or $.58 per share was included in the 1989 discontinued operations.

The company reported fourth quarter net sales of $41,115,000 compared to $42,993,000 for the same period of 1988. Net income from continuing

operations of $148,000 or $.02 per share was recorded in the fourth quarter 1989 versus a net loss from continuing operations of $471,000 or $.06 per share for the fourth quarter 1988. Included in the fourth quarter continuing operations of 1989 and 1988 were restructuring costs associated with the consolidation of the company's product lines equivalent to $.09 per share and $.11 per share, respectively. Net income of $4,484,000 or $.52 per share was recorded for the fourth quarter 1989, compared to a net loss of $2,047,000 or $.24 per share for the same period of 1988. Fourth quarter discontinued operations net income of $4,336,000 or $.50 per share was included in 1989 versus a net loss of $1,576,000 or $.18 per share in 1988. A net gain from asset dispositions, net of plant shutdown costs, described above was included in the fourth quarter 1989.

#90023p0439 01/23/1990 ~PR Newswire

NEW YORK (JAN. 23) PR NEWSWIRE - Gov. Mario Cuomo's tax package is specifically molded to discriminate against those who can least afford a tax increase.

Steve Handman, a member of the board of the American Smokers Alliance (ASA), charged today that the governor's tax proposal is regressive taxation in the purest form.

"The governor in making his proposal public, said that the tax increases would 'help the poor.' Now, how you help the poor by taking their income is a real puzzle," said Handman. "His proposed five cent increase in consumer cigarette taxes is not only punitive to smokers, but blatantly unfair to millions of people," continued Handman, who lives in New York City.

ASA was formed in 1988 to provide smokers with a voice in fighting discrimination and to promote the right of persons to smoke if they so desire. The ASA now has membership throughout the United States.

The ASA plans to join with other groups in opposing the governor's tax plan. "It's obvious that the governor has no intention of listening to the people, but we intend to petition our individual members of the Legislature to take a very hard look at this proposal," commented Handman.

Consumer excise taxes on cigarettes are now 33 cents per pack in New York State after the tax was boosted 12 cents last year. "If you work in New York City, you pay another $.08 on top of the state tax," said Handman. "This hardly is fair and it's time that smokers began to voice their opposition to not only taxation, but the tax-tax mentality of the governor

who is leading the state down the precise road that Gov. Dukakis took Massachusetts."

SAN FRANCISCO (JAN. 23) PR NEWSWIRE - Chevron U.S.A. Inc. announced a decrease in the posted prices it will pay for all grades of crude oil in its Eastern Region (U.S. areas outside of California and Alaska).

The decrease of $0.75 per barrel was effective today at 7:00 a.m. Chevron will now pay $21.00 for West Texas Intermediate, $19.35 for West Texas Sour, $21.30 for South Louisiana Sweet (Onshore).

New prices for all grades other than those from California and Alaska are reflected in Chevron's Eastern Region Crude Oil Price Bulletin 90-E5. Bulletins are issued periodically reflecting price increases or decreases as market conditions change.

#90023p0446 01/23/1990 ~PR Newswire

MINNEAPOLIS (JAN. 22) PR NEWSWIRE - Cray Research Inc. (NYSE: CYR), announced today that the National Center for Atmospheric Research (NCAR) will install a CRAY Y-MP8/864 supercomputer system in the second quarter of 1990. The new system will more than double NCAR's computational capacity.

NCAR became Cray Research's second customer in 1977 with the purchase of a CRAY-1 system. It was the first customer to run the Cray Research operating system, COS. The new CRAY Y-MP supercomputer will run UNICOS, which is based on AT&T's UNIX System V operating system, a de facto industry standard.

In 1983, NCAR purchased a second CRAY-1 system. That system was replaced by the current CRAY X-MP/48 supercomputer in 1986.

"We're very pleased that our long-time friends at NCAR have chosen a CRAY Y-MP system to advance their important research," said John A. Rollwagen, Cray Research chairman and chief executive officer. "The larger system will enable them to expand their models for greater accuracy as they take advantage of the additional processors and parallel architecture.

"At a time when concern for the condition of the environment is escalating it is very gratifying for us to be at a point in our technology progression where we are able to supply supercomputers that can address these problems. Our supercomputers are the only systems available today which can accommodate the enormous environmental models run at institutions such as NCAR," said Rollwagen. "We expect environmental modeling and weather forecasting to be important growth areas for Cray Research."

Computational researchers at NCAR use supercomputers in all areas of NCAR research including climate simulation, ocean simulation, atmospheric chemistry, cloud and storm behavior, and solar effects. These sophisticated environmental simulations are used to construct computer scenarios of past and present and predict the future. Without massive supercomputer capacity, the researchers face the choice of lower resolution models or unreasonably lengthy runs.

"The new CRAY Y-MP system will enable us to undertake simulations that would be impossible without it, especially in research to improve our understanding of global warming," said Bill Buzbee, director of NCAR's Scientific Computing Division. NCAR has been in the forefront of the debate about the "greenhouse effect."

Another portion of NCAR's work has focused on modeling the oceans and the interplay between oceanic and atmospheric processes. Last November, NCAR computational research scientist Bob Chervin along with Dr. Albert Semtner Jr., from the Naval Postgraduate School in Monterey, Calif., were presented with a Cray Research Gigaflop Performance Award for their global ocean model. By modifying their program to run in parallel on all eight processors of the CRAY Y-MP system in Cray Research's Mendota Heights, Minn., facility, the researchers were able to achieve a speed of 1.125 billion calculations per second, or 1.125 gigaflops.

With their own CRAY Y-MP system on site, Chervin and other NCAR researchers are looking forward to gigaflop performance as an every day practice. But climate researchers have a seemingly unquenchable thirst for more power. "Even more powerful systems are needed to show the complex interactions between all elements of our planet," said Buzbee. "We need to be able to couple models of atmospheric chemistry, atmospheric dynamics, oceans, land surfaces and ice masses. Such a holistic view is critical to understanding our present climate and its future."

NCAR, located in Boulder, Colo., is managed by the University Corporation for Atmospheric Research (UCAR), a group of more than 50 institutions with doctoral-level programs in atmospheric and related sciences.

Earlier today Cray Research Inc. announced that the Saudi Arabian Oil

Company (Saudi ARAMCO) has installed a CRAY-2 computer system.

Cray Research Inc. designs, manufactures, markets, and supports large-scale, high-speed computer systems for scientific and engineering applications.

LOS ANGELES (JAN. 23) PR NEWSWIRE - Farmers Group Inc. learned today of Judge Frank Britt's decision to move up the commencement of the California state insurance department hearings, held to examine the takeover bid of Farmers' parent company, B.A.T. Industries (NSYE: BTI), from March 19 to Feb. 13.

The California hearing was originally scheduled for Jan. 16, but due to an earlier request from Axa-Midi it was postponed until March 19.

"Judge Britt concluded today that these hearings should move forward as expeditiously as possible," said Jeffrey C. Beyer, vice president of Farmers Group. "Our initial reluctance to accelerate the date was to avoid the logistical difficulty of concurrent hearings. Farmers will certainly go forward with its presentation in each of the relevant states, regardless of concurrent forums."

The California hearings are being held to determine whether the proposed takeover of B.A.T. Industries p.l.c. by Sir James Goldsmith's Hoylake Investments, and the subsequent sale of Farmers Group Inc., to his investment partner Axa Midi Assurances of France, would be in the best interest of Farmers' policyholders.

Hearings are currently underway in Illinois and are additionally scheduled in Idaho, Oregon and Washington. Four other states in which a member of the Farmers Group of Cos. is headquartered have not yet scheduled their insurance department hearings.

#90023p0449 01/23/1990 ~PR Newswire

MINNEAPOLIS (JAN. 23) PR NEWSWIRE - Cray Research Inc. (NYSE: CYR) today reported revenue of $784,700,000, and net earnings of $89,045,000, or $3.02 per share, for the 12-month period ended Dec. 31, 1989. This

compares with revenue of $756,306,000, net earnings of $156,631,000, and earnings per share of $4.99, for the same period a year ago.

Revenue for the fourth quarter was $330,139,000, compared with $330,885,000 a year ago; net earnings were $52,477,000, or $1.78 per share versus $88,528,000, or $2.80 per share, for the same period a year ago.

Customers accepted 35 systems during the quarter, with a contract value of $300 million, bringing totals for the year to 73 systems and a contract value of $638 million. This compares with 65 systems accepted in 1988, with a contract value of $567 million. Of the systems installed in 1989, 52 were new systems and 21 were used systems.

The value of systems ordered in the fourth quarter totalled approximately $315 million, bringing the total value of systems ordered in 1989 to more than $700 million. This compares with a value of approximately $600 million for contracts signed in 1988. The order backlog at the end of the quarter was about $330 million, compared with $315 million at the end of the third quarter, and $270 million at year-end 1988.

John Rollwagen, chairman and chief executive officer, said, "Cray Research had a very strong fourth quarter in terms of systems accepted, which helped us to meet the 1989 revenue and earnings guidance we gave in October. As expected, revenue was approximately the same as 1988 revenue and the decline in earnings from 1988 levels is due, in large part, to product transition costs and CRAY-3 development expense incurred during 1989.

"We also had an exceptional quarter in terms of orders signed. Based on our current backlog and prospect list, we continue to operate on the assumption that 1990 revenue will be flat; however, we are confident that we can improve profitability over 1989. We begin the new decade with a very successful and stable product line, in strong financial condition, and with a well-established installed base of nearly 240 systems in 20 countries throughout the world."

Cray Research Inc. designs, manufactures, markets, and supports large-scale, high-speed computer systems for scientific and engineering applications.

#90023p0450 01/23/1990 ~PR Newswire

WASHINGTON (JAN. 23) PR NEWSWIRE - Russell M. Murray, former executive vice president for lending at Silverado Banking, Savings and Loan

Association, Denver, today consented to an order prohibiting him from ever working for any federally insured financial institution without the prior approval of the appropriate regulatory agency.

Murray agreed to the order while denying any wrongdoing, the Office of Thrift Supervision announced. The agency's Enforcement Review Committee approved the action Tuesday evening and the final order was signed immediately.

Meanwhile, OTS Enforcement Review Committee deliberations regarding former Silverado director, Neil Bush, are continuing. The agency said it expects to announce a decision on the matter within 10 days.

Over the past two weeks, five former officers and/or directors of failed Silverado have consented to prohibition orders, including Murray. The others are Michael R. Wise, former chairman and chief executive officer of the thrift; Richard K. Vandapool and Robert M. Lewis, both former vice chairmen; and W. James Metz, director and majority stockholder. The prohibition order is the same for all five individuals. The investigation has been a joint effort of the OTS Office of Enforcement in Washington and the OTS Topeka District Office.

The investigation grew out of the failure of Silverado Banking Savings and Loan Association, Denver, in late 1988. Regulators took control of the institution on Dec. 9, 1988, and subsequently sold it to First Nationwide Financial Corporation on Dec. 30 of that year.

Examiners found that Silverado's management had concentrated too much of the thrift's business in commercial loans in a depressed market; conducted an exceptionally large number of problem transactions with insiders, such as shareholders, officers and directors; and was deficient in assessing the creditworthiness of borrowers.

#90023p0451 01/23/1990 ~PR Newswire

SAN ANTONIO (JAN. 23) PR NEWSWIRE - Adtec Inc., a San Antonio based manufacturer of prison locking devices and detention hardware, reported its operating results for the second quarter of the fiscal year ending May 31, 1990. Revenues during the quarter decreased 7 percent from the second quarter of last year primarily due to the timing of work available on pending contracts and the overall decrease in the backlog of work available in connection with major contracts in Crescent City, Calif. During the second quarter of the 1989 fiscal year, the Crescent City contracts accounted for approximately 34 percent of the company's total revenues, compared to less than 4 percent in the current second quarter.

This reduced dependence on large contracts to generate revenue is reflected in the backlog of work at Nov. 30, 1989, of approximately $14 million of which there is only one contract ($2,225,000) over $1,600,000.

Cumulative revenues for the first two quarters of the 1990 fiscal year increased 19 percent over the like period for the prior year. This overall increase is primarily due to the timing of work available on a number of contracts in the first quarter ended Aug. 31, 1989. Adtec experienced an operating loss of $2,361,619 in the second quarter of 1990, as compared to operating income of $160,767 for the second quarter of 1989. The company had an operating loss of $2,085,770 for the six months ended Nov. 30, 1989 as compared to an operating income of $291,020 for the first two quarters of the 1989 fiscal year. The company had a net loss of $1,759,821 for the second quarter of the 1990 fiscal year, as compared to net income of $89,377 for the second quarter of 1989. The net loss for the first two quarters of the 1990 fiscal year was $1,670,631, as compared to net income of $267,274 for the comparable period in the 1989 fiscal year.

The company's cost of revenues for the second quarter ended Nov. 30, 1989, increased to 132 percent of revenue, compared to 83 percent in the like period last year. This was mostly due to cumulative adjustments in the second quarter of approximately $2 million of expected costs on certain contacts, primarily in Crescent City resulting from increased costs to complete these jobs, as previously reported. The company has previously disclosed that a material supplier of its wholly-owned subsidiary, American Detention Services Inc. ("ADS") furnished material to ADS for the Crescent City projects which did not conform to the prototype design, causing ADS to incur substantially increased costs during installation. Management has been advised that the supplier is in receivership. Further the supply contract in question is not covered by a performance bond, contrary to requirements of the contract, thereby requiring ADS to incur the increased cost to properly complete installation. Although management is continuing to explore remedies that may be pursued against the supplier it is not presently expected that the supplier has sufficient assets available to satisfy any claim that ADS may assert. Certain other contracts also incurred overruns primarily resulting from a hollow metal supplier not delivering the products timely to the jobsites.

(JAN. 23) UPI - The father of convicted hacker Robert Morris thinks his son's trial was ''fair.'' But he also emphasizes that there's ''NOT a fraudulent or dishonest bone in his body.'' A federal jury in Syracuse, New York, Monday night found the younger Morris guilty of unleashing an electronic ''worm'' that crashed computer networks nationwide. He's the first person to be prosecuted under a portion of the 1986 Computer Fraud and Abuse Act. NO word whether there'll be an appeal.

Yugoslavia's Communist Party ended its three-day party congress early Tuesday, apparently more deeply divided than ever. Earlier Monday, the party agreed to abolish its own 45-year monopoly on power. The move could pave the way for multi-party elections in April. But serious rifts later developed between various factions when the party congress refused to approve other reforms. The meeting was thrown into disarray when liberal Slovenian delegates walked out in protest.

The Secret Service reportedly is investigating threats by Colombian drug lords against President Bush. The tips are said to include specific warnings the cartels will try to shoot down Air Force One as it lands at Cartagena, Colombia... the site of next month's drug summit. The White House says the president still plans to go to Colombia.

In Colombia Monday, the son of a top cabinet member was released by his cocaine hit squad kidnappers. He's the fifth person freed by the cartel hit squad known as ''The Extraditables'' since the group issued its conditional surrender in its war on the nation last Wednesday. The government has rejected the offer.

A federal magistrate in Boston has scheduled a detention hearing Thursday for a Colombian drug suspect extradited to Massachusetts to face charges

of selling cocaine in a major drug ring. The suspect was flown from Bogota to the United States Sunday morning.

#90023u0358 01/23/1990 ~United Press International

WASHINGTON (JAN. 23) UPI - Members of Congress returned to Capitol Hill for the start of a new session Tuesday, with the Senate ready to plunge into the debate on clean air laws and the House poised to challenge President Bush over a veto.

The lawmakers' two-month long break was scheduled to end at noon Eastern time with the start of the second session of the 101st Congress.

Many observers feel the election-year session has potential for major accomplishments as well as bitter political battles over Social Security and other issues.

Bush has made clear he will insist that Congress vote soon on his proposal to lower the capital gains taxes, something that eluded him last year.

The Senate, equally determined to pass a new clean air bill, planned to begin debating the measure on opening day, but a final vote may be far off.

An overhaul of the clean air act is backed by the administration as well as Democrats in Congress, but they differ on how far to go with new rules to clean up the air. Bush has hinted of a veto if Congress makes the new

rules too burdensome on business.

Senate Democratic leader George Mitchell of Maine rejected Monday White House charges that the Senate bill is too expensive. He told a news conference the bill's health benefits far outweigh its pollution control costs.

The only item on the House agenda Tuesday was a resolution commending the U.S. military forces who took part in the Panama invasion.

On Wednesday, however, the House is scheduled to vote on whether to override Bush's veto of the bill to extend the visas of more than 33,000 Chinese students who fear they will suffer persecution if they return home. Supporters of the bill were confident they can muster the two-thirds vote necessary to pass the bill over the president's objections.

The outcome of a Senate vote is less certain.

Bush vetoed the bill Nov. 30, but issued an executive order to extend the students' visas. He objected to the bill on grounds that it interfered with his foreign policy responsiblities and threatened to worsen the split between the U.S. and Chinese governments.

White House press secretary Marlin Fitzwater acknowledged Monday the president faces an uphill fight in trying to sustain the veto. He said the administration has been trying to make members of Congress aware of the steps already being taken to protect Chinese students in the United States.

''We are hopeful that members of Congress now have a better understanding of the assurances that have been given to students and that they will have some impact (on the veto override vote),'' Fitzwater said.

Several committees scheduled hearings for the first week back, begining with the House Banking and Urban Affairs Committee's look Tuesday at the status of the government's efforts to resuscitate the savings and loan industry.

The first hearing on the Panama invasion was scheduled for Thursday when the Senate Foreign Relations Committee receives testimony on the current situation in Panama.

The Senate Armed Services Committee planned two days of hearings on the changing Soviet military threat.

#90023u0359 01/23/1990 ~United Press International

(JAN. 23) UPI - Police stations in northwest suburban Boston were flooded

with hundreds of calls Monday evening after a small earthquake shook the area. Dr. John Ebel, the assistant director of Boston College's Weston Observatory, says the tremor... which measured two-point-five on the Richter scale... lasted just a few seconds and was centered about two miles south of Littleton. Ebel called the quake ''just a little bump in the night.''

Federal agents and Army bomb experts with dogs apparently came up empty-handed Monday in their search for evidence in last month's mail bombings that killed two people. Authorities questioned Wayne O'Farrell, but released him after searching the current and former sites of his military surplus store in Enterprise, Alabama. O'Farrell's home in nearby New Brockton also was searched. NO arrests were made. One F-B-I agent says law officers were looking for- quote- ''bomb-making paraphernalia.''

Lawmakers return to Capitol Hill Tuesday for the start of a new session, part two of the 101st Congress. The Senate plans to begin right away with a debate on an overhaul of the clean air act. But a final vote may be far off. The only item on the House agenda Tuesday was a resolution commending the U-S military forces who took part in the Panama invasion.

Senate Democratic leader George Mitchell of Maine is rejecting White House charges that the Senate clean air bill is too expensive. He told a news conference in Washington Monday that the bill's health benefits far outweigh its pollution control costs.

(JAN. 23) UPI - Musicians have lost the battle against the unlimited use of taped music in some Las Vegas showrooms under terms of a four-year agreement announced Monday night. The settlement ends a bitter strike that began almost eight months ago against five mega-casino resorts. The exact contract terms were NOT revealed.

The three-day-old strike at the Port of Baltimore ended Monday night after waterfront employers and representatives of the dock workers agreed to allow a vote on a contract proposal. Union leaders say workers will be back on the job Tuesday morning.

New Englanders dug out Monday from the first ''nor'easter'' of the decade. The weekend storm dumped between four and 10 inches of snow across the region... much to the delight of winter resort operators in Vermont and New Hampshire, whose ski slopes had been left with bare spots by a January thaw.

#90023u0382 01/23/1990 ~United Press International
TOKYO (JAN. 23) UPI - Prime Minister Toshiki Kaifu prepared Tuesday to dissolve the powerful lower house of parliament and call general elections next month in response to his administration's poor popularity rating.

Kaifu, 58, called on Emperor Akihito Tuesday to report on his recent tour of both Western and Eastern Europe and his resolve to dissolve the lower house and hold general elections, government sources said.

A national opinion survey conducted last weekend indicated that public support for Kaifu's administration improved slightly over the past month but was outclassed by the number of non-supporters, the national daily Asahi Shimbun reported Tuesday.

The daily said 37 percent of those surveyed supported Kaifu's government, up from 35 percent in December, but the number who said they did not support him rose to 41 percent from 40 percent during the same period.

The paper said public support for the ruling Liberal Democratic Party stood at 48 percent, compared with 30 percent for the No. 1 opposition Japan Socialist Party.

Political sources said the Liberal Democrats and opposition parties formally agreed to dissolve the lower house Wednesday afternoon after approving three pending bills, including one that allocated government subsidies to farmers.

The government will proclaim on Feb. 3 that the election will be held Feb. 18, the sources said.

Government spokeswoman Mayumi Moriyama told reporters a regular Cabinet session scheduled for Friday had been cancelled.

It will be the first national election since Kaifu took office Aug. 9 after his two predecessors stepped down in a three-month period amid bribery and sex scandals.

His Liberal Democratic Party, which has been in power since its founding in 1955, lost for the first time a majority in the upper house of Parliament in an election last July.

Political analysts blamed the party's setback on the lingering impact of the bribery scandal and Japan's first sales tax, introduced in April.

Most senior party leaders, including former prime minister Noboru Takeshita, were involved in the scandal which surfaced in the summer last year.

Recruit Co., a major publishing and information service conglomerate at the center of the scandal, was accused of distributing a large number of pre-listed shares of its subsidiary to selected political and public figures to expand its business.

A total of 14 people, including Recruit's founder and former chairman Hiromasa Ezoe, now stand trial on bribery charges.

Opposition parties have vowed to make the sale tax the top political issue for the election. They forced legislation to abolish the tax in the upper house last month.

The leader of Japan's most powerful labor organization, Rengo, predicted the Liberal Democrats will lose its majority in the lower house in the next election.

''The LDP has a 40 percent chance of losing its majority in the lower house,'' Akira Yamagishi, chairman of Rengo, told a meeting of the All Japan Telecommunication Workers' Union in Tokyo Monday.

The pro-Western conservative party won a landslide in the previous national election held for both houses in July 1986.

Party secretary general Ichiro Ozawa said the Liberal Democrats will go all out to win at least 270 seats in the 512-seat lower house. It currently holds 294 seats in the chamber.

Kaifu planned to make a policy speech in both chambers before dissolving the lower house but reluctantly dropped the plan under pressure from party seniors, who put him into power last August.

The Liberal Democrat's failure to clinch a majority in the next election will cost him his job, although his current two-year term as party president runs through October 1991, political analysts said.

The current four-year term for the lower house is due to expire in July this year.

#90023u0401 01/23/1990 ~United Press International

WEST BERLIN (JAN. 23) UPI - More than 100,000 people, calling for the disbanding of the beleaguered Communist Party and reunification of Germany demonstrated in numerous East German cities.

The rallies Monday coincided with a growing problem within the party that reached crisis proportions Sunday when the party's deputy chairman, Wolfgang Berhofer, and 39 other officials resigned their membership.

In the southern city of Leipzig alone an estimated 100,000 people protested communist policies.

''Down with the SED'' one banner urged. The Communist Party is formally known as the Socialist Unity Party of Germany - Party of German Socialism, or SED-PDS. It is often shortened to SED. Other slogans called for German reunification.

Similar protests also were held in other East German cities, in what has become a Monday night tradition since huge pro-democracy demonstrations last fall forced the resignation of the country's hard-line communist leadership and led to the breaching of the Berlin Wall.

Prime Minister Hans Modrow, himself a pro-reform communist, said he had accepted Nickel's resignation Monday after Leipzig's state prosecutor announced over the weekend he had begun an investigation into the charges against her.

Nickel was accused of authorizing illegitimate payments while she was a city official in Leipzig, but Modrow said she was not charged with profiteering.

''Mrs. Nickel energetically rejects the accusations,'' Modrow said.

Modrow denied reports in a West German newspaper that former East German secret police were preparing for insurgency.

The mass-circulation daily Bild said the Stasi, backed by some army units, were arming themselves in preparation for a civil war that would aim at toppling the government. Modrow described the report as a ''provocation.''

-30- 2012

#90023u0413 01/23/1990 ~United Press International

(JAN. 23) UPI - Ronny Thompson didn't get his father's permission during the game, but received his praise afterward.

Trailing by a point in the game's closing seconds, Georgetown Coach John Thompson diagrammed a play that he thought would bring the third-ranked Hoyas a victory. But his son Ronny, who happens to play forward on his dad's team had another idea.

Ronny Thomspon made an inbounds pass to Alonzo Mourning, who converted it into an easy lay-in and was fouled with 18 seconds to go. The basket stood

as the game-winner as the Hoyas earned a hard-fought 70-69 victory over Villanova in a Big East game.

''It was my son's decision,'' Thompson said of the pass. ''He was talking to me on the play since I was standing behind him. I wanted to get Mark (Tillmon) off a double screen and have Dikembe (Mutombo) set a down screen for Alonzo.

''Ronny kept saying he was going to throw it to Alonzo. I said, 'No. Yes. Be careful.' He made a good decision.''

The younger Thompson had complete confidence in Mourning.

Not so fast, Ronny.

Lance Miller missed a layup for the Wildacats at the other end but the ball went out of bounds to Villanova with five seconds to play. Mark Tillmon, who led the Hoyas with 26 points on 9-of-26 shooting, then blocked a shot by Chris Walker. Walker got the ball back, but his desperation heave at the buzzer was off the mark.

Georgetown, which suffered its only loss to Connecticut last week, improved to 15-1 overall and 5-1 in the Big East.

''We had every opportunity to win but they made the big shot,'' Villanova Coach Rollie Massimino said.

Villanova, 11-9 and 3-4, got 16 points from Miller, 13 from Chris Walker and 12 from Woodard. The Wildcats made only seven of 31 shots from the field in the second half and 16-of-54 (29.6 percent) for the game.

But the Wildcats stayed close with a pertering defense that held Mourning in check all night until his last-minute heroics.

''It was a big shot in that it won the game but anybody on the team was capable of hitting the shot,'' said Mourning, who scored 19 points made just 4-of-11 shots from the field. ''It was an easy shot. The defense concentrated on stopping a jumper so I was able to spin and turn and get a layup.''

Georgetown shot only 22-for-58 (37.9 percent) as a team.

--- AROUND THE COLLEGE SCENE ---

Elsewhere in the Top Twenty, No. 5 Nevada-Las Vegas downed Long Beach State 86-77; No. 7 Duke demolished William & Mary 109-76; No. 9 Arkansas busted Houston 100-89 and La Salle ripped Loyola (Md.) 89-69.

At Williamsburg, Va. Phil Henderson scored 25 points and Alaa Abdelnaby added18 to power Duke in a rout of the Indians. The Blue Devils made 38 of 43 free throws and raised their record to 14-3. The Indians fell to 4-12.

At Fayatteville, Ark., Mario Credit and Ron Huery scored 21 points each to lead the Razorbacks, 15-2 overall and 7-0 in the Southwest Conference, over the Cougars. Arkansas took an early 6-5 lead and nefver trailed. Chris Morris led Houston, 12-6 and 3-3, with 26 points, making 9 of 10 shots.

At Philadelphia, Lionel Simmons scored a game-high 36 points and grabbed 14 rebounds to help the Explorers improve to 13-1 and 4-0 in the Metro Atlantic Athletic Conference. La Salle has won 26 of the last 27 meetings between the two schools. Kevin Green led Loyola, 3-13 and 1-5 with 22 Points.

At Madison, Wis., Patrick Tompkins put in an alley-oop inbounds pass from Kurt Portmann at the buzzer that gave Wisconsin a 77-75 victory over Minnesota in a Big Ten game. The Badgers led by as many as 21 points with 12:03 left and still held a 64-49advantae with 8:52 to go before the Golden Gophers went on a 17-2 run to tie it at 66-66. Willie Burton, who led Minnesota with 24 points, gave the Gophers a 75-73 lead with a three-pointer with 1:13 to go. Danny Jones then tied it to set up the game-winer. The Badgers, 11-7 and 2-4, got 22 points from Willie Simms, Tim Locum had 20 and Jones added 19. Minnesota fell to 12-4 and 3-3.

In other games it was: Holy Cross 64, Lafayette 62; Slippery Rock 86, Indiana Pa 66; West Virginia 82, St. Josephs (Pa.) 72; Austin Peay 67, Middle Tenn. St. 62; Marshall 78, Furman 55; New Orleans 77, S. Mississippi 75; North Carolina 73, Wake Forest 61; Old Dominion 94, Jacksonville 71; Tulane 82, Nicholls St. 69; W. Kentucky 68, E. Kentucky 66 (2OT); Cleveland St. 89, SW Missouri St. 86; Creighton 68, Indiana St. 66; Marquette 65, St. Louis 59; Texas 97, Texas Tech 77; Colorado St. 60, Air Force 47 and Wyoming 95, Nebraska 65.

#90023u0458 01/23/1990 ~United Press International

LOS ANGELES (JAN. 23) UPI - German duo Milli Vanilli and country singer Randy Travis were triple-winners as dance music dominated the 17th Annual American Music Awards.

Five dance acts - Janet Jackson, Bobby Brown, Paula Abdul, rapper M.C. Hammer and New Kids On The Block - each won two awards Monday night, along with heavy-metal rockers Guns 'N Roses.

Milli Vanilli, another dance act, won for favorite new pop-rock artist, favorite new soul/rhythm-and-blues artist, and favorite pop-rock single

for ''Girl You Know It's True.''

The song comes from an album of the same name that has sold 5 million copies in the past year and was still ranked No. 3 on the latest Billboard Top 20 album chart.

''This is for East Germany and West Germany,'' Milli Vanilli's Rob Pilatus said in an acceptance speech.

Travis, winner for favorite country male vocalist, country album for ''Old 8 X 10,'' and single for ''Deeper Than The Holler,'' said he was still excited about winning awards. ''It lets you know people still care.''

Travis attributed his success to quality songs, solid production, and keeping songs simple.

''And I was lucky enough to be able to sing a little,'' he said.

For the eighth consecutive year, the group Alabama was named favorite country duo or group.

Abdul, a former Los Angeles Lakers cheerleader whose debut album has sold 4 million copies, won for favorite pop-rock female vocalist and favorite dance artist.

''I'm just a happy girl,'' Abdul said. ''It's just been wonderful.''

Jackson's single, ''Miss You Much,'' from her ''Rhythm Nation 1814'' album won for favorite soul/rhythm-and-blues single and favorite dance single.

New Kids On The Block, five teenage boys from Dorchester, Mass., won for favorite pop-rock album with their ''Hangin' Tough,'' and pop-rock group. The quintet, a favorite among junior high and high school girls, now has three albums on the charts that have sold a combined 9 million copies.

''Hangin' Tough,'' one of 1989's top commercial successes, has sold 6 million copies and has spent nearly a year on the charts.

''Not bad for five boys from Dorchester,'' said band member Donny Wahlberg. He attributed the group's success to their danceable tunes and the band members' individual appeal.

Brown, formerly with the New Edition, won for top soul/rhythm-and-blues album with ''Don't Be Cruel,'' a brash mix of rebellious rap and catchy harmonies, and for favorite pop-rock male vocalist.

Brown, although claiming not to be ''into awards,'' said he was ''overwhelmed'' with the album honor. ''I did not think I was going to win

anything. It's a big surprise. I didn't think awards were for me.''

Hammer won the rap album award for his ''Let's Get It Started,'' and for favorite rap artist. The album produced a hit single, ''Turn This Mother Out.''

The O'Jays, who haven't had a hit for years, were the surprising choice for favorite soul/rhythm-and-blues group. They beat out Soul II Soul, a British dance-music group with two two current hit singles and a platinum album.

Soul II Soul, which tied with Brown for most nominations with five, was shut out for awards.

Guns N' Roses, a Los Angeles group that has been criticized for lyrics interpreted by some as anti-black and anti-homosexual, won for favorite heavy metal album, ''Appetite for Destruction,'' and heavy metal artist.

Band members Slash and Duf McKegen spiced up the live broadcast with profanity during their second acceptance speech.

Twenty-seven awards were handed out to the most popular artists in six broad categories, including dance, pop/rock, soul, country, heavy metal and rap.

Music critics and the public declared ''disco'' music dead in the early 1980s, but an updated wave of dance music has returned to the top of the music scene in the past year.

Executive producer Dick Clark said dance music was added as an award category this year to acknowledge the emerging dominance of dance songs and artists in pop music.

Dance artists dominated the nominations. Brown and Soul II Soul racked up five nominations each. Paula Abdul, Tone Loc and Milli Vanilli followed with four apiece.

Based on votes cast by a national sampling of 20,000 record buyers, the American Music Awards are more a measure of popularity and commercial success than the more established Grammy Awards, which are chosen by members of the music industry and will announced later in the spring.

In honorary categories, co-host Anita Baker presented Prince with an Award of Achievement for his ''outstanding contributions to the music industry.''

Prince, who scandalized some people earlier in his career for his suggestive lyrics and onstage antics, was selected for the honor by a panel of industry professionals. Last year's winner was Michael Jackson.

Neil Diamond, who has gone years without a hit record but continues to play to sold-out concerts, was given the Award of Merit in recognition of his three-decade career.

#90023u0490 01/23/1990 ~United Press International
(JAN. 23) UPI - ALMANAC:

Today is Tuesday, Jan. 30, the 30th day of 1990 with 335 to follow.

The moon is waxing, moving toward its first quarter.

The morning stars are Mercury, Venus, Mars and Saturn.

The evening star is Jupiter.

Those born on this date are under the sign of Aquarius. They include Franklin D. Roosevelt, 32nd president of the United States, in 1882; historian Barbara Tuchman in 1912; actress Dorothy Malone in 1925 (age 65); actor Gene Hackman in 1931 (age 59); Louis Rukeyser, host of TV's ''Wall Street Week,'' in 1933 (age 57); and actresses Tammy Grimes in 1936 (age 54), Vanessa Redgrave in 1937 (age 53) and Victoria Principal in 1945 (age 45).

On this date in history:

In 1835, a gunman fired twice on President Andrew Jackson, the first attempt on the life of a U.S. president. Jackson was not injured.

In 1933, Adolf Hitler became chancellor of Germany.

In 1948, Indian leader Mahatma Gandhi was assassinated by a Hindu extremist.

In 1968, the communist Viet Cong attacked the South Vietnamese capital of Saigon, temporarily occupying the U.S. Embassy.

In 1979, the Iranian government announced it would let exiled Shiite Moslem leader Ayatollah Khomeini return. Washington responded by ordering the evacuation of all American dependents from Iran.

A thought for the day: President Franklin D. Roosevelt said, ''I have no expectation of making a hit every time I come to bat.''

SYRACUSE, N.Y. (JAN. 23) UPI - The father of a young computer expert convicted of scrambling thousands of computers nationwide with a hi-tech ''worm'' said the landmark trial was fair but his son doesn't have a ''dishonest bone in his body.''

After nearly 7 1/2 hours of deliberation Monday, the jury convicted Robert Tappan Morris, 24, of Arnold, Md., of designing a program that shut down some 6,000 computers on nationwide networks, a felony charge under a new law designed to discourage computer fraud.

The defendant managed only a silent smile as his family huddled with defense attorney Thomas Guidoboni following the verdict. U.S. District Judge Howard Munson released the former Cornell University graduate student on his own recognizance and scheduled a hearing for new motions Feb. 27 in U.S. District Court in Albany.

Morris was the first person to be prosecuted under a portion of the 1986 Computer Fraud and Abuse Act. He faces up to five years in prison and a $250,000 fine.

''Anyone would have come to the same conclusion,'' the defendant's father,

also named Robert Morris, acknowledged in discussing the verdict. ''I think the trial was a fair one, and he had an opportunity to state his case and he did so.''

But the father, a chief scientist for the the National Security Agency's computer security division, emphasized, ''It's perfectly obvious there is not a fraudulent or dishonest bone in his body.''

The family would not discuss the case during the preceding two weeks of testimony, and the elder Morris continued to refuse to talk about any ramifications the decision might have on his profession.

''I'm more interested in my family and my son right at the moment,'' he said.

The younger Morris, who strode off silently with his girlfriend as dozens of reporters asked for comments on the verdict, testified Thursday that what happened on Nov. 2, 1988, was an experiment gone awry, a ''dismal failure.''

The government argued he intentionally wrote the program to break into ''federal interest'' computers he was not authorized to use, and that by doing so, prevented their authorized use and caused a minimum of $1,000 in damage.

''Obviously what the jury was saying was in this particular case the government had proven its case beyond a reasonable doubt,'' said Justice Department prosecutor Mark Rasch.

Justice Department attorney Ellen Meltzer, who along with Rasch prosecuted the case, said a sentencing date probably would be set at the hearing.

The government can be expected to file a memorandum recommending a penalty for Morris one week before the sentencing date, said Meltzer, who insisted that at no time has she or Rasch indicated they will seek the maximum penalty.

''The government will file an appropriate sentencing memorandum,'' Rasch said. ''A felony is a serious offense. It (the worm) has had a profound effect on users of computers across the country.''

Guidoboni expressed disappointment in the verdict and said he would not discuss possible appeals until after the hearing, where he said he would motion for an aquittal.

Morris's worm invaded the Internet and Arpanet computer networks, which link military, government, business and university computer centers, and the program replicated out of control within the systems.

The affected computers included ones at a National Aeronautics and Space Administration facility at Moffett Field, Calif., and the Air Force Logistics Commstem at Wright-Patterson Air Force Base in Dayton, Ohio.

Guidoboni said in his closing argument that Morris did not intend for his program to cause damage or shut down computer systems. He noted that defense witnesses said Morris inserted commands in the program designed to limit its growth, preventing it from clogging the systems it entered.

The government said the defense argument that the worm did no permanent damage to computer memories did not constitute a valid defense.

Morris, who is currently working on computers at his alma mater, Harvard University, was suspended from Cornell until September after a university committee determined he created the program.

The panel said the program propagated itself through a computer system and was therefore a ''worm'' and not technically a computer ''virus,'' which is a program that inserts itself into a host program to propagate.

#90023u0533 01/23/1990 ~United Press International

SOFIA, Bulgaria (JAN. 23) UPI - Thousands of public transport workers returned to work after the first organized strike - a 13-hour walkout that earned them a pay increase and agreement to their other demands.

Also Monday, the Communist Party granted opposition groups access to television and the right to publish a newspaper for the first time in more than four decades.

The official news agency BTA said the strike began early Monday, crippling public transport and forcing thousands of residents to walk or take cabs to their jobs. The agency said all the demands of the bus and electric bus drivers and other transport workers were met and they resumed their work later Monday.

In an indication that Bulgarian workers are becoming better organized under the reforms sweeping Eastern Europe, the 4,000 transport workers formed a Strike Committee that demanded firing of the transport director and his deputies and urged management to give them unspecified wage increases.

The strikers had ignored a call by municipal authorities to return to work.

''The strike is just, and a last measure against the tardy reaction of the company's management to the demands placed more than a month ago,'' the

strike committee spokesman said.

During the first day of a second round of talks aimed at changing Bulgaria's political system, the Communist Party granted opposition political groups access to television and the right to print an independent newspaper for the first time in four decades.

The spokesman for the independent groups said the new daily newspaper, called Democracy, will have an initial circulation of 70,000. Opposition newspapers have published underground in the past, but Democracy will be the first to be legally permitted by the Communist Party.

The first round of the round-table talks between leaders of the Communist Party and new independent groups, including representatives of the free labor union Podkrepa, which is similar to Poland's Solidarity, began Jan. 3.

Also Monday, BTA said deposed Communist Party leader Todor Zhivkov, 75, who was recently arrested on charges of abuse of power, is likely to be handed a verdict of up to 30 years in jail.

Zelu Zelev, the Chairman of the Union of Democratic Forces which is an umbrella organization for several opposition groups, said the discussion at the round-table will focus on quick dismantling of the remnants of the communist system.

''Rapid dismantling of the totalitarian system should be sped up,'' he said.

He said laws must be worked out on how to depoliticize the communist-controlled army and police as well as to create principles on the operation of the other new parties, which are expected to be formed.

The new round of talks was scheduled to run for about two weeks, during which leaders of the independent groups will be allowed to appear on television and present their views.

#90023u0541 01/23/1990 ~United Press International

GENEVA (JAN. 23) UPI - The United States and Soviet Union, in a breakthrough toward a strategic arms reduction treaty, said they have agreed on trial inspections of each side's nuclear warheads.

The agreement to view each other's nuclear warheads would have been unthinkable a year ago and resulted from what U.S. delegate Richard Burt and his Soviet counterpart, Yuri Nazarkin, called a new era in superpower relations.

Letters formalizing the accord on the inspections were signed and exchanged by chief arms negotiators at an earlier-than-scheduled resumption of the talks on 50 percent cuts in long-range strategic nuclear arsenals.

Burt and Nazarkin have instructions from presidents George Bush and Mikhail Gorbachev to complete a basic treaty outline in time for the next superpower summit in June.

At the last round of talks, which ended Dec. 8, the two powers agreed to experiment with such proposed treaty compliance verification measures as ''tagging,'' or electronically labeling, missiles and putting heavy bombers on display.

''This agreement to conduct trial re-entry vehicle inspections marks the

first time in history that the United States and the Soviet Union will inspect each other's nuclear warheads,'' an American delegation statement said.

''As such, it is not only an important step toward an effectively verifiable START (Strategic Arms Limitation) treaty, but also a step toward greater transparency, and, hence, greater predictability, in the U.S.-Soviet strategic relationship,'' it said.

The statement said that U.S. experts will demonstrate procedures for monitoring warheads for the peacekeeper land-based intercontinental missile and the Trident II sea-launched strategic missiles. Moscow will do the same for warheads on its SS-18 intercontinental and SS-N-23 sea-launched missiles.

''A date will soon be set for the first trial inspections, which will be in the United States of a peacekeeper missile,'' the statement said.

''The purpose of the trial inspections is to demonstrate procedures for verifying that the number of re-entry vehicles on a ballistic missile is no greater than the number permitted on that type of missile, as will be specified in the START treaty,'' it said.

Re-entry vehicles are commonly known as warheads. Up to 10 in number, they separate from the ''delivery vehicle'' - a missile or bomber - at high altitude and guide themselves down to strike different pre-assigned targets.

Washington and Moscow aim in the planned START treaty to limit each other to 6,000 strategic nuclear warheads on 1,600 missiles and bombers.

Negotiators are working on a draft treaty outline and accompanying protocols, which already run to more than 1,000 pages.

''There is a good chance of having the major pieces together by June, but everyone, including President Bush, realizes that the final legal language needed for signing a treaty will take longer,'' a U.S. delegate said.

The latest round of negotiations was the 13th since the outset in 1985 and was opened by Burt and Nazarkin at a one-on-one meeting in the afternoon at the U.S. delegation.

Under pressure from the national leaders, the talks were resumed without waiting as had been planned until after the Feb. 6-7 meeting in Moscow between U.S. Secretary of State James Baker and Soviet foreign minister Eduard Shevardnadze.

Officials said Burt and Nazarkin would go to Moscow for that meeting and

probably receive new instructions designed to accelerate work on the START treaty.

Negotiations will mainly take place in various working groups and likely run without break to around the end of May, they said.

Baker said recently that prest least a ''political agreement'' on a START treaty in time for their June summit in Washington.

The Geneva talks originally covered medium-range missiles as well as strategic weapons and anti-missile Star Wars space defense research.

Elimination of ground-based intermediate missiles was reached in 1987 when Gorbachev accepted on-site compliance inspections and dropped demands for a parallel ban on the U.S. Strategic Defense Initiative, or ''Star Wars,'' space program.

One major issue for reducing long-range weapons involves sea-launched subsonic and low-flying cruise missiles. Moscow wants them included in the treaty, but Washington says verification would involve overly intrusive inspection of ships and naval ports.

-30- 4678

#90023u0552 01/23/1990 ~United Press International

(JAN. 23) UPI - Fog and sub-freezing temperatures made roads treacherous in New England and rain smacked Oregon's Pacific coast Tuesday, but most of the nation got a break from the January chill and enjoyed mild, unseasonably warm weather.

Authorities advised motorists in Rhode Island and Massachusetts to use extra caution and said patches of dense fog were causing poor visibility. National Weather Service forecasters also warned that roads already wet from heavy rain and snow were freezing over and becoming slick.

Temperatures dropped to the upper 20s in southern New England and further north, New Hampshire reported temperatures in the upper teens with light snow and fog.

In the West the Oregon coast got the brunt of another storm as a fast-moving weather front spread rain from one end of the state to the other Monday. Seaside, Ore., recorded nearly an inch in the 24 hours through 5 p.m., while inland areas recorded much lighter amounts.

Mild Pacific air also sent temperatures warming into the mid 40s to mid 50s statewide, while Brookings, a traditional warm spot on the south coast had the state's high at 61 degrees.

In California, dense morning fog settled in the southern San Joaquin Valley.

Mild January weather continued across the Midwest and upper Great Lakes early Tuesday. Skies were cloudy in north and clear in the south, with temperatures ranging in the 20s and 30s.

High pressure provided fair but chilly weather for most of the South, with some fog in Alabama valleys and lakes. Jacksonville, Fla., reported 41 degrees early in the morning, while Atlanta was at 45 and Miami at 68.

Temperatures warmed up throughout the Southwest Tuesday and parts of Oklahoma were averaging around 10 degrees above normal so far in the new year.

''If current trends continue, this month may become one of the warmest Januarys on record in Oklahoma. This is especially remarkable, since it follows one of the coldest Decembers on record,'' the weather service said.

The same was true in Arkansas, where temperatures Monday ranged from 61 degrees at Jonesboro to 70 at Texarkana, readings 10 to 20 degrees above normal for this time of year.

Monday's high temperatures in Texas were generally in the 60s and 70s throughout the state. The highs only reached into the low 40s in the northern panhandle, where snow remained on the ground.

Clear skies prevailed over most of the mid-Atlantic states, but parts of New Jersey and Delaware saw some patchy fog near daybreak. Snow touched northwestern Pennsylvania, and eastern parts of the state had a few flurries.

LIMA, Peru (JAN. 23) UPI - A strong earthquake Tuesday rocked the central coast of Peru, but there were no immediate reports injury or damage, the Geophysical Institute of Peru said.

The quake, measuring 5.1 on the Richter scale, occurred at 3:47 a.m. and was centered about 50 miles southeast of Pisco in the Pacific Ocean, the institute said.

The temblor was felt in Pisco and about 110 miles to the northwest in the capital city of Lima, authorities said. There were no immediate reports of casualties or damage.

-30- 682

#90023u0704 01/23/1990 ~United Press International

(JAN. 23) UPI - House Republicans join the clamor against President Bush's China policy... Bush himself goes to Kansas City today for an anti-drug appearance... and Japan's prime minister asks to call new elections. These stories... and more... next from the wires of United Presss International.

The second session of the 101st Congress opens today. And as it does, Capitol Hill will see a rare display of bipartisan unity.

Democrats and Republicans are joining forces to blunt President Bush's diplomatic overture to Chinese leaders who ordered last June's brutal government crackdown on the pro-democracy movement.

A Senate Judiciary subcommittee will hold a hearing today to discuss the reported harassment of Chinese students by diplomats attached to the Chinese Embassy.

Tomorrow, the House is expected to kill the presidential veto of a bill allowing Chinese students to stay in the United States rather than return home to possible persecution.

The outcome in the Senate is uncertain.

Both chambers passed the measure unanimously last November. When Bush vetoed it November 30th, he said it threatened to worsen the split between the U-S and Chinese governments. But he issued an executive order to extend the visas of more than 33-thousand Chinese students.

Some lawmakers feel that's NOT enough. In the words of Republican Representative William Broomfield of Michigan- ''This is an opportunity for Congress to go on record about how we feel about human rights in China.''

Another item on the docket of this election-year session is an overhaul of the nation's clear air laws. The Senate plans to plunge into the debate right away... but a final vote may be a long way off.

Bush has made clear he will insist Congress vote soon on his proposal to lower the capital gains taxes... something that eluded him last year.

A number of other committees have scheduled hearings the first week back. The House Banking and Urban Affairs Committee will take a look today at the status of the government's efforts to revive the savings and loan industry.

The first hearing on the Panama invasion is set for Thursday. That's when the Senate Foreign Relations Committee will receive testimony on the current situation in Panama. And the Senate Armed Services Committee plans

two days of hearings on the changing Soviet military threat.

-30- 2553

#90023u0730 01/23/1990 ~United Press International

(JAN. 23) UPI - President Bush goes to Kansas City today to praise a citizen's group for standing up to drug dealers.

Two days before the scheduled release of an updated national anti-drug strategy... Bush will salute the group hailed as a model for inner-city residents fed up with drug crimes.

The Ad Hoc Committee on Crime has championed what police call a confrontational approach that includes street marches to stand up to dealers and the intimidation of landlords who tolerate drug activity by their tenants.

But police admit it often just moves the crime to different locations.

Bush will meet with community activists at Metropolitan Missionary Baptist Church... tour an area of boarded-up crack houses... and address law enforcement officers.

Bush has NOT been commenting on the arrest of Washington, D-C, Mayor Marion Barry allegedly for using drugs... except to say that it was ''sad.''

President Bush met with senior N-double-A-C-P leaders yesterday and assured them his administration would fight what the civil rights leaders are calling an increase in acts of racial violence.

The organization's executive director... Benjamin Hooks... urged greater contact between federal agents and his group's 17-hundred chapter leaders.

Attorney General Thornburgh and F-B-I Director William Sessions sat in on the meeting and said progress is being made in the investigation into the bombings of N-double-A-C-P offices.

Hooks says many blacks feel the arrest of Washington, D-C, Mayor Marion Barry is evidence that the white establishment is harassing elected black officials.

Vice President Quayle told Boston Republicans yesterday that the party failed to take a leadership role in the struggle for civil rights in the 1960's. Quayle says the G-O-P should work to change its image on civil rights.

(JAN. 23) UPI - Japan's prime minister is preparing to dissolve the powerful lower house of parliament and call general elections next month.

Political sources say the ruling Liberal Democrats and opposition parties have agreed formally to dissolve the lower house tomorrow afternoon after approving three pending bills. According to the sources, the government will proclaim February 3rd that the election will be held February 18th.

It'll be the first national election since Prime Minister Kaifu took office August 9th. His two predecessors resigned during a three-month period of bribery and sex scandals.

The move to call general elections comes on the heels of a national opinion survey that gave Kaifu's government poor marks.

The poll conducted last weekend indicated public support for Kaifu had improved slightly during the past month. But during the same time period, the survey also found an increase among the number of people who said they did NOT support him.

Government sources say Kaifu called on Emperor Akihito today to report on his recent tour of both Western and Eastern Europe... and express his intent to dissolve the lower house and call general elections.

#90023u0736 01/23/1990 ~United Press International
(JAN. 23) UPI - The planned American testing of an unarmed cruise missile over Canada's northern territories later today will be all but ignored by peace and environmental groups.

A spokesman for the Toronto-based Greenpeace says that while the missile tests issue is ''by NO means dead''... the group is concentrating on other things.

Earlier tests of the cruise missile and last year's test of an advanced ''stealth'' cruise missile were vigorously protested by peace groups.

The missile is scheduled to be launched from a U-S B-52 bomber over the Beaufort Sea in the Canadian Arctic this morning . It will follow a four-hour course to the target area at the Primrose Lake Evaluation Range at Cold Lake in northern Alberta.

Along the way, Canadian and U-S fighter jets will attempt to locate and track the missile.

60 students and activists stormed a regional headquarters of Poland's communist party and confiscated private files. The occupation came as pressure mounts on the communists to divulge how much property the party owns.

Squads of police surrounded the four-story building after it was occupied by activists from the political party Confederation for Independent Poland and from the Independent Students Association.

At the same time... Solidarity leader Lech Walesa was meeting with a leader of the communist party's progressive wing in Gdansk to discuss the property dispute. NO agreement was reached.

The communists never have divulged details of their vast assets... which include hundreds of buildings... publishing houses... scientific institutions and other enterprises seized by the party after World War Two.

#90023u0860 01/23/1990 ~United Press International

BY JAN A. ZVERINA

DETROIT (JAN. 23) UPI - Mercedes-Benz has for 1990 advanced the state of open motoring in both design and price with its 300SL and 500SL models, its first significantly new roadsters in 18 years.

The two-seaters, which range in price from a whopping $72,500 to $83,500, replace last year's 560SL that cost a paltry $64,230 by comparison. Prices exclude federal gas guzzler taxes ranging between $500 and $1,300, depending on model.

Mercedes' new roadsters mark the culmination of a six-year design effort by the West German carmaker, which is heralding them as its safest and most technologically advanced cars ever.

Standard features include supplemental air bags for both driver and passenger, a seat belt system that is an integral part of the seat, and a roll bar that automatically raises in under a half-second if a rollover is imminent.

The 500SL is powered by a 32-valve 5.0 liter V8 engine and 4-speed automatic transmission. Although smaller than last year's 5.6 liter V8, horsepower is up by 42 percent, to 322.

EPA fuel economy, however, is a dismal 14 city-18 mpg highway.

The 300SL has a 24-valve 3.0 liter inline six-cylinder engine. At 228 hp,

it is 14 percent more powerful than the 4.5 liter V8 found in Cadillac's Allante, the SLs' closest U.S. competitor.

Not counted in the 300SL's price is a guzzler tax of between $500 and $850 depending on whether the new 5-speed automatic ($1,000 extra) or 5-speed manual gearbox is chosen.

EPA fuel mileage estimates range from 15 to 22 mpg.

Both SLs continue the front-engine/rear-drive layout. They are over four inches shorter than last year, making them about the same size as a Corvette.

Wheelbases, however, are stretched 2.3 inches to 99. Overall width is increased by less than an inch to 71.3, but the front and rear tracks have been widened by over two inches.

Both have long, sloping hoods and short decklids. The lower half of their bodies have a plastic cladding that is integrated into the bumpers. The windshield has a unique single arm wiper that clears 91 percent of the glass.

Each SL has a removeable, 74-pound hard top in addition to a folding soft top designed to fully retract or raise with a touch of a button. Adopting a concept first used on Mazda's RX-7, a screened panel behind the front seats can be raised to minimize wind turbulence during open driving.

Evaluated was a 500SL that had racked up more than 8,300 miles at the unmerciful hands of other automotive journalists. As tested, it cost $85,050, including the $250 destination fee.

The only extra-cost options offered are heated seats ($505) and orthopedic seats, at $325 each.

The 500SL seems more spacious and has a decidedly modern feel inside when compared with the 560SL.

Gone is the dated but pleasant dashboard, replaced by a modern design with a hooded instrument panel. But its electrically adjustable steering wheel still obstructs the fuel gauge at all times and the top of the speedometer when in its lower position.

All SLs have a new, automatically operated soft top. A console-mounted button lowers the windows, unlatches the top and operates the compartment cover, all in about 30 seconds via 15 hydraulic cylinders and 11 solenoid valves.

Unfortunately, the test car's top refused to retract completely, requiring

an adjustment Mercedes says must be done after extensive use.

On the road, the 4,145-pound 500SL has a surprisingly soft ride for a car capable of reaching 60 mph from standstill in a shade over six seconds while keeping total composure during spirited slalom runs.

Both SLs share suspension systems with Mercedes' compact 190 and mid-sized 300 series sedans.

One can also easily be lured well past the speed limit if a sharp eye is not kept on the speedmeter - testimony to the 500SL's superb balance of ride and power. Also noted was precious little cowl shake without the hard top in place, thanks to a more rigid body design.

But Mother Nature is still the Great Equalizer of all cars great and small. One of Michigan's infamous ice storms rendered the 500SL nearly useless despite its sophisticated anti-lock brakes.

For 1991, all domestically sold SLs may be equipped with traction control to increase grip, as well as an automatic suspension system that adjusts both the ride height and stiffness to one's driving.

Despite the higher price, Mercedes says U.S. buyers are queuing up for the new SLs. By contrast, the much improved Cadillac Allante still seems to be a slow seller despite a price cut to $50,900 last year.

Domestic sales for the SL this year are expected to be between 10,000 and 12,000 units, with early indications over half of them will be the 500SL.

(For each car written about in his weekly Roadtalk column, UPI Auto Writer Jan Zverina test drives the vehicle for one week, driving it between 250 and 500 miles on city and rural roads.)

#90023u0862 01/23/1990 ~United Press International

(JAN. 23) UPI - While there are more than 100 income tax return preparation programs on the market, the number available for Macintosh computers can be counted on one hand, with a finger or two left over.

But MacInTax by Softview makes anything more than one superfluous. Like the Macintosh, it is simple and powerful.

Introduced in 1985, MacInTax has more than 90 percent of the Macintosh tax software market and racked up an impressive list of awards.

The reason for its success becomes apparent the minute you start it up. It is not just a rough facsimile of the IRS form. It is an exact replica.

MacInTax is not quite a turnkey operation. The first time you start the application, you will need to use the Font/DA Mover utility to install any additional screen fonts necessary to duplicate the IRS forms.

All the necessary screen fonts, and even a Font/DA Mover utility, are included on the two, 800k MacInTax disks. The number of fonts you will need to load depends on what fonts already are avaialble in your system.

The Mac IIcx used for this review had all but the four smallest Geneva fonts needed, and it took only about a minute to load those four from MacInTax's font file.

Once the fonts are loaded, you're ready to start preparing your return, with more than 75 forms schedules, statements and worksheets - all in actual IRS format - at your fingertips. All you do is fill in the blanks. Calculations are carried out automatically.

All the forms, schedules and worksheets that make up the individual return are linked, so a change made on any form will be reflected in the other forms.

If, for example, you make a change on your 1040 that affects your adjusted gross income, it will not only affect the relevant lines of the 1040, but on the supporting forms and schedules - including the medical and employee expense deduction ceilings on Schedule A Itemized Deductions.

The program makes quick work of an average return. I completed a 1040 with Schedule A Itemized Deductions in less than 20 minutes.

MacInTax includes the complete IRS instruction booklet keyed to each line of each form. To get instructions, you just double click on the line of the form or schedule for which you need guidance.

Specially designed worksheets allow you to list and document line-item data. Line entries on any form or schedule can be broken out in a series of unlimited itemization windows - all fully linked to their line items to facilitate automatic calculation.

The program also allows you to import tax data from a prior-year MacInTax file. MacInTax also interfaces with most Macintosh financial management software, including Quicken, MacMoney, Dollars and Sense and Managing Your Money.

When it comes to printouts, MacInTax is the best on the market - IBM or Mac. It is the only program that prints exact duplicates of IRS forms, schedules and worksheets on all models of Imagewriter and LaserWriter printers.

MacInTax retails for $99 and offers optional state supplements for Californi',,Connecticut, Illinois, Ohio, Massachusetts, New Jersey, New York and Virginia. The state supplements are priced at $79, and Connecticut and New Jersey supplements include non-resident New York forms at no extra cost.

The supplements have the same features as the federal forms, and provide for automatic importation of data from the MacInTax federal tax files.

This year, MacInTax offers an electronic filing option, along with a refund-anticipation loan option.

The IRS has been experimenting with electronic filing since 1986 and is offering it this year for the first time.

Electronic submissions, however, must be handled by IRS-approved filers. MacInTax has contracted with InstaTax, a San Diego-based firm, to provide electronic filing. But there is a $30 filing charge - much higher than the fees charged for electronic-filing services offered by providers of tax software for IBM compatibles, some of whom offer the service free.

And to have your MacInTax-generated return filed by InstaTax, you must fax or mail it to San Diego, along with an IRS electronic-filing authorization form, W-2s and other documents that might be required to support your deductions.

The objective of electronic filing is to speed refunds - only returns claiming refunds are eligible for electronic filing under IRS rules - but the mailing and re-keyboarding surely will cut into the speed advantage.

For those who are really eager for a refund, InstaTax offers a refund-anticipation loan. The software includes a loan application form. InstaTax charges a $40 fee for the combined electronic-filing and refund-anticipation-loan service - and there is an additional bank fee of $30, which is automatically deducted from the refund.

Software: MacInTax by Softview of Oxnard, Calif.; System requirements: Mac512e or greater with two 800k floppies or one 880k floppy and a hard disk, LaserWriter or ImageWriter; List price: $99 ($79 for state supplements) Write protection: no; Reviewers evalutation (on scale of 1 to 5) 5 - unqualified recommendation.

#90023u0884 01/23/1990 ~United Press International

(JAN. 23) UPI - Radio Moscow reports militants in Azerbaijan have attacked a Red Army convoy and killed two soldiers. Azerbaijani

nationalists are vowing a campaign of civil disobedience to force the Soviet army from their republic. Reports from Armenia said the Soviet army is moving toward the rebellious province of Nakichevan ... which has declared its secession from the Soviet Union.

An Azerbaijani nationalist in Moscow says the southern republic's parliament issued an utltimatum... declaring that if the Soviet army does NOT leave at dawn tomorrow... it will start discussing secession. The chairman of the Azerbaijani Popular Front said at a Moscow news conference the republic's passed its defiant resolution yesterday.

Yugoslavia's communist party ended a four-day session today after delegates from the Slovenian Republic walked out in protest. The Slovenians wanted reforms on relations with Europe... human rights... and more autonomy for Yugoslavia's republics. The Congress went along with one reform... releasing its monopoly on power. That paves the way for contested elections in April.

Polish students and activists occupied a regional headquarters of the communist party as part of a campaign to make the party reveal its property assets. Solidarity leader Lech Walesa was NOT able to reach an agreement with a communist leader yesterday on resolving the property dispute. The communists never have accounted for how much they own.

-30- 1631

#90023u0886 01/23/1990 ~United Press International

(JAN. 23) UPI - A report says the informant who helped the F-B-I catch Washington, D-C, Mayor Marion Barry in a drug sting operation is preparing to testify in front of a grand jury. Barry... who has NOT admitted publicly to having a drug problem... is spending the night in a Florida substance abuse re-hab center. Federal authorities have charged him with using crack cocaine.

75-thousand abortion foes marched from the White House to the Capitol to the Supreme Court yesterday after an encouraging phone address from President Bush on the 17th anniversary of the controversial Roe-versus-Wade abotion ruling. A few blocks from the march... a Republican senator who supports legal abortion addressed 75 people picketing the Republican Party's headquarters. The anniversary also was marked by nationwide demonstrations.

Government sources in Japan say the ruling party and opposition parties have agreed to dissolve the lower house of parliament and hold new elections next month. Prime Minister Kaifu met officially today with Emperor Akihito to report on his recent visit to East and West Europe. Sources say he also told Akihito of the plans to call new elections.

Nicaraguan President Daniel Ortega says the U-S-backed Contra rebels are planning to kill him. Ortega says his security forces already foiled one plan to kill him in an ambush on his campaign caravan Sunday. Ortega blames the United States for giving the contras humanitarian aid... which Ortega says they will use, quote, ''to liquidate me... kill me... assassinate me...''

#90023u0941 01/23/1990 ~United Press International

TOKYO (JAN. 23) UPI - A Japanese electronic company said Tuesday it would manufacture dynamic random access memory chips for Intel Corp. of Santa Clara, Calif., for sale worldwide under the U.S. company's brandname.

NMB Semiconductor Co., a subsidiary of the world's top miniature bearing maker Minebea Co., said the five-year agreement was designed to ease U.S.-Japanese friction in semiconductor trade.

''We now manufacture 4 million 256-kilobit and 1-1.5 million 1-megabit DRAMs monthly, and most of our products will be marketed worldwide under the Intel brand through the U.S. firm's sales network,'' an NMBS spokesman said.

The company, with production facilities in Tateyama, south of Tokyo, planned to start manufacturing 4-megabit DRAMs this fall, he said.

The company would establish a new plant, its fourth production base, in the United States in the near future, the executive said.

The agreement would join NMBS's advanced production technology and Intel's global marketing channel, he explained.

An Intel executive termed the agreement very important for the U.S. computer industry as it enables Intel to provide computer chips to U.S. customers.

The two companies formed INTEL-NMBS DRAMs Fabrication Co. in Santa Clara Monday to coordinate their joint venture, he said.

Intel developed the DRAM for the first time in the 1970s and has become a leading manufacturer of microprocessors.

The NMBS executive said the company planned to extend the agreement into a long-term arrangement.

NMBS was established by Minebea in 1984 to meet growing demand worldwide for computer memory chips. It has been exporting almost 100 percent of its DRAM products to U.S. and European computer makers.

The company's sales in the year ended last September were about $234 million.

Japanese electronic companies have seized about 80 percent of the U.S. DRAM market, triggering friction between Japanese and U.S. chip makers.

The joint venture between Intel and NMBS came a week after plans for U.S.

Memories Inc., an American semiconductor conglomerate supported by seven major U.S. makers, were abandoned after the project failed to attract enough investors.

The United States has imposed $165 million in punitive sanctions against Japanese computer imports, claiming Japan failed to fulfill its obligation to increase imports of U.S. chips to 20 percent of the domestic consumption.

The U.S. share in the Japanese chip market still amounts to about 12 percent.

Japan's imports of electronic components and devices from the United States amounted to $2.65 billion in the first nine months of 1989, according to statistics by the Finance Ministry.

Japanese electronic exports to the United States in the same period were $8.3 billion.

#90023u0977 01/23/1990 ~United Press International

TOKYO (JAN. 23) UPI - Two Japanese companies said Tuesday they will participate in a $600 million development of the ocean front area in downtown Honolulu in partnership with local consortium Aloha Tower Associates.

C. Itoh and Co. and Mitsui Trust and Banking Co. said the project called for development of 711,664 square feet of land around the Aloha Tower and the International Pier.

Mitsui Trust and Banking, a member of the giant Mitsui Group of companies, would provide most of necessary funds estimated at about $600 million, the announcement said.

In the initial stage of the project, a first class hotel, two condominiums and a shopping center will be built for completion by January 1995, the companies said.

Construction is scheduled to start in February 1991.

Land for the development will be leased from the Hawaii state government under a contract to be signed within 90 days, the companies said.

Aloha Tower Associates is a consortium, including Enterprise-Hawaii, Inc. and Aloha Tower Hawaiian Partners, a group of five local developers in Hawaii.

C. Itoh and Co. is a major Japanese general trading house.

-30- 1348

#90023u1001 01/23/1990 ~United Press International

TOKYO (JAN. 23) UPI - Japanese electronic company Hitachi Ltd. said Tuesday it would invest $150 million over the next five years to manufacture picture tubes for color television sets in Greenville, S.C.

The Tokyo-based company said the project would create job opportunities for 300 workers initially and approximately 700 eventually.

The new company, Hitachi Electronic Devices (USA), Inc., will build a manufacturing plant on a 522,000-square-foot site on Mauldin Rd. in Greenville for completion by September 1991.

The facility will manufacture 700,000 units per year initially, with the volume increased to 2 million units eventually, the company said.

It would be the largest investment by a Japanese company in a new facility in South Carolina, it said.

''While the plant responds to increasing needs for color picture tubes throughout the U.S., we hope it also makes a significant contribution to the local economy,'' Dr. Takeo Takemoto, general manager of Hitachi's electron tube division.

-30- 1211

#90023u1019 01/23/1990 ~United Press International

WARSAW, POLAND (JAN. 23) UPI - Twenty-nine crew members and a passenger, kidnapped from a Polish freighter Jan. 3 and held 19 days by Eritrean rebels, returned home Tuesday and were reunited with their families, the official news agency PAP said.

The agency said a Polish airline plane brought the freed Poles from Cairo to the northern seaport of Gdansk where they were met by hundreds of people at the airport. They had been released earlier somewhere in Eritrea then taken to Cairo where they boarded the Polish airliner.

''It was such a nonsense,'' said Dr. Krystyna Dabrowska, a physician and member of the crew. ''We did not know who attacked us, why, and what will happen with us.''

''During 19 days of captivity we changed our location five times.'' said Capt. Andrzej Sikorski, the freighter's master. ''We stayed in ravines, caves and in the desert.

''Finally the guerrillas admitted they made a mistake and apologized for it,'' the captain said, adding his crew was treated well by the kidnappers.

The 11,672-ton Boleslaw Krzywousty was attacked Jan. 3 by the gunboats of the Eritrean People's Liberation Front. The guerrillas apparently believed the ship carried weapons for Ethiopia. The EPLF has waged a guerrilla war against the government of Ethiopia for last 23 years, demanding independence for the northern province of Eritrea.

The Solidarity newspaper Gazeta Wyborcza reported in a front page story Tuesday that Poland has shipped weapons to Ethiopia by air and considered it a profitable business.

The paper said the Ministry for Foreign Economic Cooperation, controlled by the Polish Communist Party, has approved arms sales.

''In last two years Poland sold weapons to Ethiopia worth $8.3 million,'' said the paper. ''The last plane loaded with weapons worth $2.5 million took off from Warsaw's Okecie airport Jan. 12.

''Sale of arms is an excellent business for Poland,'' Gazeta quoted an unnamed Foreign Ministry official as saying. ''We are disarming ourselves and the weapons we sell are useless for our civil economy.''

PAP reported earlier that the Polish vessel was found ablaze off the African coast by another Polish ship ''Asny'' Jan. 4.

Polish officials said the vessel was en route from Sudan to Massawa in the Dahlak islands, where the Soviet navy has a nuclear submarine base. They stressed it carried no weapons for the Ethiopian government. Officials gave no details on what the ship did carry, except to say the cargo included ceramics.

TOKYO (JAN. 23) UPI - Toshiba Corp. said Tuesday it would start mass-producing color picture tubes for high-definition television sets at its plant in western Japan in August.

The Tokyo-based electronic company's construction of mass-production lines capable of manufacturing 20,000 units per month would start in April at its plant in Himeji, 370 miles west of Tokyo, the announcement said.

Toshiba said it planned to produce 32-inch and 36-inch tubes for home use and 36-inch tubes for business use.

The company said it has already developed a wide range of broadcasting and

receiving equipment and systems for high-definition television, expected to become the next generation TV with high-quality picture and sound reproduction.

The company will also introduce new highly-efficient ''shadow masks'' which will help boost the picture quality, it said.

Regular HDTV broadcasting is scheduled to start in Japan by the end of this year.

#90023u1118 01/23/1990 ~United Press International

BEIJING (JAN. 23) UPI - Chinese authorities Tuesday denied a report that 800 people have been secretly tried and sentenced for their roles in last spring's pro-democracy protests, dismissing it as ''sheer fabrication.''

The denial appeared in the form of an alleged interview with a ''senior judge'' carried by the state-run Xinhua News Agency. The judge, who was not identified, criticized Washington Post correspondent Daniel Southerland by name for his Jan. 16 report.

The rhetoric came three days after the Chinese government announced a new series of regulations restricting foreign media coverage. The rules forbid ''spreading rumors and distorting the facts,'' in effect duplicating martial law decrees lifted 12 days earlier.

''The recent report in The Washington Post that 800 Chinese sentenced to prison terms in recent months for 'counterrevolutionary crimes' based on their involvement in last year's 'democracy movement' is nothing but sheer fabrication,'' the judge said in the Xinhua report.

''The writer of the report, Daniel Southerland, also fabricated the story that 'about 10,000 people have been detained or arrested' and that 'new suspects have been picked up','' the report said.

The Post, quoting ''well-placed Communist Party sources,'' had reported that more than 800 Chinese were convicted and imprisoned recently in connection with the protests. The Post report said many of those imprisoned received 10-year jail sentences for divulging state secrets, disseminating ''counterrevolutionary propaganda'' or destroying state property.

Asked to comment on the Chinese criticism of his report, Southerland said, ''I stand by my story.''

Other foreign publications have reported secret trials of students arrested for participating in last spring's protests. The estimate of

10,000 arrests nationwide has been cited by the Post previously, and some sources believe the figures may be higher.

A high-ranking Chinese official said recently that the government will probably maintain secrecy over trials and arrests for fear of provoking student unrest.

Xinhua's repudiation of the report also took issue with its definition of ''counterrevolutionary crimes'' as so broadly defined that Chinese can be imprisoned for doing nothing more than criticizing the Communist Party or party leaders.

''Thought is not a crime in Chinese law,'' Xinhua said, charging that only those who ''plot to subvert the government or dismember the state are regarded as counterrevolutionaries.''

Quoting the ''judge,'' Xinhua concluded that trials of Chinese involved in last spring's protests are an internal affair, and warned that ''foreigners have no rights to intervene.''

More significantly, China's denial of continuing repression coincided with the day the Congress reconvened in Washington. The lifting of martial law in Beijing was widely regarded as a cosmetic gesture to placate the United States, which imposed economic sanctions after Beijing's bloody crackdown on pro-democracy demonstrators last June.

The House is expected to vote by a wide margin Wednesday to overturn President Bush's veto of a bill allowing Chinese students to remain in the United States rather then return to China and face possible political persecution.

Angered by Bush's secretive handling of Sino-U.S. relations, Congress also is likely to push for heavier military and economic sanctions to protest the June 4 carnage in Beijing.

#90023u1154 01/23/1990 ~United Press International

VICENZA, ITALY (JAN. 23) UPI - Sen. Mariano Rumor, five times prime minister between 1968 and 1974 and a pillar of Italy's Christian Democrat Party for more than 40 years, died in the Vicenza city hospital late Monday after a heart attack. He was 74.

Hospital doctors said Rumor died at 11:40 p.m., about 15 hours after being admitted to the Vicenza hospital's intensive care unit in a coma.

Rumor, a bachelor, suffered a heart attack at 4:30 a.m. Monday while staying at his sister's home in Asiago, 25 miles north of Vicenza in

northeastern Italy. After preliminary treatment at the Asiago hospital, he was transferred to the Vicenza hospital.

For two days before he was stricken, Rumor presided over a regional Christian Democrat Party congress in Thiene, midway between Asiago and Vicenza.

Rumor was born in Vicenza June 16, 1915, and was an artillery officer in Wwold War Ii until September 1943 when Italy signed an armistice with the Allies. After the war he represented the Christian Democrats in the national resistance movement.

In 1959, Prime Minister Antonio Segni made him agricultural minister. He led the CDP as political secretary from September 1964 to December 1968, when he formed his first government.

Between December 1968 and July 1970, Rumor led three successive governments based on a shaky center-left alliance with the Socialist, Social Democrat and Republican parties.

These governments introduced social and university reforms that were credited with seeing Italy through the initial onslaught of leftwing political agitation that started with student disturbances during the ''hot autumn'' of 1968.

Rumor was prime minister of two other center-left governments between July 1973 and October 1974 and then was foreign minister in two Christian Democrat governments of Aldo Moro that were based on the parliamentary support of the Communist Party.

During this period Italy was in the grip of a decade of political terrorism. Moro, at the time president of the Christian Democrat Party, was kidnapped and murdered by Red Brigades terrorists in 1978.

Rumor's career in domestic politics faded in 1978 when his name was linked with a bribery scandal involving the purchase of military aircraft from the U.S. Lockheed Co. But a joint session of Parliament acquitted Rumor of any involvement in the scandal.

Rumor was elected to the senate for the first time in 1979 and thereafter devoted most of his activities to international affairs, representing Italy in the NATO assembly and in European Community activities.

WEST BERLIN (JAN. 23) UPI - East Germany's economy grew only 2 percent in real terms last year, far short of the expected 4 percent forecast

earlier, the official East German bureau of statistics said in a report Tuesday.

The report showed that East Germany's 1989 national income, the gross national product minus the service sector, amounted to 273.5 billion East German marks, the official equivalent of $161 billion.

During the fourth quarter, the national income dropped 3 percent from the sameperiod of 1988 because of the exodus of tens of thousands of workers to West Germany, the report said.

Anton Donda, who heads the statistics bureau, said ''none of the major sectors of the people's economy fulfilled its planned contribution'' to the national income.

The preliminary figures showed a 2 percent increase in real terms of East Germany's gross national product, which fell short of the planned 4 percent increase by 5.3 billion marks, or $3.1 billion, the report said.

Industrial production rose by 2.5 percent instead of the expected 4.2 percent, and construction stagnated instead of growing by 2.1 percent.

In a separate report, the East German news agency ADN quoted Werner Peplowski, an official of East Germany's state-run trade unions, as saying that 85,000 East Germans were currently unemployed.

In the past, the country's Communist leadership had never admitted there was any unemployment in East Germany, claiming the right to work was guaranteed by the state.

#90023u1213 01/23/1990 ~United Press International

BOGOTA, COLOMBIA (JAN. 23) UPI - An American wanted in Wisconsin on drug trafficking charges was arrested by authorities in northern Colombia after an intense manhunt, police said Tuesday.

Edward Michel, 44, a native of Texas, is wanted by a Wisconsin court for smuggling 300 pounds of cocaine from Colombia to the United States, Guajira state police chief Col. Carlos Meza said.

Michel was grabbed Monday as he was driving from the regional capital Riohacha to the market town of Maicao, 450 miles north of Bogota, the colonel said. Michel was accompanied by two Colombians, Meza said.

The capture comes two days after Colombian Joseph Amsili Cohen, wanted in Massachusetts, was turned over to U.S. drug enforcement agents and flown north.

Amsili Cohen, born in Morocco but nationalized in Colombia, was the 14th Colombian extradited to the United States to face drug charges since President Virgilio Barco launched his offensive on rampaging cocaine cartels last August.

Amsili Cohen, captured by the secret police on Nov. 19, was not on the Justice Department's list of the 12 most wanted Colombian drug traffickers.

Extradition has been a key weapon in the government's war on the drug lords, and the Medellin cartel hit squad, known as The Extraditables, released a communique last week offering to give up the drug trade and hand over their arms for ''constitutional guarantees,'' a metaphor for immunity from extradition.

The Barco administration refused to back down in its merciless persecution of the cartels, who have killed some 200 people in their five-month bombing spree.

Desperate drug lords, on the run since the killing of Jose Gonzalo Rodriguez Gacha, reputed No. 2 figure in the Medellin cartel who was gunned down by in a police ambush Dec. 15, recently launched a kidnapping spree to rake in extra funds and force the government to retreat in the manhunt.

On Jan. 14, drug cartel gunmen headed by terrorist Fidel ''Rambo'' Castano grabbed 39 banana workers in Uraba, 265 miles north of Bogota, Uraba military chief Gen. Adolfo Clavijo told reporters Monday.

The kidnappers have made no ransom demands, and the families of the hostages fear for the victims' lives, the Antioquia Peasant League said.

Drug thugs Monday released businessman Alvaro Diego Montoya, son of presidential aide German Montoya, after 33 days of captivity, authorities said. It apparently was a gesture of good will.

The government said the release of Montoya, set free in Bogota at 2 a.m. Monday, was not part of a deal between the Barco administration and the traffickers.

Montoya, who was kidnapped Dec. 19 as he left his office in northern Bogota, said in a statement his captors claimed they released him ''to achieve peace in Colombia.''

Montoya's insurance company, Probolsa, was partially destroyed two weeks ago when drug traffickers detonated a 80 pound car bomb in front of the building, injuring five people.

In related news, the army Wenesday captured a drug cartel gunman, previously convicted of assassinating the president of the leftist Patriotic Union, Jaime Pardo Leal, on Oct. 11, 1987, a military spokesman said.

Dead drug lord Rodriguez Gacha allegedly paid $67,000 for the killing of Pardo Leal, who ran for president in the 1986 elections won by Virgilio Barco.

The gunman, Beyer Barrera Ramirez, was sentenced in absentia to 24 years in a Colombian jail. His accomplice, William Infante, was arrested in Miami and sentenced to life imprisonment for drug trafficking.

BUDAPEST, HUNGARY (JAN. 23) UPI - Hungary has reached an agreement with the Soviet Union calling for the complete withdrawal of the 65,000 Soviet troops stationed in Hungary, Prime Minister Miklos Nemeth said Tuesday.

Nemeth, in a speech to Parliament, said talks will open shortly in Budapest to work out a timetable for the pullout and settle related issues.

In another development, Interior Minister Istvan Horvath resigned over the ''Hungarian Watergate'' bugging scandal.

''The strategic and military geographic situation of Hungary makes it possible for Soviet troops to be fully withdrawn from the country within the shortest possible time and without endangering the country's security '' Nemeth said.

Nemeth referred to his recent discussions with Soviet Prime Minister

Nikolai Ryzhkov during which he said an agreement was reached that the presence of the troops was the result of a concept which has lost its relevance.

The troops issue has been a particularly touchy one for the Hungarian population since the ill-fated 1956 uprising put down by Soviet-led troops and tanks.

Nemeth said an expert committee is being appointed and will meet in Budapest in the next few days to work out a timetable and handle the other technical details.

Horvath submitted his resignation to Parliament over a scandal involving electronic eavesdropping by security officials of political parties.

But he used his resignation speech to blast the Alliance of Free Democrats and the Federation of Young Democrats, known as FIDESZ - the two organizations which exposed the scandal - of attempting to ''whip up sentiments, misinterpret actions and shock public opinion.''

Horvath said he was resigning because that is what it is customary in a constitutional state and a democracy. Hungary declared itself a constitutional republic Oct. 23, ending more than 40 years of Soviet-style rule.

But both he and Nemeth passionately argued against calls that all former communists should leave the government, calls being made as the government implements a touch austerity program to cut uncontrolled spending.

''The government accepted (the decision) to pass urgent measures that place major burdens on the people,'' Nemeth said. ''But no one can seriously think that it will tolerate, without so much as blinking an eye, its honesty, integrity and professionalism being called into disrepute.''

JOHANNESBURG, SOUTH AFRICA (JAN. 23) UPI - The government has decided to free Nelson Mandela from life imprisonment but has not worked out the timing and circumstances of his release, a minister was quoted Tuesday as saying.

The Nationalist, the ruling National Party newspaper, quoted Justice Minister Kobie Coetsee as saying speculation that Mandela's release is imminent is ''a reasonable deduction'' considering that other prominent political prisoners were released last October.

''Coetsee said it was a reasonable deduction ... that Mandela's release must be high on the agenda. The question is no longer whether Mandela will be released, but when and in what circumstances,'' the Nationalist reported.

At the same time, however, Coetsee warned that Mandela's release and proposed power-sharing negotiations between the government and black

leaders are internal issues. Foreign attempts to intervene ''could only delay matters,'' the Nationalist said.

Copies of the Afrikaans article were distributed Tuesday by the Justice Ministry after interpretations of Coetsee's comments broadcast on state-run Radio South Africa triggered reports that Mandela's release was at hand.

The Afrikaans-daily Beeld, meanwhile, reported Tuesday that the Cabinet will meet Wednesday to discuss Mandela's possible release and racial reforms proposed by President Frederik de Klerk.

Beeld said it is possible Mandela would be released before the opening of Parliament Feb. 2, when de Klerk is expected to outline his reforms.

Mandela, 71, was sentenced to life imprisonment in 1964 for plotting to topple minority white rule. In recent years he rejected government offers of freedom in exchange for renouncing violence as a political weapon and repudiating the armed struggle of the outlawed African National Congress.

But since Mandela's meeting with President Pieter W. Botha last July anda meeting with de Klerk in December, the government has indicated it no longer insists that Mandela renounce violence before he can be released.

Instead, it has accepted Mandela's commitment to ''peaceful solutions.''

''Coetsee indicated that earlier preconditions for his release are now of no importance or had fallen way,'' the Nationalist reported. ''Mandela himself has made this possible by his declared standpoint on peaceful involvement.''

Coetsee, who has met with Mandela regularly for several months, also told the Nationalist the black leader viewed his role as that of a ''go-between'' for the government and the ANC.

''This can be interpreted as a giant step in the negotiations process and it could be expected that the government was busy at the moment considering this as a possible role for Mandela,'' the Nationalist said.

#90023u1298 01/23/1990 ~United Press International

WASHINGTON (JAN. 23) UPI - The House Banking Committee voted Tuesday to subpoena junk bond king Michael Milken and two others as part of its ongoing investigation of Lincoln Savings and Loan Association.

The committee voted 31-1 to authorize the issuance of subpoenas for Milken the former head of the junk bond division at Drexel Burnham Lambert Inc.,

Ernest Garcia and Fernando Acosta.

Garcia and Acosta, both Arizona real estate developers, were involved in a complex series of land transactions involving property in the Arizona desert and Lincoln. The government contends the transactions were shams to divert funds from the Irvine, Calif., thrift to its parent, American Continental Corp.

Charles Keating, chairman of American Continental, has denied the allegations. Keating was the focus of a lengthy congressional hearing last fall into the failure of Lincoln.

Henry Gonzalez, chairman of the House Banking Committee, said the subpoena for the appearance of Milken ''will signal phase two of the investigation.'' No date was given for the commencement of the Lincoln hearings.

Gonzalez said all witnesses to testify before the panel have been subpoenaed.

''This is nothing more than a continuation of the same (procedure),'' he said.

Gonzalez said the committee's examination of Lincoln now will focus ''on the extent to which trading in junk bonds and subordinated debt contributed to the collapse of Lincoln and other savings institutions.''

According to testimony heard earlier by the committee, more than 23,000 investors purchased $200 million worth of American Continental's subordinated debt through Lincoln branches. The bonds were rendered worthless when American Continental filed for bankruptcy protection in April, one day before regulators seized Lincoln.

The government now is trying to determine whether Drexel and a number of real estate clients enchanced Lincoln's books through real estate and securities deals.

Drexel, the nation's second-largest privately held securities firm, was charged with insider trading and a host of other violations in 1988 in a broad civil complaint filed in federal court in Manhattan by the Securities and Exchange Commission.

The SEC charged that Drexel and Milken, its junk bond chief, made a secret pact with convicted financier Ivan Boesky, whose various financial organizations were used as fronts in a scheme to profit on corporate takeovers and other transactions.

#90023u1300 01/23/1990 ~United Press International
GENEVA (JAN. 23) UPI - A Red Cross survey team Tuesday reported serious psychological problems among residents in the area of the 1986 Chernobyl nuclear power plant accident.

The League of Red Cross Societies said four radiation specialists assessed the situation in the three affected Soviet republics at the request of the Soviet national Red Cross organization.

''Though there are undoubtedly also physical problems, the psychological problems were greater than we expected,'' team leader Renny Nancholas said.

''Very little information was released at the time of the accident and this created a credibility gap,'' he said. ''Facts given now are looked on with some mistrust.''

Nancholas, international aid director of the British Red Cross, said much of the information being released is too academic for the general population.

''The information breakdown has created a major problem of psychological distress leading to psychosomatic ailments,'' he said in initial comments released by the league - a global coordination agency for national Red Cross organizations.

The league said a detailed report would not be ready for several weeks although the team would propose two types of international assistance in the form of counseling and a public information campaign.

Fears among the people in the Russian, Byelorussian and Ukraine republics, it said, could be somewhat allayed by counseling by volunteers and if necessary by medical personnel.

Also to be recommended will be the distribution of hand-held geiger counters with attachments for monitoring food.

''The possibility that food is contaminated is a widespread public concern '' the statement said.

It said the team praised the efforts of local Red Cross workers after the accident in helping in the distribution of iodine for radiation sickness, in evacuation and resettlement.

#90023u1332 01/23/1990 ~United Press International
(JAN. 23) UPI - Reports from Azerbaijan indicate members of the

anti-communist Popular Front are ready to go underground to wage a guerrilla war against the occupation by Soviet troops. An Azerbaijani spokesman says the republic's parliament will consider secession if the Red Army is NOT out by tomorrow. A general strike is paralyzing the capital of Baku for a second day to protest the presence of Soviet soldiers.

Maverick Soviet politician Boris Yeltsin says Mikhail Gorbachev's decision to send troops to Azerbaijan could be the beginning of the end of his reform policies. Yeltsin, a vocal Gorbachev critic, says the Soviet leader may use the unrest in Azerbaijan to declare a nationwide state of emergency and end the reforms he made in the 1980's.

President Bush heads for Kansas City today to salute foot soldiers in the war against illegal drugs- police and community activists. Bush will meet with church and community leaders, tour boarded up crack houses and address law enforcement officers. The symbolic trip comes two days before the president is to unveil his updated anti-drug strategy which is expected to carry a pricetag of 10-BILLION to 11-BILLION dollars.

The father of computer hacker Robert Morris says his son doesN'T have a ''dishonest bone in his body.'' The 24-year-old Morris was convicted last night of designing a hi-tech ''worm'' program that scrambled some six-thousand computers nationwide in 1988. The jury in Syracuse, New York, made Morris the only person ever convicted of a felony on a 1986 law intended to discourage computer fraud. He faces up to five years in jail and 250-thousand dollars in fines.

#90023u1347 01/23/1990 ~United Press International

HOLLYWOOD (JAN. 23) UPI - While ''Born on the Fourth of July'' was dominating the Foreign Press Association's awards ceremony last weekend it was also winning the battle for bragging rights at the box office with a gross of $6.2 million.

In wide release on 1,314 screens for only three of its five weeks in release, the Tom Cruise vehicle has compiled $32.6 million to dominate the month of January.

The drama of a gung-ho Marine who is wounded in combat and comes home a paraplegic and an anti-war activist captured Golden Globe awards for best picture, best actor, best director (Oliver Stone) and best screenplay (Stone and Ron Kovic).

The second most popular film of the week was Sylvester Stallone's new cop movie, co-starring Kurt Russell, ''Tango & Cash,'' a buddy movie with plenty of violence and action.

''Tango & Cash'' collected $4.3 million in 1,548 theaters for a five-week total of $44.6 million.

In third place was ''The War of the Roses,'' the hard-edged comedy of marital warfare starring Michael Douglas and Kathleen Turner, directed by Danny DeVito, who also co-stars as a wily divorce attorney.

''The War of the Roses'' rang up $4.2 million in its seventh week on 1,532 screens. So far it has grossed $67 million.

''Internal Affairs,'' the new Richard Gere drama of a maniplative and crooked cop, pulled in $4 million in 975 theaters for a two-week total of $11.1 million.

No. 5 was ''Tremors, the only film making its debut in the top 10 last week. Starring Kevin Bacon and Fred Ward as a pair of handymen who try to save a small town from an invasion of giant snakes, the science-fiction thriller captured only $3.7 million in its opening frame in 1,472 theaters.

Worth noting: Debra Winger and Nick Nolte, who bombed out as co-stars in ''Cannery Row'' a decade ago, crashed and burned again as lovers in ''Everybody Wins,'' a newcomer that grossed only $614,000 on 451 screens. The mystery drama, written by Arthur Miller, was No. 20.

The collective gross for all 23,000 theaters in the United States and Canada came to $101.3 million for the week, considerably below the $107.3 million for 1989 over the same seven days.

Still, the young 1990 overall box-office take was $202.3 million as against $195 million for the equivalent period last year.

The top 10, last week's gross, total gross, weeks in release:

1. ''Born on the Fourth of July,'' $6.2 million, $32.6 million, 5 weeks.
2. ''Tango & Cash,'' $4.3 million, $44.6 million, 5 weeks.
3. ''The War of the Roses,'' $4.2 million, $67 million, 7 weeks.
4. ''Internal Affairs,'' $4 million, $11.1 million, 2 weeks.
5. ''Tremors,'' $3.7 million, 1 week.
6. ''Always,'' $3.4 million, $30.8 million, 5 weeks.
7. ''Steel Magnolias,'' $2.9 million, $60.6 million, 10 weeks.
8. ''The Little Mermaid,'' $2.8 million, $65.2 million, 10 weeks.
9. ''Driving Miss Daisy,'' $2.6 million, $9.1 million, 6 weeks.
10. ''Back to the Future II,'' $2.3 million, $107.5 million, 9 weeks.

#90023u1381 01/23/1990 ~United Press International

LONDON (JAN. 23) UPI - Thousands of Ford Motor Co. workers voted Tuesday on whether to strike at 21 plants run by the U.S.-based carmaker in Britain, as production halted at three factories where workers walked out to press demands for improved pay and conditions.

Union leaders have recommended some 31,800 manual workers reject Ford's latest contract offer of a 10.2 percent wage increase during the first year and an 8 percent increase, or the inflation rate plus 2.5 percent, whichever is higher, in the second.

The unions are seeking an unspecified larger increase than Ford's offer and a reduction in their 39-hour work week, and results are expected Thursday from the voting at 21 facilities across Britain.

Union officials said a complete work stoppage would commence Friday if a strike is favored.

Production at three Ford plants which assemble Escort cars, vans, transmissions and other vehicle parts halted Tuesday after one week of disruptions caused by unofficial strikes and layoffs prompted by the stoppages.

Ford spokesman Martin Watkins said wildcat strikes by about 600 workers at the three facilities at Halewood, 210 miles northwest of London, had compelled management to lay off some 8,000 other workers because of the disturbed production cycle.

The Financial Times newspaper quoted union leaders as predicting about 60 percent of workers would opt for an all-out strike.

However, Gavin Laird, general secretary of the Amalgamated Engineering Union, said in an interview with the British Broadcasting Corp. that most employees would opt against a strike, possibly in response to an appeal mailed by Ford to all workers.

Company executives said the letters conveyed a corporate theme that a strike would have an impact on Ford's ability to compete and that the stakes were vaster that the immediate issues. The message also gave full details of Ford's offer, which the company termed ''probably the best in the motor industry.''

''We are simply alerting them to how damaging this would be,'' an executiveexplained. ''It is certainly not a veiled threat. It is setting out the cold hard facts.''

The confrontation was being watched closely by the government, which is seeking to keep public sector pay demands down to combat inflation.

Talks broke down last Wednesday after union officials rejected an improved offer by Ford, which had raised their original second-year contract offer by 0.5 percent. Other improvements were in holidays, with an extra day offered to employees who had completed 10 and 25 years of service, Ford said.

#90023u1383 01/23/1990 ~United Press International

WASHINGTON (JAN. 23) UPI - The Army said Tuesday that, contrary to news accounts, two female soldiers performed well under fire and gave up their truck-driving duties during the invasion of Panama because they were tired.

There was no indication the two women disobeyed orders, Army spokesman Lt. Col. Dick Bridges said.

Reports during the weekend said the two women were under investigation for having disobeyed orders to drive a group of soldiers through a combat area. Some of the reports said tears were shed and that the women were worried the troops they were carrying might be injured.

A commander's preliminary inquiry was called to see if ''there is a basis for an investigation,'' Bridges said, but that action was taken only after the news reports of a possible infraction. That inquiry is continuing.

''They were fresh out of school,'' Bridges said of the two women, members of the 193rd Support Battalion based in Panama. ''They had been driving for nine hours at night and had been sniped at twice, performing well on both occasions.

''They did not feel they could continue without endangering the lives of the soldiers they were transporting,'' Bridges said. ''Does that indicate cowardice? I don't think so.''

Although the women gave up their truck-driving duties, they returned to other jobs in their military unit, officials said.

''Part of your training is to know when to stop,'' Bridges said. ''For them to report that they could no longer drive, I don't find unusual.''

The role of military women in Panama has become controversial because of U.S. law and policy prohibiting women soldiers from combat positions and because of conflicting reports about the actions of Army Capt. Linda Bray.

Early news reports said Bray led her troops, under fire, against a dog kennel held by Panamanian forces and that three Panamanian soldiers were killed in the fight.

The Army later explained that Bray directed her troops from a command post about a mile away from the kennel, but that she drove to the scene to take personal control once fighting was reported. Her troops seized the kennel, but no Panamanian soldiers were killed.

#90023u1387 01/23/1990 ~United Press International

(JAN. 23) UPI - U-S officials opposed to the British policy of forced repatriation of Vietnamese boat people from camps in Hong Kong are making Washington's views known today. Assistant deputy secretary of state for refugee affairs Robert Funseth told a meeting of 15-nations in Geneva- ''Conditions in Vietnam still preclude fair treatment of returning refugees.'' Officials estimate more than 40-thousand Vietnamese refugees are crowded in Hong Kong's refugee camps.

The 101st Congress ends its long two-month break today. The Senate is ready to plunge into a debate over clean air laws and the House is expected to challenge a presidential veto of a bill to extend the visas of more than 33-thousand Chinese students who fear presection if they go home. The only item on today's Senate agenda is a resolution commending the U-S military for its successful invasion of Panama.

In India today, official sources say the bodyguard of a senior United Nations military observer opened fire on a crowd in the capital of northern Kashmir, killing six people. Reports indicate the bodyguard became uneasy when someone threw a clay pot containing charcoal embers at the car. The U-N military observer group has been in India since 1971 to monitor the cease-fire in the Indo-Pakistan war. Moslem extremists fighting for independence in the province reportedly bombed a state-owned bank and a telephone company office today.

#90023u1437 01/23/1990 ~United Press International

PORT-AU-PRINCE, HAITI (JAN. 23) UPI - Most Haitian radio and television stations fell silent Tuesday after the government vowed to strictly enforce a new decree banning local media from reporting on an ongoing political crackdown.

Only the Protestant-affiliated Radio Lumiere defied the sweeping decree and reported local news accounts Tuesday morning, but it was not clear whether it would be allowed to continue to broadcast news throughout the day.

The Ministry of Information sent all news outlets in the troubled Caribbean nation a communique Monday ordering them to show their news

reports first to ministry censors and prohibiting them from rebroadcasting or printing news about Haiti from sources outside of the country.

Most of Haiti's independently owned news media had been under self-censorship for several days, with radio stations sticking to all-music formats. But several religious radio stations had broadcast reports of widespread arrests of political opposition leaders.

Haitian ruler Gen. Prosper Avril announced Saturday that he was declaring a state of siege in the country, which shares the island of Hispanola with the Dominican Republic.

Avril, who took power in a 1988 coup, said the measure was needed to combat ''terrorism'' in the wake of the assassination of a military leader but observers have said the political crackdown will make it virtually impossible to hold fair, democratic local elections that had been promised for April 29.

The elections were to be only the second since Haitian dictator Jean-Claude ''Baby Doc'' Duvalier was toppled in February 1986 in a public uprising and replaced by a military junta. Leslie Manigat was elected president early in 1988, but was overthrown in a military coup less than five months later by Gen. Henri Namphy, who in turn was ousted by Avril in September 1988.

Avril, responding to worldwide pressure to bring democracy to Haiti, considered one of the poorest nations in the Western hemisphere, had promised a series of democratic elections beginning with balloting for local officials in April and culminating in national presidential elections in the fall.

The state of siege has been condemned by Haitian political groups, and the National Association of Industries Tuesday joined a call for reversal of the military government order, calling it ''deplorable.''

There were unconfirmed reports that several more opposition leaders were arrested early Tuesday, but government spokesmen refused comment.

Diplomats and journalists have estimated that several dozen opposition politicians have been arrested since the state of siege was declared. Several have been deported to the United States and many more are apparently in hiding.

Life in the capital has remained normal and there were no troops in evidence. Throughout the coups and political upheavals in recent years, most Haitians have simply gone about their business, which in many cases consists of finding enough sustenance to get through the day.

#90023u1458 01/23/1990 ~United Press International
LONDON (JAN. 23) UPI - Share prices staged a recovery after an early decline on the London International stock exchange Tuesday, boosted by gains in Tokyo and an encouraging opening on Wall Street.

The Financial Times Stock Exchange 100-share index closed at 2296.8 points at 4 p.m., down 0.3 points. The narrower FT-30 index stood at 1842.8 points, up 2.7 points.

Trading volume was 481.2 million shares, compared with at 4 p.m. Gilts rebounded to show rises of about one-quarter by late afternoon.

Traders said the market seemed to overcome a number of earlier troubles ranging from economic worries, a 77-point Wall Street slide overnight and lunchtime computer glitches.

Ferranti International Signal shares were jolted out of the doldrums by talk that it was favored to win a $2-billion Eurofighter radar system contract. Shares rose 7 cents to 55 cents.

Escalating doubts about the Hoylake offer depressed B.A.T. shares, down 21 cents to $13.19, while Anglo Group shares fell 20 cents to $4.72 in sympathy.

Elsewhere, last week's profits warnings continued undermine Rechem shares, which tumbled 44 cents to $8.17.

Standard Chartered shares jumped 43 cents to $9.60 on break-up bid speculation, while similiar talk lifted Midland Bank shares 21 cents to reach $6.12.

Rank Organisation shares rose 11 cents to reach $14.02 in anticipation of Thursday's results.

#90023u1460 01/23/1990 ~United Press International

NEW YORK (JAN. 23) UPI - FBI agents and police Tuesday investigated a half million dollar bank robbery - the largest in New York City in 15 years - in which four masked men slipped into the basement of a closed Brooklyn bank and cleaned out the vault.

The four men interrupted employees who were in the basement vault at the Chase Manhattan Bank branch about 5:15 p.m. Monday preparing cash for shipment to the Federal Reserve Bank in Manhattan, said FBI spokesman Joe Valiquette.

The suspects, who apparently entered through an open basement door, fled with about $538,000, which officials said was the largest bank robbery in 15 years.

The robbery was being investigated by the FBI-NYPD Joint Bank Robbery Task Force, Valiquette said.

''There was no sign of forced entry and (when the robbers entered) at that instant, the bank manager was in basement getting his hat and coat and getting ready to leave,'' Valiquette said.

The suspects apparently knew the money was being readied for delivery to the federal reserve by armored car the next morning, Valiquette said.

Three of the robbers were armed with revolvers and the fourth had what was described as a long-barreled weapon, Valiquette said.

The gunmen took the manager, the two employees who were in the vault and two other bank workers and locked them in a maintenence closet, Valiquette said.

''Presumably, at that point, they emptied the vault and left,'' Valiquette said.

When the maintainence man arrived about 5:45 p.m., he found the five people locked in his closet and caled police, Valiquette said.

TUNIS, TUNISIA (JAN. 23) UPI - Five North African leaders battling a surge in Moslem fundamentalism drew up plans during a summit to coordinate their efforts to curb Iranian-inspired Islamic zealots, diplomatic sources said Tuesday.

A bland joint statement by the leaders of Libya, Algeria, Tunisia, Mauritania and Morocco at the end of the two-day conference in Tunis said only that they agreed to set up committees to discuss common problems concerning food distribution, economy and finances, infrastructure and human resources.

But diplomatic sources said the five mulled over the recent wave of support for militant fundamentalists in the Maghreb region and decided in principle to set up a joint committee to coordinate their policies and rein in threats to their largely secular political systems.

In Algeria, Moslem fundamentalists have formed the influential Islamic Salvation Front calling on Socialist President Chadli Bendjedid's government to crack down on Western music and other entertainment and to make the Koran the focus of education in state-run schools.

Islamic fundamentalists also are well-organized in Tunisia and their counterparts have started to demonstrate in Morocco.

Mercurial Libyan leader Col. Moammar Gadhafi has had several clashes with fundamentalists and his government has executed some of them in an effort to check their influence.

Also discussed behind the scenes was the sharp resurgence of the Western Sahara conflict between Polisario guerrillas and Morocco, observers of the Maghreb region said.

Arab diplomatic sources said Moroccan King Hassan II held three private meetings with Bendjedid on board the Moroccan pleasure steamer ''Marrakech '' which ferried Hassan to the port of Tunis for the summit.

Rabat says the former Spanish colony of Polisario is Moroccan territory while Polisario claims it is an independent country. The United Nations has been trying to arrange a referendum for the territory to determine its future after both sides agreed in principle to a plebiscite.

But fighting in the Western Sahara erupted again in October with attacks by Polisario guerrillas along the Moroccan line dividing the disputed territory.

The attacks shattered an informal cease-fire established last February after Algeria, the main backer of Polisario, re-established diplomatic relations with Morocco.

The final statement by the five Maghreb states called for their defense and foreign ministers to meet to draw up ''a formula of coordination and cooperation'' on defense questions.

But the group deferred a decision on where to locate the permanent headquarters of the Arab Maghreb Union, created last year to integrate the North African states. The leaders also deferred plans to create a common identity card for all residents of the Maghreb.

MIAMI BEACH, FL (JAN. 23) UPI - Rabbi cards are the latest collecting rage among young scholars at Miami Beach Hebrew schools, rivaling baseball cards in popularity.

Similar to baseball cards, the 4-by-6-inch rabbi cards feature color photos of revered Orthodox rabbis on one side and basic religious statistics, in Hebrew and English, on the other.

Among students at Yeshiva Elementary School, Rav Yisroel Abuchatzeirah, or "Baba Sali" as the children call him, is the Don Mattingly of rabbi cards. He "made very good miracles happen," explained Shmuely Selmar, 10, who

rates the rabbi card with his prized Mattingly baseball card.

Abuchatzeirah is one of 111 Jewish leaders featured on rabbi cards manufactured by Torah Personalities Inc. of Baltimore. Other smaller, black-and-white rabbi cards are also on the market but the color cards seem to be the most popular, store owners said Tuesday.

Teachers and administrators use the cards as rewards for students who recite their prayers well or excel in schoolwork. Faigi Kitchner, an eight-year-old student at the Lubavitch Educational Center, said she has collected more than 100 rabbi cards since her mother started giving them to her as weekly rewards at home.

The children collect rabbi cards for the same reason they collect baseball and football cards, said Rabbi Avrohom Brody, owner of the B.E. Kosher Food store, where chidren bought the cards until supplies ran out. The cards let them learn about the people they respect and look up to, Brody said.

Since the nonprofit project began in 1988, Torah Personalities has manufactured one 36-card series and another 75-card set. Almost one million cards have been sold around the world.

SILVER CREEK, NY (JAN. 23) UPI - Layne Hall recently received a letter from New York's commissioner of motor vehicles commending him for almost 75 years of safe driving.

No minor accomplishment because Hall didn't get behind the wheel until he was in his 30s. Now he is 109.

''I'll drive as long as I can,'' Hall said slowly from his home in the Chautauqua County community of Silver Creek, about 30 miles south of Buffalo. ''I enjoy it.''

Hall has two vehicles, a 1962 Cadillac and a pickup truck, which he uses for his usual twice-a-week drives into town to purchase food and medicine. And he doesn't sit around once he gets back to his home on Old Main Road, keeping himself busy with cooking and household chores.

''I'm getting along pretty fair so far,'' the spry Hall said. ''I feel fine.''

Hall has outlived two wives and eight of his 12 children. Born in Prentiss County, Miss., Hall moved to New York in 1916. During his working days, he said he was employed on a ''lot of different jobs,'' including a stint on the railroad.

Gail Taylor, spokeswoman for the state Department of Motor Vehicles, said it is not known if Hall is the oldest licensed driver in New York. Taylor said the state didn't begin licensing motorists, other than chauffeurs, until 1910.

''Our records just don't go back that far,'' she said.

Motor Vehicles Commissioner Patricia Adduci's letter to Hall commends and congratulates him for nearly 75 years of driving without having an accident.

Hall is a subject of pride to family members, especially Marshall Hall, 33 one of some 50 grandchildren.

''He's unbelievable,'' he said. ''There are not that many old people that are as active as he is.''

There is some controversy, however, as to Hall's real age. His date of

birth on his driver's license and on motor vehicles' records is listed as March 15, 1880. Hall, however, claims he's really only 105.

His grandson, however, believes Hall is contesting his age in an effort to attract a third wife. But Layne Hall said that's nonsense, and that state records are off.

''That was wrong,'' he said of the age on his license. ''By my count, I was 105 last Christmas Eve.''

#90023u1512 01/23/1990 ~United Press International

LOS ANGELES (JAN. 23) UPI - Just because you tend to slobber a bit, it doesn't mean you have to sacrifice grace and style, says etiquette entrepreneur Jean Pomerance.

Her solution - a natty bib for adults.

This is an idea whose ''time has come,'' she says. ''It's functional and fun.''

It's a way to keep lobster, salad dressing or stuff that falls from a chili-dog from soiling your tie or blouse - all while making a fashion statement.

''Bibs aren't just for babies anymore,'' said Pomerance, 63, who said the idea occurred to her as she sat in a restaurant with her family four years ago, looking down at some salad dressing adorning her clothes.

Her daughter joked that she needed a bib. Pomerance thought, ''Why not?''

She designed a stylish king-sized bib for herself, and discovered that whenever she wore it in a restaurant, other diners wanted to know where they could buy one.

Bib Elites was born. ''The first year, we sold $50,000 worth,'' said Pomerance.

The most popular of Bib Elites' styles is the Tuxedo, which features fake lapels, a simulated white shirt and a black tie. Other styles include the Princess, which looks like a black blouse with white collar and faux pearls.

For the more casual dribbler, there's a style called Engineer-Western, modeled after the always-in-vogue blue and white striped work shirt, complete with red and white checkered neckerchief.

The bibs fasten behind the neck with a Velcro-like closure, so there is no groping with buttons and snaps to draw undue attention during an elegant affair.

All the bibs, of course, are washable cotton or polyester-cotton blends.

The bibs - 12-by-20 inches - are made for adults but Pomerance says there is no reason why big kids can't wear them, too. Kiddie sizes are available in all three styles, for the family that wants to dribble together, but still match.

In fact, one of the big people who has been known to wear one of the fun bibs in public is comedian Phyllis Diller. She favors the black tie look.

Diller says she wears hers on airplanes, where turbulence tends to accentuate a lack of grace in feeding oneself. Pomerance wears hers in restaurants, and says they're ''just the thing for dinner parties.''

The bibs, Pomerance says, fill a marketing vacuum.

After conferring with a patent lawyer, she found that ''other than plastic lobster bibs, there were no adult bibs on the market.''

Manufactured in the San Fernando Valley community of Sherman Oaks, Bib Elites are available at stores that cater to eclectic shopping tastes and stores that focus on cooking needs.

The bibs also can be ordered from Eat Elite Co., 14844 Dickens St., Suite 204, Sherman Oaks, Calif., 91403.

(JAN. 23) UPI - Violence is continuing in parts of Soviet Azerbaijan . In Baku the capital, Azerbaijani militants ambushed a convey killing two Soviet soldiers. The city was paralyzed today by a strike to protest the presence of Soviet forces. And the official Tass news agency reports a leader of the Azerbaijani Popular Front told a rally attended by one-Million people that the group is going ''underground''... a phrase implying a guerrilla war or illegal struggle.

A published report says ousted Panamanian leader Manuel Noriega contacted Cuba's embassy in Panama at least three times to learn why his family has NOT been granted free passage to Havana. Noriega's wife and three daughters took refuge in the Cuban envoy's home after the U-S invasion of Panama last month. The paper says that since Noriega has been jailed in Miami he has called the Cuban envoy three times about his family.

A young Palestinian suspected of leading the uprising was shot and killed by Israeli soldiers in the occupied West Bank today. Palestinian and army sources say the 24-year-old man was shot after fleeing his home in Nablus during an army raid. Military sources say the soldiers opened fire when the Palestinian refused to halt.

President Bush gets a close up look at a battleground of the drug war today. He plans to tour boarded up crack houses in Kansas City and meet with community and law enforcement groups. Kansas City was chosen for the president's trip because of the work of the Ad Hoc Committee on Crime, a community group that's leading a fight to push drug dealers off the streets and crack houses out of the neighborhoods.

(JAN. 23) UPI - A routine traffic stop in South Central Los Angeles left one person dead early today. Officials say two deputies pulled over a car for a traffic violation and were attacked by several men, described as black Muslims. The attackers disarmed one officer who drew a backup weapon and began shooting. One person was killed and another wounded in the second clash between authorities and members of the sect in three weeks.

The dean of classic automotive design, Gordon Buerhrig, has died in Grosse Pointe Woods, Michigan, at the age of 85. Buehrig crafted cars that included the Duesenberg Model J, the Cord 180 and the Auburn Boattail Speedster. The Cord 810 was one of the earliest front-wheel drive cars, but it also featured flip-up headlights and allowed drivers to step... rather than climb up into a car for the first time.

#90023u1532 01/23/1990 ~United Press International

LONDON (JAN. 23) UPI - Prime Minister Margaret Thatcher Tuesday was non-committal during a meeting with two leading Hong Kong politicians who pleaded that the colony be granted greater self-rule before Beijing takes control in 1997, officials said.

A spokeswoman from the prime minister's office said Thatcher's 75-minute-long meeting at 10 Downing Street with Dame Lydia Dunn and Alan Lee was ''long and detailed,'' but she refused to be specific.

''Dame Lydia Dunn and Alan Lee put their case on the future democratization plans (for Hong Kong),'' she reported. ''The prime minister said that she would very carefully consider what they said.''

Hong Kong lobbyists have been trying to persuade London to increase the number of elected seats in Hong Kong's 60-member legislature to at least

30 by 1995 to ensure the body has some power before the Chinese takeover in 1997.

The communist government in Beijing has said it wants only 30 percent of Hong Kong's legislature seats to be held by directly elected members by 1997, but has said this could be increased to half by 2003.

A mainland-dominated committee last week voted to limit the number of directly elected seats in Hong Kong's legislature and impose restrictions on who could hold high political office in the colony after it reverts to China.

In Hong Kong, Gov. David Wilson said Tuesday moves by Beijing to curb democratic reforms in the colony were a disappointment and he hoped China would listen to the territory's concerns.

''There's no doubt that the upshot so far of the drafting on the political structure has been a disappointment to many people in Hong Kong,'' Wilson told reporters.

Thatcher's spokeswoman meanwhile quoted the prime minister as telling the delegates - who are both prominent appointed unofficial members of the legislature - that ''we have not reached any conclusions on this matter.''

''It was simply an opportunity for them to put their case forward and for the prime minister to listen to what they had to say,'' she said.

Dunn told reporters after the meeting that ''stability depends crucially on people's commitment to Hong Kong and their confidence ... in the administration. That is the most important point for Britain to get over to China.''

Lee said during an interview with the British Broadcasting Corp. that the pace of democracy in Hong Kong ''was a very modest one.''

''We are asking the British government to have a dialogue with the Chinese and to explain clearly and firmly the wishes of the Hong Kong people,'' he said. ''China on the other hand has said that they will respect the wishes of the Hong Kong people.''

Political power in Hong Kong now primarily lies with the governor and an executive council of colonial secretaries. The Hong Kong lobbyists argue it is crucial to create a representative government in order to maintain confidence and stability in the territory of 5.5 million people.

They believe limited self-rule may also stem the migration of thousands of Hong Kong's brightest professionals from the colony.

The wave of migrants has increased since Beijing brutally crushed a pro-democracy movement in June 1989, with many Hong Kong residents expressing fear that they will have little protection against government excesses under a post-1997 government.

Hong Kong is reverting to Chinese rule because the bulk of the territory is held under a lease that expires in 1997. Britain signed an agreement in 1984 with China that pledged the colony's capitalist system and lifestyle would be maintained by Beijing and announced it would create a representative government before the takeover.

#90023u1568 01/23/1990 ~United Press International

WASHINGTON (JAN. 23) UPI - Senior U.S. intelligence officials told a Senate panel Tuesday the military threat from Moscow and the Warsaw Pact is diminishing, and one said Moscow might be edgy about confronting NATO alone in Europe.

At a rare public session - with subsequent questions asked behind closed doors - CIA Director William Webster, the head of the Defense Intelligence Agency and the senior Army intelligence officer in Europe, testified to the Senate Armed Services Committee.

The committee is laying the groundwork for consideration of the 1991 defense budget, expected to tally $292 billion plus money for nuclear weapons.

Webster noted the rapid-fire changes sweeping Eastern Europe and Moscow's reductions in its military forces, but cautioned that the Soviet Union continues to modernize an already strong strategic force of missiles, bombers and submarines that can deliver nuclear weapons to U.S. soil.

Webster and the others said warning time for the United States and its NATO allies has increased in Europe, but they also cautioned against cuts in inteligence budgets, a point several senators indicated was important.

And, said Webster, ''We can probably expect a continued diminution, but not elimination, of Soviet threats to U.S. interests. (Soviet leader Mikhail) Gorbachev, and any successors, will have an even more pressing need than in the past few years to reduce the burden of defense spending and to transfer resources to civilian production.''

Lt. Gen. Harry Soyster, head of the DIA, said the changes in Eastern Europe mean that ''the threat of deliberate aggression directed against Europe and its extension to global conflict is much reduced. Nevertheless, Soviet capabilities are still formidable, and the situation we face is very unpredictable.''

Soyster said Moscow's ability to wage a coalition war against NATO with its Warsaw Pact allies is reduced and if Moscow concludes that it cannot count on pact nations, ''they would likely be forced now to adopt a defensive posture in the event of a crisis that could lead to war. In light of these developments, I believe that the Soviets would consider large-scale theater operations against NATO with only their own forces as highly risky, if not impractical.''

''We've seen the threat change on television every night with the dramatic changes in the Warsaw Pact. I think it's important for the American public to understand that those of us in the Congress as well as the executive branch are indeed looking at this changed threat as the foundation on which we build the budget which we will be asking the American people to pay for,'' committee Chairman Sam Nunn, D-Ga., said in opening the hearing.

In other major defense developments Tuesday, Senate Republican leader Robert Dole of Kansas, after consulting with a variety of defense experts, told the Senate the changes in attitude in Moscow and the democratization in Eastern Europe came from strengths created in the 1980s and should ''not (be put) at risk in an emotional pursuit of illusions such as the 'peace dividend.' Instead, let us approach the 1990s with caution and cool heads.''

And the Congressional Budget Office forecast for Congress that the initial small step in a treaty equalizing conventional forces in Europe would save only about $3 billion, but cutting U.S. forces to half their current levels would eventually trim $27 billion from the defense budget. The savings, however, would take several years to occur.

#90023u1570 01/23/1990 ~United Press International

DETROIT (JAN. 23) UPI - Consumer safety organizations are accusing Nissan of having a ''blatant disregard'' for safety because of its plans to air a television ad that the groups say glorifies speeding.

The Insurance Institute for Highway Safety and the National Highway Traffic Safety Administration also said Tuesday they have asked Nissan to withdraw its sales brochures depicting its 300ZX Turbo sports car without the automatic safety belts fastened.

''Nissan is showing a blatant disregard for safety both with this latest ad and with its promotional material,'' said Brian O'Neill, president of the Arlington, Va., institute.

''Federal law clearly requires that automatic belts be hooked up when displayed,'' he said adding that his group is now looking at promotional

material from all carmakers.

Bill Pauli, a spokesman at the carmaker's U.S. headquarters in Carson, Calif., said Nissan is currently reviewing the matter but no decision has been made on whether to revise the sales material.

''We were notified by NHTSA after the printing,'' Pauli said. ''But like other automakers, we think we made an honest effort to better show the interior features.''

Despite sharp protests by numerous several safety groups and insurance companies, Nissan has no plans to withdraw the television ad, which shows Nissan's $33,000 sports car outrunning a motorcycle and a race car before finally outrunning a fighter jet.

Done by California advertising agency Chiat Day Mojo, it will air this Sunday in one 60-second spot on CBS during the Super Bowl. Nissan is still deciding whether it will air 30-second versions of the commercial after that, Pauli said.

''This is part of our 'fantasy campaign' launched two months ago,'' he said. ''It simply depicts the dreams drivers have. It is so far-fetched and fanciful that we don't see any connection with real world driving situations.''

But O'Neill, who said the car is shown moving at about 150 mph, called Nissan's response ''patronizing.''

''They are quite frankly being dishonest,'' he said. ''These kind of cars all too often are involved in high-speed driving and crashing.''

#90023u1578 01/23/1990 ~United Press International

NEW YORK (JAN. 23) UPI - Chemical Banking Corp. has eliminated a total of about 100 jobs in its New York offices and at a Columbus, Ohio, mortgage subsidiary in recent weeks, a spokesman for the bank holding company said Tuesday, citing the necessity to ''take a look at expenses.''

But the spokesman, Charles G. Salmans, refused to comment on a report that a wider round of cutbacks affecting several hundred people was in the offing at the money center bank. Chemical's 1989 results, released last week, showed expenses up 11.4 percent to $2.73 billion.

The New York Times reported that the company was planning to cut more than 300 jobs in a drive to improve earnings. It said jobs would be eliminated from marketing, administration and operations areas.

Asked about Chemical's intentions, the spokesman said, ''As a matter of policy, we don't discuss possible future job levels or actions.''

But he said about 20 New York consumer banking positions have been cut, while 80 jobs were trimmed at Chemical Mortgage Co. in Columbus, whose mortgage origination work was shifted to Chemical Financial Services Co. in Cleveland, Ohio. The Columbus unit will continue mortgage servicing.

Salmans explained, ''What we are really looking at is how we can raise the ratio of people who are in line positions relative to the number of people who are in staff positions.'' Line positions involve customer contact or service; staff positions are administrative or supportive.

The spokesman did not directly link the recent cutbacks to Chemical's results in the last quarter, when profits were down 67 percent from the year-earlier quarter, or in 1989, when the bank lost $482.2 million.

But he said that ''every financial institution is having to take a look at its expenses'' right now and ''the process of taking a close look at staff levels is a constant one.'' Chemical has 14,000 employees in New York, 10,000 of whom are in the consumer banking area, Salmans said. The banking corporation as a whole has approximately 30,000 employees.

Banking analyst Stephen Berman of County NatWest USA said he was not informed of Chemical layoffs, but added, ''It wouldn't surprise me.'' Chemical, like many other banks, is under pressure from Wall Street to improve results after last quarter's ''absolutely horrible'' earnings, he said.

-30- 2546

#90023u1602 01/23/1990 ~United Press International

SAN JOSE, COSTA RICA (JAN. 23) UPI - Panamanian President Guillermo Endara, concluding his first foreign trip since being installed during the U.S. invasion last month, said Tuesday neutrality will be the main defense of the Panama Canal, which must be transferred to his country at the turn of the century.

''The canal is defended by its neutrality. The neutrality of the canal would give all countries of the world the right to transit freely through it,'' Endara told reporters before departing for home.

Endara said the Panama Canal treaty, signed by President Jimmy Carter and then-Panamanian leader Omar Torrijos in 1977, cannot be renegotiated.

He said Panama will ''assume absolute control'' of the canal in the year 2000 as stated by the treaty.

Endara arrived in San Jose Monday morning on a 24-hour official visit for talks with Costa Rican President Oscar Arias.

Endara's visit was the first foreign trip the Panamanian leader has taken since he took office Dec. 20 as U.S. troops launched military operations that ousted military strongman Manuel Antonio Noriega. After a siege of the Vatican Embassy where he sought refuge, Noriega surrendered to U.S. troops and now awaits trial on drug trafficking charges in Miami.

''The typical position of the (Panamanian) military dictatorship was to establish more and more infantry companies and acquire more arms for the year 2000, justifying this with the need of defending the canal,'' Endara said.

He said the canal cannot be defended by conventional arms, but with neutrality.

''One has to take into account various things when one talks about the defense of the canal: first, the canal, as has been demonstrated on many occasions, is undefendable; an internatio the canal destroys it and it cannot be avoided at least by conventional arms that the Public Forces would possess.''

The Endara government is organizing a Public Force to replace Noriega's Panamanian Defense Forces.

After holding a four-hour session with Arias Monday, Endara said that his country may follow the lead of Costa Rica and abolish its army.

''We don't want military, we don't want to have any more danger of military domination of our civil and democratic society,'' said told reporters Monday.

Costa Rica abolished its army in 1949 and relies for security on a 6,000-member force of ill-trained rural and civil guardsmen. The country, sometimes known as the Switzerland of Central America, proudly contends it takes the money it would have spent on a military and funds education.

''We are organizing a public force ... where exists not an air force but a civil air service without military, and the naval force will be reduced to control contraband and drug trafficking,'' Endara said.

Arias said after his meeting with Endara that it may be time for Panama to abolish the military force that has dominated the nation's politics for the past 21 years.

''We have envied Costa Rica for having abolished its military,'' Endara said. ''You enjoy a democracy without a fear of arms being put at the

popular will of people.''

-30- 3324
#90023u1630 01/23/1990 ~United Press International
ATLANTA (JAN. 23) UPI - Former President Jimmy Carter said Tuesday he will travel to Nicaragua Friday with an observer delegation to assess preparations for that country's upcoming national elections.

''With the election just one month away, it's crucial that the remaining problems that might cloud the campaign be addressed effectively, so that the candidates can debate the issues of Nicaragua's future,'' Carter said.

Carter said key issues of concern to the Council of Freely Elected Heads of Government, the group observing the February elections, are the prevention of harassment and intimidation of opposition leaders and poll watchers, ensuring equal access to the media and examining any use of state property by the governing Sandinista party.

The council is based at the Carter Presidential Center at Atlanta's Emory University.

''My visit is also intended to reassure the Nicaraguan people that they can vote with confidence and that the world is watching to reaffirm their decision,'' Carter said.

Carter and his wife, Rosalynn, will be accompanied by former Colombian President Alfonso Lopez Michelsen, Sen. John Danforth, R-Mo., Rep. Douglas Bereuter, R-Neb., Rep. Bill Richardson, D-N.M., and Carter Center Central American expert Robert Pastor.

Nicaragua's Marxist Sandinista government recently said it would permit only impartial international observers to monitor the election and therefore was rejecting President Bush's plans to send a congressional delegation.

''In light of that decision, this pre-election visit is all the more important in permitting a bipartisan group from Congress to assess the state of the electoral process,'' Pastor said.

Carter, chairman of the council, accepted invitations from the Nicaraguan government and opposition leaders last August to organize a delegation to observe the elections. This will be Carter's third pre-election trip to Nicaragua and the fifth by representatives of the council.

As in previous visits, the delegation will meet with leaders of the government, the opposition, the Supreme Electoral Council, civic leaders and other observer delegations.

The group will observe campaign rallies and monitor progress in resolving electoral problems, a statement from the Carter Center said.

The council will sponsor another pre-election visit in mid-February, and afull delegation will go to Nicaragua to observe the voting and ballot-counting Feb. 25.

-30- 2675

#90023u1637 01/23/1990 ~United Press International

WASHINGTON (JAN. 23) UPI - President Bush stood virtually alone Tuesday before a wave of Republicans and Democrats prepared to strike down his veto of a bill to protect Chinese scholars against possible persecution by the Beijing leaders who crushed the pro-democracy movement.

A core of conservative Republicans in the House lined up with the Democratic leadership in pledging to override the veto Wednesday, and the No. 2 GOP leader in the Senate conceded a crushing defeat awaits Bush.

''This thing is going to be overriden and it's just going to be a dazzler '' Sen. Alan Simpson, R-Wyo., a supporter of the Bush veto, told reporters. ''There won't be five of us in the Senate that will vote (to uphold the veto).''

Senate Republican leader Robert Dole of Kansas said Bush had already guaranteed the estimated 36,000 students in the United States will not be forced to return to their troubled homeland by putting the protections into place by executive action.

Bush vetoed the bill on grounds it eroded his leadership on foreign policy and that it would insult a government that he is trying to nudge toward moderation - at his great political risk.

''There is really no good reason to override the president's veto unless it's straight out politics,'' Dole said.

Although partisan knives are always out on Capitol Hill, Dole's charge was overwhelmed by the surge of Republicans supporting the veto override on grounds it is prudent to put the student protections into law.

''A veto sends the wrong message to the old dinosaurs still ruling China at a time when communist dictators are becoming extinct everywhere,'' said Rep. Gerald Solomon, R-N.Y.

Rep. Duncan Hunter, R-Calif., said ''a number of Republican conservatives'' would vote against Bush and ''send a very strong message to the leaders of communist China.''

Rep. Mickey Edwards, R-Okla., the No. 4 Republican in the House leadership and usually one of Bush's strongest supporters, said Congress was not attacking the president.

''He made a mistake. He's wrong on this one and Republicans are going to join Democrats in the House in overwhelming numbers, I believe, to override the president's veto.''

The bill would allow Chinese students to seek permanent resident status instead of returning home, where they could face political persecution by the hardliners who ordered tanks to crush the pro-democracy movement in Tiananmen Square last June.

The action cost the lives of hundreds and perhaps thousands of demonstrators, and prompted a tide of revulsion that left the Chinese leadership in isolation.

Bush, a former envoy to China, condemned the atrocity while also moving to limit damage to relations with the nuclear power and the world's most populous nation. He sent his national security affairs adviser and deputy secretary of state on two secret missions to China to press for moderation. Congress largely opposed the overture.

Senate Democratic leader George Mitchell of Maine and Sen. Edward Kennedy, D-Mass., Tuesday condemned the mission as ''kowtowing'' to the Chinese leaders who called out the tanks.

Mitchell, joining Edwards and Kennedy at an outdoor Capitol news conference that included a model to the ''Goddess of Democracy'' statue that was crushed at Tiananmen Square, said Bush is confused.

''The administration appears unable to distinguish between the Chinese government, with which it has aligned itself, and the Chinese people, with whom we should be aligning ourselves,'' Mitchell said.

''This administration has been too fast in bending and kowtowing to the Chinese leaders and too slow in standing with the democratic forces in China,'' Kennedy said.

Simpson said the issue is being lost by a wave of emotionalism.

''What are we doing here? This exercise, all fueled with the engine of emotion, fear, guilt and racism.''

Mitchell rejected Dole's suggestion that the Senate wait 30 days to see if the Chinese moderate their behavior beyond lifting martial law, which they did earlier this month.

The Senate will act soon after the House in behalf ''of the victims of murder by government,'' Mitchell said. ''It is the right thing to do.''

CHICAGO (JAN. 23) UPI - It's not that the editors of the World Book Encyclopedia didn't admire the job United Airlines Captain A.C. Haynes did trying to land crippled Flight 232 last year in Sioux City, Iowa.

It's just that they don't think his contribution to society was of enough "lasting significance" to merit inclusion in their revised reference work. On the other hand, the microwave oven, Jack Nicholson, and carpal tunnel syndrome cut the mustard and are in the revised 1990 edition.

"It's no easy task to get into the World Book Encyclopedia," said Executive Editor A. Richard Harmet. "You can't be a passing fancy or a flash in the pan."

Harmet said Haynes' feat "will fade with each passing year. A person must have made a major contribution to his or her field; or, an event or subject must have lasting significance. We often take a wait-and-see attitude."

The "wait-and-see" attitude led the World Book staff to wait until the 1990 edition to add articles on such subjects as Hispanic Americans and the women's movement. In previous editions, the publication said, those subjects were "covered in other articles."

Among the other people included for the first time in this year's World Book were 1920s and 1930s entertainer Josephine Baker, Pakistan Prime Minister Benazir Bhutto, Defense Secretary Richard Cheney, zoologist Dian Fossey, tennis player Steffi Graf, the late Beatle John Lennon, boxer Sugar Ray Leonard, Senate Majority Leader George Mitchell, Nicaraguan President Daniel Ortega, National League President Bill White and "The Right Stuff" author Tom Wolfe.

Other newly included subjects include the American Association of Retired Persons, biotechnology, computerized tomography, the Hubble Space Telescope, microwave ovens, positron emission tomography and the surgeon general of the United States.

In addition to the new articles, the 1990 World Book includes 3,600 revised articles. Harmet said it can take as long as three years to move an article from conception to publication.

"Once we decided to consolidate our coverage of Hispanic Americans in a new 15-page article, for example, the editors developed an outline for

article content, an expert on the subject was chosen to write the entry, illustrations were chosen or commissioned, and, finally, the manuscript was edited for readability, fact-checked and approved," Harmet said.

#90023u1663 01/23/1990 ~United Press International

FAIRFIELD, CT (JAN. 23) UPI - General Electric Co. Tuesday reported fourth-quarter net income of $1.2 billion, or $1.30 a share, up 16 percent over $1 billion, or $1.12 a share, in the same period of 1988.

Net income for the year as a whole was $3.9 billion, or $4.36 a share, up 16 percent from $3.4 billion, or $3.75 a share, reported in 1988, said GE Chairman John F. Welch Jr.

Revenues for the last quarter of 1989 were $16.2 billion, up from $15.5 billion for the same period in 1988, Welch said.

He said revenues for all of 1989 were $54.6 billion as compared with $50.1 billion for 1988.

''Our operating margin of 11.3 percent of sales - an all-time record for GE - reflected continuing company-wide productivity improvements and revenue gains around the world,'' he said.

It was the third consecutive year of ''strong double-digit'' earnings increases, said Welch.

''While virtually all of our key businesses contributed to higher earnings particularly good 1989 performances were reported in financial services, plastics and medical systems,'' he said.

General Electric began 1990 in ''excellent financial condition,'' Welch said.

Despite $800 million in acquisitions, the improving cash flow of GE's businesses reduced short- and long-term debt by more than $500 million during the year, and debt as a percentage of capital was down to 21 percent compared with 25 percent on Dec. 31, 1988, he said.

''While short-cycle orders slowed somewhat during the last half of 1989, GE's longer-cycle businesses were very strong,'' said Welch.

''Aircraft Engine's 1989 orders of nearly $8 billion brought firm backlogs to over $13 billion with options adding an additional $22 billion,'' Welch said.

Firm aerospace orders for the year rose 8 percent to $6 billion and

business from international customers more than doubled from 1988 to nearly $1 billion, he said.

New orders for GE's power generation business were nearly $4 billion, driven up more than 40 percent in 1989 by an upswing in utility demand, said Welch.

Medical systems equipment orders were strong in the second half of 1989 - up more than 20 percent, he said.

#90023u1666 01/23/1990 ~United Press International

(JAN. 23) UPI - TODAY'S PEOPLE:

MUSIC AWARDS NEWS: Someone ripped off singer Paula Abdul while she was reveling in her twin triumphs at the American Music Awards. Abdul, who was chosen favorite female vocalist in both the soul-rhythm and blues and pop-rock categories, returned to her Studio City apartment early Tuesday to find that it had been burglarized. The stolen articles were described only as ''personal items'' ... Guns 'N Roses songs have been banned from radio station WZPL-FM in Indianapolis because of the ''lewd language and drunken appearance'' of two members of the band at the ceremony. Slash and Duf McKegen carried drinks, appeared woozy and slurred their words - at least one of which was obscene - when they went onstage to pick up their award. ''We are concerned with drug and alcohol abuse,'' said WZPL's Don London, ''and we feel it's our responsiblity to keep the public aware of these problems.''

JACK AND JOHN IN WORLD BOOK: Jack Nicholson has earned himself an entry in the latest edition of The World Book Encyclopedia, along with the late John Lennon. Nicholson's 15-line entry describes him as often playing ''a cocky, rude outsider or free-spirited individualist who rejects conventional society,'' while Lennon, the ex-Beatle, rated a picture and 19 1/2 lines that lauded him as ''one of rock's leading social critics through such songs of idealism as 'Give Peace a Chance' and 'Imagine.''' Also among the 75 new listings in the 1990 World Book are writer Tom Wolfe dancer-actor Gene Kelly, opera singer Robert Merrill, Pakistani Prime Minister Benazir Bhutto, gorilla expert Dian Fossey, boxer Sugar Ray Leonard, songwriter Alan Jay Lerner and tennis players Steffi Graf and Ivan Lendl.

FANS GET INPUT WITH BOWIE: Fans can call the tune for David Bowie's upcoming tour by dialing a special 900 number. Bowie held a London news conference Tuesday to announce that the tour will open in Quebec in March and will take him to five continents before it ends in August. It will be a greatest-hits show and fans can call a toll number (900-2-BOWIE-90) to vote for the songs they want to hear. U.S. dates will be announced later.

Bowie, who capped the news conference with an accoustic performance of ''Space Oddity,'' says the touring band won't include members of his extra-curricular group, Tin Machine, but he will resume working with Tin Machine after the tour.

A BABY FOR LIFE: The cutest little baby face in the country belongs to 16-month-old Andrew Payton Nestler of Pleasanton, Calif., according to the people at Life magazine who chose him from a field of 20,000 infants. The blue-eyed blond Andrew likes making faces at people and enjoys having his picture taken, his family says. Andrew won $25,000 in U.S. Savings Bonds and an album of portraits by a Life photographer. But mom feels on the spot. ''Since he won, I feel like now the pressure's on,'' said Robin Nestler, 32. ''I feel like every time we go out, he's got to look his best.''

MOVING MUSEUM: Baron Hans Heinrich von Thyssen, the West German steel billionaire, is moving out of Lugano, Switzerland, for artistic and financial reasons. Thyssen, who has long has argued that Switzerland does not offer any attractive tax advantages, is offering to sell Villa Favorita, his home-cum-museum, to the town but officials declined to comment on reports that the asking price is $30 million. The baron also failed to convince both Lugano and Swiss federal authorities that they should contribute to the cost of extending the villa if they wanted his art collection to remain in Switzerland. Last year Thyssen decided to move the most important works in his priceless collection to Madrid, his wife's hometown. Unlike Switzerland, Spain readily agreed to build an extension to the Prado museum to house the 1,400-painting collection, which is ranked second only in the world to that of Queen Elizabeth II.

#90023u1699 01/23/1990 ~United Press International

VIENNA (JAN. 23) UPI - Romania's first democratic elections in more than four decades will be held May 20, the provisional government announced Tuesday, saying it would ask the United Nations to supervise the polls.

The ruling National Salvation Front also said it will form a political party and compete with more than a dozen other political parties that have formed in the past few weeks, the official Rompres news agency said.

Silviu Brucan, a member of the Front's executive committee, announced the election date at a news conference following a private meeting of the Front's entire membership in Bucharest.

Brucan said the government will ask U.N. Secretary-General Javier Perez de Cuellar to provide monitors for the elections.

The Front had promised elections would be held in April and it was not

immediately clear why May 20 was chosen as the date.

Several opposition groups had asked that the elections be postponed until summer or fall to give fledgling political parties more time to organize their campaigns.

The last multiparty election in Romania was in 1947 and won by the Communist Party amid widespread charges of fraud.

Leaders of the provisional government promised free, democratic elections within days after hard-line communist leader Nicolae Ceausescu was driven from power in a violent pro-democracy uprising.

Although the Front had said all along it intended to participate in elections, Brucan and other leading members had said the Front would never become a political party.

Brucan told a news conference earlier this month the National Salvation Front is an ''original creation'' of the Romanian revolution and would cease to exist if its candidates were not elected to office.

At least 13 parties have filed with the provisional government since Jan. 1, including the Liberal Party and National Peasant Party, two of the largest political organizations in Romania before World War II.

WEST BERLIN (JAN. 23) UPI - East German border troops have started tearing down the most colorful section of the Berlin Wall to be sold to collectors and afficionados worldwide for hundreds of thousands of dollars a piece.

The official East German news agency ADN said Tuesday the authorities hoped the 320-yard section of the wall would fetch millions of dollars from buyers in the United States, Japan and West Germany.

Officials said earlier buyers might include museums, art galleries as well as private collectors.

The news agency said border guards started pulling down the segments in the Berlin district of Kreuzberg Monday night and hoped to have completed their work by the end of the week.

A fence will be erected to replace the wall.

The Kreuzberg stretch is considered the most colorful and interesting part of the Berlin Wall as it is covered with political, social and other

graffiti - but only on the western side.

The East German government commissioned an East Berlin firm - Limex - to sell the wall.

Limex is planning to sell the almost 3 feet 9 inch wide by 11 feet 9 inch high pieces for between $300,000 and $400,000 a piece, and that the proceeds would be used for humanitarian purposes.

SAN FERNANDO, CA (JAN. 23) UPI - A postman pleaded innocent Tuesday to charges he shot and killed a family's dog while delivering mail on his route.

Floyd B. Sterling, 34, of Pacoima, appearing in Municipal Court for arraignment, denied one count each of cruelty to animals, carrying a concealed weapon and discharging a firearm with gross negligence, all felonies.

Municipal Court Commissioner Gerald Richardson allowed Sterling to remain free on $5,000 bail and ordered him to return to court Feb. 6 to schedule a preliminary hearing.

If convicted of cruelty to animals, Sterling could be sentenced to state prison for up to three years and fined $20,000.

Sterling is accused of shooting to death Skippy, a 2-year-old mixed German shepherd owned by Tammie Brody and her family, while on his postal route Dec. 26.

Brody, 27, said Sterling ''freaked out'' and shot the dog just as she was about to give the postman his Christmas present, a bottle of vodka. She said Skippy was not menacing Sterling at the time.

Police said an autopsy revealed that Skippy was shot while running away from the mailman.

Detective Gary Milligan said the autopsy was performed by a private veterinarian in Calabasas, who concluded that the fatal bullet entered the dog's left side below the rib cage.

Police said Sterling told them Skippy had been him in the past.

U.S. Postal Service spokesman Ron Cook said Sterling was placed on administrative leave following the shooting. Postal service carriers are not authorized to carry firearms.

The Brody family buried Skippy during an elaborate funeral service at a Calabasas pet cemetery Jan. 3.

#90023u1728 01/23/1990 ~United Press International

NASHVILLE, TN (JAN. 23) UPI - Travis Tritt's decision to try to make a living singing and writing country music got its impetus from a perceived vision of the future.

He had a recurring thought imagining himself 75 years old, sitting in an old rocker on the front porch wondering what would have happened had he tried the music business.

He may one day - 50 years down the road - sit in a rocker on the front porch, but he'll always know that he gave music a try. And a good start it has been.

Tritt's first single, ''Country Club,'' made it to No. 9 on Billboard. His album from Warner Bros. is due out in March.

But getting to that point wasn't as easy as it sounds.

The 26-year-old Marietta, Ga., native started singing in the church choir at the age of 4.

''People would come over to the house and the first thing they would ask me to do is sing. It was something that always stuck with me and that I always enjoyed. It is something I always wanted to do for a living. I didn't tell anybody.''

Tritt explained that his father had his roots in the hard work of farm life and had seen a lot of people who ended up in bad situations trying to pursue entertainment. His mother thought if he was going to sing for a living he ought to sing gospel music.

So Tritt got himself a job at a heating and air conditioning company, beginning as a loader and ending up in management of the firm.

''I ended up getting married out of high school and my marriage broke up. I had been working at the heat and air conditioning place for four years and had worked my way up to management. I was doing good but I was not happy. My wife was jealous of the music. So when the marriage broke up I decided that this was my opportunity.

''If I go out and pursue this now, which is something I've always wanted to do, if it falls flat on its face, the only person it's going to affect is me. I talked to so many people, including my boss. He was a vice president of our company and was very successful, but he had had dreams of doing something in rock music when he was young and never did.

''From talking to him and other people about the same thing, I found there were a lot of people that had an opportunity to do something when they were younger and didn't do it. The not knowing oas the hard
5/8

''I figured that if I go out and give it my best shot, one of these days when I'm 75 sitting in a rocker on the front porch, I can look back and say if it doesn't work, I gave it my best shot.''

That was back in 1983 and Tritt paid his dues doing club work around Marietta. He worked for the heating and air conditioning firm and played at night for about six months, ''And it nearly killed me,'' he said.

''After that I decided that I was having more fun and making more money working less hours doing music. I quit my day job. That was the hardest step I ever took because I didn't know after that gig ran out where the next meal was coming from.''

The gigs didn't run out, but Tritt was still just a club singer, really not making much money.

''The thing that really turned my career around was that the Marlboro Tour talent contest came to our town. I didn't have any money to go to studio to do demo tapes, and I wanted to enter this contest. A friend of mine who was an electrician was wiring up a studio for Danny Davenport, who was a pop promotion man for Warner Bros. The friend told me that he could get me some studio time and it won't cost anything. He said I'd have to rush in and rush out.

''So I went in did three songs and all three original songs. While I was recording them, Danny heard what I was doing and he liked it well enough. He invited me back and we eventually did an album.''

Tritt said it built his confidence for someone in the business to tell him he had some talent.

Davenport took Tritt's album to California, where his bosses listened and eventually sent it to the country division in Nashville.

That led to a demo contract and finally a single and album contract.

Tritt reflected on his farm background as a child and how it affects him today.

''I'm basically a farm boy and I hope we never lose those values of hard work. It may sound corny and hokey, but everything wasn't handed to me on a silver platter. That background gives me a strong grounding in my roots. That's one of the reasons I don't want to move to Nashville. I would like to stay where my music started. The true relaxed atmosphere is still there. People have a strong grounding in religion and in their beliefs. That's something you have to believe in,'' he said.

Tritt won't ever forget where he came from, he says.

''I remember sitting around even before signing a contract and said if we could just get into the top 30, wow, would that be great.''

He beat that by 21.

-30- 5061

#90023u1763 01/23/1990 ~United Press International

WASHINGTON (JAN. 23) UPI - Congress wasted little time Tuesday in calling to the carpet the Resolution Trust Corp., the government agency charged with cleaning up the nation's savings and loan mess.

''To the outside observer, it would seem the RTC's watchword is 'don't just stand there, do nothing','' said Rep. Charles Schumer, D-N.Y., a member of the House Banking Committee, which is reviewing the progress of the Resolution Trust Corp.

The agency, which disposes of the assets of failed thrifts, was created last August as part of President Bush's thrift bailout bill. Members of the RTC's oversight board defended the performance fo the 4-month-old agency.

''The oversight board believes that the pace of resolution to date has been quite credible in view of the start-up nature of the operation, the need to develop and implement new policies, and the desire to involve the maximum potential number of bidders,'' said Deputy Treasury Secretary John

Robson, who also serves as acting chairman of the RTC oversight board.

Since its inception in August, the RTC has disposed of the assets of 40 failed thrifts with about $12 billion in deposits, Robson said. Earlier this month, the agency sought bids on 52 troubled savings institutions.

Members of the committee, though, said they believe the pace of resolutions has slowed and are concerned that the agency is not performing as well as it should.

''Most of us were unrealistic to expect the RTC to hit the ground running '' said Rep. Bruce Vento, D-Minn.

Daniel Kearney, the president of the agency's oversight board, said the agency has spent much of its time making sure proper policies are in place to dispose of thrift assets.

''I'm confident the pace of resolutions will now pick up,'' he said, projecting the agency will dispose of the assets of 50 failed thrifts during the first quarter.

But Robson told the committee that between $40 billion and $100 billion worth of additional working capital may be needed to ensure the agency can do its job. In August, as part of the bailout bill, Congress approved spending $50 billion to pay for thrift losses.

''If working capital financing is not provided, the RTC may have to slow case resolutions or hastily sell acquired assets to unlock cash for resolutions,'' Robson said. ''Obviously, neither result is desirable.''

Federal Reserve Chairman Alan Greenspan, who also serves on the agency's oversight committee, reiterated the agency's need for adequate working capital.

Greenspan also gave a vote of confidence to the beleaguered savings and loan industry, which has suffered a series of scandals and seizures in recent years.

When asked by a committee member whether the thrift industry has a future, Greenspan replied:

''There is an economic function out there that is being served by savings and loans. The role of the savings and loan is changing but there are certain fundamental skills that are performed by those insititutions.''

Greenspan said thrifts ''add to the financial structure of this country.''

Jack Kemp, secretary of housing and urban development and a member of the

agency's oversight board, said protecting the ailing savings industry also will improve the ability of the institutions to provide home loans.

#90023u1777 01/23/1990 ~United Press International

DAMASCUS, SYRIA (JAN. 23) UPI - Syrian leader Hafez Assad, after three days of talks with Lebanese President Elias Hrawi, said Tuesday Syrian troops would be available to help Hrawi ''expand his control to all Lebanese territory.''

Assad, speaking to reporters at the presidential palace in the Syrian capital, said, ''I clearly declare that if the Lebanese legitimate authority asks for Syrian military support to expand its control on all Lebanese territory, we will respond.

''And if the legitimate authority chooses that the Lebanese army should understake such a mission, Syrian troops will also be ordered to give support,'' Assad said.

Assad, who held a joint conference with Hrawi, apparently was referring to a mission to oust Christian strongman Michel Aoun who has refused to recognize Hrawi's authority.

Hrawi has repeatedly vowed that if force is necessary to remove the general, only Lebanese troops would be used. Aoun has refused to relinquish the presidential palace in the Christian enclave.

Hrawi, who was elected president following a Western and Arab League sanctioned peace accord worked out in Taif, Saudi Arabia, Oct. 23, by the majority of the Lebananese lawmakers, said he would spare no efforts to reunify the country.

''I will do anything possible to prevent the disintegration of the country. I did not accept this post (the presidency) to become a witness to dividing Lebanon,'' Hrawi said.

The Lebanese president talked of an unspecified security plan that would be carried out soon in the Moslem western sector of the Lebanese capital.

Political sources had reported that Hrawi, who arrived in Syria Sunday, intended to ask the Syrians to pull their forces away from Beirut airport so that they could replaced by a Lebanese patrol.

Analysts noted that Syria is eager for the ouster of Aoun, who has vowed to fight to the finish to force the last Syrian soldier from the country.

Aoun rejected the Taif accord because it did not call for a speedy

withdrawal of Syria's 35,000 troops from the country.

A fragile Arab League-mediated cease-fire has been holding since last September following bloody fighting that engaged Aoun's estimated 15,000 troops against Moslem militia forces backed by Syrian troops.

#90023u1811 01/23/1990 ~United Press International

BY VERNON SCOTT

HOLLYWOOD (JAN. 23) UPI - Nothing kills a writer's soul as thoroughly as watching his theatrical work rewritten for the movies.

Traditionally, studios and producers have bought the screen rights to hit plays and then, for better or worse, turned them over to screenwriters. Playwriting and screenwriting are, after all, different disciplines and few can do both.

A notable current exception is Alfred Uhry, who wrote the spectacularly successful ''Driving Miss Daisy'' for the theater and won a Pulitzer Prize for his efforts.

And wonder of wonders, he was selected by producers Richard and Lili Zanuck to write the movie script.

As things turned out, he did as good or better a job with the movie as he did with the play.

Uhry, who was reared in Atlanta where ''Driving Miss Daisy'' takes place, just may win an Oscar for best screenplay based on material from another medium.

He says the difference in writing for the two is the difference between ''show'' and ''tell.''

''In a play you have to tell a lot because the audience doesn't see a great many things,'' he said. ''For instance, the secondary characters have to be discussed because they aren't seen. When you write a screenplay you show a lot of things that don't need telling.''

The scenery and props for ''Driving Miss Daisy'' on stage consisted of two stools and one easy chair. There were only three people in the play.

The movie fleshed out all the characters and opened up the story to include exteriors of all kinds, dozens of actors, interiors of automobiles church services and a variety of sets.

Andy Cummings, location scout for the film, chose the very same house in which Uhry's grandmother lived when he was growing up as a boy.

''When I wrote the play I had no expectations of it becoming a movie,'' the writer said. ''But I did see it as a movie in my head and it had 16 scenes - which is an awful lot for a play.

''In writing the screenplay my instinct was that I would have a locale to tell the story with fewer words. Audiences could see the house and garden and the car accident and details, including the twitch of facial muscles.

''All of that can be seen with the camera. The operative word for films is 'showing' as a rule of thumb. In the theater you need more 'telling.'

''(Director) Bruce Beresford encouraged me to go further down the 'show' path. In almost every scene there were chunks of dialogue from the play that I didn't need. So I allowed myself to become the camera.

''Dropping so much dialogue was difficult until I got used to it. It took me longer to imagine the story as a screeplay than it took me to write the play. The only other screenplay I'd written was 'Mystic Pizza.'''

Uhry grinned and said ''Driving Miss Daisy'' has no plot, only a small collection of details in the 25-year relationship between a prickly Southern matron and her black chauffeur.

His task was made easier by the casting of Morgan Freeman, who originated the chauffeur's role on stage, in the movie.

''Morgan gave the same performance he did on stage, only now you can see it better,'' Uhry said. ''I lost my cool when I thought the Zanucks might hire a famous movie star for the role of Hoke. No one could play it as well as Morgan. But the Zanucks wanted him, even though he might have been difficult to sell to a studio. They wanted to make the same film I had in mind.

''Jessica (Tandy) did a wonderful job in the film. She was our first choice because Dana Ivey (who starred in the stage version) was too young to do it on screen.

''I was terrified another writer might have been called in. A lot of plays are ruined by producers who hire the wrong writers and directors.

''The Zanucks took a big chance with me. When I saw the finished product,

I saw the movie I had envisioned in my head. For a writer, it can't get any better than this.''

#90023u1816 01/23/1990 ~United Press International

WASHINGTON (JAN. 23) UPI - For a fourth time in recent months, a security breach has forced the Educational Testing Service to cancel tests in India that students take for admission to U.S. colleges and universities, officials said Tuesday.

ETS officials in Princeton, N.J., said they canceled a Graduate Management Admission Test for 850 students at six centers in southern India Jan. 27 because two test books were missing at one center. Of the 220,000 people who take the GMAT annually for admission to business school, 5,000 are in India.

On Dec. 6, other security breaches prompted the ETS to cancel the Graduate Record Examination for some 3,700 students in India and throw out scores for 2,744 students who took the GRE Oct. 14 and for 620 students who took the Test of English as a Foreign Language Oct. 28.

ETS officials said in all four cases students had or could have had access to tests in advance. They refused to say whether the cases were linked or whether they involved thefts of tests, either in the United States or India.

''Our investigation is continuing,'' said ETS spokesman Ray Nicosia, who also declined to say whether authorities were assisting the probe.

The number of students from India in U.S. colleges and universities has increased sharply in recent years, according to statistics compiled by the Institute of International Education in New York.

In 1988-89, 23,350 Indians were enrolled in U.S. schools, the fourth-largest contingent of foreign students, behind China, Taiwan and Japan. In 1984-85, Indian enrollment was 14,610, the seventh-largest group.

ETS officials said despite the new cancellation, the GMAT will be given at eight centers in other areas of India Jan. 27. Students affected by the cancellations will be allowed to take the test March 17, the company said.

''For those students who may be in danger of missing an application deadline because of the GMAT testing delay, ETS, upon request, will notify the candidate's institutions that the delay is no fault of the student,'' said Elizabeth Durkin, director of graduate management programs for ETS.

Students affected by the other cancellation either have been or will be

given a chance the take the tests again, said officials of ETS, America's largest private educational measurement institution.

CHICAGO (JAN. 23) UPI - Soybean futures made session highs about midday Tuesday and held most of the gains until the final bell.

Closing prices were higher throughout the soybean complex on the Chicago Board of Trade and the grains were mostly higher.

Much of the strength in soybeans was attributed to professional buying and the weakness of the dollar on foreign currency exchanges. Higher prices for gold futures also encouraged buying in soybeans.

Moderate gains in soybean oil were linked to hopes of a near-term export sale to Pakistan.

Grain futures were mixed in relatively quiet trading activity. Corn and wheat had underlying support from steady basis levels and a slight increase in export business.

Egypt and South Korea were in the market for 250,000 tons of corn, and there was talk the Soviet Union would soon be offered more wheat. However wheat was pressured by forecasts for rain or snow next week in the Great Plains.

At the close, corn was unchanged to up 1 1/2, soybeans up 1/2 to 2 1/2, wheat up 3/4 to down 2 and oats up 1 3/4 to 2 1/4.

#90023u1835 01/23/1990 ~United Press International

NEWARK, NJ (JAN. 23) UPI - A federal judge Tuesday ordered Eddie Antar, founder of the defunct Crazy Eddie chain of electronics stores, to return

his fortune to the United States to be placed under a trustee pending the outcome of civil and criminal securities fraud cases.

U.S. District Judge Nicholas J. Politan, who said the Securities and Exchange Commission appeared to have a strong case, also issued a preliminary injunction barring Antar from engaging in securities fraud. But the judge delayed the SEC's suit for four months to give the government time to complete a criminal investigation.

''The public must be protected,'' the judge said as he ordered repatriation of Antar's assets. ''People who deal in stocks are dealing with a public trust. The court can't wait until other cases are decided while serious charges are still outstanding.''

Politan, over objections from Antar's lawyer, Justin Feldman, ordered a freeze on $68 million Antar gained from the sale of Crazy Eddie stock. Antar transferred much of his fortune to the Bank Leumi in Israel in what the judge called a ''bizarre'' procedure of buying large cashier's checks.

The New Jersey U.S. Attorney's office, which has named Antar as a target of a grand jury racketeering investigation, has notified Feldman and other lawyers that their fees may be forfeited if he is convicted. SEC lawyer Richard Simpson said he could not tie the government's hands by agreeing not to seek forfeiture.

Feldman, who told the judge, ''I'm devoted to my client, but not at my own expense,'' asked for a stay of the civil case.

Antar built Crazy Eddie from one store in Coney Island, N.Y., to a retail chain with stores around the New York area, becoming a household name through TV commercials featuring a deranged-looking actor trumpeting ''his prices are insane.''

He resigned as chief executive officer of Crazy Eddie Inc. in December 1986 after selling much of his stock. The SEC charges that he and other executives juggled the company's books, increasing income by $2 million in 1985, almost $6 million in 1986 and by many millions of dollars in 1987.

The company, based in Edison, is bankrupt and undergoing liquidation. Another group reportedly has purchased the right to use the Crazy Eddie name.

The SEC suit seeks triple damages from Antar, his brother, Mitchell, a cousin, Sam E. Antar, and other executives. Antar is also the target of a grand jury investigation by the U.S. Attorney for New Jersey and a defendant in a shareholders' suit in federal court in Brooklyn.

Antar, a former Manhattan resident whose whereabouts are unclear, did not

attend the hearing. Feldman argued that the government has presented no proof Antar was involved in any of the 1987 fraud.

During a lengthy hearing, Mitchell Antar's lawyer, David O'Connor, joined the SEC in opposing a stay. O'Connor's New York law firm is also representing Antar's father and other relatives.

O'Connor argued that Antar was seeking a delay in order to scapegoat his relatives.

''Mitchell Antar on recognizing what a horror his brother had created with the company resigned in 1987,'' O'Connor said. ''But now we hear it's all Mitchell Antar's fault.''

#90023u1857 01/23/1990 ~United Press International

WASHINGTON (JAN. 23) UPI - Critics of the B-2 stealth bomber renewed their drive to kill off the bat-winged plane Tuesday and charged that the cost of building and operating the space age jet equals its worth in gold.

''You can't live in, ride in or eat or use for education a B-2 bomber,'' Assistant Senate Democratic leader Alan Cranston of California told a news conference. But he said, ''You can use the money going into the B-2 bomber to help on many fronts like those.''

Cranston and Sen. Patrick Leahy, D-Vt., who got 32 votes last year on his amendment to cancel the B-2, want to block the use of more money to buy new B-2s, but allow the 15 now under construction to be completed and research into stealth technologies to continue.

A Leahy aide estimated as much as $3 billion could be saved in the fiscal 1991 budget by eliminating B-2 production money.

The Air Force estimate of $70 billion for 132 planes, or $532 million each including research costs, puts the per-unit production expense at about $275 million for each of the long-range strategic bombers, designed with high-tech materials to evade radar detection and penetrate enemy airspace.

Senators on the Armed Services Committee estimate the life-cycle operating costs of the B-2 - fuel, crew costs, construction, spare parts and the like - at about $35 billion, which with the Air Force research and production figure of $70 billion boosts the fleet's true cost to a total $105 billion.

Cranston said he believes the actual overall costs will be about $140 billion, based on possible problems with the plane and the fact its predecessor, the B-1, ended up costing 2.1 times what it was first projected to cost.

At a weight of 174,000 pounds, Cranston and Leahy said the plane's cost - figured using Cranston's estimate - roughly equates to the value of its weight in gold. Gold was selling for $408 an ounce Tuesday, or more than $6,500 a pound.

''It's simple math, but crazy logic. Imagine building an airplane that literally costs its weight in gold.

''Even Midas, who could turn everything into gold just by touching it, wouldn't be that wasteful,'' said Cranston.

Leahy and Cranston said they will press their proposal at every opportunity - in the congressional budget resolution, the defense authorization bill and the defense appropriations bill - and they intend to create ''a guns vs. butter debate of historic proportion'' at a time when the threat against the United States is diminishing.

Cranston opposed the unsuccessful move last year to kill the plane, built by Northrop Corp. in his home state, but became a convert when convinced its cost could soar from the $70 billion research and production estimated by the Air Force to about $140 billion for research, production and operations.

While Cranston said he would ''support whatever we need for national defense,'' he added, ''I will not support anything for national defense that we don't need simply to provide jobs or profits in my state or elsewhere in the country. There are better ways to invest taxpayers' money.''

Leahy said halting the project at 15 planes would save a minimum of $40 billion, the amount left to be spent on B-2 production under the Air Force cost estimate.

He noted that last year Defense Secretary Dick Cheney said Congress should either fully fund the B-2 program or kill it outright and not stretch it out.

''My decision is easy. We should not accept the B-2. We should kill it outright,'' said Leahy.

-30- 3761
#90023u1863 01/23/1990 ~United Press International

NEW YORK (JAN. 23) UPI - Under cover of darkness, four armed investigators picked the front door lock on the headquarters of reputed Mafia boss John Gotti, slipped into the club's inner sanctum and bugged two phones, a witness testified Tuesday at Gotti's assault trial.

Slipping past the barber's chair where the so-called Dapper Don's personal stylist has perfected many a ducktail, the armed investigators for the state Organized Crime Task Force were busy concealing the listening devices when there was a noise outside the door at the Bergin Hunt and Fish Club in Queens. A member of the club was trying to get in.

''We were inside. They were outside,'' recalled Fred Rayano, the task force's chief of field operations, testifying at Gotti's trial in state Supreme Court.

The door was jammed and the club member was left out in the pre-dawn chill.

The close call on April 10, 1985, persuaded the government not to return to the club later, despite the fact that the eavesdropping devices turned out to be faulty and one eventually broke, Rayano testified.

As a result, there are audibility glitches in some of the tapes to be presented at the trial, problems that could cost the government its assault case against the alleged most powerful gangster in the nation.

Gotti, 49, the reputed head of the Gambino organized crime family, is charged with assault and conspiracy for ordering the May 1986 shooting and wounding of John O'Connor, a carpenters union official.

His co-defendant, Anthony ''Tony Lee'' Guerrieri, 60, a reputed Gambino soldier, is accused of helping plan the attack, which allegedly was carried out by the Westies, a murderous Irish gang from Hell's Kitchen anxious to gain favor with the Gambinos.

The revenge shooting came four months after a carpenters union goon squad allegedly vandalized a Gambino-linked restaurant to protest the use of non-union labor.

Key evidence against Gotti are his secretly recorded conversations at the club, including one in which he orders his underlings to ''bust up'' O'Connor.

''You know there are audibility problems on some of those tapes?'' asked defense attorney Gerald Shargel.

''Some of those tapes are not clear,'' Rayano conceded.

Rayano said he had been strongly in favor of the decision to leave the

equipment in place rather than return to fix it.

''It was a matter of settling for what you have or losing everything,'' Rayano explained.

Rayano also conceded the government decided not to use ''state of the art'' listening devices that would have more clearly picked up the conversations. He said those devices, although more modern, would have been difficult to install quickly and to properly conceal.

The defense maintains the government was happy to use the second-rate equipment because it produced muffled tapes that the government could interpret any way it wanted.

The government transcribed the recordings and those transcripts will be provided as a guide for jurors listening to the tapes during the trial. Some of the tapes are expected to be played Wednesday.

#90023u1867 01/23/1990 ~United Press International

WASHINGTON (JAN. 23) UPI - Public cholesterol screening tests apparently encourage many people to seek advice from their doctors and change their diets to cut their risk for heart disease, researchers say.

A recent study found about 40 percent of people who had high cholesterol levels on public screening tests went to a doctor to followup on the results and more than three-quarters reported changing their diets.

Dr. Antonio Gotto of Baylor College of Medicine in Houston said his team's study of more than 13,000 people may help rebuff recent criticism about the value and safety of widescale cholesterol screening.

In a study published recently in The American Journal of Cardiology, Gotto and his colleagues looked at the effectiveness of cholesterol screening at a variety of sites - shopping malls, workplaces, health care centers, a supermarket, a blood bank and a school.

The study was conducted by a national network of lipid research clinics and was funded by Boerhinger-Mannheim, which makes the finger-prick cholesterol test used in the study. Gotto, chairman of Baylor's department of medicine, said researchers had no financial interest in Boerhinger.

Overall, 25 percent of the 13,824 people tested had blood cholesterol levels above those recommended by the National Institutes of Health. That is similar to the proportion found in the general U.S. population.

At each screening site, people were given a written record of their

cholesterol results and were told to contact a doctor if their levels were high. Subjects also received a pamphlet explaining how blood cholesterol increases the risk for heart disease and offering dietary advice on lowering cholesterol.

About two months after the screening, researchers conducted telephone interviews involving about one-third of the people with high cholesterol levels. Forty-three percent said they had visited a doctor and 10 percent had made an appointment, researchers said.

''We consider that a very good response,'' Gotto said.

More than 75 percent who had seen a doctor said their diagnosis of high cholesterol had been confirmed, and 72 percent had been prescribed diets to reduce the problem, researchers said.

In addition, about 80 percent of people who had not visited a doctor reported modifying their eating habits in response to their high cholesterol results.

Government studies have linked cholesterol to coronary heart disease, the nation's No. 1 killer. The percentage of adults who had their cholesterol checked has soared from 35 percent in 1983 to 66 percent in 1989.

A recent federal report charged much of public cholesterol screening is unsafe and inaccurate, with up to 25 percent of tests giving results that are too low. Concerns were also raised that many people with high cholesterol results are not referred to doctors.

Gotto said his study found blood drops ''pricked'' from finger capillaries registered cholesterol levels about 0.8 percent to 3.5 percent lower than simultaneous tests examining blood drawn from the vein. That level is ''acceptable,'' he said.

Researchers' calculations also showed about 2 percent of people with elevated cholesterol levels will test falsely negative, while about 7 percent of those with high levels on the screening tests will turn out not to have cholesterol problem.

No case of disease transmission through careless use of needles was reported, Gotto added.

The study used nurses to conduct the tests, but Gotto said other well-trained workers probably could do the job as well.

Gotto said he thinks widescale cholesterol screening efforts are important because ''you might reach people who are either afraid to go to the doctor's office or who can't afford to go often.''

The average cost of finger-prick cholesterol screening is about $5 to $7, Gotto said.

#90023u1877 01/23/1990 ~United Press International

TORONTO (JAN. 23) UPI - Telecommunications giant Northern Telecom Ltd. Tuesday reported fourth-quarter earnings of $168.5 million, or 67 cents a share, after recording a loss of $17.5 million in the 1988 quarter.

Revenues for the fourth-quarter were $1.79 billion. up from $1.5 billion in the like 1988 period.

For the year ended Dec. 31, Nortel reported earnings of $376.5 million, or $1.47 a share, compared with $183.2 million, or 70 cents a share in 1988. Revenues for the 12 months reached $6.1 billion from $5.4 billion in 1988.

Paul G. Stern, vice-chairman and chief executive officer, said Nortel's fourth-quarter results reflected a strong sales effort and benefits from the company's restructuring and cost-reduction programs begun last year.

Research and development costs increased slightly to $188 million in the fourth quarter and $730 million for 1989.

Stern said, barring a significant economic downturn, Nortel expects increases in earnings and revenues in 1990 stemming from strong order growth and continued restructuring.

In 1989, Nortel initiated a restructuring of its operations to focus on software development.

Nortel is a global supplier of fully digital telecommunications switching systems. The company's product line includes central office switching, business communications systems and terminals, tranmission, cable and outside plant.

#90023u1895 01/23/1990 ~United Press International

BRUSSELS, BELGIUM (JAN. 23) UPI - Prospects for economic reform in the Soviet Union appear ''increasingly doubtful'' while such reforms in China have been reined in by the country's hard-line leadership, NATO reported Tuesday.

The previously classified report, ''Comparison of Economic Reforms in China and the Soviet Union,'' was based on developments only up to the beginning of last July.

''By trying to maintain the country's 'socialist achievements,' economic reforms in the Soviet Union will remain piecemeal,'' the report released Tuesday said.

''The failure of the Soviet leadership to press ahead with key measures such as price reforms and the half-hearted manner in which it has approached the growing fiscal and monetary crisis are reflected in the continuing decline of the Soviet Union's economic position.

''The survival prospects for economic reforms in the Soviet Union - now admitted by the leadership to be in a 'state of crisis' - become increasingly doubtful,'' the report said.

The Soviet Union's draft plan for 1990 was dismissed by NATO experts as containing ''some new approaches to dealing with the various problems, but these seem insufficient.''

In China, economic reforms will increasingly focus on administrative measures that increase efficiency on the surface, rather than on comprehensive solutions to the country's ''deep-rooted real problems,'' the report said.

''Whenever it came to do or die in past reform efforts, the party bureaucrats have always put their own interest first, as reflected once again by recent events in China,'' including the violent suppression of last June's pro-democracy demonstrations in Beijing, NATO said.

''As a result, the future course of reform in this country is uncertain, as its scope has been seriously restricted and its direction rechanneled toward areas acceptable to the new, more conservative and suspicious leadership in Beijing,'' the report said.

Despite statements by Chinese leaders that economic reform continues, the reform efforts are ''expected to lose further momentum, last but not least because they will also receive substantially less external support,'' the NATO report said.

The study said that economic restructuring in both countries has always been hampered by ''unsuitable'' political institutions, and the Chinese leadership was ''not prepared to take the necessary steps.''

''As a result, political reforms never left their embryonic stage in China while they have already greatly changed the political landscape of the Soviet Union,'' the report said.

SPRINGFIELD, IL (JAN. 23) UPI - An Israeli company has agreed to locate a helicopter repair facility at the Rockford Airport, a deal that could create 150 jobs in three years, Gov. James R. Thompson announced Tuesday.

Israel Aircraft Services Inc. plans to start one project to reinforce helicopter blades in Rockford soon and hopes to win another contract from the U.S. Army to refurbish and then resell aging UH-1 ''Huey'' helicopters.

Thompson, who is in Israel on a nine-day trade mission, said Illinois beat out a site in Amarillo, Texas, and other possible sites in Oklahoma to lure the Israeli company to Illinois.

''Illinois has the resources and the skilled workers to attract the attention of Israel Aircraft Services,'' Thompson said. ''Rockford, in particular, offered an ideal location.''

Officials said Rockford's close location to Chicago also helped land the agreement.

''They (the Israelis) feel that Illinois has much more of a potential to truly be an international business center than some of the other states. We hope this project will lead to other projects,'' said Dennis Whetstone, deputy director of Illinois' Department of Commerce and Community Affairs.

The smaller-scale, blade-repair project that is expected to add 25 new jobs to the Rockford area will begin soon, but officials said Israel Aircraft Services must first win a contract from the Pentagon before it can start working on the UH-1s.

David Fox, a spokesman for Rep. Lynn Martin, R-Ill., said two other companies besides Israel Aircraft Services still are in the running for the UH-1 project.

Under the helicopter refurbishment program, the company would buy the aircraft from the U.S. Army, repair them and then sell them to private industry for a profit. The company must be located in the United States to win the contract under federal rules, officials said.

DCCA has estimated the UH-1 project would create 150 new jobs. The agency said it will make available a $450,000 grant through the state's Industrial Training Program to assist the company in training new workers if it wins the rehabilitation contract, Whetstone said.

DCCA will also make available a $750,000, low-interest loan to assist the company with the purchase of machinery and equipment, tooling and other improvements for the rehabilitation deal, he said.

#90023u1977 01/23/1990 ~United Press International

NEW YORK (JAN. 23) UPI - Shearson Lehman Hutton Holdings Inc. reported a meager $3.8 million in fourth-quarter earnings Tuesday, partly reflecting its recent recapitalization efforts, while Morgan Stanley Group Inc. reported a strong fourth-quarter showing.

Quarterly net income by Shearson, the second-largest brokerage on Wall Street which has been struggling since the 1987 stock market crash, resulted in a loss of 3 cents a share, compared with a $13 million loss in the fourth quarter of 1988. Quarterly revenues were $2.93 billion, compared with $2.91 billion in the year-ago period.

Earnings were sharply down from third-quarter net income of $66 million, or 64 cents a share, on revenues of $3.3 billion.

Shearson's net income for 1989 was $110 million, or 95 cents a share, up 14.6 percent from $96 million, or 81 cents a share, in 1988. Revenues for 1989 were $12.5 billion, compared with $10.5 billion in 1988.

Quarterly and annual results reflected higher commissions and revenues from market making and principal transactions, offset by declines in investment banking revenues and relocation and severance expenses,

Shearson said. Net interest income was higher in the quarter, but declined for the year, the company said.

During the fourth quarter, Shearson slashed commissions and laid off 800 employees, paying $7 million in severance expenses, the company said.

Analysts said Shearson's fourth-quarter earnings suffered by troubles in the junk bond market and the company's $850 million recapitalization plan announced in December in an effort to retain its credit ratings.

However, he added, Shearson's recovery is likely to be hampered in 1990 by declining corporate profits, the stock market's slow start in January and concern over inflation.

#90023u1994 01/23/1990 ~United Press International

WASHINGTON (JAN. 23) UPI - The United States government spent $14.6 billion more last month than it generated to bring the fiscal year-to-date deficit to $69.6 billion, the Treasury Department reported Tuesday.

The government reported total outlays in December of $103.7 billion and receipts of $89.1 billion.

To finance the deficit, the government borrowed $6.8 billion from the public, reduced its operating cash by $5.2 billion and generated $13 billion by other means, the Treasury said.

#90023u2003 01/23/1990 ~United Press International

WASHINGTON (JAN. 23) UPI - Although Americans are drinking less, alcohol remains the nation's most widely used drug, costing the country $136.3 billion this year in lost productivity, disability and death, the government said Tuesday.

The Health and Human Services Department called its ''Seventh Special Report to the U.S. Congress on Alcohol and Health'' a collection of ''state-of-the-art knowledge'' on all areas of alcohol-related problems and research.

In releasing the triennial study, copies of which will be available to the public in about six weeks, HHS Secretary Louis Sullivan hailed its account of recent advances in understanding and treating alcoholism.

''Using the latest computer-aided imaging technologies ... and other advanced research techniques, alcohol researchers have recently made promising headway toward determining factors that make individuals

vulnerable to the disease of alcoholism and its consequences,'' Sullivan said.

''We are now optimistic, for instance, that the genetic and environmental factors that define individual vulnerability to alcoholism can be identified. Doing so would provide health care professionals and others with powerful tools for preventing and treating alcohol abuse and alcoholism.''

Research findings collected in the report include:

-Although per capita consumption of alcohol has reached its lowest level since 1970, alcohol is used by more Americans than any other drug, including cigarettes.

-An estimated 10.5 million adults exhibit symptoms of alcoholism. An additional 7.2 million abuse alcohol, but show no symptoms of dependence.

-Despite a downward trend in alcohol consumption by high school seniors in the 1980s, nearly 92 percent in 1988 had tried alcohol, nearly two-thirds were current drinkers and one-third were occasionally heavy drinkers.

-Nearly half of all deaths in motor-vehicle accidents are alcohol-related. Raising the minimum drinking age to 21 results in ''striking reductions'' in traffic accidents involving drinking drivers ages 16 to 20.

-Twenty-five percent of hospitalized people have alcohol-related problems.

-The economic cost of alcohol abuse and dependence was estimated at $116.9 billion and at $136.3 billion in 1990.

-Untreated alcoholics and their families have higher general health costs than non-alcoholics and their families.

#90023u2014 01/23/1990 ~United Press International

(JAN. 23) UPI - More word today of Nelson Mandela's possible release, South Africa's ruling National Party newspaper quotes the nation's justice minister as saying it's ''reasonable'' to deduce that the government will free the activist from life imprisonment. The Nationalist newspaper says the question now is when Mandela will be released and under what circumstances.

A report from the Soviet news agency Tass indicates Azerbaijani militants may resort to guerrilla warfare in the fight against Soviet forces that stormed the capital during the weekend. Tass quotes a leader of the Azerbaijani Popular Front as telling crowds in Baku that the group is

moving ''underground''- a term used to imply a guerrilla war or illegal struggle. Radio Moscow says militants attacked a Red Army convoy today, killing two Soviet soldiers.

Military officials say a Marine Corps helicopter went down at sea last night while practicing landings, injuring three crew members and leaving a fourth missing. Officials were NOT immediately sure if the craft set down deliberately or crashed in waters off Hawaii. An air-sea search is continuing for the crew member lost at sea.

Congress will consider overturning a presidential veto when it resumes work this afternoon. House and Senate leaders are calling for an override of President Bush's rejection of a measure that would shield Chinese students from possible persecution at home. In the words of Oklahoma Republican Mickey Edwards- ''The president has simply made a mistake.''

-30- 1692

#90023u2017 01/23/1990 ~United Press International

PITTSFORD, NY (JAN. 23) UPI - Selectronics Inc., a leader in handheld electronic books, Tuesday announced it has acquired Microlytics Inc., a software company best known for its Word Finder thesaurus computer program.

The transaction involves stock swaps that makes Microlytics a wholly owned subsidiary of Selectronics, and Microlytics' financial backer, Xerox Corp. a one-third owner of the company, company officials said.

As a result of the deal, the number of Selectronics shares outstanding Tuesday grew from 17.4 million to 35.4 million. The price of the stock, traded over the counter under the symbol SELE, was $1.25 a share, company officials said.

Together, the two companies will exploit a text-compression technology developed by Xerox at its Palo Alto, Calif., research center that will produce more powerful and less expensive electronic publishing and related software products, company officials said.

Selectronics products currently include The Electronic Bible, licensed from Zondervan; The Electronic Encyclopedia, licensed by Random House; and a series of electronic language translators.

Microlytics makes linguistic and reference software for IBM PC and McIntosh computers. The best-selling Word Finder thesaurus is licensed to dozens of the largest software manufacturers in the world.

#90023u2018 01/23/1990 ~United Press International

WASHINGTON (JAN. 23) UPI - Sen. Christoper Dodd, D-Conn., proposed Tuesday a ban on speaking fees for senators, and an independent survey showed that a prohibition has close to majority support in the Senate.

Dodd introduced legislation to prohibit acceptance of speaking and appearance fees starting in 1991 and limit all outside earned income to 15 percent of the Senate salary.

At the same time, Public Citizen, a watchdog group set up by Ralph Nader, released a survey showing that 43 senators support legislation to ban speaking fees and another seven, who did not take a position on a ban, do not accept them.

Of the 85 Senate offices that responded to the survey, 43 said they favored legislation to ban speaking fees, 31 said they were undecided and 11 said they were opposed.

''This survey shows unprecedented momentum against honoraria,'' said Joan Claybrook, president of Public Citizen. ''Never before have so many senators exhibited an understanding that these 'dihonoraria' have no place in the U.S. Senate.

''This is an encouraging sign that 1990 may be the year to clean up Congress,'' Claybrook said.

Dodd, who stopped accepting fees in February 1989, said: ''The pay system that has evolved over the years - with the public paying the bulk of a senator's salary and a handful of interested groups picking up the rest - is untenable.

''This is the time to do it - at the start of a new session, in the wake of the House-passed ban, in these early months before our attentions turn to other demands of a busy election year,'' Dodd said.

''I happen to believe that the best way to rid ourselves of honoraria is to couple the ban with a corresponding pay increase, much as the House did '' he said. ''Absent the political will to vote a pay raise, however, the integrity of this institution remains threatened by the continued receipt of honoraria.''

Senate Democratic leader George Mitchell said he expected efforts to impose a ban but reminded reporters that legislation approved last year would fully eliminate speaking and appearance fees over a period of years as the Senate salaries rise through cost-of-living increases.

Mitchell said of the Senate-approved bill, ''I wish it would have been a shorter period of time.''

The House last year approved legislation that bans speaking fees in 1991 when the salary of its members climbs to about $125,000 a year from the present $89,500. The Senate refused to accept any pay increase, except a series of cost-of-living raises, which would bring the salaries of its members to about 101,000 in 1991.

#90023u2028 01/23/1990 ~United Press International

WASHINGTON (JAN. 23) UPI - The woman who lured Mayor Marion Barry into a cocaine sting operation testified before a grand jury Tuesday, while Barry issued a plea from a Florida alcohol treatment center that he be allowed to continue his ''healing process in peace.''

Rasheeda Hazel Moore, 38, testified before a federal grand jury in Washington for more than two hours. It was not known what Moore, who was working as an FBI informant when Barry was arrested Thursday night, said in her secret testimony.

But her testimony theoretically could lead to further charges against Barry, who now faces one misdemeanor count of crack cocaine possession.

Barry spent his first full day Tuesday at the Hanley-Hazelden Center, an in-patient substance abuse program at St. Mary's Hospital in West Palm Beach, Fla. He entered the 28-day treatment center Monday for what his attorney said was an alcohol problem.

Reporters continued to camp outside the treatment center, and Barry, through his spokeswoman in Washington, issued a plea to be left alone.

''He asked the media to please back off the center for a while ... to please allow him to get into his healing process in peace,'' said Barry spokeswoman Lurma Rackley, who talked to Barry by telephone.

''He sounded like he was ready to go ahead and move forward with the program there,'' she said. ''He's ready to roll.''

The Hazelden philosophy is based in part on the 12-step program pioneered by Alcoholics Anonymous.

The government remained in the hands of City Administrator Carol Thompson, whom Barry named Friday to run the city indefinitely.

Barry, 53, was videotaped buying and smoking crack cocaine Thursday evening inside a downtown hotel, where he was lured by Moore, according to an FBI affidavit filed in court.

After his arrest, Barry tested positive for cocaine, said U.S. Attorney Jay Stephens. If convicted of the cocaine possession charge, Barry could face a year in prison and a $100,000 fine.

He will plead innocent and seek a jury trial, said his attorney, R. Kenneth Mundy. A status hearing is scheduled for Feb. 5.

Moore's testimony is part of a year-long grand jury investigation. Barry testified twice last year, and has repeatedly denied drug use.

Moore appeared before the grand jury at U.S. District Court at about 9:15 a.m., and was behind closed doors for more than two hours before leaving the courthouse without speaking to reporters.

Former city worker Charles Lewis, convicted of cocaine charges in the Virgin Islands and Washington, already has testified he used drugs repeatedly with Barry.

If Moore, a former top model who served six months in prison after being convicted in 1984 of illegal use of a motor vehicle, can corroborate testimony that Barry allegedly used drugs in Washington or the Virgin Islands, the mayor could potentially face felony perjury charges.

Herbert O. Reid, the city's attorney, said Tuesday of Moore: ''I don't know how credible she is.''

Thompson holds all the mayor's powers with the exception of signing or vetoing legislation or approving contracts with the federal government. Documents requiring Barry's signature are being sent to him at the treatment facility, Thompson said.

''There will be continued stability, there will be continuity, and there will be progress,'' said Thompson, 38, who has never held elected office.

Barry has not announced whether he will seek a fourth term, but Thompson said he is not considering resignation. His term lasts another 11 months.

Moore, 38, graduated from the city's Roosevelt High School in 1969, and was a classmate of Thompson's. During a modeling career she appeared on the cover of Essence magazine.

Barry, who publicly admitted Sunday a need for help ''to heal my body, mind and soul,'' has never specifically conceded having a drug problem.

He was elected mayor in 1978 and easily won re-election twice. For years, he has issued categorical denials of drug use.

He has often spoken of the ''crisis'' drugs have caused in the city, where battles over drug turf are blamed for the nation's highest per capita murder rate. Barry also has led many anti-drug rallies aimed at the city's youth.

The possibility Barry will not seek a fourth term could dramatically change the outcome of this September's Democratic primary and the November general election. Four established Democrats already are running in the heavily Democratic city. The Rev. Jesse Jackson is also considered a possible candidate, but has said he will not run if Barry is a candidate.

#90023u2044 01/23/1990 ~United Press International

(JAN. 23) UPI - The woman who helped lure Washington, D-C, Mayor Marion Barry into a cocaine sting operation appeared before a federal grand jury today. But it is NOT known what Rasheeda Moore planned to say during her secret testimony. Moore was working as an F-B-I informant at the time of Barry's arrest Thursday night. In West Palm Beach, Florida, Barry is spending his first full day in a rehabilitation center that his attorney says he entered for an alcohol problem.

Colombian authorities have announced the arrest of an American wanted in Wisconsin on drug trafficking charges. Police say Texas native Edward Michel is wanted on charges of smuggling 300 pounds of cocaine from Colombia into the United States. Authorities say Michel was nabbed by police in a town 450 miles north of Bogota.

The Pentagon now says there was NO cocaine, as the Army first believed, in a so-called ''witch house'' frequented by ousted Panamanian leader Manuel Noriega. A Defense Department spokeswoman says that as much as 110 pounds of a white substance found wrapped banana leaves was really a bonding material used in voodoo rituals. The substance was found at Panama's Fort Amador in a house inhabited by a Brazilian woman believed to be Noriega's ''sorceress.''

#90023u2065 01/23/1990 ~United Press International
WASHINGTON (JAN. 23) UPI - Two senators proposed legislation Tuesday to elevate the Environmental Protection Agency to Cabinet-level status, saying it would assure the government gives the environment the priority it deserves.

The bill by Sens. John Glenn, D-Ohio, and William Roth, R-Del., would change the name of the EPA to the Department of the Environment and allow the EPA administrator to regularly attend Cabinet meetings with the president.

Glenn and Roth said their bill was long overdue in view of the growing importance of environmental issues, particularly global concerns such as climate change.

Glenn said the Bush administration helped draft the bill, but the administration's position was not clear.

The president reportedly is leaning toward supporting the idea but Bush has resisted expanding the Cabinet in the past, saying it could become unwieldy. However, administration officials say the political benefit of highlighting the government's environmental commitment could override such reservations.

In remarks on the Senate floor, Glenn said the EPA administrator needs the additional clout and prestige of Cabinet-level status to demonstrate the United States is serious about addressing international problems such as global warming, ozone depletion and ocean pollution.

''A sub-Cabinet EPA does not send the appropriate signal to the rest of the world,'' said Glenn, chairman of the Senate Governmental Affairs Committee.

Glenn also noted that virtually all other nations have their top environmental official at ministerial rank.

Roth, ranking Republican on the governmental affairs panel, said in a statement: ''In an age when holes in the ozone, oil slicks on the ocean and acid rain are commonplace in the headlines, it is time to advance the

EPA to Cabinet-level status to assure the environment the priority, protection and attention it deserves.''

Both senators said elevation to Cabinet-level status would make little difference in the day-to-day operations of the EPA, which was created as an independent agency in 1970 and now has 15,000 personnel and a $2 billion annual budget - bigger than some Cabinet-level agencies.

However, they said it would enable the EPA administrator to attend Cabinet meetings with the president, helping raise the profile of environmental issues in the highest councils of government.

Glenn noted Congress approved legislation last year elevating the Veteran's Administration to Cabinet-level status and he said the EPA, by most measures, was at least as important an agency.

He also said the EPA met most of the criteria for Cabinet-level status as defined by the National Academy of Public Administration.

WASHINGTON (JAN. 23) UPI - A white substance found wrapped in banana leaves in a ''witch house'' in Panama frequented by Manuel Noriega was not cocaine as the Army believed, but a material used in voodoo, the Pentagon said Tuesday.

''It's bonding material,'' said a Defense Department spokeswoman, Army Maj. Kathy Wood. ''It's a substance they use in voodoo rituals.''

However, the Army's Criminal Investigation Division - which conducted tests on the material - would not immediately identify the substance other than to describe it as ''bonding material.'' There was speculation it was flour or corn meal.

On Dec. 22, Army Col. Mike Snell, the commander of a U.S. infantry task force, told reporters that his troops had found 50 pounds of cocaine in a house frequented by Noriega at Fort Amador, a military base used jointly by U.S. and Panamanian forces before the Dec. 20 U.S. invasion.

The two-story building was inhabited by a Brazilian woman believed to be Noriega's ''sorceress'' and became known among U.S. soldiers as the ''witch house.''

Snell said some of the substance was found wrapped in banana leaves inside a refrigerator. ''We're sure it's cocaine,'' he was quoted as saying.

Gen. Maxwell Thurman, commander of the U.S. Southern Command based in

Panama, later repeated the allegation, saying that 50 kilos - not pounds - of cocaine belonging to Noriega had been found. A kilo equals 2.2 pounds.

''They found a white, powdery substance wrapped in banana leaves in a refrigerator and thought it was cocaine,'' Wood said. ''It looks like cocaine. But CID did tests on it and it turned out to be 'bonding' material.

''We found out we were wrong.''

The Washington Post reported Tuesday that according to officials in the Army's Criminal Investigation Division, the contents of the banana leaves were actually tamales.

Wood denied that the white substance was tamale, but could not identify the white substance other than to relay the CID's description of it as ''a bonding agent.''

The contents of the banana leaves apparently were used in Noriega's magic ''bonding rituals'' against opponents or persons he wanted to control, officials said.

Noriega, who surrendered to U.S. forces Jan. 3, is in jail in Miami awaiting trial on federal drug trafficking and racketeering charges.

VIENNA (JAN. 23) UPI - The environmental organization Greenpeace said Tuesday it is urging Czechoslovak President Vaclav Havel to shut a uranium processing plant in southern Bohemia that it claims is spewing out radioactive waste.

Tests conducted on samples of waste water discharged from the Mape plant in southwestern Czechoslovakia, near the Austrian border, contained radiation ''significantly higher'' than acceptable levels, said Greenpeace spokesman Florian Faber.

Greenpeace presented data on the radiation Monday to plant managers, who

denied that a problem existed, Faber said. But he said they promised to conduct their own tests and share the results with Greenpeace before Friday.

Faber said the group also contacted regional environmental officials and planned to make a direct appeal to Havel, the former dissident and new Czechoslovak president, urging him to close the plant.

''The incidents around Mape are simply unbelievable,'' said Michael Undorf a member of Greenpeace's anti-nuclear division. ''The health and safety of the Czechoslovakian as well as the Austrian populations has been simply ignored.''

Based on reports given the delegation by several different Czechoslovak scientists, it became clear that ''something was wrong at Mape,'' Faber said.

Greenpeace members visited the plant earlier this month and collected samples of waste water being discharged from a pipe. The samples were then anaylzed at the Austrian Institute for Ecology in Vienna, the spokesman said.

Tests showed the water contained radiation ''significantly higher'' than allowable levels, Faber said. The exact radiation reading in REM units was not immediately available.

He said the waste water was being dumped into an abandoned coal pit adjacent to the plant, but Greenpeace learned that, until 1985, the water was discharged directly into the Vltava River, which flows through Prague.

There was no immediate comment on the allegations by the Czechoslovak government.

SAN DIEGO (JAN. 23) UPI - Known KGB agents were spotted among the entourage that accompanied performers at the city's Soviet Arts Festival last fall, an FBI counterintelligence agent said Tuesday.

Gary Laturno, one of the FBI agents who monitors East Bloc activity in San Diego, said KGB officers stationed in New York and other American cities were spotted among the roughly 200 support workers and stage hands who accompanied the Soviet delegation.

''We learned there was an intelligence presence among the people who were here,'' Laturno said. ''They were intelligence officers.''

He said, however, there was no evidence that security at the numerous military bases and defense contractors in the San Diego area was ever breached, and that no Soviets were arrested during the festival's run last October and November.

Laturno would not say how many KGB agents had been spotted, and said the FBI planned no further action.

The FBI created a furor shortly before the festival opened when it issued a public warning to San Diego residents to be alert for possible overtures from Soviet visitors who might be recruiting agents.

The warning upset both members of the public who opposed the controversial festival for political and security reasons and those who were eager to see internationally known performing groups and treasures such as Faberge eggs that had never before been seen outside the Soviet Union.

The Soviet press attache in San Francisco, Sergei Aivazian, said at the time that the warning put ''a damper on Soviet-American relations.''

Laturno first confirmed that KGB agents had indeed been seen at the festival Monday night in a speech to the Stamp Out Crime Council, a local anti-crime citizens group.

Laturno said the KGB agents who came to San Diego were both intelligence gatherers and counterintelligence operatives keeping an eye on the Soviet performers.

Laturno stressed that none of the stars of the festival was linked to the KGB.

''I don't think anyone would spend their life learning to be a violin virtuoso just to be able to spy on the United States,'' Laturno said.

#90023u2109 01/23/1990 ~United Press International

WASHINGTON (JAN. 23) UPI - Federal Reserve Chairman Alan Greenspan said Tuesday he does not think last week's calls by the Bush administration for lower interest rates were made to pressure the Fed.

Greenspan, testifying before the House Banking Committee, said he viewed the administration's remarks as meaning lower interest rates are beneficial to the nation's economic health and stability.

''We all agree on that but we may disagree on the methods to achieve those goals,'' Greenspan said.

Although Greenspan said he does not think the White House is trying to pressure the Fed into easing credit, he noted there may be some disagreement on the mechanisms to use to attain lower interest rates.

Greenspan, who testified as a member of the Resolution Trust Corp. oversight board, added that it would be ''inappropriate'' for the White House to pressure the Fed into cutting interest rates.

Last week, White House spokesman Marlin Fitzwater told reporters that the administration hoped the Fed would look at recent economic indicators as a sign that inflation has remained steady during the past eight years and that ''lower interest rates are justified.''

On Friday, President Bush told a gathering of the nation's homebuilders in

Atlanta that ''low and stable rates of interest'' for home mortgages are vital to the health of the economy.

Without mentioning the Federal Reserve, Bush said he wants to see interest rates ''come down even more.''

The administration's remarks followed a published report last Thursday quoting two governors of the Federal Reserve, Manuel Johnson and Wayne Angell, as saying they saw evidence of economic improvement and were not inclined to lower interest rates.

NEW YORK (JAN. 23) UPI - Former mayor and Democratic presidential candidate John V. Lindsay was hospitalized in stable condition Tuesday after suffering a dizzy spell, officials said.

Lindsay, 68, who underwent successful heart surgery two years ago, became ''dizzy and weak'' after lunch at the exclusive Century Club and was taken to New York Hospital Cornell Medical Center in an Emergency Medical Service ambulance at 2:45 p.m., police spokesman detective Joseph McConville said.

The cause of the dizzy spell had not been determined.

Hospital spokeswoman Cathy Robinson said Lindsay was taken to the emergency wing where doctors said his condition was stable. ''His condition is being evaluated,'' she said. ''He is being given various tests.''

Mayor David Dinkins went to the hospital immediately on learning that Lindsday had been admitted, City Hall aides said.

The tall, patrician Lindsay was a two-term mayor, elected as a Republican with the Liberal Party endorsement in 1965 after 20 years of Democratic rule at City Hall. He failed to win a Republican primary race for the nomination in 1969 and won re-election as an independent, again with Liberal Party backing.

He made a bid for the Democratic presidential nomination in 1972 but was

rebuffed in the primaries.

Since he left office in 1973, he has been a partner in the Park Avenue legal firm of Webster and Sheffield and chairman of Lincoln Center Theater. He is credited with reviving the theater three seasons ago after several years of inactivity.

He also has written three books, including the best-selling ''Journey Into Politics.''

In January 1988 Lindsay, who had no history of heart problems, underwent open-heart surgery to replace a defective heart valve at Columbia Presbyterian Medical Center.

#90023u2153 01/23/1990 ~United Press International

NEW YORK (JAN. 23) UPI - Dr. Veronica Prego found out she had AIDS from a study that was so ''full of holes'' it could not protect the doctor's anonymity, a witness testified Tuesday in a landmark $175 million lawsuit against the city.

The testimony concerned one aspect of a lawsuit in which Prego is suing the doctor who conducted the study, claiming he did not protect confidential information about her condition.

Dr. Francis Gaffney, an expert on research protocol at NASA, testified in state Supreme Court in Brooklyn that the study done by Dr. Sheldon Landesman on exposure of health care workers to AIDS required such detailed information that anyone reading it could guess the identity of the subjects.

''The study was constructed in such a way ... there were so many holes it was not anonymous,'' Gaffney said during direct examination.

Prego also is suing the city for $175 million, alleging negligence at the municipal Kings County Hospital caused her to prick herself with a needle and contract the virus that causes AIDS.

On Monday she finished seven days of testimony. She was not in court Tuesday, continuing a practice began earlier in the trial of staying home when she was not on the stand.

Gaffney, a cardiologist, also said the process of consent in the study was flawed because subjects were not told what would happen to them if they tested positive for the AIDS virus.

''Even back then someone receiving the knowledge that they were HIV positive that is going to change your life,'' Gaffney said. ''If you have tested positive, you're going to have a lot of problems getting life

insurance.''

The study started in 1984 and was conducted by Landesman for Downstate Medical Center to find out more about the exposure of health workers to the AIDS virus.

Prego's lawyer, Diane Wilner, said the Argentine doctor was able to obtain her test results over the phone without using her required test number. Prego had a secretary trace her results through biographical information such as place of birth and sex.

Prego has testified that she learned she had tested positive for the AIDS virus during a telephone conversation in a common room of Kings County Hospital, where she was working as a resident at the time.

Landesman's lawyer, Barbara Finger, said Prego's ability to obtain test results was not proof the test was flawed. Finger also had Gaffney confirm he attended medical school with Prego's former roommate, Adrian Fleckner, in New Mexico.

#90023u2173 01/23/1990 ~United Press International

MOSCOW (JAN. 23) UPI - Azerbaijani militants battled Soviet soldiers Tuesday at a key army barracks in the Azerbaijani capital of Baku after ambushing a Red Army column in a mounting campaign to drive troops from the southern republic, news reports said.

The Soviet army, struggling to end the most serious ethnic conflict confronting President Mikhail Gorbachev, swung south toward the breakaway Azerbaijani province of Nakichevan, a tiny enclave on the Iranian border that has declared secession, reports from the Armenian capital of Yerevan said.

Soviet television said the official death toll climbed to 93 and the number of wounded rose to 639 since the Red Army stormed into Baku Saturday in an attempt to end pogroms against Armenians and stop insurrection against Soviet power.

There was no breakdown of when and where the casualties occurred. The report said only that among the dead were 75 civilians. The official news agency Tass reported three people were killed in an ambush on an army convoy late Monday.

In an atmosphere where passions seethed, it was difficult to distinguish rhetoric from truth. Western reporters have not been permitted into the area. In the last two days, Tass bannered two dispatches with the headline: ''Rumors Are Rife in Baku.''

Soviet television has called the crisis - the most violent, most serious and protracted that Gorbachev has faced in his nearly five years in office - the country's ''most trying days since World War II.''

The 2-year-old dispute between Moslem Azerbaijanis and Christian Armenians over Nagorno-Karabakh, the predominantly Armenian enclave in Azerbaijan, has claimed over 300 lives, including at least 150 since Azerbaijani nationalists called for renewed pogroms 10 days ago.

On Monday members of the Azerbaijani Popular Front threatened to go underground, implying a guerrilla war or illegal struggle, while the

Azerbaijani legislature issued an ultimatum for the army to pull out at daybreak Wednesday.

On Monday night a convoy carrying demobilized services and women and chidren was ambushed, and two soldiers and a passerby were killed, Tass reported Tuesday. It said a second civilian was wounded in the gunfire.

Heavy fighting erupted Tuesday around the Salyansky barracks, Soviet television said. Telephone calls to Baku confirmed the battle but differed on who was fighting whom in the confused situation in the Caspian Sea capital of 1.8 million.

Soviet television said Azerbaijani militants armed with automatic weapons were firing on Soviet defenders of the barracks, a scene of recurrent gunfire since the invasion.

But Leila Unusova, a member of the Popular Front, told United Press International by telephone that Soviet soldiers were battling their comrades who had refused to fire on Azerbaijanis.

A general strike immobilized Baku Tuesday, and the Azerbaijani Popular Front vowed to continue the work stoppage and a civil disobedience campaign until the Soviet force of 24,000 regular army and Interior Ministry troops and sailors leave.

''All enteprises are not working today,'' Tass said. ''Except for the metro, city transport is not moving. All print shop workers and editorial staffers are on strike.''

There were no detailed reports from secessionist territory of Nakichevan on the Iranian border, but Radio Moscow said Soviet soldiers were bringing the situation on the Iranian border near the province under control.

The army oversaw talks Tuesday between Armenian and Azerbaiajani state and Communist Party leaders in Yersakh on the border between Armenia and Nakichevan province.

Gen. Mikhail Surkov, head of the political department of the Yerevan garrison in Armenia, said it was too early to expect major achievements in the talks which began Monday.

Other army commanders have brought together Armenian and Azerbaijani military commanders in a mediation role in other areas of what has become for all purposes a war zone.

The Azerbaijani parliament warned the army in a resolution adopted Monday that it would begin to consider secession if the Red Army did not withdraw from Azerbaijan by dawn on Wednesday.

No Soviet republic has ever seceded despite its constitutional right to do so. One deterrent always has been fear of a Red Army invasion to undo any political separation.

In Lithuania early this month, Gorbachev promised a new law would spell out the mechanism for any of the nation's 15 republics to leave. But he said he believed they should remain in the new Soviet federation he is building.

In an ominous development, Neimat Panakhov, head of the National Defense Committee of the Azerbaiajani Popular Front, announced Monday that his group was ''going undergound.''

A well-connected source in Moscow said: ''Such a statement means terrorism and nothing less.'' The source said the danger of terrorims would be a topic for a Central Committee plenum on Feb. 5-6.

Sources in Baku, reached by telephone, differed on the ''underground'' statement. Some said the Committee was never active, and others said it had been disbanded by the military. Still others said Panakhov was talking only about trying to escape detention by authorities.

BELGRADE, YUGOSLAVIA (JAN. 23) UPI - Prime Minister Ante Markovic said Tuesday that the move to abolish the Communist Party's constitutional monopoly on power would lead the country to complete social and economic reform.

''Reformist, democratic processes, the guarantee of freedoms and rights of citizens, direct and secret elections, now are being implemented to turn our economic reform into a total social reform,'' Markovic said in a nationwally broadcast speech.

Communist leaders voted overwhelmingly at a chaotic meeting Monday to instruct the government to abolish the party's 45-year monopoly on power in a move that will perhaps allow the creation of a multi-party system in time for local elections in April.

Markovic, a reform-minded leader who announced sweeping economic changes in December, said his government was preparing an amendment to the constitution that would abolish the monopoly.

At the same time, he said his government would propose other constitutional amendments, including ones that would centralize power in Yugoslavia, a federation of six republics and two provinces.

''We have widened our proposal with several new initiatives we received from the republics and provinces relating to the election procedure, to free, direct and democratic elections, to the right of citizens' associations and to the multi-party system,'' Markovic told Belgrade Radio.

He said the multi-party system ''already has become our practice, but we have to give it a constitutional basis.''

Markovic said the Cabinet will ask Parliament to act quickly on the proposed amendments when they are submited in early February. He said the federal government cannot carry out economic reforms designed to move the country to a free-market system unless the amendments are adopted.

Members of the congress of the Communist Party, holding a three-day plenary session that ended in the pre-dawn hours of Tuesday, voted to give up their consitutional monopoly, but reformers and orthodox communists split ideologically on other measures, including a proposal to divide the party into two separate parties.

Delegates from the northwestern state of Slovenia walked out of the party congress Monday because of the dispute.

Markovic would not comment on the party's deep division. ''It is an internal affair of the Yugoslav Communist Party,'' he said.

''Regardless of the fact whether the Yugoslav Communist Party will be one or several organizations, we are opening a space for party pluralism and freedom of asssociations,'' Markovic said. ''Regardless of the fact whether it will be one, 10 or no party, the state has to function.''

Under Markovic's reform measures, Yugoslavia has become the first East European country to have a convertible currency.

#90023u2208 01/23/1990 ~United Press International

WASHINGTON (JAN. 23) UPI - Republicans escalated their attack Monday on the proposal by Sen. Daniel Patrick Moynihan, D-N.Y., to cut Social Security taxes by $55 billion, while most top Democrats withheld judgment or expressed only cautious support.

House Republican leader Bob Michel of Illinois, in a letter to Chairman Dan Rostenkowski, D-Ill., of the House Ways and Means Committee, said the Moynihan plan could produce ''a dangerous adjustment in Social Security financing which could inspire even more drastic threats to the system and ultimately bring it down.''

And Sen. John Heinz, R-Pa., an opponent of Moynihan's proposal, warned at a news conference that the plan, if adopted, could lead to a ''tax cut bidding war.''

He said such a bidding war on which taxes to cut occurred in 1981 when Congress adopted tax cuts sought by President Reagan during his first year in office. Those tax cuts helped produce record budget deficits during the 1980s.

President Bush earlier called Moynihan's proposal a ''charade'' to force a tax increase and the administration has tried to orchestrate congressional opposition to the plan.

On Congress's first day back after a two-month recess, top Democrats praised Moynihan for opening public debate over the controversial use of the $70 billion Social Security Trust Fund surplus to help finance the government and make the budget deficit appear smaller.

But they expressed cautious support, at best, for Moynihan's tax cut plan and some, like Chairman Lloyd Bentsen, D-Texas, of the Senate Finance Committee, withheld judgment.

Bentsen announced Finance Committee hearings on the Moynihan proposal on Feb. 5 and Feb. 8 and said he would form an opinion afterwards.

Moynihan first proposed on Dec. 29 that Congress roll back the Social Security tax increase that became effective Jan. 1 and that payroll taxes be cut again in 1991.

He did so to protest the administration's continue use of the $70 billion surplus in the Social Security Trust Fund to finance the government and disguise the size of the deficit.

He said if the surplus was to be used for deficit reduction rather than saved to pay benefits when the ''baby boom'' generation retires after the year 2010, he would prefer a ''pay as you go'' approach with lower tax rates now and tax increases later when needed.

He suggested a combination of tax increases and spending cuts could be used to make up the $55 billion his proposal would cost in deficit calculation.

Moynihan's plan may make it harder for President Bush to win passage of his capital gains tax cut, which directly benefits mostly wealthier Americans with stocks, bonds and real estate holdings.

The theory is that Congress would have a hard time in an election year passing a tax cut for the rich while rejecting Moynihan's tax cut that

predominatnly benefits low and middle income Americans among the 132 Social Security taxpayers.

The Social Security tax rate went up Jan. 1 from 6.06 percent to 6.2 percent, not counting the additional 1.45 percent tax for Medicare. Moynihan's bill would repeal that increase and cut the rate back to 5.1 percent Jan. 1.

At 5.1 percent, the plan would save a couple earning at least $54,300 a year about $600 in 1991, Moynihan said.

Senate Democratic leader George Mitchell of Maine said on NBC's ''Today'' program he is ''very sympathetic'' to Moynihan and predicted ''a lot of Democrats'' will support his plan. He later said the plan has ''growing support.''

But Mitchell stopped short of endorsing the proposal himself, saying he first wants to review the results of studies about the effect of the plan on the deficit.

House Speaker Tom Foley, D-Wash., called the Moynihan plan a ''very important proposal'' but also stopped short of endorsing it. He said the government should either stop using the surplus to mask the deficit or lower the tax rate.

#90023u2232 01/23/1990 ~United Press International

MIAMI (JAN. 23) UPI - Police officer William Lozano went on the radio Tuesday to say thanks to his supporters on the eve of his sentencing for manslaughter in the deaths of two blacks that sparked race riots a year ago.

Lozano was a guest on ''Panorama,'' a talk show hosted by Raquel Regalado on Radio MAMBI, a Spanish-language station. The nine phone lines in Regalado's studio were busy throughout the 60-minute program.

Lozano, who has been free on bond since the killings, faces a maximum of 45 years in prison when he is sentenced Wednesday morning by Dade County Circuit Judge Joseph P. Farina.

Lozano, who had been advised by his lawyers to decline comment on the upcoming sentencing, said very little during the program except to express his gratitude for the views of some callers. He said he planned to spend most of his day with his family.

''I was invited and I came just to listen to what some of my supporters had to say,'' he said after the program. ''My message today is thanks from

me and my family for the caring and the support I have received.''

Lozano was convicted Dec. 7 of two counts of manslaughter. An ethnically mixed jury found him guilty of the Jan. 16, 1989, shooting death of black motorcyclist Clement Lloyd and the death of Lloyd's passenger, Allan Blanchard, who died the next day from injuries sustained in the subsequent crash.

Lozano testified during his trial that he thought Lloyd was trying to run him over, so he fired in self-defense.

The shooting, shortly after a Martin Luther King Day parade, prompted three days of racial violence in Miami's predominantly black neighborhoods. During the disturbance, one looter was killed, about 400 people were arrested, six were injured by gunfire and damage totaled about $1 million.

A vast majority of the Panorama callers said they felt Lozano was a victim that he was being used as a scapegoat to appease the black community in an attempt to avoid another riot.

''We don't want to make a victim of Lozano because he is Spanish and we don't want to have problems with the black community,'' Regalado said after her show. ''This is a political situation that is very bad for the people because it is dividing the community.''

#90023u2265 01/23/1990 ~United Press International

WASHINGTON (JAN. 23) UPI - The Senate began debate Tuesday on revising the Clean Air Act amid complaints from President Bush that lawmakers are imposing excessive pollution control costs on industry.

Seven months after Bush sent his clean air plan up to Capitol Hill, senators took up a bill that incorporates the president's innovative proposal for reducing acid rain, but which goes much further than the administration wants in curbing toxic air emissions and car pollution.

It was the first time in 12 years that the Senate has debated the clean air law.

Senate Democratic leader George Mitchell of Maine defended the Senate bill saying its health benefits far outstrip its costs to industry.

''It costs the United States more in health care and lost productivity than it would to clean up the air,'' Mitchell said.

On a sharper partisan note, Mitchell criticized the administration for focusing on pollution control costs and ignoring the human costs of dirty air. He said thousands of premature deaths and millions of respiratory ailments would be prevented by improved air quality, especially among children, who are more sensitive to pollution.

''The bill ought not to be measured solely in dollars and cents,'' Mitchell said. ''Just because we can't put a dollar value on a child's health doesn't mean we should exclude the health of American children from this debate.''

In addition to the cost controversy, Senate deliberations may be snarled by Midwest lawmakers seeking federal assistance for their states in

meeting acid rain control costs. They may try to block the bill if they do not get help.

The Senate bill also would phase out ozone-depleting chlorofluorocarbons by the end of the century and put limits on auto emissions of carbon dioxide, the key pollutant linked with global warming.

The Senate debate marks a major step forward in the first congressional action on the nation's air pollution laws since 1977, the last time lawmakers updated the original Clean Air Act of 1970.

Clean air legislation remains mired in committee in the House, a reminder of more than a decade of ineffectual wrangling over the issue.

Both Democrats and Republicans give Bush credit for jump-starting the move toward more stringent emission controls by proposing a comprehensive clean air bill last summer.

But environmentalists and Mitchell say while Bush's acid rain plan is sound, he did not propose tough enough limits on cancer-causing emissions from industry nor on auto pollution, the main reason 101 cities exceed federal health standards for ozone smog.

Bush's acid rain plan would cut 10 million tons of sulfur dioxide pollution from 107 coal-burning power plants, mainly in the Ohio Valley and Appalachian states. Those emissions have been linked with stunted forests and ''dead'' lakes in the Northeast and Canada.

The president's proposal includes an innovative ''emissions trading'' plan that would allow utilities to swap pollution allowances so sulfur dioxide emissions cuts can be achieved in the cheapest way possible.

The allowance system will enable the Environmental Protection Agency to enforce a ''cap'' preventing growth in acid rain pollution after the year 2000, when the 10 million-ton reduction is to be in place.

Midwest lawmakers charge Bush's acid rain plan would require their states to pay more than their fair share for acid rain control, causing huge, economically damaging electric rate hikes.

Those legislators are seeking a cost-sharing plan, but Bush and Senate Democratic leaders say that would force residents of ''clean'' states - those that already have reduced their emissions - to pay twice for acid rain cleanup.

Bush, echoing industry officials, has expressed concern over provisions of the Senate legislation that seek to reduce the estimated 2.7 billion pounds of toxic and cancer-causing chemicals spewed into the air each year

by facilities ranging from petrochemical plants to dry cleaning shops.

#90023u2286 01/23/1990 ~United Press International

SPRINGFIELD, MA (JAN. 23) UPI - A prosecutor who resigned from the office of Hampden County District Attorney Matthew Ryan Jr. said Tuesday he has given the FBI information that links his former boss to organized crime members in the Springfield area.

Former Assistant District Attorney Francis W. Bloom said he went to the FBI more than six months ago with information that Ryan may have helped reputed organized crime members with cases in the Hampden County courts.

''My reason for doing this was so I could sleep at night,'' Bloom said at a news conference in Springfield.

Ryan has not commented on the allegations.

Bloom worked for Ryan for eight years and at one time had been the top assistant district attorney in the office. He announced he was resigning from Ryan's office in October, but remained in the office so he could finish up some of his cases.

Published reports earlier this week linked Ryan to several people reputed to be members of the Scibelli organized crime family, which runs betting operations in central and western Massachusetts and parts of upstate New York.

The Boston Globe reported that Ryan undermined requests for high bail for convicted cocaine dealer Francesco Campiti, and released Adolfo Bruno from jail even though New York police wanted him extradited. Bruno, who was convicted on racketeering charges, is reputed to be the No. 2 man in the Scibelli crime family.

Bloom said he will decide ''within the six weeks'' whether he plans to run for the Hampden County district attorney's seat, which Ryan has held since 1958. Ryan has not announced whether he intends to run for re-election.

#90023u2297 01/23/1990 ~United Press International

WASHINGTON (JAN. 23) UPI - A federal judge said Tuesday he wants to see a list of ''specific questions'' Ronald Reagan would face before ruling on whether the former president must testify at the Iran-Contra trial of ex-White House aide John Poindexter.

Poindexter, who was Reagan's national security adviser, sat in court as

his lawyers argued that the former president's testimony is critical to Poindexter's defense.

The retired rear admiral, the last defendant currently under indictment in the Iran-Contra scandal, is accused of five felonies.

Reagan's lawyer asked the federal judge not to require the former president to appear at Poindexter's trial, scheduled to begin Feb. 20.

U.S. District Judge Harold Greene already has privately examined excerpts of Reagan's diaries that Poindexter's lawyers want to use at the trial.

Without ruling on requiring Reagan's testimony or diaries, Greene issued an order Tuesday telling Poindexter's lawyers to give him a list of ''specific questions that counsel expect to ask the former president'' at the trial.

''Until such focused questions are submitted, the court will not be in a position to decide whether, and the extent to which, President Reagan must testify,'' Greene said, emphasizing, ''I want specific questions.''

As justification for requiring Reagan to testify, Poindexter's lawyers produced a list of 67 categories of inquiry involving Reagan. Greene ruled the list was too vague and ''more suited to the discovery of documents than to the questioning of a witness.''

Four sets of attorneys appeared in court Tuesday, representing Poindexter, Reagan, special Iran-Contra prosecutor Lawrence Walsh, and the Justice Department, on behalf of President Bush.

''What's the former president trying to protect?'' asked Frederick Robinson, a lawyer for Poindexter who urged Greene to order Reagan to testify. ''We believe he should show respect for the constitutional principle that 'no man is above the law.'''

Robinson said, ''If Mr. Reagan has the time to give speeches in Japan and to write a book, he certainly has the time to testify in this case.''

Robinson also rejected Reagan's earlier claim there is a danger he might blurt out national security information during the heat of the trial and compared the assertion to ''graymail'' - forcing the goverment to drop a case for fear sensitive information will become public.

And, he argued, alternatives to Reagan's personal appearance - such as testimony on videotape - would be ''flagrantly inadequate'' to ensure Poindexter's right to a fair trial.

A related discussion during the hearing concerned arguments over whether

the press and public would have a right to view the taping session for a deposition, if one were ordered.

Daniel Webb, a former U.S. attorney selected by Walsh to prosecute Poindexter, said Reagan should have to testify but only if Poindexter first proves that the former president is ''critical or essential'' to the case.

Theodore Olson represented Reagan, saying the former president has cooperated with inquiries into the scandal over the secret sale of arms to Iran and covert aid to the Nicarguan Contra rebels, but now ''the interests of the presidency must also be protected.''

Olson also told the judge there are ''only a few occasions'' during the time in question - mainly 1985 and 1986 - when Reagan and Poindexter met with no other people in the room.

Bush, then vice president, attended many of the White House meetings, Olson noted, and others who were there could testify about what happened rather than requiring Reagan's recollection.

PRAGUE, CZECHOSLOVAKIA (JAN. 23) UPI - Parliament Tuesday passed

legislation giving itself authority to oust nearly 100 Communist deputies after President Vaclav Havel urged representatives to fufill their ''historical role'' leading to the first free elections in four decades.

In his first speech to the Federal Assembly since his inauguration Dec. 29 Havel also said that during upcoming visits to Washington and Moscow he would invite President Bush and Soviet President Mikhail Gorbachev to hold their next summit in Prague.

A bloc abstention by Slovak deputies earlier in the day had threatened a fragile consensus between the party and opposition forces designed to provide free parliamentary elections in June.

Under the ''round-table'' agreement that ended 41 years of communist rule and brought Havel to the presidency, the party had agreed to reduce its presence in parliament by the end of January to a level commensurate with its national strength. The party has a membership of 1.6 million in a country of 15.5 million.

''Certainly you realize the special responsibilities which you have in this period,'' Havel told parliament. ''I want you to play with honor your historical role for the good of our nations.''

If the bill had not passed, the communists would have retained a majority in the assembly until the June elections.

The crucial legislation was approved after a day of bitter debate and behind-the-scenes negotiating in which Slovak deputies in the House of Nationalities abstained as a bloc, making the first vote invalid.

The Federal Assembly is composed of the House of Nationalities, with 75 Czech and 75 Slovak deputies, and the House of the People with 200 deputies. A two-thirds vote of each chamber is needed to approve legislation.

Hundreds of students protested in front of the Federal Assembly building just yards from Wenceslas Square during the voting Tuesday, and student leaders declared a strike alert to press their demands that deputies who had supported the former hard-line communist regime be ousted.

During his speech to parliament, Havel proposed re-naming the nation the Czechoslovak Republic, dropping the word ''socialist,'' while the Czechoslovak People's Army would be renamed the Czechoslovak army.

The playwright and essayist also called for restoring the state symbol to its pre-war design, but adding an eagle to the national symbol to represent Moravia.

The president also asked the assembly to place the presidential guard at Hradcany Castle - now made up of Interior Ministry forces - under the direct personal control of the president and his office.

Finally, Havel called for new funds to increase the authority and prestige of the presidency.

He said he wanted to make the office of the president ''an intellectual center'' of Czechoslovakia. He asked for funds to renovate and restore Lany Castle, the president's official summer residence, and the burial place of Czechoslovakia's first freely elected president, Tomas Garrigue Masaryk.

Havel received an informal protest about the scheduled Feb. 2-6 visit of the dalai lama to Czechoslovakia during a meeting Havel requested Tuesday with Chinese Ambassador Wang Xingda.

China's position is that the dalai lama is an emigrant who engages in political activities that violate China's territorial integrity.

The president assured the Chinese ambaassador of Czechoslovakia's interest in expanding friendly relations with China, the official news agency CTK said.

In his first address to the nation Jan. 1, Havel announced he would ask both the dalai lama and Pope John Paul II to visit Czechoslovakia. The pope's visit is scheduled April 21-22.

ROTTERDAM, NETHERLANDS (JAN. 23) UPI - Two men were killed and two others were reported missing Tuesday when a powerful explosion ripped through a Bahamian oil tanker that was undergoing repair, a company spokesman said.

''The blast occurred in an empty petroleum tank where workmen were soldering hydraulic lines,'' said Niek van der Valk, a spokesman for Rotterdam shipping repair company Verolme Botlek.

Firemen quickly put out a small fire that broke out in the engine room of the 100,000-ton Century Dawn, which was under charter to the Atlas Shipping Management company of Hong Kong.

Van der Valk said one body had been retrieved from the vessel, but the body of another workman known to have died had not yet been recovered because of heavy smoke on board the vessel. Firemen were still searching for two other workmen who had been on board the vessel at the time of the explosion.

Van der Valk said that those who died and those who were missing were all thought to be Dutch nationals and that the Century Dawn had passed a safety inspection hours before the explosion occurred.

An investigation was underway to determine the cause of the explosion.

(JAN. 23) UPI - Most Haitian radio and t-v stations are silent today as the government vows strict enforcement of rules banning the media from reporting on a political crackdown. Only the Protestant-affiliated Radio Lumiere defied the decree and reported local news this morning... but it is UNclear whether it will be allowed to continue broadcasting. Haiti's military ruler General Prosper Avril declared a state of seige in the Caribbean nation Saturday.

Tehran residents say a large number of people from Iranian Azerbaijan who crossed to the Soviet side in recent days are now trapped there, because the Soviet troops closed the border. The border was sealed yesterday after

thousands of Soviet Azerbaijanis rushed to Iran for brief visits. Tehran residents reached by phone says the traffic was two-way with Iranians crossing to the Soviet side to visit relatives and shop in cheap Soviet markets.

The nation's top intelligence officials testified at a rare public session of the Senate Armed Services Committee today, saying the military threat from Moscow is diminishing. C-I-A chief William Webster noted sweeping changes in Eastern Europe, plus cuts in Soviet military forces. But he warns the Soviet Union is modernizing its strategic force of missiles, bombers and submarines capable of delivering nuclear weapons to U-S soil.

The F-B-I is helping New York police investigate a half-Million-dollar bank heist. Authorities say the city's biggest bank robbery in 15 years involved four masked men slipping into the basement of a closed Brooklyn bank yesterday and cleaning out the vault. The men locked five bank employees in a maintenance closet before making off with about 538-thousand dollars.

WASHINGTON (JAN. 23) UPI - The energy secretary should have standby authority to impose price controls on the oil industry, Rep. Barney Frank, D-Mass., said Tuesday, contending there was no good reason for the recent price increases.

Frank said his proposal, now being drafted into legislation, is necessary to reign in oil producers' apparent desire to profit from increased demand for oil during cold weather. Price controls would not be required, he said if there were a natural disaster or some other ''legitimate'' reason to raise oil prices.

Under the bill, the energy secretary would be given standby authority to impose price controls for a certain period of time - for instance, an order prohibiting price increases of more than 15 percent for the next three months.

Frank said the price controls of the 1970s were more elaborate and ''basically conservation-driven, not price-driven.''

''In the recent crisis ... when it got real cold ... big oil producers just decided to triple the prices,'' the Massachusetts congressman said.

In the Northeast, prices for home heating oil jumped, in some cases, 50 cents a gallon between November and December. He noted the Justice Department's investigation of the sudden price increase probably will not yield evidence of collusion.

The oil industry has contended several factors contributed to the increases, including an oil refinery fire in Louisiana, sudden demand due to an unexpected early cold snap and transportation difficulties due to icy waterways.

An oil industry trade association said it will oppose the proposal.

''Price controls hurt American consumers,'' said Joseph Lastelic, spokesman for the American Petroleum Institute.

#90023u2337 01/23/1990 ~United Press International

NEW YORK (JAN. 23) UPI - Stocks closed mixed Tuesday in active trading,

as the blue chips rebounded from Monday's 77-point plunge with the help of computerized program buying and bargain hunting.

The Dow Jones industrial average, which plummeted 77.45 Monday, its steepest drop since the 190-point mini-crash of Oct. 13, rose 14.87 to close at 2615.32.

Among broader market indicators, the New York Stock Exchange composite index rose 0.40 to 183.60. Standard & Poor's 500-stock index was up 1.23 to 331.61. The price of an average share gained 8 cents.

Declines led advances 847-660 among the 1,982 issues crossing the NYSE tape. Big Board volume totaled 179,300,000 shares compared with the 148,380,000 shares traded Monday.

Analysts said a bout of program buying, used to profit on brief price differences between stocks and stocks index futures, boosted the blue chips in late trading, but the broad market remained lower.

''A number of buy programs helped the Dow industrials,'' said Alfred Goldman, market strategist with A.G. Edwards and Sons Inc. in St. Louis.

Goldman said he was suspicious of the gain, however. ''These lifts are fake-out rallies are shouldn't be trusted,'' he said. ''Yesterday showed the market has more work to do on the downside. From this level I don't think the market has the momentum or spirit to take it up.

''The best place to be is on the sidelines with cash, waiting for a sign of a bottom, but I don't see it yet,'' he said.

Stocks rose broadly on the opening as the market began a rebound from Monday's selloff, taking their cue from gains in Tokyo overnight and at midday in London. Bargain hunting fueled the advance, Goldman said.

But the broad market then pulled back, as investors remained jittery about what corporate earnings reports may show and about the recent runup in interest rates, which were little changed Tuesday afternoon after posting gains earlier on.

Even at unchanged levels, however, the 30-year bond yielded 8.31 percent. The bond yielded less than 8 percent as 1990 began.

''The message the bond market is sending is rates are headed higher, not lower, at least for the next few weeks,'' said Goldman.

On the trading floor, Bank of New England, the most active NYSE issue, was down 1/2 to 3 1/4. Citicorp, which followed, up 1/8 to 24 3/4, said Monday it was weighing a bid for parts of the troubled bank, which is trying to

sell assets to avoid a federal takeover.

General Electric was third, gaining 1/2 to 63 3/8 after reporting higher fourth-quarter earnings in line with expectations.

Among the blue chips, AT&T was up 1/2 to 40 7/8, IBM jumped 1 1/4 to 97 3/4, American Express gained 3/8 to 30 7/8 and Bethlehem Steel was up 1/4 to 16 5/8. Goodyear tumbled 14 to 36 7/8 but Merck added 1 3/8 to 72 1/8 after reporting an expected rise in earnings.

Elsewhere on the earnings front, Quaker Oats tumbled 1 1/8 to 49 7/8, extending Monday's drop after reporting a fourth-quarter earnings decline. Centel sank 2 3/4 to 52 5/8, as the market pummeled another victim of a sharp drop in fourth-quarter earnings.

Merrill Lynch was down 3/4 to 23 3/8. The company reported a $361 million loss after taking a $470 million restructuring charge. Borden Chemicals and Plastics was down 3/8 to 11 1/4. Fourth-quarter profits were down sharply from year-ago levels.

Among takeover-related issues, Hilton Hotels plunged 8 3/4 to 65 1/2 after reports quoted the company as saying its board would meet next week to consider a restructuring along with takeover offers. Campbell Soup jumped 1 1/2 to 48 1/2 after two previously silent members of the founding Dorrance family said they wouldn't be opposed to a merger, reports said.

First Capital Holdings, another active issue, lost 3/8 to 6 1/8. Investors were nervous about the company's exposure to junk bonds, especially those of troubled First Executive Corp., analysts said.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 216,726,390 shares, up from 181,604,340 shares traded in the previous session.

Prices closed lower in active trading on the American Stock Exchange.

The Amex Market Value index closed off 1.15 to 359.73. The price of an average share fell 4 cents. Declines led advances 341-230 among the 809 issues traded. Composite volume totaled 18,548,800 shares, compared with 18,475,900 shares traded Friday.

B.A.T. Industries led the Amex issues, up 1/8 to 13 3/16. Reports said the British government has filed objections with U.S. insurance regulators in nine states over Hoylake Investments Ltd.'s bid for the company's insurance assets.

The National Association of Securities Dealers composite index fell 1.52 to close at 430.42.

#90023u2357 01/23/1990 ~United Press International
NEW YORK (JAN. 23) UPI - The dollar came off sharply in choppy New York trading Tuesday as Soviet troops expanded operations in Azerbaijan and nervous players took profits before West German or other central bank intervention could wipe out dollar gains registered in previous sessions.

But participants said it was recovering late in the day and could expect to get some lift from the mediocre results of the Washington auction of $5 billion in 40-year Resolution Funding Corp. bonds.

Rumors circulating on foreign exchange desks said Soviet army troops had been withdrawn from rebellious Azerbaijan, suggesting lowered tensions in the southern region. In fact fighting went on in Baku, the capital, and elsewhere, but the rumors still boosted the West German mark.

The dollar had moved up against the deutsche mark and other currencies in the previous days as ethnic and secessionist violence flared in the predominantly Moslem Soviet republic. The rationale was that bloodletting there endangered perestroika and mark-bullish East European reforms.

Players were ''unable to sustain (dollar) levels because of the situation in Azerbaijan settling down,'' said Todd Gerber, a foreign exchange vice president with Societe Generale in New York. Once the slide began, ''Everyone wanted to climb aboard and sell dollars,'' he said.

In late New York trading the dollar was changing hands at 1.6978 marks, down from 1.7235 at the end of dealings Monday. The U.S. currency was quoted at 145.90 yen, also off from 146.50 yen.

In earlier global trading action the dollar failed to break the 1.73 German mark barrier as some had expected it to, and the Bundesbank never entered the market to defend its currency. But heavy Asian sales triggered a dollar selloff that continued into the New York session.

''You got people running for cover,'' said currency analyst Lisa Finstrom of Shearson Lehman Hutton. ''People were looking for an excuse to cover up. Instead of watching intervention wipe out all their profits they took profits'' on their dollar gains of past days, she said.

In New York trading the British pound rose to $1.6502 from $1.6365.

Other dollar rates: 1.5108 Swiss francs, off from 1.5350; 5.7730 French francs, off from 5.8565; and 1,264 Italian lire, off from 1,182.50.

In Europe the dollar fell against the main currencies. It eased in Frankfurt to 1.7005 West German marks from 1.722 Monday. It also declined in Zurich to finish at 1.5135 Swiss francs against 1.5265.

In Paris, Brussels and Milan it fell to 5.8020 French francs against 5.8430, 35.75 Belgian francs against 35.94, and 1,269.50 lire against 1,278.10.

In London, the pound moved up to $1.6495 against $1.6390.

Republic National Bank in New York closed cash gold at $413.50 an ounce, up from $407.25 Monday. The New York Commodity Exchange settled gold at $413 an ounce, up from $407.20. Gold rose in Zurich to $408.50 an ounce from $405.50, and in London moved up to $409.75 an ounce from $405.25.

Republic closed cash silver at $5.305 an ounce, up from $5.28. Comex spot silver rose to $5.294 an ounce from $5.268. Silver traded higher in Zurich to $5.25 an ounce against $5.20. It rose in London to $5.29 an ounce from $5.19.

#90023u2390 01/23/1990 ~United Press International

WASHINGTON (JAN. 23) UPI - Rep. Craig Washington, D-Texas, was sworn in Tuesday to replace the late Rep. Mickey Leland, D-Texas, and said the possible jail terms facing him in Houston are only ''glitches that will work themselves out.''

Flanked by members of the Texas delegation, Washington, 48, was sworn in as the state's 18th District congressman one day after being found in contempt of court for the second time for failing to show up to represent a client.

Washington won a special election in December to replace Leland, who died in a plane crash along with 15 others during a hunger mission to Ethiopia in August.

At a news conference, Washington appeared annoyed that repeated questions about his legal troubles in Houston were overshadowing his first day in Congress.

''These are glitches that will work themselves out,'' he said of two pending citations for contempt of court. ''This is much ado about nothing. It has nothing to do with my service in Congress.''

On Monday, Texas state Judge Jim Barr sentenced Washington to 30 days in jail for failing to appear on behalf of a client accused of murder, but set a May 18 hearing for Washington to ''show cause'' as to why he should not serve it.

A 15-day sentence was imposed on Washington Jan. 16 by visiting state Judge Bill Hatten for not appearing on behalf of a defendant in a 4-year-old manslaughter case. A hearing on that sentence is scheduled April 30.

Washington said he had not been aware that the case of Junior Stubbs, accused of killing his common-law wife, had been set for Monday and rankled at the suggestion that he had not made provisions for his client.

''There are many people who think I'm one of the best lawyers in Texas,'' Washington said, adding that his Houston practice has been ''in transition'' since his December election.

Washington expressed confidence that ''I can walk by a 30-day citation'' for contempt.

''I'll be serving (the 18th District) from here in Washington, not from the Harris County jail,'' he said.

''I don't care what the judge thinks of me,'' Washington said of Barr. ''I care what the people of my district think of me.''

Washington said some 500 of his friends and supporters had traveled to Washington to witness his swearing in.

Giving the thumbs up to supporters who crowded the House gallery, Washington said he had ''mixed emotions'' about the moment because it was precipitated by the death of Leland, who enjoyed great popularity in the predominantly black district.

''I could never replace Mickey Leland,'' Washington said in a brief floor speech, ''I'm merely his successor.''

''I'm not here to serve as king of the hill. I'm on the bottom of the hill and I need your help,'' Washington told his new colleagues. ''God bless God, God bless America, God bless Texas.''

In introducing Washington to the House, Rep. Jack Brooks, D-Texas, said the Houston Democrat had ''served with distinction and compassion'' in the Texas Legislature for 16 years.

Washington was named to Texas Monthly magazine's ''Ten Best Legislators'' three times as a state representative, but the magazine named him ''Flop of the Year'' after he went to the Senate in 1983 and placed him on its ''Ten Worst Legislators'' list in 1985 and 1987.

#90023u2396 01/23/1990 ~United Press International

WARSAW, POLAND (JAN. 23) UPI - The Communist Party Politburo Tuesday denounced ''reckless attacks'' against the party, saying it feared an increasing number of Poles may be persecuted for their political beliefs.

The unusually strong Politburo statement followed a wave of occupations of Communist Party facilities by young activists demanding that the party turn over its property to the state.

In the latest attempt, activists of the nationalistic Confederation for an Independent Poland and the Independent Students Association occupied the party's college in Krakow, accusing the communists of reneging on an

agreement to hand the property over to the city.

Activists also occupied party facilities in the southeastern town of Mielec.

The party used the facilities to house delegates who are planning to attend an extraordinary party congress that begins in Warsaw Friday. Delegates are expected to dissolve the existing party and replace it with a more progressive organization.

''All chapters of the party ... are loyal in supporting the reforms under way. Despite that, the party has become the object of ever more violent and reckless attacks,'' the Politburo statement said.

''An atmosphere is created which may stimulate a wave of persecution of people for their political beliefs.''

The Politburo asked the constitutional authorities ''to use means which are at the state's disposal to ensure security of the debates of the Communist Party'' at its congress this weekend.

In another development, a spokesman for the Confederation for an Independent Poland said one of its activists in the central city of Radom was beaten by security police.

The alleged victim, Wojciech Pasek, was warned afterwards to stop his political activities, the spokesman said.

CARACAS, VENEZUELA (JAN. 23) UPI - A military transport plane with 24 people aboard crashed Tuesday morning in a mountainous area north of Caracas, a spokesman for the rescue team said.

The spokesman said no survivors had been found.

He said workers had recovered eight bodies, among them the plane's pilot, Lt. Ali Barrios Hernandez, the co-pilot, Lt. Feliz Jimenez Perez, and the plane mechanic, Sgt. Douglas Martinez Gomez.

The Venezuelan Air Force cargo plane took off at 7 a.m. from the International Airport of Maiquetia, situated on the coast near Caracas, for Puerto Ayacucho, the capital of the Federal Amazon territory in southwest Venezuela.

Officials said the plane was on a routine training mission and was carrying 21 military personnel, including navy enlisted men and marines, and three crew members.

Witnesses said the plane was flying very low over the mountainous zone of Junquito, north of the Venezuelan capital of Caracas, and was in heavy cloud cover when it crashed a short while later.

Firemen and rescue workers traveled to the scene of the crash, 10 miles from the suburb of El Juncal, north of Caracas, where they searched the wreckage to identify victims and try to find out what caused the crash, the spokesman said.

NEWARK, N.J. (JAN. 24) UPI - Eddie Antar, founder of the defunct Crazy Eddie chain of electronics stores, must return his fortune to the United States to be placed under a trustee pending the outcome of civil and criminal securities fraud cases, a federal judge ruled Tuesday.

U.S. District Judge Nicholas J. Politan, who said the Securities and Exchange Commission appeared to have a strong case, also issued a preliminary injunction barring Antar from engaging in securities fraud. But the judge delayed the SEC's suit for four months to give the government time to complete a criminal investigation.

''The public must be protected,'' the judge said as he ordered repatriation of Antar's assets. ''People who deal in stocks are dealing with a public trust. The court can't wait until other cases are decided

while serious charges are still outstanding.''

Politan, over objections from Antar's lawyer, Justin Feldman, ordered a freeze on $68 million Antar gained from the sale of Crazy Eddie stock. Antar transferred much of his fortune to the Bank Leumi in Israel in what the judge called a ''bizarre'' procedure of buying large cashier's checks.

The judge told Feldman he would sign an order Wednesday and that Antar has seven days to object. Feldman argued that compelling Antar to identify and locate his assets might violate his right against self-incrimination.

The New Jersey U.S. Attorney's office, which has named Antar as a target of a grand jury racketeering investigation, has notified Feldman and other lawyers that their fees may be forfeited if he is convicted. SEC lawyer Richard Simpson said he could not tie the government's hands by agreeing not to seek forfeiture.

Feldman, who told the judge, ''I'm devoted to my client, but not at my own expense,'' asked for a stay of the civil case.

Antar built Crazy Eddie from one store in Coney Island, N.Y., to a retail chain with stores around the New York area, becoming a household name through TV commercials featuring a deranged-looking actor trumpeting ''his prices are insane.''

He resigned as chief executive officer of Crazy Eddie Inc. in December 1986 after selling much of his stock. The SEC charges that he and other executives juggled the company's books, increasing income by $2 million in 1985, almost $6 million in 1986 and by many millions of dollars in 1987.

The company, based in Edison, is bankrupt and undergoing liquidation. Another group reportedly has purchased the right to use the Crazy Eddie name.

The SEC suit seeks triple damages from Antar, his brother, Mitchell, a cousin, Sam E. Antar, and other executives. Antar is also the target of a grand jury investigation by the U.S. Attorney for New Jersey and a defendant in a shareholders' suit in federal court in Brooklyn.

Antar, a former Manhattan resident whose whereabouts are unclear, did not attend the hearing. Feldman argued that the government has presented no proof Antar was involved in any of the 1987 fraud.

During a lengthy hearing, Mitchell Antar's lawyer, David O'Connor, joined the SEC in opposing a stay. O'Connor's New York law firm is also representing Antar's father and other relatives.

O'Connor argued that Antar was seeking a delay in order to scapegoat his

relatives.

''Mitchell Antar on recognizing what a horror his brother had created with the company resigned in 1987,'' O'Connor said. ''But now we hear it's all Mitchell Antar's fault.''

#90023u2444 01/23/1990 ~United Press International

BEVERLY HILLS, CA (JAN. 23) UPI - Hilton Hotels Corp., which has attempted to attract a buyer since last summer, said Tuesday it may take itself off the sales block, fueling speculation that the offers received so far are well below the asking price.

Hilton stock plunged $7.875 to $66.375 in trading Tuesday on the New York Stock Exhange following the announcement, which was made in response to inquiries by the exchange.

The company's brief announcement said Hilton's board, at its regularly scheduled meeting next week, would consider bids for the company and ''restructuring strategies which would not involve a sale of the company.''

Recent reports have said the bids for Hilton's 270 hotels and three Nevada casinos were far less than the $120 a share - or about $6 billion - many analysts had expected.

JMB Realty Corp. of Chicago and Miller-Klutznik-Davis-Gray Co., the real estate vehicle of Los Angeles investor Marvin Davis, are believed to be the major bidders. But there were indications Tuesday that one of the bids believed to be about $90 a share, may have been withdrawn.

Roffman said the stock, which traded as high as $115.50 a share in August, has been highly sensitive to speculation about the sale because a good deal of the Hilton stock is in the hands of risk arbitragers.

Barron Hilton, chairman and chief executive officer, who owns or controls about a quarter of the company's shares, first indicated in May that the company might be sold, after he had won a 10-year fight over the estate of his late father, Conrad Hilton, the founder of the company.

But his desire to sell has apparently fallen off because of the lackluster bids.

Fourth-quarter revenues were $259.6 million, up from $254.4 million for the year-ago quarter.

The company owns and operates 14 hotels, including the Waldorf Astoria in New York and the Las Vegas and Flamingo Hiltons in Las Vegas, and manages

more than 30 others.

#90023u2453 01/23/1990 ~United Press International

ENTERPRISE, AL (JAN. 23) UPI - FBI agents questioned junk store operator Robert Wayne O'Ferrell a second time Tuesday and dug up his septic tank seeking clues to the mail bombings that killed a federal judge and a civil rights lawyer.

FBI agent Chuck Archer said O'Ferrell had not been arrested ''and he is not in custody.'' Asked if O'Ferrell was a suspect, he said, ''I wouldn't comment that he is a suspect, only that he is one of many people being interviewed today, as well as yesterday.''

Archer said FBI agents had seven search warrants to serve in the area. One was for O'Ferrell's Old and New Surplus Salvage Warehouse, another was for the downtown storefront where he used to operate the business, the third was for his home in nearby New Brockton and a fourth was for the septic tank at O'Ferrell's home.

On Tuesday afternoon federal agents pumped out O'Ferrell's septic tank and began digging it up with backhoes. Asked what he hoped to find, Archer said, ''Evidence of a bombing.''

The agent declined to discuss the remaining three search warrants, but said agents hoped to have them all served by the end of the day. He said some of the warrants were for property that O'Ferrell did not own.

Authorities took O'Ferrell into Enterprise police headquarters in the

early afternoon after searching his salvage warehouse a second day.

Earlier Tuesday, O'Ferrell said he did not know the whereabouts of the key item in the federal agents' search: a typewriter with a unique typing pattern that sources said was linked to the bombings.

''I'm not guilty,'' O'Ferrell declared as he walked his dog outside his white, two-story clapboard house Tuesday morning. ''I don't have anyting to hide.''

Federal investigators believe a typewriter used to prepare a lawsuit for O'Ferrell is the same machine used to write a letter claiming responsibility for the December bombings.

Agents were looking for an old manual typewriter with a distinctive typing pattern that appeared in letters sent to an Atlanta television station, to the bombing victims and to federal appeals judges and some NAACP officials sources said.

The FBI found similarities between the type in the letters and in documents O'Ferrell submitted in his lawsuit against Gulf Life Insurance Co., which fired O'Ferrell several years ago for representing other insurance companies.

U.S. District Judge Myrom Thompson of Montgomery, Ala., ruled against O'Ferrell, and the decision was upheld by the 11th U.S. Circuit Court of Appeals in Atlanta in an April decision written by Judge Robert Vance, who was killed in the first mail-bombing Dec. 16. The other judges involved in the ruling were Peter Fay of Miami and Phyllis Kravitch of Savannah, Ga.

The white-haired O'Ferrell, 46, said he was cooperating with the FBI. ''All we are doing is cooperating with them, doing whatever they ask us.'' He said he was ''disappointed and embarrassed'' at the attention he is getting.

O'Ferrell said the FBI was looking for a typewriter ''that supposedly we have had, have sold.''

''We don't have any idea who it was sold to, when it was sold,'' he said. ''We don't keep a record of that stuff. That's all they want to know about is the typewriter - what we know about it. And that's it.''

The bombs that killed Vance at his home in suburban Birmingham and Savannah, Ga., lawyer Robert Robinson at his office two days later triggered a massive federal probe that escalated last weekend with 50 more FBI agents assigned to the case.

Gulf Life issued a statement from its Jacksonville headquarters confirming

O'Ferrell worked as an agent in the company's Dothan, Ala., district from September 1984 until July 1985, when he was fired. The company said Robinson was not involved in O'Ferrell's lawsuit against Gulf Life.

O'Ferrell, who uses the title ''Rev.'' on his mailbox, said he is a ''licensed'' Southern Baptist minister, although he has ''never been to any Bible institutes. What I get is just strictly by sitting down and studying and praying.''

Vance was killed when a pipe bomb exploded in his home, and his wife was injured but she recovered. A similar bomb killed Robinson, a veteran Savannah city councilman and civil rights lawyer.

Bombs also were mailed to the 11th Circuit courthouse in Atlanta and the NAACP headquarters in Jacksonville, Fla. Those devices did not explode.

FBI agents speculated the bombings were racially motivated, and on Dec. 27 a group calling itself Americans for a Competent Federal Judicial System mailed a letter to Atlanta television station WAGA claiming responsibility for the bombings and threatening more.

The letter, written in what appeared to be some broken type, said Vance and Robinson were killed in reprisal for the atrocities inflicted upon Julie Love, a white Atlanta preschool teacher who was raped and killed last year. Two black men were charged in that slaying, and one has pleaded guilty.

#90023u2588 01/23/1990 ~United Press International

TUNIS, TUNISIA (JAN. 23) UPI - Heavy rains battered Tunisia for the fourth straight day Tuesday, killing at least 13 people and triggering floods that washed out roads and damaged thousands of homes, authorities said.

Interior Ministry officials said they feared the death toll would climb as the heavy rains continued and weather forecasts showed no sign of relief. In addition to the 13 dead, five people were reported missing.

Rivers and streams overflowed their banks and flood waters washed over roadways and bridges, destroying or seriously damaging more than 4,000 homes, officials said.

The flooding left several cities and villages isolated, including Gabes and Tozeur in southern Tunisia.

The Army and National Guard were mobilized to rescue stranded residents and deliver supplies to flood-ravaged towns.

In the southern Tozeur and Kebili regions, more rain fell in two days than normally falls in a year, officials said.

#90023u2599 01/23/1990 ~United Press International

PITTSBURGH (JAN. 24) UPI - An Aristech Chemical Corp. shareholder has filed a class action lawsuit claiming the company is not providing enough information to outside bidders competing with a $26-a-share buyout led by Aristech management and the Mitsubishi Corp. of Tokyo, his attorney said Tuesday.

Rodney B. Shields of Phoenix, Ariz., filed the suit in Delaware Chancery Court last Thursday, said his attorney, Nick Chimicles.

The suit seeks to block the buyout until enough information is given other bidders, Chimicles said.

Aristech declined comment.

''I would never comment on pending litigation,'' said Aristech spokesman Harry Varner.

Jon Huntsman, a Salt Lake City businessman who controls Huntsman Holdings Corp., in October offered a $25-a-share buyout bid that was rejected by the Aristech board as inadequate. Huntsman has since indicated he may sweeten his bid.

''What we're trying to do is get management to deal on a level playing field with other serious bidders, which would include folks from Utah, the Huntsman outfit,'' said Chimicles. ''Inasmuch as management said (Huntsman's) $25 (bid) was inadequate, we're scratching our heads as to how $26 is adequate.

''What we want them to do is share with Huntsman the inner operating results of the company so that Huntsman can make an assessment as to whether they're willing to increase their bid beyond the $26 bid of

Mitsubishi.''

The suit also seeks full disclosure of details of the Mitsubishi deal, Chimicles said.

The Aristech board was scheduled to answer the Mitsubishi bid by the close of business day Tuesday. Chimicles said he would wait to see the response before taking further legal action.

''The directors may be held liable for a breach of fiduciary duty, if the Mitsubishi bid is accepted without modification,'' he said.

Analyst Gregory Drahuschak at Butcher & Singer in Pittsburgh said any future Huntsman offer might ''pale in comparison to Mitsubishi.''

''This gets into gamesmanship, 'I'll up your price today and somebody else wll up it tomorrow.' Mitsubishi is going to win that war. Their pockets are many times deeper than Huntsman's,'' he said.

Huntsman operates chemicals and plastics businesses that had total revenue of $1.4 billion in 1988. Mitsubishi, a world-wide trading concern, had annual sales of more than $100 billion.

Both Mitsubishi and Huntsman are interested in Aristech's polypropylene business, Drahuschak said. Polypropylene is used in manufacturing plastics the consumption of which is growing, the analyst said.

''It's everywhere,'' he said, pointing to such products as plastic wrap. ''It's a long-term growth business. Over time, it's on an upward path.''

Aristech is the chemical unit spinoff of USX Corp., the nation's No. 1 steelmaker.

Mitsubishi, a Japanese chemicals conglomerate, is based in Tokyo.

#90023u2639 01/23/1990 ~United Press International

TORONTO (JAN. 24) UPI - Southam Inc. released Tuesday unaudited estimates of its 1989 operating income at its subsidiaries to a conference on Canadian media companies, a month before the company's year-end results are expected.

John P. Fisher, president and chief executive officer of Southam, said the estimates were unaudited approximations of the percentage change in segment income for the operating companies compared with 1988 results. Segment income was defined as operating income before tax and before interest.

The estimates showed the newspaper group was up 21 percent, book retailing up 45 percent, business information up 10 percent and graphics down 8 percent.

The newspaper group's results indicated a 1 percent drop in run-of-press linage, a 3 percent rise in advertising revenue and a 6 percent increase in circulation revenue.

Return on revenue for the newspaper group was 15.1 percent in 1989, compared with 12.9 percent in 1988.

Southam publishes a number of daily newspapers in Canada including the Montreal Gazette, the Ottawa Citizen, the Calgary Herald and the Vancouver Province and Vancouver Sun. Average daily circulation in 1988 was 1.54 million copies.

#90023u2706 01/23/1990 ~United Press International

SAN JOSE, Calif. (JAN. 24) UPI - Chips and Technologies Inc. reported a 12 percent gain in second-quarter earnings Tuesday, driven by strong sales of its newest and most powerful computer chip sets.

The semiconductor manufacturer said net income climbed to $8.9 million, or 57 cents a share, from $7.9 million, or 55 cents a share, in the same quarter of 1988.

Sales climbed to $74.4 million from $54.4 million in the year-earlier quarter.

Gordon Campbell, president and chief executive officer, said sales were particularly strong for products aimed at makers of high-end computers based on 32-bit architecture and to laptop computer manufacturers.

For the first six months of the fiscal year, net income rose 32 percent to $18 million, or $1.15 a share, from $13.6 million, or 94 cents a share, in the same period of 1988.

Sales rose to $145.3 million from $98.4 million in the year-earlier period.

-30- 1112

#90023u2744 01/23/1990 ~United Press International

HARTFORD, Conn. (JAN. 24) UPI - Northeast Utilities had 1989 fourth quarter net income of $46 million, or 42 cents a share, down from $63.3 million, or 58 cents a share, in the same period of 1988, the company reported Tuesday.

Net income for the entire year was $209 million, or $1.92 per share, down from $233.9 million, or $2.15 a share, in 1988.

Fourth-quarter revenues were $574 million, down from $591 million in the same period the year before. Revenues for 1989 were $2.3 billion, up from $2.27 billion in 1988.

The utility's Board of Trustees also approved a quarterly dividend on its common shares of 44 cents a share, a continuation of the current indicated annual dividend rate of $1.76 per share.

Higher operating and maintenance expenses, the general impact of inflation and the divestiture of Connecticut Light & Power Co.'s natural gas operations were the main reasons for the decrease in net income, said Northeast Utilties Chairman William B. Ellis.

Those factors were offset partially by cost-cutting measures at Northeast and by higher 1989 sales, said Ellis.

Unusually mild weather for most of 1989, combined with the company's conservation program, resulted in kilowatt-hour sales increasing by just 2 percent over the previous year.

''In 1989, we successfully divested ourselves of gas properties that accounted for some 5 percent of NU's overall business and our shareholders benefited by receiving one share of the new, independent gas company for every 10 NU shares owned,'' said Ellis.

The earnings figures included through June 30, 1989, the results of the gas operations of Northeast's Connecticut Light & Power Co. subsidiary.

CL&P's gas operations were spun off to company shareholders and began operating as Yankee Gas Services Co., a subsidiary of a new, independent company, Yankee Energy System.

Northeast Utilities supplies electricity to more than 1 million customers in Connecticut and 192,000 customers in western Massachusetts.

#90023u2753 01/23/1990 ~United Press International

CINCINNATI (JAN. 24) UPI - Jurors decided Tuesday two former Cincinnati Bell workers defamed the company with an unsupported claim that the firm ordered hundreds of illegal wiretaps.

A Hamilton County Common Pleas Court jury said the two fired Bell workers, Leonard Gates and Robert Draise, should pay the firm and two company

managers, Peter Gabor and Jim West, a total of $110,000.

Over the past several years, Gates and Draise have been publicly stating that phone company managers ordered them to install about 1,200 illegal wiretaps during a 12-year period.

An investigation by company officials said no illegal wiretaps had been ordered and that Gates and Draise made up the charges in order to get back at the firm for being fired.

Gates and Draise filed a counter-suit, contending they were defamed by Bell when Bell officials said the duo's wiretap allegations were lies. However, Judge Fred Cartolano said Gates and Draise had failed to provide sufficient evidence and he refused to let jurors consider their claim.

After the verdict was returned against Gates and Draise, the judge said he would ask the county prosecutor to review trial testimony to determine if the two should be charged with perjury for some of their sworn statements during the trial.

Cartolano said the jury's verdict meant Gates and Draise were ''thieves - they have stolen the truth. In my mind, there's been deliberate lying throughout this trial.''

Said Draise of the verdict, ''This proves that truth and justice do not mix.''

Jurors ordered Gates to pay the company and the managers a total of $60,000 and ordered Draise to pay a total of $50,000.

#90023u2762 01/23/1990 ~United Press International

TOKYO (JAN. 24) UPI - Japanese automaker Mazda Motor Corp. and its U.S. affiliate Ford Motor Co. have agreed to jointly manufacture passenger cars in West Germany beginning in 1992, the leading economic journal Nihon Keizai Shimbun reported in its Wednesday edition.

The daily said Mazda president Norimasa Furuta is scheduled to visit the United States in February to finalize details of the project with Ford executives.

''We have been studying joint production of cars in Europe for some time but no final decision has been made yet,'' said a spokesman for the Hiroshima-based automaker.

''Executives of our companies (Mazda and Ford) hold regular consultations, but we cannot confirm at present Mr. Furuta's trip to the United States in

February,'' the official said.

Nihon Keizai said the agreement calls for the two automakers to build a new passenger car model to be designed and developed by Mazda at an annual rate of 120,000 units a year in the initial phase, starting in 1992.

Production will be undertaken either at Ford's existing plant in Saarland near the French-German border or at a new factory to be built by a joint Mazda-Ford firm in the compounds of the Saarland factory, the daily said.

Investment is estimated at 50 billion yen (dlrs 345 million), it said.

Mazda will be the first major Japanese automaker to manufacture cars in West Germany and the fourth to move into Europe.

Nissan has been producing ''Bluebird'' cars in Britain since 1986. Toyota and Honda are preparing to start production there in 1992.

Japanese car exports to Western Europe totaled 1.44 million units in 1988, accounting for 11.1 percent of the market there.

#90023u2806 01/23/1990 ~United Press International

EL CENTRO, CA (JAN. 24) UPI - Two Navy Blue Angel jets collided Tuesday during a training exercise over the Superstition Mountains, but the pilots escaped serious injury, military officials said.

One of the planes crashed, but its pilot ejected safely.

The two FA-18 Hornet jets, part of the Navy's precision flying team, collided about 12:30 p.m. while flying ''a diamond formation maneuver'' in a remote area near the El Centro Navy Air facility, Petty Officer Larry Coffey said.

One of the pilots, Marine Capt. Chase Moseley, ejected safely from his plane. The other, Cmdr. Pat Moneymaker, was able to land his jet.

Moseley was reported in good condition at the El Centro Regional Medical Center.

Two other jets involved in the training exercise also landed safely.

Coffey said Moseley was flying in the No. 2 position, to the right of the lead plane, flown by Moneymaker.

Navy Lt. Greg Stroh, a Blue Angels supply officer who was at the hospital, said the pilot suffered only facial bruises and cuts in ejecting and would

be released later Tuesday.

Authorities were investigating the cause of the accident.

The Blue Angels use the desert base as a winter training center to practice precision flying routines they perform at air shows throughout the country.

The last accident involving the elite Blue Angels unit occurred in February 1987 over El Centro, when a single FA-18 Hornet went down and its pilot ejected to safety without injury.

#90023u2878 01/23/1990 ~United Press International

(JAN. 23) UPI - Congress is back at work after a two-month recess... while President bush pushes his anti-drug campaign in Kansas City. And, the fighting continues in the Soviet republic of Azerbaijan... These stories, and more, up next from U-P-I

Congress returned to work today after a two-month recess, and House Speaker Thomas Foley of Washington promised reporters ''a very active session.''

Party-line differences emerged even as the gavels were banging open the House and Senate sessions.

A host of issues- Social Security, taxes and a clean-air bill among them- remain to be debated from the first half of the Congress last year.

Differences boiled to the surface in the Senate shortly after the open because of the clean-air bill and a presidential veto of legislation that would give Chinese students sanctuary in the United States.

Senate Majority Leader George Mitchell of Maine called for passage of the clean-air legislation in his opening speech. President Bush opposes the legislation, saying it will be too expensive for business.

Bush welcomed the Congress back to work, saying he was extending his hand to the lawmakers in what he termed the ''spirit of co-operation.''

It's business as usual on Capitol Hill today, with one notable exception. Members from both sides of the aisle are virtually united in their opposition to President Bush's veto of a visa-extension bill for Chinese students.

Even staunch supporters of the president concede he will be thrashed for his rejection of the legislation. Wyoming Republican Alan Simpson says

predicts there woN'T be five senators voting to uphold the veto.

Although many Republicans are breaking ranks to voice their opposition to Bush's veto, the G-O-P leadership contends the seemingly imminent override of the action stems from political motives.

Senate Minority leader Bob Dole says while Bush vetoed the measure, he later passed it through an executive order. In Dole's words- ''There is really NO good reason to override the president's veto unless it's straight out politics.''

#90023u2907 01/23/1990 ~United Press International

(JAN. 23) UPI - President Bush has employed a two-handed method of dealing with Congress in recent weeks. On one hand, he has extended an olive branch of sorts, saying he looked forward to co-operation between Capitol Hill and the White House.

On the other hand, he has issued harsh criticism of the legislative body, accusing it of NOT reflecting America's mainstream.

Speaking to reporters today while traveling to Kansas City, Missouri, Bush said he wants to- quote- ''continue to extend the hand'' of co-operation he offered to Congress when he took office last year ago.

But then he took a swipe at lawmakers, saying a crime bill they will debate is- as he put it- ''a sheep in wolf's clothing.''

Bush used his visit with a group of Kansas City residents who took matters in their own hands to get rid of dope peddlers to prod Congress to give police and prosecutors broader powers.

Otherwise, Bush said, it's like- ''sending troops into battle wearing handcuffs.''

The woman who helped lure Washington, D-C, Mayor Marion Barry into a cocaine sting operation is testifying before a federal grand jury today. That as Barry spends his first full day in a substance abuse rehabilitation program in Florida.

Rasheeda Hazel Moore went before the grand jury this morning. She was working as an F-B-I informant last Thursday night when Barry was arrested at a Washington hotel and tested positive for cocaine use. It's NOT known what Moore planned to say in her testimony to the grand jury.

Barry faces a misdemeanor drug possession charge in the bust.

He entered a 28-day treatment program in West Palm Beach yesterday for what his attorney says is an alcohol problem. But there have been persistent reports that Barry used cocaine and the smokable derivative ''crack.''

City Administrator Carol Thompson was named by Barry to run the city as the mayor deals with his complex legal and personal troubles.

#90023u2988 01/23/1990 ~United Press International

(JAN. 23) UPI - Militant Azerbaijanis battled Soviet troops at a key army barracks in the capital city of Baku today, leaving three dead in their mountain campaign to drive the Red Army from Azerbaijan.

But the Soviet troops showed NO sign of leaving and instead swung south toward a break-away province... a tiny enclave on the Iranian border that has declared its secession from the Soviet Union.

Armenian reports told of the troop movement toward the border province.

Official Soviet television reported a mounting death told in the battle for Baku. It says the fighting has killed 93 people and left another 639 injured. The fighting erupted on Saturday, when Soviet troops moved into the capital to put Moslem-led ''pogroms'' against Christian Armenians.

Baku itself is immobilized by a general strike. Work stoppages and civil disobedience are promised until the 24-thousand Soviet troops leave.

Heavy fighting still is reported at an army barracks in Baku, but telephone calls to the city yielded differing word on who is fighting whom in the confused situation that involves Moslem Azerbaijanis, Christian Armenians and Soviets.

Rescue workers at the scene of a Venezuelan military plane crash say NONE of the 24 people aboard survived when the aircraft went down in an area north of Caracas this morning.

Witnesses say the Venezuelan Air Force cargo plane was flying very low over mountainous of Junquito and was in heavy cloud cover when it crashed.

A plane was transporting 21 military personnel. So far, search teams have recovered eight bodies, including the pilot and co-pilot.

#90023u3015 01/23/1990 ~United Press International

(JAN. 23) UPI - While most kids grow up swapping cards with pictures of

their favorite ballplayers, some youngsters in Miami Beach are collecting rabbi cards.

Similar to baseball cards, the four-by-six-inch rabbi cards feature color photos of revered Orthodox rabbis on one side and basic religious statistics on the other.

Teachers and administrators at Hebrew schools in the area use the cards to reward students who recite their prayers well or excel in schoolwork.

But the cards areN'T confined to the schoolroom. One precocious eight-year-old has more than 100 rabbi cards in her collection which she has amassed through good deeds around the house.

The owner of one kosher food store, a rabbi himself, says the cards allow childred to learn about the people they respect.

The firm which came up with the idea, Torah Personalities of Baltimore, has manufactured a 36-card series and another 75-card set.

#90023u3313 01/23/1990 ~United Press International

(JAN. 23) UPI - Reports from Azerbaijan today say Azerbaijani militants are battling Soviet troops at a key army barracks in Baku . The militants also reportedly ambushed a Soviet army column, leaving three dead.

The Azerbaijani capital of Baku was reported paralyzed by a general strike called to stay in effect until the 24-thousand Soviet troops sent to the republic are withdrawn.

68-year-old former New York Mayor John Lindsay became ill at the Century Club in mid-town Manhattan today and was taken to a hospital. A police spokesman says Lindsay was ''dizzy and weak'' but did NOT lose consciousness. He's reported in stable condition.

President Bush extended one hand in co-operation to Congress during his visit to Kansas City, Missouri, but used the other one to jab the Democratic alternative to his anti-crime package.

Political observers say a 30-day state of seige declaration by Haiti's military ruler jeopardizes free-elections scheduled in April. General Prosper Avril has NOT commented on the reported arrests of two more political foes today and has ordered the country's media NOT to report on the situation.

The provisional government in Romania announced that the first democratic elections in more than 40 years will be held on May 20th and the United

Nations will be asked to monitor the balloting.

Officials say a security breach forced the Education Testing Service to cancel tests in India that students take for admission to U-S colleges and universities. It is the fourth such cancellation in recent months.

One of the four armed investigators who planted electronic listening devices at reputed Mafia chieftian John Gotti's private club in 1985 says the bugs were installed hastily because they were almost caught in the act. Gotti's lawyer says the defective taps invalidate the government's case.

Saying ''There are better ways to invest taxpayers' money,'' California Democrat Alan Cranston renewed his campaign to kill the B-2 stealth bomber. The senator estimates the cost of the 532-Million-dollar a copy bat-winged jet equals its weight in gold- or more than 65-hundred bucks an ounce.

A California postman pleaded innocent today to charges he shot and killed a family's dog while delivering mail last month. Floyd Sterling faces charges of cruelty to an animal, carrying a concealed weapon and discharging a firearm with gross negligence.

The University of Pennsylvania filed federal suit yesterday to get royalties from a wrinkle cream developed by a professor emeritus at Penn's medical school. University officials claim Dr. Albert Kligman violated a pact with the school by patenting and licensing his medication to Johnson and Johnson.

-30- 2906

#90023u3470 01/23/1990 ~United Press International

(JAN. 23) UPI - Moslem militants in Azerbaijan battled Soviet troops at an army barracks in Baku today after leaving three dead in an ambush on a Soviet army column. But the Soviets show NO sign of leaving the southern republic, pushing south toward a region that declared its secession.

A junk store owner in Enterprise, Alabama, says he's ''disappointed and embarrassed'' by all the attention he's getting as the federal investigation into a rash of mail bombings focuses on him. But Wayne O'Ferrell says he plans to help investigators any way he can. Enterprise's police chief reports federal agents interviewed O'Ferrell for a second time today about the December package-bomb slayings of a federal judge and civil rights attorney.

Embattled Washington, D-C, Mayor Marion Barry issued a plea to be left alone to continue his- quoting now- ''healing process in peace.'' Barry is spending his first full day in a substance abuse treatment center in

West Palm Beach, Florida. In Washington, his spokeswoman issued the plea for privacy, as Rasheeda Hazel Moore testified before a grand jury. Moore was the F-B-I informant involved in the sting operation that led to Barry's arrest last Thursday night on a charge of possessing crack cocaine.

New York police say former mayor and Democratic presidential candidate John Lindsay was rushed to the hospital this afternoon after suffering a dizzy spell after lunch. Doctors say Lindsay is in stable condition and are conducting tests to determine the cause of his dizziness. The 68-year-old Lindsay successfully underwent heart surgery two years ago.

Radio and television stations in Haiti are barred from reporting on continuing political turmoil in the nation. But there still are reports today that two more opposition leaders were arrested by the military government, which declared a 30-day state of siege Saturday. Observers estimate a dozen opposition political leaders have been arrested in the crackdown. About 10 have been deported to the United States.

President Bush strolled through a Kansas City, Missouri, neighborhood reclaimed from drug peddlers today, after complaining about the lack of action on Capitol Hill to come up with an acceptable anti-crime program. Bush commended the anti-drug actions of community groups and called upon Congress to give law enforcers leverage in their battle against drugs.

-30- 2573

#90023u3777 01/23/1990 ~United Press International

(JAN. 23) UPI - Military officials say two Navy Blue Angel jets collided today during a training exercise over the Superstition Mountains in California, but the pilots escaped serious injury. One of the F-A-18 Hornets crashed after its pilot ejected. He was treated for facial bruises and cuts. The other pilot managed to land his jet. The collision occurred while the Navy's precision flying team was flying a diamond formation in a remote area near the El Centro Navy Air facility. The other two F-A-18's in the formation landed safely.

F-B-I agents dug up the septic tank of an Enterprise, Alabama, man being questioned in the December mail bombings that killed a federal judge and a civil rights lawyer. Authorities are hoping to link junk store operator Robert O'Ferrell to the bombings through a typewriter. They believe a typewriter used to write a lawsuit for O'Ferrell is the same machine used to prepare letters claiming responsibility for attacks. O'Ferrell is NOT under arrest.

Fighting continues in the Soviet republic Azerbaijan , but there are conflicting reports about who's involved in today's battle in the capital. Soviet T-V says the conflict in Baku is between Azerbaijani militants and Soviet troops. But a spokeswoman for the Azerbaijan National Front tells

U-P-I by telephone Soviet troops are firing on fellow soldiers who've refused to fire at Moslem rebels.

President Bush launched a verbal attack against Congress today as he visited a Kansas City, Missouri, neighborhood where residents regained control of their streets from drug dealers. Bush praised the inner-city residents, while blaming Congress for handcuffing his own anti-crime agenda. The president challenged lawmakers to give police and prosecutors broader powers and tougher laws.

-30- 1953

#90023u3810 01/23/1990 ~United Press International

(JAN. 23) UPI - The head of the Steamship Trade Association says Baltimore dock workers returned to work, ending their three-day walkout after reaching a tentative settlement. It appears the proposed pact will be O-K'd by the rank-and-file, meaning an end to six months of often bitter talks. There'll also be more jobs for cargo handlers. But there'll be a reduction of between 50 and 60 positions for clerks and checkers at the port.

Two prominent Hong Kong politicians met today with British Prime Minister Thatcher to urge her to speed the pace of democratization in the colony before it reverts to Chinese control in 1997. A spokesman for Thatcher says the trio's 75-minute meeting was ''long and detailed,'' but she refused to be specific. Hong Kong lobbyists have been trying to convince London to increase the number of directly elected seats in the colony's legislature.

East Germany is hoping to cash in on the most colorful piece of the Berlin Wall. East German border troops are tearing down a 320-yard section of the wall so it can be sold to collectors for hundreds of thousands of dollars per piece. The nation's news agency says East German authorities hope buyers in the United States, Japan and West Germany will pay Millions of dollars for the wall.

A witness in a landmark 175-Million-dollar lawsuit against New York City says an AIDS study was so ''full of holes'' it could NOT protect participants' anonymity. The testimony concerned one aspect of a lawsuit filed by a doctor who found out she had AIDS from the study. Dr. Veronica Prego claims in the suit that the doctor who conducted the study failed to protect confidential information.

#90023u4033 01/23/1990 ~United Press International

(JAN. 23) UPI - Military officials say the pilots of two Navy Blue Angels jets escaped serious injury after their planes collided this afternoon

over California's Superstition Mountains. One plane crashed, but its pilot ejected safely. The other pilot was able to land his F-A-18 Hornet jet after the collision near the El Centro Navy Air facility. Authorities are investigating the cause of the accident.

Five people burned to death this morning in the worst of several chain-reaction pileups on a foggy stretch of highway in and near Selma, California. Authorities say a family of four was burned beyond recognition after their car slammed into the rear of a stopped tractor-trailer truck and was then hit from behind by a pickup truck carrying propane. The pickup's driver also burned to death in the fiery collision.

The F-B-I has completed a second day of questioning Enterprise, Alabama, junk dealer Robert O'Ferrell in a pair of racially motivated mail bombings. O'Ferrell insists he's innocent and says he's ''disappointed and embarrassed'' by all the attention he's getting. Agents today dug up O'Ferrell's septic tank looking for clues to connect him with the bombings that killed two people.

The conflict in Azerbaijan rages on... despite the presence of 24-thousand Soviet troops to restore order in the mutinous Asian republic. Official news reports raised to 93 the number of dead since Red Army forces stormed Baku Saturday in a bid to end the violence against Armenians and the rebellion against Soviet power. Soviet T-V says Moslem militants fired on soldiers in Baku today. But an Azerbaijani nationalist says the battle was between Soviet troops.

-30- 1845

#90023u4057 01/23/1990 ~United Press International

(JAN. 23) UPI - Senator Daniel Moynihan's proposal to cut Social Security taxes from six-point-two percent to five-point-one percent has rankled the feathers of many conservatives on Capitol Hill. House Republican leader Bob Michel of Illinois described the plan as ''dangerous''... saying the reduction could ''ultimately'' bring down the Social Security system. Moynihan's plan... which the New York Democrat says would benefit lower and middle-class folks... will go before the Senate Finance Committee next month.

A federal judge is holding off on ruling whether Ronald Reagan must testify in the Iran-Contra trial of ex-White House aide John Poindexter. U-S District Judge Harold Greene says he wants to see a list of ''specific questions'' the former president would face before making such a ruling. Poindexter's lawyers argue that Reagan's testimony is critical to their client's defense.

In the face of a federal drug charge, Washington, D-C, Mayor Marion Barry has NOT yet decided whether to pursue a fourth term of office. Today,

however, his chances of mounting a successful campaign were dealt a severe blow. In a hand-delivered letter to his office, the Greater Washington Board of Trade asked Barry to pull out of this year's race. The regional chamber of commerce represents 15-hundred businesses... many of which formerly financed Barry's campaigns.

Things aren't always as they appear. During last month's U-S invasion of Panama, a group of American soldiers found a cache of white powder while searching one of Panamanian strongman Manuel Noriega's so-called safe houses. The commander of the task force told reporters- ''We're sure it's cocaine.'' After analysis in a U-S lab, it turns out the substance is a ''bonding material''... possibly flour or corn meal.

-30- 1965

#90023u4272 01/23/1990 ~United Press International

(JAN. 23) UPI - For a second straight day, F-B-I agents questioned an Enterprise, Alabama, man in a series of racially motivated mail bombings that killed two people and injured a third.

F-B-I agent Chuck Archer says Robert O'Ferrell has NOT been arrested and is NOT in custody. Archer would NOT say O'Ferrell was a suspect... only that he was one of several people being questioned.

O'Ferrell insists that he's innocent and says authorities are searching for a typewriter that he supposedly sold at his junk store.

Officials believe a typewriter used by O'Ferrell to prepare a lawsuit may be the same one used to write letters claiming responsibility for the December bombings.

Agents today dug up O'Ferrell's septic tank seeking clues in the case. Several other search warrants were prepared for O'Ferrell's home and work areas.

Soviet news reports say Azerbaijani militants are stepping up their campaign to drive Red Army troops from the southern republic.

The militants battled Soviet soldiers today at a key army barracks in the Azerbaijani capital of Baku... after ambushing an army column.

The official news agency Tass says the casualty toll in the fighting has climbed to 93 deaths and 715 injuries since the Red Army moved into the area last Saturday.

The Soviet army is struggling to end attacks on Christian Armenians and halt the insurrection against Soviet power.

The Azerbaijani legislature has issued an ultimatum for the army to pull out at daybreak tomorrow. Baku was immobilized today by a general strike. And Azerbaijani forces are vowing to continue their work stoppage until the 24-thousand-member military force withdraws.

There are talks taking place between Armenian and Azerbaijani leaders. But one official says it's too early to expect major progress in the talks which began yesterday.

-30- 2023

#90023u4292 01/23/1990 ~United Press International

(JAN. 23) UPI - Czechoslovakia's state-run news agency reports the reforming East Bloc country's parliament today passed legislation that reduces the number of communists in the Federal Assembly.

News reports did NOT include the final tally, although the legislation needed the support of two-thirds of the members in the 150-member House of Nationalities and the House of the People.

Today's activity lays more groundwork for free, general elections in June. However, an initial rejection of the crucial measure by the head of the Slovak Communist Party placed its success in doubt.

After a recess, the proposal to oust 100 communist deputies received a green light. Also passed today was a law granting Czechoslovaks the right to associate in political parties. Until now, Czechs could choose between five parties, all of them affiliated with the communists.

Radio and television stations in Haiti are being censored as the nation's military government continues a crackdown on its political opposition.

Two more opposition leaders were arrested today... bringing to one dozen the estimated number of people arrested Since Saturday.

Sources in the business community say one of those arrested today was a businessman known for his outspoken criticism of drug trafficking and smuggling. Members of the military are believed to be involved in those activities.

The Ministry of Information sent all news outlets a communique yesterday ordering them to submit their news reports to ministry censors before broadcast.

It also prohibits them from rebroadcasting or printing news reports about Haiti from sources outside of the country.

Haitian ruler General Prosper Avril announced a 30-day state of siege in

the Caribbean nation last Saturday following the assassination of a military official.

Observers say the crackdown will make it virtually impossible to hold fair local elections scheduled for April 29th.

-30- 2119

#90023u4325 01/23/1990 ~United Press International

(JAN. 23) UPI - President Bush took to the streets of a Kansas City, Missouri, neighborhood to view firsthand the results of a community's determination to reclaim their streets from drug sellers.

After his foray past boarded-up crack houses and down streets where residents have chased off pushers, Bush told law enforcement groups that he could NOT- as he put it- ''remember a more inspiring experience.''

Bush's visit to the heartland comes two days before he's expected to unveil a second-phase anti-drug plan. The measure is expected to elevate current spending levels by about 10 percent, to between 10-BILLION and 11-BILLION dollars.

As he flew to Kansas City, Bush told reporters aboard Air Force One that he was willing to co-operate with Congress. But he referred to an anti-crime package up for debate on Capitol Hill as ''a Trojan-horse.''

Bush said the Democratic proposal would be- quote- ''tougher on law enforcement officials than criminals.''

At least 20 vehicles were involved in a series of chain-reaction pileups that claimed five lives today on a fog-shrouded stretch of California highway.

Five people were burned to death in one of the pileups involving a pickup truck carrying propane.

A California Highway Patrol dispatcher says authorities could NOT immediately determine how many people were injured in the collisions.

Firefighters say the propane fed the blaze caused when the pickup smashed into the rear of a car which had just slammed into the back of a stopped milk truck.

Authorities say a family of four in the car and the driver of the pickup were burned beyond recognition.

The dispatcher says many of the motorists on the highway were traveling- quote- between ''55 and 65 miles an hour even though they couldn't see

100 yards ahead of them.''

-30- 1999

#90023u4389 01/23/1990 ~United Press International

(JAN. 23) UPI - Federal agents dug up the septic tank at the home of a southeastern Alabama junk store operator as they continued searching for clues to the mail bombings that killed two people last month. Authorities questioned Robert O'Ferrell for a second day today, but wouldn't say if he is a suspect.

Police in Selma, California, say five people burned to death today in the worst of a series of chain-reaction pileups on a fog-shrouded highway. Several other people were injured in the accidents involving at least 20 vehicles.

The pilots of two Navy Blue Angels jets escaped serious injury after their planes collided over California's Superstition Mountains today. One plane crashed, but the pilot ejected safely. The other pilot managed to land his jet. The cause of the accident is under investigation.

A tactical reconnaissance jet crashed this evening at Bergstrom Air Force Base... southeast of Austin, Texas. Air Force officials say both crew members aboard the plane ejected before the crash and apparently were NOT hurt.

The woman who lured Washington, D-C, Mayor Marion Barry into a cocaine sting operation that led to his arrest last Thursday testified before a grand jury today. It's NOT known what 38-year-old Rasheeda Moore told the panel.

Barry has NOT ruled out running for a fourth term of office this year. But the Greater Washington Board of Trade... a powerful regional chamber of commerce representing 15-hundred businesses... issued a letter today, urging Barry publicly NOT to seek re-election.

In West Palm Beach, Florida, Barry spent his first full day today at a substance abuse facility... undergoing treatment for what his lawyer calls an alcohol problem. Through a spokeswoman in Washington, Barry issued a plea to reporters let him alone.

A federal study finds that, while Americans are drinking less, alcohol remains the nation's most widely used drug. The government says alcohol will cost the country an estimated 136-point-three-BILLION dollars this year in lost productivity, disability and death.

-30- 2240

#90023u4403 01/23/1990 ~United Press International
(JAN. 23) UPI - Hungary has reached an agreement with the Soviet Union for the withdrawal of all Red Army troops stationed in Hungary. Prime Minister Miklos Nemeth says talks will open soon in Budapest to work out a timetable for the pullout.

Shipping officials in Rotterdam, Netherlands, say two men were killed and two others were reported missing today when a powerful explosion ripped through a Bahamian oil tanker that was undergoing repair. The cause of the blast is unknown.

More than three-thousand doctors running emergency services in Paris hospitals began a two-day strike for more money today. French hospital officials charge the labor action violates medical ethics.

The 13th test of an unarmed U-S cruise missile over Canada's northern territories is being called a success. A spokesman for the Canadian Forces Base in Cold Lake, Alberta, says the nearly four-hour test was completed without problems.

Former New York Mayor John Lindsay will spend the night in a hospital for observation after suffering a dizzy spell. Officials say the 68-year-old Lindsay... who had heart surgery two years ago... was ''completely alert, awake and aware.'' Cause of the dizziness was NOT known.

Tennessee lawmakers are mulling a proposal that'd make punching out a flag burner a crime punishable by a one-dollar fine- as long as the assault did NOT involve a weapon. The bill comes in reaction to last year's Supreme Court ruling that said flag burning is a constitutionally protected freedom.

-30- 1677
#90023u4584 01/23/1990 ~United Press International
(JAN. 23) UPI - Members of Congress returned to Capitol Hill today... eager to dig into a spate of issues, including the environment and Social Security. But the first bit of business relates to President Bush's veto of a unanimously passed bill to extend the visas of Chinese students. From all accounts, it looks as if Congress will override the veto by a wide margin.

23-

More than 500 residents the 18th congressional district in Texas were on hand in Washington today to watch as Democrat Craig Washington was sworn in as the Lone Star State's newest representative. He takes the seat of the late Mickey Leland, who died in a plane crash in Africa last August. In a brief floor speech, the freshman lawmaker said he ''could never

replace Mickey Leland.'' He asked fellow representatives to help him succeed.

Enterprise, Alabama, junk dealer Robert O'Ferrell was subjected to a second day of questioning today by F-B-I agents looking into two mail bombing deaths. Agents point out that O'Ferrell is NOT in custody and they refuse to describe him as a suspect in the killings. Authorities believe a typewriter once used by O'Ferrell is the machine that produced letters claiming responsibility for the December bombings.

The reputed head of Colombia's Medellin cocaine gang says the drug cartels are at war with each other. In a letter to a Bogota newspaper, Pablo Escobar says tensions are high between his group and the Cali gang... who he accuses of helping police trap and kill one of his cohorts last month. Escobar says he's willing to negotiate a truce with his competitors, citing a desire for peace.

#90023u4595 01/23/1990 ~United Press International

(JAN. 23) UPI - It appears an end is in sight in Brazil's eight-day petroleum worker strike. The work stoppage by some 60-thousand employees has caused nationwide fuel shortages in Brazil and is threatening gas exports to the United States. The Labor Supreme Court today ruled in favor of a 31-percent monthly salary raise for the workers. That figure is less than half what the workers were seeking, but 10-percent more than a company offer.

An F-B-I counter-intelligence agent says known K-G-B spies were among the entourage that accompanied performers at San Diego's Soviet Arts Festival last fall. But F-B-I agent Gary Laturno says there's NO evidence security at the numerous military bases and defense contractors in the San Diego area was ever breached.

Quaker Oats Company is turning up the heat in its bid for the creation of federal guidelines regarding a product's health claims. Quaker says consumers are confused in the wake of conflicting conclusions of recent studies- some which trumpet a diet of high-oat fiber and others which trounce such a diet. In order to accurately label its products so consumers can make informed choices, Quaker wants the government to establish uniform national standards for health claims.

The Travis County, Texas, Commission has approved the spending of 96-hundred dollars for an air ambulance to fly a young quadriplegic girl to Portland, Oregon... where a family waits to adopt her. Six-and-a-half-year-old Patty Carnes has spent nearly her entire life in an Austin hospital. But state, county and city officials still need to find another 35-thousand dollars for the medical and transportation

equipment Patty needs before she can leave the hospital.

#90024b0009 01/24/1990 ~Business Wire
LAKELAND, FL (JAN. 24) BUSINESS WIRE - Teltronics Inc. (NASDAQ:TELT) announced Wednesday that it has signed a letter of agreement to acquire the business, product line and assets of Auditech Communications Inc. of Seattle and the Auditech Division of Promatek Industries Ltd. of Montreal, Quebec, Canada.

The purchase price of $1.5 million Canadian will be paid over a period of time not to exceed six years plus a royalty incentive payment if future sales exceed certain levels.

Auditech is currently producing an annual sales rate of $1.5 million Canadian, up 50 percent from its previous fiscal year ended June 30, 1989. Auditech manufactures and markets the latest state of the art solid state dedicated Call Accounting System available in North America.

Auditech's product has software programs for general business use, hospitality guest billing, and the professional services market. Auditech's major customers include some of the largest telecommunications services and equipment companies in North America, including Northern Telecom, PacTel and AllTel. Auditech's Call Accounting System is also marketed by the two largest ''Telco'' supply companies, North Supply and Graybar.

Commenting on the acquisition agreement, Teltronic's president, Richard

Mugavero, said: ''The combination of Auditech's product line with our previously announced acquisition of COM DEV, a leader in Call Accounting, significantly enhances Teltronics' position as a major market share leader in the dedicated Call Accounting Market. The distribution network that these acquisitions bring together for us is unmatched by any other competitor in the market.''

Consummation of the acquisition is subject to certain conditions, including the execution of definitive purchase contract and the approval of the board of directors of Teltronics. There can be no assurance, until this is completed, that the proposed purchase will occur.

Teltronics designs, develops and manufactures electronic peripheral products for telecommunications markets, including telephone companies, long distance service providers, and corporations which utilize sophisticated telecommunications systems for expense control, accounting, and revenue generation.

#90024b0012 01/24/1990 ~Business Wire

CLEVELAND (JAN. 24) BUSINESS WIRE - The promotion of Ed Fruchtenbaum to President, U.S. Greeting Card operations, and his appointment to a vacant seat on the Board of Directors, effective immediately, was announced today by American Greetings.

In his new position, Fruchtenbaum will have responsibility for all American Greetings domestic greeting card operations.

Since joining the Company's West Coast sales organization in 1973, Fruchtenbaum, 41, has had a rapidly advancing career with American Greetings. His success in assuming greater responsibilities, while producing outstanding results, propelled his career from Field Sales to Vice President, Marketing Administration, then Group Vice President, Sales Marketing and Creative, and Senior Vice President, Marketing, in 1988.

''This is a well deserved promotion in recognition of Ed's many achievements and outstanding contributions to the Company's success'', said Morry Weiss, President and Chief Executive Officer.

''His knowledge and abilities have been well demonstrated. In this new position his capacity for leadership and vision will play an important role in the future growth of American Greetings,'' Weiss added.

Fruchtenbaum will occupy the board seat vacated at the death of Vice Chairman Morris Stone in June, 1989.

Fruchtenbaum received a Bachelor of Arts Degree from California State University - Northridge, in 1971.

He and his wife, Paulette, and their three children, reside in Chagrin Falls, Ohio.

#90024b0019 01/24/1990 ~Business Wire

SARASOTA, FL (JAN. 24) BUSINESS WIRE - Omni Films International Inc. (NASDAQ:OFII) produced and shipped during the first quarter of fiscal 1990 three 70mm cinema systems, total value in excess of $2 million, under the terms of previously announced contracts.

Omni shipped an Omnivision-870 with a total contract value of $289,000 to Japan. A Motion Master system with a total contract value of $940,000 was shipped to Taiwan. A second Motion Master system with a total contract value of $1 million was shipped to England. Contract revenues from these sales during the first quarter approximate $2 million.

Fred Hollingsworth III, president, said ''We feel very good about these record production and shipment levels that exceed any other quarter in our company history. We are optimistic that sales will continue to increase due to the amount of worldwide interest in our products.''

Omni Films International specializes in the design, sale and installation of five separate and distinct 70mm wide-screen cinema systems, and produces, distributes and licenses 70mm films for these systems. Since inception, Omni has delivered approximately 200 of its cinema systems to locations in 53 countries, incuding every continent except Antarctica. Omni is traded on the NASDAQ system under the symbol OFII.

KERRVILLE, TX (JAN. 24) BUSINESS WIRE - LDB Corp. (NASDAQ:LDBC) Wednesday announced that it has instituted a major expense reduction program at both the parent company and its Mr. Gatti's pizza subsidiary.

As part of the program, L.D. Brinkman has assumed the office of president of Mr. Gatti's Inc., a position previously held by Mark McCall, who is no longer with Mr. Gatti's.

Additional executive responsibilities are being realigned at Mr. Gatti's to provide further cost savings without diminishing operating effectiveness. LDB Corp.'s senior officers will also take voluntary pay reductions as part of this program to demonstrate their commitment to improve earnings and to build shareholder value.

MORGAN HILL, CA (JAN. 24) BUSINESS WIRE - Redlake Corp., Morgan Hill, Calif.-based manufacturer of photographic and video instrumentation equipment, announced Wednesday the unaudited results of its third quarter and nine months ended Dec. 31, 1989, of fiscal year 1990, as follows:

(Unaudited results)

	Three Months Ended 12/31/89	Per Share	Three Months Ended 12/31/88	Per Share
Net Revenues	$1,011,300		$440,861	
Income (loss) before income taxes	24,394		(206,121)	
Provision (credit) for income taxes			(29,071)	
Net income (loss)	$24,394	6 cents	$(177,050)	(45 cents)
	Nine Months Ended 12/31/89	**Per Share**	**Nine Months Ended 12/31/88**	**Per Share**
Net Revenues	$2,389,836		$2,161,468	
(Loss) before income taxes	(27,836)		(272,884)	
Provision (credit) for income taxes	1,200		(49,100)	
Net (loss)	$(29,036)	(7 cents)	$(223,784)	(57 cents)

For the third quarter of fiscal year 1990, net revenues increased and there was a net income. Net revenues increased $570,439, or 129 percent, from $440,861 in the third quarter of fiscal year 1989 to $1,011,300 in the third quarter of fiscal year 1990.

Net revenues increased as a result of the continuing good order rate for the company's photo-instrumentation products. The company's new personal computer imaging board product contributed sales of $54,764 for the

quarter. The company also received a contract to develop a next generation imaging board which contributed an additional $85,000 in revenues.

There was a net income of $24,394 for the third quarter of fiscal year 1990 compared to a net loss of $177,050 for the third quarter of fiscal year 1989. The third quarter net income was a result of an increase in revenues.

PALO ALTO, CA (JAN. 24) BUSINESS WIRE - MAXWEST Wednesday announced a joint venture with Butler-Bloor Ltd., a market research and consulting company for high technology headquartered in the United Kingdom.

Under the terms of the agreement MAXWEST will distribute Butler-Bloor research reports in the United States.

Written for the MIS marketplace, Butler-Bloor reports are intended as informative reference documents for MIS decision-makers.

The report names Uniface 4GL as having the most outstanding functionality.

Included in the report are sections detailing the 4GL market; open software architectures, issues, products; single platform products; product comparisons; and survey results.

The selection of a database is probably one of the most important decisions made in the industry, this report compares each of the dominant players in the database market and discusses which applications database products are most suitable for.

Section I of the report includes: the database market, performance features, distributed databases, the database products and product comparisons.

Commenting on the reports, Carolyn Morris, president of MAXWEST, said: ''We are excited about this venture with Butler-Bloor. Their reports are outstanding and should be well received in the U.S.''

Future topics for Butler-Bloor reports include ''Object-Oriented Programming'' and ''UNIX Performance.''

Both reports are available immediately through MAXWEST, located at 265

Lytton Ave., Palo Alto, Calif. 94301. Telephone: 415/326-2222.

MAXWEST Inc. is a business consulting firm that specializes in developing high technology businesses. As management consultants, MAXWEST helps companies tackle the most difficult problems associated with building independent businesses, marketing and management in high growth companies.

CONTACT: MAXWEST, Palo Alto

ENGLEWOOD, CO (JAN. 24) BUSINESS WIRE - U S WEST (NYSE:USW) Wednesday reported earnings per share of $6.02 on net income of $1.111 billion for the year ended Dec. 31, 1989.

The company earned $6.17 per share on net income of $1.132 billion in 1988.

The 1988 results include a non-recurring after-tax gain of $88.7 million, or 48 cents per share, from the second-quarter sale of 9.66 million shares of Class A common stock by U S WEST NewVector Group, the company's cellular and paging subsidiary. Excluding this gain, the company earned $5.69 per share on net income of $1.043 billion in 1988.

Consolidated revenues totaled $9.7 billion in 1989, compared to $9.2 billion in 1988. Return on average equity was 14.2 percent, compared with 14.9 percent in 1988. For the quarter ended Dec. 31, 1989, U S WEST reported earnings per share of $1.84 on net income of $344.4 million, compared to earnings per share of $1.49 on net income of $271.7 million for the fourth quarter of 1988.

The fourth quarter results were favorably affected by higher local service and long-distance telephone company revenues; increased revenues from the company's cellular and paging unit and its directory publishing operation; a property sale by U S WEST's real estate subsidiary; and a change in accounting for income taxes.

''We ended the year on a very positive note financially, and as a whole,'' said Chairman and Chief Executive Officer Jack MacAllister. ''Our business is more exciting than it's ever been -- we're truly becoming a global communications company.'' The company's largest subsidiary, U S WEST Communications, introduced new products and services -- such as Voice Messaging, Express Service and Custom Ringing -- that help business and residential customers make better use of their time.

In addition, U S WEST Community Link(sm) service was introduced to the Omaha-Council Bluffs community in November. The company's first videotex

gateway was launched with 218 information services and has already grown to offer nearly 400 services, including classified ads, health services, symphony schedules, community activities, local news and sports information.

An improved economic climate in 1989 helped U S WEST Communications achieve its best access line growth since divestiture. Total access lines were up 2.9 percent, with business lines up 3.5 percent.

#90024b0036 01/24/1990 ~Business Wire
BEVERLY HILLS, CA. (JAN. 24) BUSINESS WIRE - Litton is installing what will be Europe's largest engineering document imaging system at the Toulouse, France, production facilities of aircraft producer Aerospatiale.

When completed late this year, the multimillion dollar system will link Aerospatiale's three new manufacturing plants near the southern France city. Aerospatiale is one of Europe's leading aircraft manufacturers and a partner in the European Airbus program.

The new 100-terminal system, linking engineering and production, is expected to reduce search time for engineering drawings and other technical documents to several seconds from the current 30 to 90 minutes necessary with Aerospatiale's manual card filing procedure.

The system, capable of handling more than one million documents, was designed and produced by Litton's Information and Control Systems division San Diego, through its recently acquired operation, MC2 (Marketing Concept Conseil) of Grenoble, France.

The Litton system will scan documents printed on paper and microfilm and digitize the images into tiny picture elements called pixels for storage on optical disks. Each optical disk is capable of storing 3,000 to 4,000 documents on each side.

Litton's Information and Control Systems division provides engineering and distribution management, process control and inspection, industrial logistics and information systems to the industrial automation market. The MC2 operation, acquired by Litton last year, is a major European supplier of document imaging systems.

Litton is a technology-based company providing advanced electronic and defense systems, resource exploration services and industrial automation systems to U.S. and world markets.

#90024b0044 01/24/1990 ~Business Wire

SANTA CLARA, CA. (JAN. 24) BUSINESS WIRE - 3Com Corp. (NASDAQ:COMS) and and SynOptics Communications Inc. (NASDAQ:SNPX), of Mountain View, Calif. Wednesday announced completion of tests certifying interoperability of 3Com's newest EtherLink adapter and SynOptics' LattisNet concentrator for unshielded twisted pair Ethernet networks, giving businesses a multivendor solution for expanding their twisted pair systems.

Unshielded twisted pair, the flexible cabling installed for telephone systems, is one of several media able to connect computer systems and peripheral devices in a local area network (LAN). In addition to carrying voice communication, twisted pair can transmit data at the Ethernet-specified rate of 10 megabits per second.

3Com and SynOptics are the world's leading suppliers of Ethernet products. 3Com's Ethernet adapter boards connect desktop computers to a LAN and SynOptics' twisted pair wiring concentrators link segments of the Ethernet LAN together.

With more than 1.4 million EtherLink adapters installed worldwide, 3Com's Ethernet products are the industry's de facto standard for reliability and network software support. SynOptics was first to enter the Ethernet market with an unshielded, twisted pair solution in August 1987, and has installed more than 300,000 nodes of its LattisNet Unshielded Twisted Pair (UTP) system.

Certification of interoperability between 3Com's EtherLink II Twisted Pair (TP), introduced this month, and SynOptics' LattisNet UTP implementation was in direct response to customers' requirements for integrated twisted pair Ethernet solutions, according to the companies. During the last 60 days, product tests and evaluations were conducted in both companies' laboratories at customer sites throughout the United States.

3Com's first unshielded twisted pair adapter board is designed to ensure interoperability with SynOptics' existing LattisNet product and to comply with the latest IEEE draft standard for point-to-point communication via Ethernet on dual twisted pair wiring (called 10BASE-T).

The draft standard was approved by the IEEE 10BASE-T Task Force last week and forwarded for further review next month by the IEEE Technical Committee on Computer Communications (TCCC). Final specification of the standard is anticipated this fall.

The ability of 3Com's adapter to operate with products based on the emerging IEEE specification and SynOptics' LattisNet, the de facto standard for unshielded twisted pair wiring, gives customers the flexibility to add IEEE-standard hubs to their existing systems without having to replace the adapters at the desktop.

3Com Corp. (NASDAQ:COMS) is a computer networking company providing multivendor connectivity and information sharing for workgroups, departments and corporate environments worldwide. The company designs, manufactures, markets and supports a comprehensive range of networked client-server computing systems based on industry standards and open systems architecture.

#90024b0051 01/24/1990 ~Business Wire

THOUSAND OAKS, CA (JAN. 24) BUSINESS WIRE - GTEL of California, a leader in the telecommunications industry, Wednesday announced its multicompany team has been officially awarded the state of California's CALNET contract.

CALNET is a new, state-of-the-art telecommunications network designed to replace the state's 30-year-old phone system.

''We are extremely proud that GTEL has been chosen for this exciting project,'' said Berney Heiler, president of GTEL, a Thousand Oaks-based subsidiary of GTE California. ''GTEL's project team of companies is excited about helping bring the state of California to the forefront of telecommunications technology.''

The GTEL team is comprised of GTEL, IBM, MCI, Rockwell and others; these companies employ more than 100,000 people in California. The 10-year contract is valued at $67 million.

CALNET possesses a telecommunications system that will utilize a high-speed digital network, enabling customers to transmit not only voice but computer data and, eventually, full-motion video.

Unlike the current system, CALNET will be partially owned by the state. The state will have the option of upgrading the system as it sees fit and not be forced to live by the decisions of an outside telecommunications provider.

The need for a private state system surfaced nearly five years ago when the state began looking at ways to improve the Automatic Telecommunications Switching System (ATSS). Part of the problem with ATSS is that many state government locations cannot use the system because they cannot be economically connected to it. In addition, the out-dated

ATSS system is not meeting the technological needs of the state.

''Not only will the CALNET system be able to provide the state more services,'' said Heiler, ''but the state's partial ownership will reduce costs and give the state control of its telecommunications future. The bottom line is the state will have more options, get better service and save millions in costs.''

The contract is to begin immediately with the first phase expected to be operational within 15 months. CALNET will be the second-largest private phone system of its kind in the world, second only to the federal system FTS-2000.

SANTA CLARA, CA (JAN. 24) BUSINESS WIRE - At SCOOP '90, ExperTelligence Inc. announced the first integrated symbolic software application development system available for the Macintosh II series.

The Action! Developer System for the Macintosh II series is the first CASE tool available for the Mac that integrates the Action! technology originally developed by ExperTelligence on the microExplorer.

The development system includes the Action! interactive application development tool developed by ExperTelligence, the Macintosh Tool Box

Interface (TBI), developed by ExperTelligence and adapted by Procyon Ltd., and the Procyon Developer system, developed by Procyon Ltd. and distributed by ExperTelligence.

With this system, a developer can develop on a native Macintosh, compile it and deliver it standalone in record time and unprecedented quality. Applications that could have taken from three to five man-years can be developed in less than six man-months, are much easier to use, more attractive, and also bug-free.

Denison Bollay, president and chief executive officer of ExperTelligence, said, ''For the first time, advanced Macintosh developers can use a completely integrated system that is better than most of the systems found on dedicated Lisp machines or high-end workstations.''

The development system can work on any Macintosh II system with 8 megabytes (recommended). Applications generated by the system can run on a 5-megabyte configuration. The full development system is available now from ExperTelligence at the introductory price of $3,000. For this price the customer receives six binders of high-quality documentation, 25 diskettes containing the various programs, 100 examples and the famous ExperTelligence support.

Dr. John E. Forge, executive vice president and chief operating officer, said, ''This product, all by itself, triples our potential market in the high-end corporate area...and it is only the beginning!''

Based in Goleta, ExperTelligence has been a pioneer in the object-oriented and desktop AI markets. ExperTelligence is a public company traded OTC. The company's software packages and services are used by thousands of organizations worldwide.

#90024b0069 01/24/1990 ~Business Wire

GALVESTON, TX (JAN. 24) BUSINESS WIRE - American Indemnity Financial Corp. (NASDAQ:AIFC) Wednesday declared a regular quarterly cash dividend on its common stock of 14 cents per share payable Feb. 15 to stockholders of record on Feb. 8 and announced 1989 fourth quarter and year-end financial results on a preliminary and unaudited basis.

For the fourth quarter ended Dec. 31, 1989, the company reported a net loss of $2,539,719 or $1.32 per share, compared with net income of $643,668 or 33 cents per share for the fourth quarter ended Dec. 31, 1988.

For the year ended Dec. 31, 1989, the company reported a net loss of $5,999,533 or $3.12 per share, compared with net income $2,943,107 or $1.53 per share for the year ended Dec. 31, 1988.

Catastrophic weather related losses was the principal factor that adversely impacted the company's earnings in 1989 as a result of 21 separate occurrences of severe hail, wind, tornadoes, and floods in Texas and other states, including the effects of Hurricane Chantal which struck the upper Texas coast in August. The cost to the company of such weather losses for the year ended Dec. 31, 1989 was approximately $7,169,000 or $3.73 per share, compared with approximately $3,037,000 or $1.58 per share for the year ended Dec. 31, 1988. The company was not involved in losses resulting from Hurricane Hugo in the Carolinas or the California earthquake.

SUNNYVALE, CA (JAN. 24) BUSINESS WIRE - Amdahl Corp. announced Wednesday that it will implement IBM's Move-Page Facility on Amdahl's 5890E Series of mainframe computers.

The facility is an extension to the ESA/370 computer architecture that permits support of Hiperbatch, a new function that has the potential to improve performance of IBM's MVS/ESA operating system in certain batch operating environments.

Plans to implement the facility and support Hiperbatch on the company's more powerful 5990 Series of mainframes had been announced in November.

The new facility will be available on all 5990s, including systems already installed at customer sites, beginning in the second quarter of 1990.

It will be offered as an option on 5890Es beginning in the third quarter. Support on the 5990s will be provided at no charge.

Support on 5890E models is priced at $45,000 for uniprocessors and dual processors and at $85,000 for multiprocessors.

With annual sales in excess of $2 billion, Amdahl is a major supplier of

large mainframe computers, data storage subsystems and data communications products.

The company also develops software and offers educational and consulting services.

#90024b0089 01/24/1990 ~Business Wire
WASHINGTON, DC (JAN. 24) BUSINESS WIRE - Unify Corp. Wednesday introduced ACCELL/SQL for INFORMIX, a new high-performance application development system designed to expand the flexibility of Informix DBMS users.

The product was developed as part of an ongoing open systems commitment by Unify Corp. and was unveiled here before an estimated 20,000 Unix users during this week's 1990 National Uniforum Show.

ACCELL/SQL for INFORMIX integrates a high-performance 4GL and a powerful applications generator. Unify's approach in developing this new product eases a developer's job of going from draft prototypes to full-fledged applications by greatly increasing the number and power of tools available for application development.

The ACCELL/SQL for INFORMIX generator offers a fill-in-the-blanks approach to field and form definition, allowing the programmer to rapidly prototype applications. Almost 80 percent of most business applications can be built using the generator alone.

The product has been specifically designed to interface easily with

existing Informix DBMS applications, as well as provide programmers direct access to the Informix DBMS engine. Moreover, ACCELL/INFORMIX provides access to Informix tools via the ACCELL Menu-Handler module.

ACCELL/SQL for INFORMIX also gives Informix users a cooperative processing option to offload input-output processing from a Unix host to ASCII terminals and DOS-based PCs, thereby allowing an increased number of users and enhanced performance.

ACCELL/SQL for INFORMIX will be generally available in March, with prices ranging from $1,500 to $228,000, depending upon hardware configuration and number of users.

ACCELL/SQL for INFORMIX is based on Unify's ACCELL/SQL, the industry's first application development technology built to support multiple database and user interface options. This implementation is the latest delivery in Unify's 'open systems' commitment to improve 4GL application development technologies for all leading Unix databases.

Unify Corp. is a leading manufacturer of Unix based application development software tools. Based in Sacramento, Calif., Unify employs 235 people in 18 offices across the United States, Europe, Japan and Australia. In 1988, Unify's ACCELL/SQL and UNIFY 2000 RDBMS were chosen by the U.S. Air Force as the foundation software technology for its $1 billion worldwide Unix conversion project -- the AFCAC-251 contract awarded to AT&T.

VANCOUVER, BRITISH COLUMBIA (JAN. 24) BUSINESS WIRE - David Patterson, president of Steelhawk Resources Ltd., announces the acquisition of 49 percent of the issued and outstanding shares of Nucell Inc. The remaining 51 percent of Nucell Inc. is held by Peripheral Systems Inc., an Oregon corporation trading on NASDAQ.

Nucell is an Idaho corporation formed on Dec. 30, 1985 for the purpose of designing, producing, and marketing a Resonant Nuclear Battery, "the Nucell Battery", for the direct conversion of magnetic energy to electric energy.

The Nucell Battery was developed by Paul M. Brown, who discovered a technique to "organize" magnetic fields around radioactive charged particles in a way that allows radioactive energy to be drawn off as electricity. The Nucell Battery utilizes a very small amount of non-fissionable radioactive material, or spent nuclear fuel may be used as the fuel source.

Further, Steelhawk Resources Ltd.'s shares are currently quoted on the Canadian Over-The-Counter Automated Trading System (COATS) as well as, being quoted on the over-the-counter market in the United States.

CLEVELAND (JAN. 24) BUSINESS WIRE - Ferro Corporation (NYSE-FOE) reported worldwide sales of $269.9 million for the fourth quarter ending December 31,1989. This represents an increase of 3.5 percent from the $260.8 million recorded in the same quarter last year. Earnings were $12.3 million for the period, exceeding the $11.8 million in the fourth quarter of 1988. Primary earnings of $0.56 per share, after dividends on convertible preferred stock issued in April 1989, compared with $0.57 in the corresponding quarter of 1988.

For the full year ending December 31, 1989, sales totaled $1,083.6 million a 7.4 percent increase over the $1,009.0 million recorded last year. Net income was $49.7 million versus $46.6 million last year, an increase of 6.7 percent. Primary earnings of $2.25 per common share (giving effect to the dividend payable on preferred shares) compared with $2.26 per common share in 1988.

Fourth quarter earnings include the benefits of a tax refund received from reduction in prior years' taxes paid, occurring as a result of additional foreign tax credits allowed. This refund was partially offset by a provision for the realignment of U.S. frit production capacity. The net effect of these transactions contributed about $0.05 per common share to earnings.

In commenting on fourth quarter results, Adolph Posnick, Ferro's Chairman and Chief Executive Officer, noted that international operations continued to perform well. In the United States, lower activity in the automotive and appliance sectors affected demand for coatings and plastics. Specialty chemicals, however, maintained their consistently strong performance through the period.

In looking ahead to 1990, Mr. Posnick observed that the Company's operations were well-positioned on all fronts. Another good year is anticipated in foreign operations. Improved results are expected from domestic operations, reflecting on-going management actions to offset generally sluggish U.S. economic projections.

Ferro Corporation is a major international producer of industrial specialty materials, including coatings, colors, ceramics, chemicals and plastics.

#90024b0130 01/24/1990 ~Business Wire

MOUNTAIN VIEW, CA (JAN. 24) BUSINESS WIRE - Adobe Systems Inc. announced Wednesday that it has received what it believes to be the first copyright registration for a typeface program in the United States.

In registering Adobe's ITC Garamond font computer program, the U.S. Copyright Office has recognized that Adobe's PostScript typeface programs are original works of authorship like any other copyrightable computer program.

This copyright registration protects the computer program itself, but does not extend to the typeface design it generates. Under current law in the United States, a typeface design, or the shapes of its individual characters, is not copyrightable subject matter.

In its "Policy Decision on Copyrightability of Digitized Typefaces" dated Sept. 29, 1988, the U.S. Copyright Office ruled that digital typeface data was the same as the underlying design, and therefore was not itself an original expression of authoriship. PostScript language typeface programs however, are not merely data, but are copyrightable computer programs.

"This is a significant milestone for the electronic publishing industry," said Jonathan Seybold, industry analyst. "By registering this typeface program, the Copyright Office has recognized that typeface programs are creative works of authorship deserving the same level of protection as any

other computer program. This will encourage fair competition in the industry that will directly benefit the end-user community."

"This action demonstrates that the Copyright Office has recognized a subtle, but important distinction between copyrightable and uncopyrightable subject matter," according to Bruce Lehman, an attorney specializing in copyright matters for the firm of Swidler and Berlin in Washington D.C., who processed this registration for Adobe.

"By acknowledging that typeface computer programs are protectable, as are any other computer programs, the Copyright Office has recognized that the law protects this emerging industry."

In addition to Adobe, other companies that develop and market font software programs see the registration as a beneficial action for the entire industry." As a manufacturer of typeface programs, we are very pleased by this development," said Rob Friedman, president of Bitstream Inc., a leading digital-type foundry based in Massachusetts.

"In fact, we worked closely with Adobe to obtain this clarification in copyright policy. Legal protection encourages manufacturers to make the significant investment needed to develop high-quality font product. This in turn means more high-quality type for end-users."

TUSTIN, CA (JAN. 24) BUSINESS WIRE - Sheldon Razin, president and chairman of Quality Systems Inc. (NASDAQ:QSII), provider of computerized management systems to the health care industry, announced the hiring of Sy Rubenstein as the company's chief operating officer.

In this newly created position, Rubenstein will be centrally involved in overseeing the daily operations of the company. In addition, he will play an integral role in initiating and implementing key growth strategies for QSI.

Rubenstein brings a significant track record of technical expertise, computer hardware and software applications knowledge, and management background with businesses providing high-tech products and extensive client services. This management experience includes nearly 30 years of increasingly significant leadership positions within Rockwell International.

Rubenstein served as president for three of Rockwell's corporate divisions including the Space Transportation Systems division, where he was a

principal designer, chief engineer and program manager for the space shuttle.

Rubenstein holds a bachelor of science degree in electrical engineering from M.I.T., a master's in electrical engineering from New York University a master's of business administration from Cal State Fullerton, and has completed the Senior Executive Training Program at Stanford University.

Nationally prominent within the high-tech arena, he also has been the recipient of numerous achievement awards, including the NASA Distinguished Public Service Award, the NASA Medal for Exceptional Engineering Achievement, and the Engineer of the Year award for the Orange County Engineering Counsel.

QSI feels that the addition of Rubenstein to its senior management staff is strategically key. Coupled with the company's strong cash position, recent product developments, sales force expansion and its successful Industry Remarketer association with IBM, QSI believes that it is well positioned for future growth.

Quality Systems Inc. is engaged in the sale of computerized information processing systems to medical and dental group practices.

#90024b0132 01/24/1990 ~Business Wire

SAN FRANCISCO (JAN. 24) BUSINESS WIRE - Potlatch Corp. Tuesday reported record earnings for the fourth consecutive year due to excellent results from its pulp and paperboard operations.

For the fourth quarter, net earnings were $40.0 million, compared with $33.0 million in 1988. Earnings per common share were $1.38 or 16 percent above the $1.19 reported for the fourth quarter of 1988. Sales were $315.8 million, 11 percent ahead of 1988's $285.4 million.

For 1989, net earnings were $136.7 million, compared with $112.4 million in 1988. Earnings per common share were $4.79 or 19 percent ahead of the $4.04 reported in 1988. Sales of $1.23 billion were 14 percent over the $1.08 billion for 1988.

On a fully diluted basis, earnings per common share for the fourth quarter and full year 1989 were $1.33 and $4.56, respectively, compared with $1.11 and $3.78 for 1988.

Richard B. Madden, Potlatch chairman and chief executive officer, said

that in addition to the strong performance of the pulp and paperboard operations, the earnings of the wood products group and tissue operation were also up sharply.

For the year, the wood products group earnings increased to $13.1 million from $3.2 million in 1988. Earnings for the fourth quarter of 1989 were $8.0 million, compared with a loss of $1.3 million in 1988. The improved earnings for the year and fourth quarter were primarily due to higher sales realizations for panel products.

Madden said that production at the Lewiston, Idaho, sawmill, which experienced operating problems during much of 1989, was significantly improved in the fourth quarter. ''Late in the fourth quarter several modifications were made to the mill which will result in additional improvement. We have indentified some remaining areas requiring modification in 1990, and when those are completed the mill should be operating at the production levels initially projected,'' Madden added.

The Northwest Paper division reported fourth quarter and full year 1989 earnings of $13.7 million and $67.8 million, respectively, down from $20.5 million and $76.9 million in 1988. Although sales realizations and shipments improved during the year, operating problems related to new equipment at the Cloquet, Minn., mill adversely affected fourth quarter and 12 month 1989 results.

Other pulp-based businesses, which include the Pulp, Paperboard and Packaging group and the Consumer Products division, reported 1989 earnings of $167.2 million, a 24 percent increase over the $134.6 million in 1988. Fourth quarter 1989 earning were $47.3 million, compared with $40.9 million in 1988.

Madden said the significant rise in earnings was mostly attributable to substantially higher sales realizations for pulp, bleached paperboard and tissue products.

''Although there are elements of uncertainty in the economic environment, we are optimistic about our recent productivity improvements and our focus on high-value-added products. As we enter the 1990s, we will continue to concentrate on controlling costs and becoming more efficient,'' Madden added.

Potlatch is a diversified manufacturer of forest products with timberlands in Arkansas, Idaho and Minnesota.

PALATINE, IL. (JAN. 24) BUSINESS WIRE - Square D Co. Wednesday announced a 10 percent increase in its quarterly cash dividend on common stock, raising the dividend 5 cents per share to 55 cents, a $2.20 annual rate.

The dividend will be payable April 2, 1990, to common stockholders of record March 15, 1990.

Square D last increased its common stock dividend in October 1988, when the rate was increased from 48 to 50 cents per share.

The April 2, 1990, dividend will be paid to approximately 12,000 holders of common stock. It will be the 217th consecutive quarterly cash dividend paid by Square D.

''The dividend increase is an expression of the confidence with which we view the future and is consistent with our long-term financial goals,'' said Jerre L. Stead, Square D chairman, president and chief executive officer. ''We continue to seek to provide an above-average total return to our shareholders through stock price appreciation and dividends.''

Square D is a worldwide leader in industrial control and electrical distribution products, systems and services.

NEWPORT BEACH, CA (JAN. 24) BUSINESS WIRE - Mortgage Investments Plus Inc. (ASE:MIP), an equity-oriented real estate investment trust advised by Koll Realty Advisors, Wednesday reported consolidated net income of $5 million, or 56 cents per share, for the year ended Dec. 31, 1989, compared with net income of $4.3 million, or 47 cents per share for 1988.

Funds available for distribution in 1989 were 80 cents compared with 82 cents in 1988. Net income for the fourth quarter was $1.3 million, or 15 cents per share in 1989 and $1.2 million, or 14 cents per share in 1988. Fourth quarter 1989 funds available for distribution were 25 cents per share.

The increase in 1989 net income was primarily due to improved operations from both consolidated and unconsolidated equity investments offset by a reduction in net interest income.

Cash distributions from joint ventures for 1989 have increased approximately $762,000 over 1988 levels. This is the result of improved joint venture leasing. MIP's portfolio of completed properties has increased by approximately 200,000 square feet in 1989 to a total of 1.8 million square feet.

Leasing of completed joint venture properties was 86 percent as of Dec. 31 1989, compared with 88 percent at Dec. 31, 1988.

It is estimated that 53 cents per share of the 1989 dividend will be taxable as ordinary income to stockholders of the company and 27 cents will be a non-taxable return of the capital. In 1988, 51 cents per share of the dividend was taxable as ordinary income to stockholders and 29 cents was a non-taxable return of capital.

SEATTLE (JAN. 24) BUSINESS WIRE - Plum Creek Timber Company, L.P. (''Plum Creek'') today announced that it will distribute $0.70 per depositary unit representing cash generated from operations for the fourth quarter of 1989.

This distribution, which is 17 percent greater than the intended minimum distribution of $0.60 per quarter, will be paid on March 1, 1990, to unitholders of record on February 14, 1990.

Combined earnings for the quarter ended December 31, 1989, were $5.0 million, or $0.31 per unit (fully diluted, including 1,250,000 Deferred Participation Interests owned indirectly by Burlington Resources Inc.). Earnings for the period June 8 through December 31, 1989, were $14.4 million, or $0.90 per unit.

Depositary units represent limited partner interests in Plum Creek. As of December 31, 1989, there were 14,352,500 depositary units outstanding.

Plum Creek and its 95 percent owned subsidiary, Plum Creek Manufacturing Inc., were formed in June 1989 to acquire, own and operate substantially all of the timber business and wood products manufacturing operations, respectively, of Plum Creek Timber Company Inc., a wholly owned subsidiary of Burlington Resources Inc.

IRVINE, CA (JAN. 24) BUSINESS WIRE - Allergan Inc. (NYSE:AGN), a leading manufacturer of eye and skin care products, Wednesday announced 1989 results and a series of steps taken to improve profitability by

streamlining its business and increasing productivity.

These steps resulted in a one-time pretax restructuring charge of $22.8 million in the fourth quarter of 1989. The company also announced a quarterly dividend of 7 cents per share.

For the full year 1989, Allergan worldwide net sales were a record $806.9 million, up 7 percent over the prior year. After pro forma adjustments net earnings for 1989, which excludes the restructure charge, decreased to $66.8 million, or 18 percent less than the pro forma net earnings of $83.8 million for 1988.

Allergan Inc., formerly a division of SmithKline Beckman Corp., became a stand-alone public company on July 27, 1989, resulting in a new capital and administrative structure. Therefore, financial data should be adjusted from an ''as reported'' basis to a ''pro forma'' basis to meaningfully compare 1989 with 1988 results.

Foreign currency fluctuations between the periods reduced net sales by $14.7 million. International sales represented 42 percent of Allergan's total 1989 sales.

For the three months ended Dec. 31, 1989, worldwide net sales were $211.5 million, down 2 percent over the like period last year. Pro forma net earnings for the fourth quarter of 1989, which excludes the restructure charge, decreased to $3.4 million from $29.4 million pro forma net earnings in the fourth quarter of 1988.

#90024b0176 01/24/1990 ~Business Wire

DALLAS (JAN. 24) BUSINESS WIRE - A.H. Belo Corp. Wednesday announced improved results for the fourth quarter and full year ended Dec. 31, 1989, with net income more than doubling over the prior year.

Revenues for the fourth quarter were $115.2 million, up 9.1 percent over the $105.6 million reported for the fourth quarter of 1988. Net earnings for the quarter were $8.3 million, compared with $2.5 million reported for the prior year.

Fourth quarter earnings per share were 41 cents compared with 12 cents for the same quarter last year. Average shares outstanding for the quarter were 20 million, essentially unchanged from the prior year.

For the full year ended Dec. 31, revenues were $417.1 million, an 8.2 percent increase over the $385.4 million reported for 1988.

1989 earnings were $23.4 million, or $1.16 per share, compared with $10.1 million, or 51 cents per share, for 1988. The 1988 fourth quarter and full year results included a write-down of syndicated programming totaling $6.1 million pretax, which reduced net earnings by $4 million. An average of 20.3 million shares were outstanding during 1989, versus 20 million shares for 1988.

''Belo's strong performance in 1989 coincided with a similar resurgence in the Southwest economy where our largest operations are based,'' said Robert W. Decherd, chairman and chief executive officer. ''The by-product of these market recoveries, demand-driven advertising gains, dramatically improved Belo's overall results for the year.''

Decherd continued, ''We have never been more encouraged about Belo's long-term prospects. However, we do not think that 1989's rate of earnings growth can be sustained in 1990.''

Belo's publishing revenues for the fourth quarter of 1989, principally at The Dallas Morning News, were $65.1 million, up 10.3 percent from the $59 million reported last year. Revenue increases were the result of growth in daily and Sunday circulation and continued strength in both retail and classified advertising, principally in the financial, automotive, and employment categories. Broadcast revenues were $50.2 million for the fourth quarter, an increase of 7.6 percent over the $46.6 million reported in the same period of 1988.

Excluding the effect of non-recurring political advertising in the fourth quarter of 1988, revenue gains in the comparable period of 1989 were particularly significant at WFAA-TV in Dallas and KHOU-TV in Houston, reflecting the continued rebound in those local economies.

Belo owns The Dallas Morning News and Dallas-Fort Worth Suburban Newspapers, Inc., publisher of seven community newspapers in the Dallas-Fort Worth area. In addition, Belo owns and operates network-affiliated television stations WFAA-TV (ABC) in Dallas-Fort Worth and KHOU-TV (CBS) in Houston, Texas; KXTV (CBS) in Sacramento, California; WVEC-TV (ABC) in Hampton-Norfolk, Virginia; and KOTV (CBS) in Tulsa, Oklahoma.

Shares of Series A Common Stock are traded on the New York Stock Exchange under the symbol BLC.

#90024b0190 01/24/1990 ~Business Wire

PALO ALTO, CA (JAN. 24) BUSINESS WIRE - Hewlett-Packard Co. Wednesday announced that it will offer an enhanced early retirement program to approximately 2,400 long-service employees in the United States as part of an ongoing program to balance its work force and slow expense growth.

The program will be available on a voluntary basis to employees who are at least 55 years old and who have 15 or more years of service with the company. The company estimates that 800 to 1,000 of its 60,000 employees in the United States will take advantage of the offer.

''We're offering this early-retirement incentive as part of HP's continuing efforts to balance the work force and to slow the growth of expenses,'' said John A. Young, HP president and chief executive officer. ''The voluntary program reflects the respect the company has for its most-tenured employees and provides additional flexibility to help us accomplish these objectives.''

HP offered a similar program in 1986, which resulted in about 780 employees choosing to retire early.

Employees who choose to participate in the current program will receive one-half month's salary for each year of service up to a maximum of 12 months' salary. In addition, retirees will receive the funds that already have accumulated in their accounts under the company's regular retirement plans. A sign-up period will begin Feb. 1, and program participants will leave the company on or before March 30, 1990.

HP will provide retirement counseling and financial-planning assistance to eligible employees to help them decide whether to retire early.

Hewlett-Packard Co. is an international manufacturer of measurement and computation products and systems recognized for excellence in quality and support. The company's products and services are used in industry, business, engineering, science, medicine and education in approximately 100 countries. HP had revenue of $11.9 billion in its 1989 fiscal year.

SAN JOSE, CA (JAN. 24) BUSINESS WIRE - Directors of SJW Corp. Wednesday increased the quarterly dividend on common stock from 45 1/2 cents to 46 1/2 cents per share.

The new annual dividend rate is $1.86 per common share. The first dividend at the new rate is payable on March 1, 1990 to shareholders of record Feb. 5, 1990. President and Chief Executive Officer J.W. Weinhardt noted this makes the 23rd consecutive year the company has increased its common dividends.

Earnings per common share were $1.50 for the year ended Dec. 31, 1989

compared to $2.50 for 1988. The company's primary source of earnings is its water utility which serves a population of approximately 750,000. The $1 decrease in earnings was due primarily to the effects of the company's mandatory water rationing program which resulted in lower usage and increased personnel and administrative expenses.

The 18.8 percent decrease in average usage resulted in a $9,919,000 decrease in revenues while higher rates and new customers added $3,320,000 to revenues.

Earnings per common share for the quarter ended Dec. 31, 1989 were 27 cents compared to 32 cents for the fourth quarter of 1988. The 5 cents decrease in earnings per share for the fourth quarter was due primarily to year end tax adjustments.

#90024b0210 01/24/1990 ~Business Wire

DFW AIRPORT, TX (JAN. 24) BUSINESS WIRE - American Airlines on Wednesday announced an innovative promotion to reward members of its AAdvantage frequent traveler program with free tickets.

The airline will offer one free coach class round-trip ticket to any AAdvantage member who flys three round trips between now and April 6, said Michael W. Gunn, senior vice president-marketing.

AAdvantage members who qualify by flying at least three round trips with a fare of $98 or more each will earn a free coach class ticket good for travel between Sept. 4 and Dec. 14, 1990. Two free tickets will be provided for five paid round trips, three free tickets for seven paid round trips.

The tickets are good for travel on American Airlines or American Eagle in the continental United States, Canada, Mexico and the Caribbean.

''We want to make this promotion available to all our AAdvantage members across the system,'' said Gunn. ''We are in an intensely competitive business and must respond to market forces. Therefore, we will continue to give our frequent flyers the best program in the industry.''

A competitor has introduced a more restrictive promotion available only to frequent flyers in limited markets.

Another unique feature of American's program, Gunn said, is that any passenger can instantly become an AAdvantage member by calling American's local reservations number and asking to be enrolled. To qualify for the

special promotion, new members must enroll by Feb. 2, 1990.

The free tickets may be given to a friend or relative, as any American AAdvantage award may be. However, they may not be purchased, sold or bartered and are void if used in this manner.

American will count trips taken by existing AAdvantage members between Jan. 14 and April 6 and will mail certificates to qualifying members in May, eliminating the need to claim the awards. The certificates may be redeemed at any American Airlines or American Eagle ticket office or ticket counter.

The award tickets require a Saturday night stay and a 14-day advance reservation, and have blackout dates of Nov. 16, 17, 21, 25 and 26. Seats for award travel are limited and may not be available on all flights.

''With this promotion,'' Gunn said, ''AAdvantage remains the pacesetting frequent traveler program, as it has been since we introduced the concept of rewarding our most loyal customers in 1981.''

#90024b0230 01/24/1990 ~Business Wire

TORONTO (JAN. 24) BUSINESS WIRE - Dolphin Explorations Ltd. announced Wednesday that it has received the feasibility study by Kilborn Limited of

Toronto on the Cape Ray gold project in southwestern Newfoundland.

Though more detailed study of the feasibility report is required, under current economic circumstances it appears the property could only be brought into production with some assistance from governments.

Robert McCallum, Dolphin's president and chief executive officer, along with other company officials, met with government representatives to review the economics of the Cape Ray gold project.

''During these meetings we generally reviewed the project feasibility and specifically requested governments to give consideration to the provision of the necessary infrastructure, a project loan guarantee and assistance with manpower training,'' said McCallum.

Dolphin is required to provide a number of Environmental Impact Statements (EIS) and component studies of which eight have been approved. It is expected that the final EIS document wil be submitted to the Department of Environment and Lands for review in early March 1990. Subject to receiving final EIS approval, construction could commence in the second half of this year and the project could be brought on stream by year-end. Total capital expenditures are estimated at less than $20 million.

The Cape Ray mine, which is designed to process 300 tons of ore per day and produce about 30,000 ounces of gold per year, would create 68 permanent full-time jobs and approximately 100 indirect jobs over a five-year period with the presently known ore reserves. Furthermore, the mine would inject over $65 million primarily into the local economies of the Port aux Basques and Isle aux Morts areas.

''Our land position at Cape Ray is really extensive,'' said McCallum, ''with over 20,000 hectares and 38 kilometres of favourable structure along the strike of the Cape Ray fault. The potential to expand the ore reserve base at Cape Ray is significant.''

Dolphin has spent approximately $16 million during the past five years on exploration and development in Newfoundland where the company has been increasingly concentrating its activities.

#90024b0238 01/24/1990 ~Business Wire

CHARDON, OH - (JAN. 24) BUSINESS WIRE - Essef Corp. Wednesday reported financial results for the first quarter ended Dec. 31, 1989.

First quarter fiscal 1990 sales of $36,922,000 increased 75 percent from sales of $21,061,000 reported in 1989. A net loss of $224,000, or 5 cents per share, was incurred compared to a net loss of of $2,187,000, or 44 cents per share, last year.

The increase in first quarter sales was generated principally by the Business Machine & Computer segment, in which sales more than doubled from $8,075,000 in fiscal 1989 to $22,347,000 in fiscal 1990.

The Water Treatment and Systems Equipment segment had a 20 percent increase in sales over the $7,148,000 recorded in fiscal 1989. The Swimming Pool & Spa Equipment segment had sales of $5,838,000, which represented a 3 percent increase over fiscal 1989.

Income from operations for the first quarter of fiscal 1990 was $838,000 compared to a loss from operations in fiscal 1989 totaling $2,578,000.

The Business Machine & Computer segment recorded first quarter income from operations of $1,564,000 compared to a loss from operations in fiscal 1989 of $2,179,000. The $3.6 million turnaround in this segment resulted primarily from substantially increased sales.

The Water Treatment & Systems Equipment segment had a loss from operations of $47,000 compared to income from operations of $181,000 in the fiscal 1989. There are several causes for the loss.

During the fiscal 1990 first quarter, more expenses were incurred relating to the introduction of several new products. Additionally, the results of ConRec, a joint venture formed in March 1989, were included in this segment.

This joint venture had a slight loss from operations during the first quarter as had been expected. It is anticipated that ConRec will become profitable later this year.

The Swimming Pool & Spa Equipment segment increased its income from operations in this year's first quarter from $65,000 to $120,000. The increase resulted primarily from cost control programs instituted in the fourth quarter of 1989.

Even though sales increased slightly this year as compared to last year, current indications are that the Swimming Pool & Spa markets in the United States are soft, particularly in the northeast.

Because factors such as the weather and the economy can have a significant

impact, it is difficult, today, to assess the results of this segment for the remainder of fiscal 1990.

Corporate expense increased from $645,000 in the first quarter of fiscal 1989 to $799,000 in this year's first quarter. The addition of two persons to the corporate staff in the second and fourth quarter of fiscal 1989 as well as fees associated with the recently completed bank agreement accounted for more than the $164,000 increase.

Interest expense for the fiscal 1990 first quarter was $1,158,000 compared to $738,000 in fiscal 1989. Approximately a 30 percent increase in average debt outstanding as well as an increased effective borrowing rate resulted in the increase in interest expense.

Essef Corp. common shares are quoted on the National Association of Security Dealers' NASDAQ National Market System under the symbol ''ESSF'' and are reported elsewhere as Essef Corp.

The company designs and manufactures products for selected markets through the application of high performance polymeric materials and innovative process technologies.

#90024b0254 01/24/1990 ~Business Wire

AUSTIN, TX (JAN. 24) BUSINESS WIRE - Gulf States Utilities Co. said Wednesday the Texas Supreme Court has agreed to decide if the Public Utility Commission of Texas has the authority to consider River Bend prudence in GSU's pending rate case and has scheduled a hearing on the issue for Feb. 28.

Company officials said that, because it is such an important issue, the Supreme Court's decision to review the case is not surprising.

The high court, acting on motions filed by rate case intervenors, agreed to look at a Sept. 20 decision in which the 3rd Court of Appeals in Austin ruled that the PUCT had the authority to review the reasonableness of $1.4 billion invested by GSU in the River Bend power plant.

The 3rd Court ruling reversed an earlier decision by 250th District Court Judge Harley Clark upholding intervenors' claims that prudence had been considered in GSU's last rate case and could not be taken up again.

The prudence phase of the case involves $1.4 billion in River Bend investment set aside by the PUCT in 1988 so that it could consider

additional evidence. When GSU submitted the requested cost reconciliation data as part of a March 1989 rate filing, intervenors tried to block the nuclear prudence portion of the case by contending that the legal principle of ''res judicata'' barred additional consideration of prudence issues inthe current case. The 3rd Court rejected the intervenors' arguments.

The PUCT has held hearings on some non-prudence rate case issues, but the prudence hearings have been delayed while the courts considered the intervenors' arguments.

GSU is seeking a net first-year rate increase of $67.5 million as part of its Regional Recovery Plan. Although the company wants to document the prudence of the River Bend costs being held in abeyance, it is proposing to place that investment into ''inventory'' rather than into rate base as a way to minimize the impact on customer rates. At some future time, the PUCT could bring the inventoried portion of the plant into rate base.

#90024b0256 01/24/1990 ~Business Wire

GLENDALE, CA. (JAN. 24) BUSINESS WIRE - GLENFED Inc. (NYSE:GLN) Wednesday reported net earnings of $47,010,000, or $1.53 per share, for the second quarter of fiscal 1990, which ended Dec. 31, 1989.

This compares to net earnings of $35,160,000, or $1.19 per share, for the second quarter of fiscal 1989, which ended Dec. 31, 1988.

Included in the earnings for the second quarter of fiscal 1990 is a net gain of 94 cents per share, on a fully diluted basis, resulting from an after-tax gain of $81.1 million on the sale of $350 million of discounted loans, offset by a $30.0 million special addition to general loan loss reserves and an after-tax charge of $20.4 million to adjust the amortization of Glendale Federal Bank's excess servicing asset.

On a fully diluted basis, second-quarter earnings totalled $1.45 per share versus $1.13 per share a year earlier.

For the six months ended Dec. 31, 1989, net earnings were $66,577,000, or $2.17 per share, compared to net earnings of $66,606,000, or $2.27 per share, for the six months ended Dec. 31, 1988.

On a fully diluted basis, earnings for the first six months of fiscal 1990 totalled $2.08 per share, versus $2.14 per share a year earlier.

''Our financial performance for this quarter reflects the results of several positive restructuring actions taken to ensure that we exceed the tough new capital requirements enacted for our industry without the need to raise additional capital,'' said Norman M. Coulson, president and chief executive officer of GLENFED.

''As a result of these actions, the company's principal operating subsidiary, Glendale Federal Bank, exceeded all three of the new capital requirements that the bank must now meet.''

The most significant action was the sale of $350 million of purchase accounting loans for an after-tax gain of $81.1 million, which initially reduced the current interest rate spread by 7 basis points. In addition, Glendale Federal Bank made a special charge to earnings of $30.0 million to increase its general loan loss reserves, raising its reserve position to the highest level in its history.

This special charge is the result of management's decision to increase its overall reserves to a more conservative level, and is not the result of any specific loss situations. The adjustment of the excess servicing asset reflects the company's decision to revise its pre-payment assumptions on previously sold loans to more accurately reflect current pre-payment experience.

#90024b0257 01/24/1990 ~Business Wire

SUNNYVALE, CA. (JAN. 24) BUSINESS WIRE - Boole & Babbage (NASDAQ:BOOL) Wednesday announced unaudited results for its first fiscal quarter ended Dec. 31, 1989.

Revenue for the three months just ended was $21,197,000, up 24 percent from the $17,053,000 reported in the first quarter of the prior year.

Net income for the three-month period was up 37 percent to $1,378,000, or 36 cents per share, on 3,855,000 equivalent shares outstanding. In the first quarter of 1989, the company earned a profit of $1,003,000, or 28 cents per share, on 3,569,000 equivalent shares outstanding.

In commenting on the results, Han Bruggeling, president and chief executive officer, said: ''All of our distribution channels, domestic and international, contributed to our strong performance in the first quarter.

''The European Software Co. continued its sales success, as did Boole &

Babbage/North America, Empact Software and our distributors in Japan, Latin America and Australia.''

Boole & Babbage is a leading developer and worldwide distributor of software products that enable IBM mainframe computer users to manage, tune and refine their information systems. The company has evolved from being a leader in performance and operations management software to also being one of the leading independent software distributors in the world.

The company markets its products in the United States through Boole & Babbage/North America, Empact Software, and Mission Computer Services, and internationally through The European Software Co. (TESC) and distributors in Australia, the Pacific Rim and Latin America.

#90024b0274 01/24/1990 ~Business Wire

SAN JOSE, CA. (JAN. 24) BUSINESS WIRE - Corvus Systems Inc. announced two new products in its Omninet/4 product line, the Omninet/4 Micro Channel card and Omninet/4 Repeater.

The Omninet/4 Micro Channel card is a technically advanced 4Mbps (Megabits per second) network interface card for networking all IBM PS/2 Micro Channel models over twisted-pair wiring. The Omninet/4 Repeater boosts and repeats a network signal to extend the total network length of an Omninet/4 network to a maximum of 4,000 feet. Together, the two products complete the Omninet/4 product line.

Both the Omninet/4 Micro Channel card and the Omninet/4 Repeater are immediately available for $449 (all prices are suggested U.S. resale at participating resellers; inquiries are invited).

The Omninet/4 Micro Channel card brings the advanced capabilities and superior data throughput of Omninet/4's CSMA/CA (Carrier Sense Mulitple Access/Collision Avoidance) protocol to PS/2 models with the Micro Channel design.

The card features optical isolation, a high-speed computer interface and advanced VLSI technology. It is speed-switchable from 4Mbps to 1Mbps for use in Omninet/1 networks, and it supports the Corvus ReadyNet and PC/NOS network operating systems, as well as, the Novell NetWare network operating system.

The Omninet/4 Repeater extends the length of an Omninet/4 network by repeating the signal at 1,000-foot intervals. Up to three repeaters can be placed on the network in 1,000-foot segments to bring the total network length to 4,000 feet.

The Omninet/4 Repeater is optically isolated and is speed-switchable from 4Mbps to 1Mpbs for use with Omninet/1 networks.

Corvus Systems manufactures a complete line of local area network hardware and software products for IBM PC, PS/2, Macintosh, Apple II and compatible systems. More than half-a-million Corvus LAN nodes have been installed worldwide.

For additional information, contact Corvus Systems Inc., 160 Great Oaks Blvd., San Jose, Calif. 95119. Telephone 408/281-4100.

#90024b0604 01/24/1990 ~Business Wire
BELLEVUE, WA (JAN. 24) BUSINESS WIRE - First Mutual Savings Bank (NASDAQ:FMSB) Wednesday reported 1989 net income increased 17 percent to an all-time high of $1.5 million or $1.07 per share for the year ended Dec. 31, 1989.

In 1988 the savings bank earned $1.3 million or $.92 per share. All earnings per share figures are adjusted for a 15 percent stock dividend paid Jan. 15, 1990.

''1989 was a very good year for First Mutual Savings Bank. Lending remained strong, core deposits increased 17.2 percent, and overhead costs were cut by approximately $500,000 on an annualized basis,'' said Bruce F. Baker, president.

''We are especially proud of the job done by our new lending team. Their

efforts sustained a high volume of loan production enabling First Mutual to be ranked, once again, among the top 20 of over 170 real estate lenders in King County during the fourth quarter,'' Baker added.

''First Mutual shareholders have enjoyed an outstanding return on their investment in the four years since the Bank went public. An initial investment of $1,000 in First Mutual common stock, including all cash and stock dividends, would now be worth $2,923. This is equivalent to a 30.8 percent compounded rate of return,'' Baker noted.

At year-end, First Mutual's shareholder's equity had grown to $14.5 million from $13.0 million at Dec. 31, 1988. Book value at Dec. 31, was $10.46 per share compared to $9.68 a year ago. The Savings Bank produced a return on average equity of 10.9 percent for the full year, while increasing its net worth to assets ratio to 8 percent, well above all regulatory requirements.

Baker said First Mutual originated $96.0 million of new loans in 1989 compared to $94.8 million in 1988. Fourth quarter loan originations increased 38 percent to $32.0 million compared to $23.2 million a year ago.

''Real estate owned as a result of foreclosure has been paired to $965,000 or .8 percent of total loans from $3,112,000 or 2.6 percent of total loans one year ago. Loans delinquent over 90 days totalled only $90,000 at year end,'' Baker said.

The Bank's net interest income was $4.05 million in 1989 compared to $3.99 million the year before. Non-interest income was $3.46 million in 1989 compared to $3.68 million a year ago. Total non-interest expense was $5.20 million compared to $5.75 million in 1988.

First Mutual's fourth quarter net income was $446,000 or $.31 per share compared to $500,000 or $.36 per share in the fourth quarter of 1988. Fourth quarter net interest income was $973,000 compared to $1,000,000 in 1988. Non-interest income totaled $946,000 down from $1,039,000 and non-interest expense was $1,250,000 compared to $1,295,000 a year ago.

First Mutual's portfolio of loans increased to $124.3 million at year end compared to $122.0 million at Dec. 31, 1988. Deposits at Dec. 31, 1989, totaled $122.4 million compared to $122.8 million one year earlier.

First Mutual's total assets at Dec. 31, 1989, were $180.7 million compared to $186.2 million one year earlier. The Savings Bank's return on average assets was .82 percent. First Mutual's portfolio of loans serviced for others increased to $312.8 million compared to $291.9 million at the end of last year.

Headquartered in Bellevue, First Mutual Savings Bank operates five full

service branches in the Seattle metropolitan area known as the ''Greater Eastside.'' The FDIC-insured savings bank derives a significant portion of its income from mortgage banking operations and also originates small commercial property loans.

EAST HANOVER, NJ (JAN. 24) BUSINESS WIRE - The Ultimate Corp. (NYSE:ULT), a supplier of UNIX and Pick-based business computer systems has acquired Hands-On Learning (HOLC), a leading purveyor of training for UNIX, X-Windows and the ''C'' programming language, according to Rick Dool, Ultimate senior vice president of marketing.

The acquisition was completed last week and joint marketing activities began immediately, he said.

HOLC, a Burlington, Mass. firm founded in 1981, provides public and on-site seminars and video and publication-based self-study courses on operating systems, database applications, programming languages and state-of-the-art graphic interfaces.

More than half a million people around the world have completed Hands-On Learning training courses. The company offers services nationwide and in the United Kingdom, France, Germany, Sweden, Norway, Denmark, Japan and Australia.

Customers include DEC, IBM, AT&T, Citibank, the federal government and a wide range of small and medium-sized organizations.

Ultimate currently provides UNIX and Pick training through its Ultimate University division. The Jan. 3 HOLC acquisition will enhance and extend those capabilities in what the company considers a key element of its long-term strategy.

Hands-On Learning officers say that the combination of Ultimate's wide-ranging customer and distribution base and their firm's training expertise creates a synergy that will immediately benefit customers and help Hands-On more quickly develop new training products that will benefit customers in the future.

Ultimate's substantial capital resources will also help Hands-On Learning accelerate the expansion of its video training products, Roeder said.

Ultimate provides business solutions to companies of all sizes by integrating system-level software and applications software on hardware platforms from premier computer vendors such as Bull HN, Hewlett-Packard, IBM and Sequoia.

The firm also provides education training, consulting and field-maintenance services to customers across a wide range of vertical markets. In addition to its domestic operations, Ultimate has subsidiaries in the United Kingdom, Canada, France, Australia and New Zealand.

NEW YORK (JAN. 24) BUSINESS WIRE - Unicom Inc., a film distribution company based in New York, has signed letters of intent to acquire a controlling interest in Motion Picture Services Companies (MPSC), a full production motion picture service company.

Unicom officials expect the formal contracts for completion of the merger to be signed in early February, adding the production company to Unicom's current assets, which include a library of 150 foreign-language films.

The first 10 of Unicom's films are currently undergoing the dubbing process, as well as having new original soundtracks and musical scores written and recorded.

The three principals of MPSC -- President Don Gold, Vice President and Secretary Richard Compton and Vice President Lou Fusaro -- have a total of over 70 years of management experience in the entertainment industry. They have done production work for all three major television networks, major motion picture studios including MGM, and also have extensive experience, writing, directing and producing dozens of feature films.

Gold, Compton and Fusaro will join the Unicom board of directors upon completion of the merger, bringing their years of expertise to the Unicom management team.

MPSC has offices in New York, Los Angeles, Miami, Orlando, Fla., and Toronto. This network of offices throughout North America allows MPSC to guarantee arrival of its equipment at a filming location within two days, anywhere in the continental United States. Cargo containers approved by the Federal Aviation Administration also allow MPSC to deliver its equipment anywhere in the world.

The net asset value of Unicom is $38 million prior to the merger with MPSC. Unicom intends to distribute its library of films for the home video, syndication and cable television markets.

HUNTINGTON BEACH, CA (JAN. 24) BUSINESS WIRE - Mercury Savings and Loan Association, an Orange County, California-based financial institution (NYSE/PSE:MSL), Wednesday initiated foreclosure action against the two Marriott hotels in which it is the primary lender.

At the same time, Mercury wrote down the carrying value of these hotels and made other adjustments using preliminary estimates made by management in order to meet deadlines for filing regulatory reports.

The Association intends to obtain additional data necessary to make final determinations for financial reporting purposes in connection with its year-end audit and final statement of results.

Mercury anticipates that additional information at a later date could cause a revision in the valuation allowances for the Marriott hotels, as well as the possibility of recovery in the lawsuits against the Marriott Corp. restoring the writedowns.

The writedowns, representing nearly $32 million, produced an unaudited net equity for Mercury Savings and Loan Association of a negative amount slightly under $100,000.

In connection with the Marriott hotels, an action has been filed in California initiating the foreclosure against the Irvine Marriott and an action was filed in Oklahoma initiating foreclosure against the Tulsa Marriott.

Both hotels have been sold by Marriott or a Marriott subsidiary to investor groups.

The limited partnership which acquired the Irvine Marriott is Cigna Hotel Associates-I Limited Partnership and the limited partnership which acquired the Tulsa Marriott is Chesapeake Hotel Limited Partnership.

Both hotels are being managed by Marriott, are considered ''flagship'' hotels and became delinquent and then in default on their mortgages when the Marriott Corp. stopped paying guaranteed portions of the loan payment which were not covered by operations.

Mercury also reported that adjustments in the carrying value of these hotels have been made to comply with the filing deadline of certain regulatory reports. Mercury has accepted lower evaluation for carrying purposes on both hotels, but anticipates that additional information at a later date may cause revision in these allowances and recovery in the lawsuits against the Marriott Corp. will also restore the writedowns.

#90024b0614 01/24/1990 ~Business Wire

PHOENIX (JAN. 24) BUSINESS WIRE - John W. Teets, chairman, president and chief executive officer, The Greyhound Corp. (NYSE:G), Wednesday announced revenues, income and earnings per share for the fourth quarter and twelve months ended Dec. 31, 1989.

For the fourth quarter of 1989, revenues were $863,402,000, compared to $838,407,000 in the same period last year.

Net income and income from continuing operations was $28,042,000, up 18 percent, compared to $23,818,000 in the 1988 quarter.

Net income per share for the fourth quarter of 1989 was 70 cents, up 15 percent from the comparable 61 cents per share in 1988.

Revenues for the 1989 year were $3,536,851,000, up from $3,304,860,000 in 1988.

Income from continuing operations for the year was $108,711,000, up 17 percent, compared to $93,308,000 in 1988.

Income from continuing operations for the 1989 year was $2.75 per share vs. $2.42 in 1988.

Net income in the twelve months was also $108,711,000. Results for the 1988 year were increased by $10,750,000 due to a one-time gain from the early adoption, effective Jan. 1, 1988, of Statement of Financial Accounting Standards (SFAS) No. 96, Accounting for Income Taxes, making net income for the 1988 twelve month period $104,058,000.

Net income was also $2.75 per share for the year, while the one-time change in accounting for income taxes added 28 cents per share in 1988, making net income $2.70 per share.

In a year when many companies were announcing depressed earnings: ''Greyhound was extremely pleased with the performance of each of its operating segments -- Consumer Products (The Dial Corp.), Services, Transportation Manufacturing and Financial -- which performed above plan and ahead of 1988,'' Teets said. ''We expect the realistic programs and profit plans we have put in place to continue producing positive results into the '90s,'' he added.

#90024b0616 01/24/1990 ~Business Wire
SAN JOSE, CA (JAN. 24) BUSINESS WIRE - Businessland Inc. (NYSE:BLI) announced sales of $375,028,000 for the second fiscal quarter ended Dec. 31, 1989.

Revenues were up 24.5 percent compared with $301,339,000 for the comparable period last year. For the preceding quarter ended Sept. 30, 1989, revenues were $315,857,000.

Operating income for the quarter ended Dec. 31, 1989 was $5,910,000 prior to the January announcement of costs associated with a company restructuring to improve profitability. The restructuring costs of $7,500,000 consist of severance pay associated with a reduction in workforce and a loss provision for the closure of excess facilities.

During the quarter ended Dec. 31, 1989, the company realized a gain of $1,047,000 net of income tax, as an extraordinary item resulting from the early extinguishment of $6,700,000 of its 5.5 percent convertible subordinated debentures. After inclusion of these non-recurring items, the company had a net loss of $1,209,000, or 3 cents primary loss per share.

For the comparable period last year, the company reported net income of $9,468,000 or 32 cents primary earnings per share.

Founded in 1982, Businessland Inc. is an international leader in the distribution, integration and support of microcomputer and workstation systems for business. The company integrates products from selected manufacturers to create systems tailored to specific customer needs and provides the high-level service and support to maximize their productivity.

Businessland operates centers and branch offices in 50 major U.S. metropolitan markets, five metropolitan areas in Great Britain, two in West Germany and two in Canada.

#90024b0619 01/24/1990 ~Business Wire
SAN FRANCISCO (JAN. 24) BUSINESS WIRE - With its distribution businesses setting the pace, McKesson Corp. reached new all-time highs in revenues and income from continuing operations in the third fiscal quarter and nine months ended December 31, Alan Seelenfreund, chairman and chief executive officer, and Rex R. Malson, president and chief operating officer,

reported Wednesday.

Revenues rose 13% in the quarter to just over $2 billion from $1.8 billion in the year-earlier period. Income from continuing operations increased 25% to $30.0 million from $24.0 million, while fully-diluted earnings per share rose 19% to 64 cents from 54 cents.

Nine-month revenues were up 10% to $5.7 billion from $5.2 billion, while income from continuing operations rose 17% to $80.4 million. Per share earnings from continuing operations increased 12% to $1.73 from $1.55.

Net income for the quarter was $30.0 million, or 64 cents a share, compared with $30.8 million, or 69 cents a share, a year ago. The prior year's results included after-tax income of $6.8 million, or 15 cents a share, from discontinued operations, principally a gain on the sale of the company's wholesale wine and spirits business.

Net income for the nine-month period gained 7% to $80.4 million from $75.2 million, and earnings per share registered a gain of 2% to $1.73 from $1.69. Prior year after-tax income included $6.6 million, or 14 cents a share, from discontinued operations.

The company's drug distribution business, which accounted for 57% of third quarter operating profit and 83% of revenues, reported a 20% gain in operating profit to $39.7 million, while nine-month operating profit increased 13% to $110.6 on an 11% revenue gain to $4.7 billion. The unit's operating margin improved to 2.37% from 2.25% in the quarter and to 2.35% from 2.31% for the year to date.

#90024b0622 01/24/1990 ~Business Wire

MURRAY HILL, NJ (JAN. 24) BUSINESS WIRE - C.R. Bard Inc. (NYSE: BCR) reported Wednesday that for the year 1989 sales were $777.8 million, up three percent from $757.5 million the prior year. For the quarter, sales totaled $189.5 million vs. $191.9 million in the fourth quarter of 1988.

Net income was down 17 percent and earnings per share decreased 14 percent for the year 1989. For the quarter ended Dec. 31, net income and earnings per share declined 40 percent and 38 percent, respectively.

For the year 1989, net income was $65.4 million, or $1.18 per share, vs. $78.7 million, or $1.38 per share in 1988. Net income for the quarter was $12.4 million, or 23 cents per share, compared with $20.7 million, or 37 cents per share, for the comparable 1988 period.

Both the full year and the fourth quarter figures reflect the impact of Bard's August withdrawal of its New Probe angioplasty catheter at the request of the FDA.

Additionally, Bard took one-time charges of about seven cents per share in the fourth quarter in connection with previously announced severance payments and the write down of a minority interest in a small start-up company.

George T. Maloney, Bard's president and chief executive officer said, "Although 1989 was a difficult year for our domestic angioplasty business, the balance of our cardiovascular group showed good increases. Our surgical and urological groups were also up in 1989."

Commenting on Bard's future, Maloney indicated Bard is continuing its cost control efforts and has a number of new products under development. "Our outlook is for a good performance in 1990," he said.

C.R. Bard Inc., headquartered in Murray Hill, is a leading multinational developer, manufacturer and marketer of health care products. A recorded announcement giving financial performance details for the quarter and year is available by calling, 201/277-8300.

DALLAS (JAN. 24) BUSINESS WIRE - Hogan Systems Inc. (NASDAQ:HOGN) Wednesday reported net income of $1,185,000, or 9 cents per share, on revenues of $11,811,000 for its third fiscal quarter, ended Dec. 31, 1989.

For the quarter ended Dec. 31, 1988, the company reported net income of $2,085,000, or 16 cents per share, on revenues of $11,096,000.

During the quarter, Hogan recognized software license revenue from all three product groups, Integrated Banking Applications (IBA), International Money Management System and BankVision. The most significant was IBA where the company reported revenues in excess of $1 million from three license agreements for Hogan's integrated credit/debit card system, the Consumer and Merchant Servicing System (CAMS).

Five financial institutions now hold licenses for modules of CAMS and are currently implementing the software.

In addition, Hogan announced the signing of a new multisite license agreement for its IBA Platform Automation Support System. IBA Platform

provides an interface between a financial institution's platform applications systems and its host-based applications.

For the nine months ended Dec. 31, 1989, the company reported net income of $3,224,000, or 24 cents per share, on revenues of $34,009,000. For the nine months ended Dec. 31, 1988, Hogan reported a net loss of $1,452,000, or 11 cents per share, on revenues of $35,240,000.

Hogan Systems Inc., of Dallas, designs, markets and supports integrated online application software products for use by financial institutions worldwide, including international, money center, regional and community banks, savings and loans, credit unions and other financial organizations.

The company maintains major sales and support offices in Woking, England; Melbourne, Australia; New York City and Dallas.

LOS ANGELES (JAN. 24) BUSINESS WIRE - Jeff H. Reynolds, chairman of California Pacific International and Weatherby Investments Inc. (OTC), disclosed in a statement Wednesday that negotiations have been entered into with Locke Rich Minerals Ltd. of Vancouver, British Columbia (VSE:LKM), by which Locke Rich Minerals will acquire certain oil and gas properties from and thru California Pacific International.

As proposed, California Pacific will exchange certain oil and gas properties for and in exchange of equity securities of Locke Rich Minerals.

Reynolds stated that this transaction was part of the reorganization plan that has been on-going for the past 18 months. In clarification, Reynolds stated that California Pacific has been undertaking a plan of diversification and acquisition, and in conjunction, has been exploring opportunities by which various current business interests could be combined with acquisition candidates to further enhance California Pacific's overall operations.

Reynolds stated that a definitive agreement was expected within two weeks.

ALISO VIEJO, CA (JAN. 24) BUSINESS WIRE - Armor All Products Corp., the world's leading supplier of automotive appearance chemical products, reported a 12% increase in revenues for its third fiscal quarter ended December 31, l989. Net income and earnings per share declined 7% from the year-ago quarter, Jeffrey M. Sherman, president and chief executive officer announced Wednesday.

Revenues for the quarter were $43,419,000, up from $38,770,000 in the year-earlier period. Net income for the quarter declined to $5,845,000 from $6,304,000 and earnings per share decreased to 28 cents from 30 cents.

For the nine-month period, revenues were $104,072,000, a 3% increase from the $100,770,000 in the comparable period last year. Net income for the nine months was down 12% to $15,095,000 from $17,117,000 and per share earnings declined l2% to 72 cents from 82 cents.

Commenting on the results, Sherman noted that quarterly profits were adversely affected by higher sales of lower margin items in the company's wax, wash and specialty chemicals division. Additionally, selling and marketing expenses were higher to support the company's full range of products.

Sherman said that he continues to see cautious purchasing practices and tight inventory management by retailers in the face of an uncertain economic environment and continued consolidation among the customer base. These factors will contribute to slower revenue growth than the company has experienced in recent years. ''While an earnings improvement is expected in the fourth quarter, results for the full year are expected to be flat to down modestly,'' Sherman said.

#90024b0634 01/24/1990 ~Business Wire

SCOTTSDALE, AZ (JAN. 24) BUSINESS WIRE - PCS Inc. announced Wednesday that revenues for the third fiscal quarter ended December 31, l989, increased 15%, but net income dropped 16%.

Revenues increased to $27,127,000 from $23,631,000 for the quarter and net income declined to $2,707,000 from $3,210,000 in the same quarter a year ago, according to John C. Pfeiffer, vice chairman of the board and chief executive officer. Earnings per share fell 18% to 18 cents from 22 cents.

For the nine-month period, revenues rose 11% to $74,521,000 from $67,408,000 and net income declined 50% to $4,676,000 from $9,409,000.

Earnings per share for the nine-month period decreased 51% to 32 cents from 65 cents.

Carole Kennedy, president and chief operating officer, reported that the number of claims processed in the third quarter totaled more than 24 million, a 6% increase over the same quarter last year, while the number of PCS cardholders was essentially unchanged from a year ago at 8.3 million.

Pfeiffer noted that the 16% net income decline in the third quarter was due primarily to close-down charges related to the terminated bid to process claims for Medicare, and a decline in the profitability of the PDS division.

Earlier this month, the company announced that it has entered into an agreement to sell PDS to Walsh International, Inc. of Stamford, Conn. The agreement is subject to the approval of the PCS board of directors and regulatory authorities. PDS is a provider of highly specialized marketing data on the prescribing volume and patterns of use of prescription drugs. In the nine months ended December 31, 1989, the PDS segment reported revenues of $18,578,000 and an operating loss of $489,000.

On December 22, l989, the company announced that it had received a proposal from McKesson Corp. for McKesson to acquire all of the outstanding shares of PCS's common stock not currently owned by McKesson at a price of $15 in cash. McKesson now owns approximately 86% of PCS's l4.5 million outstanding shares. That proposal is presently under review by a special committee of the PCS board.

#90024b0637 01/24/1990 ~Business Wire

SAN JOSE, CA (JAN. 24) BUSINESS WIRE - Conner Peripherals Inc. (NASDAQ:CNNR) Wednesday reported record sales and net income for the year and fourth quarter ended Dec. 31, 1989.

For the year, sales were $704.9 million, up 175 percent from $256.6 million in 1988. Net income for the year totaled $41.5 million, up 110 percent from $19.8 million in 1988. Earnings per share for 1989 were $1, up from 58 cents in 1988.

For the fourth quarter, sales were $225.7 million, up 135 percent from the $96.2 million reported for the like period last year, and 22 percent from the third quarter ended Sept. 30, 1989.

Net income was $14.6 million, up 181 percent from the $5.2 million in the fourth quarter of 1988 and 24 percent from the $11.8 million in the third quarter of 1989. The fourth quarter represented the company's 12th consecutive quarter of profitability.

Earnings per share on a fully diluted basis for the fourth quarter were 32 cents, compared with 15 cents for the like period last year, and 28 cents in the third quarter of 1989.

Common shares and equivalents outstanding in the quarter were 50 million shares, an increase of 14.2 million shares from the fourth quarter of 1988.

Sales to Compaq were 20 percent of total sales during the quarter, compared with 45 percent in the like quarter last year. For the year, sales to Compaq were 29 percent of total sales, compared with 48 percent in 1988.

Founded in 1986, Conner Peripherals manufactures and markets high-performance 2.5- and 3.5-inch Winchester disk drives for the new generation of notebook, laptop, portable and desktop computers and workstations.

These systems are based on 16-bit, 32-bit and RISC-based microprocessors and require greater storage capacity, faster access time, lower power consumption and smaller size than previous disk drive products.

#90024b0638 01/24/1990 ~Business Wire

SAN JOSE, CA (JAN. 24) BUSINESS WIRE - Compression Labs Inc. (NASDAQ/NMS:CLIX) Wednesday reported record revenues for the fourth quarter ended Dec. 31, 1989, of $9 million, an increase of 52 percent from the like quarter of last year.

Net income for the fourth quarter was $469,000, or 5 cents per share, an increase of 65 percent from $284,000, or 4 cents per share, in the like period of 1988.

For the year ended Dec. 31, 1989, revenues increased 36 percent to $29.2 million compared to $21.4 million for the like period a year ago. Net income for the year was $901,000, or 10 cents per share, an increase of 196 percent from $304,000, or 4 cents per share, in 1988.

During the year, backlog increased from $2.2 million to $23.1 million as a

result of several major orders and a contract to develop HDTV and videophone products.

John E. Tyson, president, chief executive officer and chairman of the board of CLI, attributed the increase in 1989 revenues to two factors: increased acceptance of videoconferencing and CLI's ability to provide a total videoconferencing solution.

Tyson cited the large orders plcaed by General Electric, IBM, Hewlett Packard, Telecom Australia and British Aerospace as evidence of this trend. US Sprint and AT&T also selected CLI to supply videoconferencing systems for the FTS 2000 Federal Telecommunications contract.

On Jan. 15, 1990, CLI further expanded its product line with the introduction of the Rembrandt II/06, the first of a new generation of videoconferencing codecs, and the Gallery Series, a new line of low-cost modular room systems.

CLI is the world leader in full motion, color videoconferencing systems for use by business, government and education. CLI is a full service provider of videoconferencing solutions, including video codecs, room systems and multipoint units. Considered an effective communications tool for innovative organizations around the world, videoconferencing is now emerging as a strategic resource for maintaining an organization's competitive edge in the 1990s.

#90024b0641 01/24/1990 ~Business Wire

MOUNTAIN VIEW, CA (JAN. 24) BUSINESS WIRE - IntelliCorp Inc. (NASDAQ: INAI), a leader in knowledge systems development and delivery software, Wednesday reported a net profit of $433,000, or six cents per share, for the second quarter ending Dec. 31, 1989.

This compares to a net profit of $13,000, or zero cents per share, for the second quarter a year ago, and to $393,000, or five cents per share, for the most recent quarter.

Second quarter revenues were $6,099,000, a 20 percent increase over $5,082,000 for the second quarter a year ago.

The company also announced the appointments of Ken Haas to the position of

vice president, finance and chief financial officer.

Haas has been vice president, general counsel of IntelliCorp for more than six years and, during that period, was actively involved in many of the company's significant financial transactions, including its 1983 initial public offering, 1985 second public offering and 1986 joint venture with Amoco Corp. Haas succeeds Paul Krug, who continues as a consultant to the company while pursuing other career interests.

"We are quite pleased with the solid growth over the second quarter a year ago," said Thomas P. Kehler, chairman and chief executive officer. "Moreover, the consolidation of corporate administration under Ken Haas will improve efficiency and provide the finance organization with continued strong leadership as the company grows."

IntelliCorp is a leader in developing, marketing, and supporting knowledge-based software development tools and services. The company has licensed more than 4,000 copies of its software products worldwide for applications in the automotive, telecommunications, aerospace, manufacturing and energy industries.

In addition to its Mountain View headquarters, the company has domestic regional offices in Boston, Chicago, Detroit, New York City, Philadelphia, Washington, and international offices in Munich, West Germany; Hampshire, United Kingdom; and Tokyo.

ELKIN, NC (JAN. 24) BUSINESS WIRE - Mutual Federal Savings and Loan Association (NASDAQ/NMS: MUTU) Wednesday announced results for its first quarter ended Dec. 31, 1989.

Net income for the first quarter of fiscal 1990 was $366,000, or 29 cents per share, compared with $331,000, or 26 cents per share, in the like quarter a year ago.

Commenting on the results, Joe E. Harris Sr., chairman of the board, said: "I am pleased to report the results of our first quarter. Net income increased 10.6 percent from the first quarter a year ago. The Association's return on assets increased to 1.13 percent. This level exceeds the benchmark that banks and thrifts use of one percent. During the quarter, deposit growth returned to more normal levels."

"At Dec. 31, 1989, deposits were $104.8 million and total assets were $128 million. Mutual Federal continues to maintain one of the strongest capital

positions within our industry," Harris continued. "Stockholders' equity at Dec. 31, 1989, was $18.7 million, or 14.57 percent of total assets."

Mutual Federal and Southern National Corp. recently announced the signing of a definitive agreement to merge the two organizations. The definitive agreement is subject to approval by Mutual Federal's shareholders and regulatory authorities.

Mutual Federal Savings and Loan Association with offices in Elkin, Yadkinville and Dobson, N.C., primarily serves customers in Surry, Yadkin and Wilkes counties.

#90024b0646 01/24/1990 ~Business Wire

TOLEDO, OH (JAN. 24) BUSINESS WIRE - Owens-Corning Fiberglas Corp. (NYSE: OCF) Wednesday reported its financial results for the fourth quarter and year ended December 31, 1989.

Owens-Corning recorded net income of $46 million, or $1.09 per share, in the fourth quarter of 1989, compared to $58 million, or $1.37 per share, in the 1988 quarter.

Net income in the fourth quarter reflects three special items. The first is an after-tax charge of $18 million, or $.44 per share, for the rationalization of operations in North America, including a special early retirement program.

The second is an after-tax charge of $31 million, or $.73 per share, for

an addition to its reserve for asbestos liability to reflect insurance deductibles.

In anticipation of future case filings, the company also said it would charge pre-tax earnings at the rate of $6 million per quarter, beginning in the 1990 first quarter to provide for additional deductibles for those claims. The charges for deductible payments are non-cash and any cash outlay would substantially lag this accounting treatment.

The third is a net gain of $38 million, or $.90 per share, resulting from a settlement with the Internal Revenue Service concerning the treatment of certain assets for tax purposes covering several years.

Consolidated net sales for the 1989 quarter were $871 million, compared to $704 million in the 1988 period.

For the year, Owens-Corning reported net income of $172 million, or $4.08 per share, in 1989, compared to $189 million, or $4.51 per share, in 1988.

In addition to the fourth quarter special charges and credits, the 1989 results include a third quarter charge of $4 million, or $.10 per share, for a reduction of equity income attributable to Fiberglas Canada, Inc. before its acquisition.

The 1988 results include a charge of $.20 per share for the early retirement of debt. Consolidated net sales were $3 billion in 1989, compared to $2.8 billion in 1988.

"The company's performance was affected by the continued economic slowdown in the U.S. Our overseas performance remained strong, particularly in Europe and Brazil," said William W. Boeschenstein, chairman and chief executive officer. "We are responding to U.S. business conditions by eliminating excess capacity in our North American operations."

#90024b0647 01/24/1990 ~Business Wire

CHARLOTTE, NC (JAN. 24) BUSINESS WIRE - CEM Corp. (NASDAQ/NMS: CEMX) Wednesday reported new highs in revenues and earnings for both the second quarter and first half of its 1990 fiscal year.

For the three months ended Dec. 31, 1989, net sales totaled $4,869,000, up 26 percent from $3,851,000 in the year-earlier period. Net income for the second quarter increased 22 percent to $729,000 versus $597,000, and earnings per share rose to 15 cents, up 15 percent from 13 cents in the

second quarter of fiscal 1989.

The second quarter results brought net sales through the first half to $8,729,000, a 17 percent gain over $7,465,000 a year ago. Net income for the six months rose seven percent to $1,269,000 compared with $1,182,000. Earnings for the half amounted to 27 cents per share, up four percent from 26 cents per share in the year-earlier period.

Share and per share results for the year-earlier periods have been adjusted to reflect a 2-for-1 stock split effected as a stock dividend in March 1989.

Commenting on the results, Michael J. Collins, president and chief executive officer, said: "We are particularly pleased with the acceleration achieved in net sales during the quarter. The higher revenue reflects sound customer demand throughout our line of microwave-based instrumentation.

"As expected, shipments of our Moisture/Solids Analyzer rose sharply compared with both the year-earlier level and the pattern of sales earlier this year. The use of this device in new applications has extended our marketing efforts into several other attractive industrial markets.

"Increasing interest in our new Microwave Ashing System has also highlighted CEM's performance thus far in fiscal 1990. Response to the testing speed, simplicity and convenience which this product offers has continued to exceed our expectations since its introduction a year ago.

"Fiscal 1990 as a whole should mark another year of significant progress for CEM. Our stepped-up product development program is yielding a very positive return, and we are gratified by the enhanced exposure CEM is achieving in our target markets."

CEM produces microwave-based instrumentation for testing and analysis. The company's products are used in many manufacturing and processing industries, including chemical and food processing, and the general analytical laboratory market.

BALTIMORE (JAN. 24) BUSINESS WIRE - Allied Research Corp. (NASDAQ:ARAI) announced that Reinald W. Carter, 57, was elected president and chief operating officer at its January board meeting.

He also was elected a member of the board of directors of Allied Research

and Mecar, S.A., Allied's Belgium subsidiary. Carter was previously executive vice president and continues as chief financial officer of Allied Research. M.B. Ruffin continues as chairman and chief executive officer.

Allied Research Corp. is a diversifed developer and producer of high technology weapons systems for conventional, light and mobile defense requirements of U.S. and foreign nations.

Carter has been associated with Allied since first joining the company in 1972 as corporate controller. He left Allied in 1976 to form his own consulting firm, and served Allied Research through 1984 as the company's principal financial consultant. He rejoined the company in 1985 as executive vice president and chief financial officer.

Ruffin noted that Carter's more than 33 years in financial and operational management well-equipped him to provide Allied Research with the leadership and knowledge needed to control and consolidate recent growth and diversification efforts.

Carter has held executive posts both with Memcor and LTV Electrosystems, and has been a financial advisor to various firms.

Carter is a graduate of Upper Iowa University and a Certified Public Accountant. He and his wife, Maribelle, have three grown children.

Allied Research recently completed a 140,000 square foot engineering and production complex near Brussels, Belgium, and opened new corporate headquarters on Baltimore's Inner Harbor. The U.S. subsidiary, Barnes & Reinecke, recently integrated its operations into 90,000 square foot facilities in Elk Grove Village, Ill.

SUNNYVALE, CA (JAN. 24) BUSINESS WIRE - MIPS Computer Systems Inc. (NASDAQ:MIPS) Wednesday said Northern Telecom has announced general availability of a telephone switch, designed around the MIPS R2000, that represents the telecommunications industry's first RISC-based product.

The DMS-10 400E Processor belongs to the DMS-10 family of digital central office switches designed primarily for telephone operating companies serving small towns and rural areas.

The 400E processor enables telephone companies using the DMS-10 to offer their rural customers a broader range of advanced services.

Silvestri also noted that the 400E processor represents another major design win for MIPS in an embedded control application, where a controller is performing a specialized function within the overall system environment. Companies such as McDonnell Douglas and Lockheed are among those who are using MIPS microprocessor for embedded applications in aerospace and avionics.

The DMS-10 400E Processor has been extensively tested in a number of central office telephone switching systems in the U.S. Northern Telecom reports it has already received more than 100 orders for the new processors.

Northern Telecom's introduction of the first RISC-based switch follows by two weeks the introduction by Tandem Computers of the Integrity S2, the first UNIX- and RISC-based fault-tolerant computer system designed around the MIPS architecture.

Northern Telecom is the leading global supplier of fully digital telecommunications switching systems. The company, headquartered in Nashville, Tenn., provides products and services to the telecommunications industry, businesses, universities, governments, and other institutions worldwide.

MIPS Computer Systems Inc. is a leading supplier of RISC-based products, including technology designs, computer systems, optimizing compilers, and operating systems. The company markets a full range of binary-compatible, high-performance computer systems, ranging from 12 to 55 mips in performance. MIPS sells its systems through OEMs, VARs and system

integrators worldwide.

BEDMINSTER, NJ (JAN. 24) BUSINESS WIRE - Computer Memories Inc. (NASDAQ: CMIN) announced the purchase of 1.2 million shares of its common stock from The Leslie Group Inc., Frederic Heim, Marshall D. Butler and certain of Mr. Butler's children for an aggregate purchase price of $2,220,000.

The funds for the purchase were obtained from the company's working capital. After the purchase, the company had outstanding 10,783,118 shares of its common stock.

In connection with the stock purchase, Mr. Butler and Seymour Leslie, a principal of The Leslie Group Inc., resigned as directors of the company and Mr. Heim resigned as a vice president of the company.

The selling stockholders also agreed that until Jan. 23, 1995 neither they nor any of their affiliates would acquire any substantial interest in the company or any of its affiliates or attempt to acquire or control the company or any of its affiliates. In addition, the selling stockholders who continued to own shares of common stock agreed to vote their shares in favor of management proposals.

TOTOWA, NJ (JAN. 24) BUSINESS WIRE - John L. Soldoveri, chairman of Great Falls Bancorp of Totowa, reported an increase in assets of $8,224,000 or 18.29 percent when compared with Dec. 31, 1988.

Net income for the year was up sharply. He indicated that the company had reached $53,184,000 in assets as of year end 1989 up from $44,960,000 on Dec. 31, 1988.

Soldoveri also reported that net income for 1989 was $678,000 or $1.27 per share. For the year 1988 net income was $434,000 or 82 cents per share,

an increase of 55 percent. For the fourth quarter the comapny had net earnings of $175,000 or 33 cents per share. In the final quarter of 1988 the company reported net income of $176,000 also 33 cents per share. Per share amounts are based on average shares outstanding and are adjusted for a 10 percent stock dividend issued on Aug. 1, 1989.

George E. Irwin, president of Great Falls Bank, the company's sole subsidiary, noted that the bank's favorable performance was attributable to the maintenance of a good net interest spread and keeping overhead under control. He indicated that the bank had a return on average assets of 1.40 percent and a return on average equity of 14.55 percent. Irwin noted that the bank provided $75,000 for loan loss reserves in the last three months of 1989 compared to $15,500 for the same period in the previous year.

He stated, ''Our objective is to achieve a 1.50 percent loan loss reserve ratio by the end of the first quarter of 1990.''

As of Dec. 31, 1989 the loan loss reserve stood at 1.43 percent of total loans.

#90024b0661 01/24/1990 ~Business Wire
SANTA MONICA, CA (JAN. 24) BUSINESS WIRE - Gamma Electronic Systems Inc. (Alberta Stock Exchange:GE.A)(OTC) announced Wednesday that it has reacquired two patents previously developed by John Bedini, a director and major stockholder in Gamma.

Patent No. 4555795 commonly referred to as ''optiphonics'' is a monaural to binaural audio converter utilizing optical sound processing. The use of this patent in conjunction with the company's existing B.A.S.E. technolgoy should clearly ensure their position as the next standard audio format.

Patent No. 4644422 commonly known as ''copy not'' is an anti-copy system which can be encoded onto virtually any CD, record or tape. The company feels that this anti-piracy process could generate substantial royalties from the recording industry once perfected.

The marrying of these two technologies along with the company's existing B.A.S.E. technology could produce a virtually noise-free, multidimensional recording which could not be copied.

Gamma also announced Wednesday that it has entered into negotiations with

Sakata Inx, a recognized leader in the pro-audio field, for distribution of its revolutionary sound processor, B.A.S.E., in the Asian market.

The negotiations, still in the evaluations stages, could translate into revenues exceeding $1 million for Gamma in the first year of the agreement.

''The Asian market is vast,'' said Michael Fishman, president of Gamma's wholly owned subsidiary, B.A.S.E. Ltd. ''The million-plus dollars being discussed is the minimum amount that would be guaranteed by Sakata. The actual sales volume should exceed that figure significantly.''

Other exciting news for Gamma includes last week's agreement with the William Morris Agency, the world's largest and longest-established entertainment agency, to represent the company and its revolutionary, multidimensional sound technology, B.A.S.E.

Gamma is a publicly traded specialist in technology based in Santa Monica, with wholly owned subsidiaries for manufacturing and research and development in Sylmar, of which Bedini is president, and a marketing subsisidary in Glendale. The B.A.S.E. system is available for studio recording, television and radio broadcasting, live performances and will soon be available to be licensed in integrated chip form for incorporation into virtually any amplifier, VCR, CD player, home or car stereo, television and any consumer or pro-audio piece of equipment.

Sakata Inx, founded in 1896 has its headquarters in Japan, a global network of over 50 offices worldwide and a variety of joint venture partners including Kawasaki Motors Corp. (Philippines). Sakata is also the distributor of AKG products.

NEW YORK (JAN. 24) BUSINESS WIRE - Enzo Biochem Inc. (AMEX:ENZ) Wednesday announced that its wholly-owned diagnostic product subsidiary, Enzo Diagnostics Inc. has signed a marketing and sales agreement with ESBE Laboratory Supplies (ESBE) for the sale and distribution of Enzo Diagnostics' products in Canada.

This distribution arrangement becomes effective Feb. 1, 1990.

Malcolm W. Walpole, vice president, international for Enzo Diagnsotics, stated ''ESBE is well positioned throughout Canada. The company uses service to effectively differentiate itself from the larger national supply houses. This agreement with ESBE provides Enzo access to our target

markets in Canada and allows Canadian customers to purchase Enzo products more easily. These customers will no longer need to clear their goods through customs and they can pay their invoices in Canadian funds.''

ESBE is a privately-held company headquartered in the Toronto area which sells laboratory supplies to hospital, research and private reference laboratory markets throughout Canada.

The company has sales offices in Vancouver, British Columbia; Calgary, Alberta; Edmonton, Alberta; Markham, Ontario and Montreal, Quebec and has warehouses in Calgary and Markham.

The product line of Enzo Diagnostics includes non-radioactive DNA probe-based diagnostic kits detecting various pathogens, monoclonal antibodies for cancer differentiation, and biotin-labeled DNA probes or probe componenets.

Enzo Biochem Inc., is an established New York City-based biotechnology company engaged both in the reserach, development and manufacture of innovative health care products based on molecular biology and genetic engineering techniques and in providing diagnostic services to the medical community.

ARMONK, NY (JAN. 24) BUSINESS WIRE - Siemens AG and IBM Corp. have signed an agreement to jointly develop 64-million-bit memory chips.

The agreement also provides for discussion of further cooperation on subsequent semiconductor memory generations.

Joint development of the 64-million-bit dynamic random access memory (DRAM) chips will begin immediately at IBM and Siemens. The common activities will be concentrated at IBM's new Advanced Semiconductor Technology Center in East Fishkill, New York and use the resources of both the Essex Junction, Vermont facility of IBM and the Munich facility of Siemens. Production of the chips will take place in manufacturing facilities of the respective companies.

Each company will share equally in the development costs of the multi-year project and be responsible for its own personnel.

The goal of the project is to have a world standard 64-million-bit DRAM ready for commercial introduction in the mid-1990s. Work will concentrate on the chip design and process technology, using the most sophisticated tools and materials available.

The strengths of the two firms complement one another and increase the probability that world leadership in memory chip technology will be maintained. Both firms have substantial experience in the field of submicron semiconductor development. They began volume production of the 4-million-bit DRAM in 1989 and have independent 16-million-bit DRAM development efforts under way.

''The cooperation with IBM promises optimized efficiency and underlines our long-term effort to supply state-of-the-art semiconductor ICs to European industry. Siemens considers the cooperation a substantial support to the JESSI objectives,'' said Karlheinz Kaske, president and chief executive officer of Siemens.

''We carefully examined our options and feel we have assembled a world-class technology team," said Jack D. Kuehler, president of IBM. ''The joint development approach will give each firm maximum leverage on its assets and create a formidable synergy, one that offers tremendous promise for years to come.''

The world market for semiconductors was approximately US $50 billion in 1989, with an average annual growth rate of 15 percent. The memory chip market comprises more than 25 percent of the world total for semiconductors in general. Today between 75 and 80 percent of the world merchant supply of advanced memory components comes from Asian producers.

CLEVELAND (JAN. 24) BUSINESS WIRE - Eaton Corp.'s board of directors Tuesday declared a regular quarterly dividend of 50 cents per common share on the company's outstanding stock, payable on Feb. 23, to shareholders of record on Feb. 5.

Eaton has paid dividends on common shares annually since 1923.

With 44,000 employees in 22 countries, Eaton Corp. is a manufacturer of highly engineered products serving automotive, industrial, commercial and defense markets. Principal products include truck transmissions and axles, engine components, electrical equipment and controls.

For the nine months ending Sept. 30, 1989, Eaton had sales of $2.8 billion and income of $171 million, or $4.54 per share. The company's sales in 1988 were $3.5 billion, with income from continuing operations of $228 million, or $6.11 per share of common stock.

NASHUA, NH (JAN. 24) BUSINESS WIRE - Lockheed Sanders has received a subcontract from Ford Aerospace to provide Trackstar Radars and associated equipment and services as part of Ford's total Chaparral Air Defense Missile System program for the Government of Egypt.

The Trackstar is a self-contained mobile surveillance, pulsed doppler, L-band acquisition radar installed in a modified tracked vehicle. The radar is equipped with an integral Indentification Friend or Foe (IFF), as well as a Land Navigation System (LNS), and radio equipment for both voice and data transmission and reception.

Sanders will receive $38 million for its mobile surveillance radar system. The Sanders contract includes the Trackstar Radars, integrated weapon displays, radar maintenance test sets, radar and integrated weapons display, simulators, spare parts, training, field engineering, and depot maintenance capability. Work will be performed by Sanders Ground Systems Division in Merrimack, N.H.

The total contract price to Ford, Sanders and other subcontractors is $220 million. Included in the package are the Chaparral missile and Identification Friend or Foe 1/8IFF) system, mobile fire units, the Sanders mobile surveillance radar system, spares, maintenance equipment and training services.

Lockheed Sanders is engaged in development, manufacture and sale of advanced electronic systems and products in a broad range of defense electronic markets. The company has played a major role in U.S. Army Air Defense programs since 1966, and has developed a family of sophisticated mobile radar systems deployed today around the world.

#90024b0678 01/24/1990 ~Business Wire

LOS ANGELES (JAN. 24) BUSINESS WIRE - Coast Savings Inc. (NYSE & PSE:CSA) reported Wednesday that net earnings were $6.2 million for the quarter ended Dec. 31, 1989, compared to $9.5 million for the fourth quarter of 1988 (a).

Primarily as a result of the previously announced capital restructuring program initiated during the third quarter, the company realized a net loss for the year of $74.2 million, compared to net earnings of $41.7 million for the year ended Dec. 31, 1988.

Fully diluted earnings per share for the fourth quarter of 1989 were 40 cents compared to 63 cents for the quarter ended Dec. 31, 1988. The fully diluted loss per share totaled $4.87 for the year, compared to fully diluted earnings per share of $2.73 for 1988.

Following a $50.2 million reduction during the third quarter, nonperforming assets declined by an additional $24.7 million during the fourth quarter, reducing the balance of nonperforming assets to $199.3 million at Dec. 31, 1989.

As a result of this continued strong improvement, the company's nonperforming asset ratio (net nonperforming assets expressed as a percent of total assets) was reduced to 1.77 percent at Dec. 31, 1989, down substantialy from 1.98 and 2.21 percent at Sept. 30, 1989, and June 30, 1989, respectively.

Reflecting the declining cost of deposits and the Eleventh District index reset lag, Coast's interest rate spread - the difference between the yield on interest-earning assets and the cost of interest-bearing liabilities - increased to 2.42 percent at Dec. 31, 1989, up from 2.32 and 1.78 percent at Sept. 30, 1989, and June 30, 1989 respectively.

Primarily as a result of the redcution in nonperforming assets and the return of the net spread to a more normalized level, net interest income increased to $49.2 million for the quarter, an 11 percent increase over the $44.4 million attained for the three months ended Sept. 30, 1989.

Coast Savings Financial Inc., is the holding company of Coast Savings and Loan, one the the nation's largest savings and loan associations. Coast's primary emphasis is on residential real estate lending and retail banking provided through 125 retail banking offices and 8 regional mortgage lending centers located throughout California.

#90024b0679 01/24/1990 ~Business Wire

LOS ANGELES (JAN. 24) BUSINESS WIRE - Coral Inc. (OTC) reported record revenues of $8.643 million with more than $687,000 pre-tax profit for its third-quarter 1989.

Coral Chairman Michael H. Epstein explained that: "Our third-quarter revenues reflect the increased business that we anticipated as a result of improving our technology, refining our approach and expanding our marketing efforts. In fact, they are indicative of the possibilities in the $600 million audiotext industry which is expected to grow to $5 billion by 1993."

No comparison of results for the corresponding period of the previous year is feasible because System 800 was not acquired by Coral until Dec. 30, 1988, and its other subsidiaries were acquired subsequent to that.

Coral consists of three Los Angeles-based subsidiaries: System 800 International Inc.; Coral Equipment Group; and Graffiti Graphics Inc. System 800 functions as a value-added utility and is one of the largest and fastest-growing providers of audiotext conferencing services in the country.

Founded in February 1988, its customers' activity on MCI's 800 lines passed the 3-million-minute-per-month mark in June 1989. The significance of this is that System 800's clients are billed on a per-minute basis. In fact, System 800 is one of MCI's largest 800 customers in the world.

Coral Equipment Group owns the hardware and software now utililzed by System 800 and other companies in related fields. Craffiti Graphics is a full-service advertising agency which is responsible for all media buying, ad placement and graphic arts for System 800 and for other outside clients. Coral is located at 9255 Sunset Blvd., Los Angeles, Calif. 90069. Telephone: 213/288-2100.

STOCKHOM, SWEDEN (JAN. 24) BUSINESS WIRE - Ericsson has received two orders totaling $135 million from Telecom Australia for equipment that will be used in the country's public and cellular telephone networks.

The first order, worth $117 million, is for AXE equipment for new local, transit and trunk switches. Telecom Australia is one of Ericsson's major customers, with 2.4 million AXE local lines installed or on order.

The second order, worth $18 million, is for radio base station equipment to be used in the AXE-based Australian cellular mobile telephone network. Four years ago Australia chose Ericsson's AXE system for its cellular network, and today approximately 150,000 subscribers are connected.

Headquartered in Stockholm, Sweden, Ericsson is one of the world's leading manufacturers of telecommunications equipment. Its wholly owned North American subsidiary is based in Richardson, Texas.

#90024b0691 01/24/1990 ~Business Wire

LYNNWOOD, WA (JAN. 24) BUSINESS WIRE - Eldec Corp. (NASDAQ:ELDC) Wednesday reported that fiscal 1990 third quarter earnings from continuing operations were down 10 percent at $1.22 million compared with $1.34 million last year.

For the nine months year to date, earnings from continuing operations were 5 percent ahead of last year -- $3.52 million vs. $3.35 million.

On a per-share basis, quarterly earnings from continuing operations were 22 cents compared with 25 cents a year ago. Nine-month earnings from continuing operations were 64 cents for fiscal 1990 in contrast to 63 cents in fiscal 1989.

Net earnings, detailed below, are not comparable because of the one-time gain last year of $5.2 million from the sale of Transducers Inc. and this year's gain of $652,000 from the sale of California property.

Sales for the quarter, which ended Dec. 24, 1989, were up 13 percent -- $28.1 million compared with $24.9 million for the same quarter a year ago. Sales for the nine month period were $81.6 million, a 14 percent increase over the $71.6 million for the same period last year.

The backlog of unfilled orders grew to $132.8 million, up 5 percent from the $126.1 million backlog of a year ago. That portion of the backlog to be shipped within 12 months stands at $95.4 million, 7 percent higher than last year's $88.8 million figure.

Chief Executive Officer Max Gellert attributed the somewhat lower earnings for the quarter to continuing high costs in the company's Power Conversion Division, which makes power supplies for military programs, and unplanned high costs in employee medical coverage.

ELDEC custom designs and manufactures electronic and electromechanical products for aerospace and defense applications. Founded in 1957, the company is a subcontractor to a large number of major aerospace and defense electronics contractors.

#90024b0701 01/24/1990 ~Business Wire

WILLIAMSPORT, PA (JAN. 24) BUSINESS WIRE - Commonwealth Bancshares Corp., headquartered in Williamsport, Pa., announces that it achieved record earnings in both its fourth quarter of 1989 and for the entire year.

Earnings for the fourth quarter totaled $3,661,000, 43 percent higher than 1988's fourth quarter, and $108,000 above the corporation's previous record quarterly net income of $3,553,000, achieved in 1989's third quarter.

Net income for the year amounted to $12,714,000 up 26 percent from 1988. This performance was achieved without substantial securities gains or one-time adjustments. An enhanced net interest margin and strict control of non-interest expenses were the major factors behind the strong earnings.

The return on assets for the fourth quarter was 1.07 percent compared to .92 percent for the same quarter last year and 1.06 percent for the third quarter. The return on assets for 1989 was .96 percent, a major improvement from the .79 percent in 1988.

Earnings per share for the fourth quarter was 59 cents, up from 42 cents in 1988's fourth quarter. Earnings per share for the year amounted to $2.04, a 27 percent increase over 1988's $1.61.

"1989's financial results came in right on budget, and we expect 1990's performance to be even better," said William D. Davis, chairman, president and CEO of the corporation.

"With a strong asset/liability management program in place, net interest margin is expected to steadily improve. In addition, through the implementation of new cost-saving programs developed in 1989 with the assistance of a productivity consultant, we are confident that we can continue to control our non-interest expenses."

Davis also noted that although the financial industry is expected to experience some earnings pressure in 1990, Commonwealth expects to be an exception.

"Our high quality loan portfolio, strong capital position and excellent liquidity, coupled with a strong diversified local economy will provide the necessary elements for continued success. Our non-performing loans to total loans ratio remains well below the industry norm. Commonwealth does not participate in lending to third world countries and has avoided any speculative commercial real estate exposure.

"We have signed a definitive merger agreement with the First Bank of Greater Pittston and expect the completion of the merger about mid-year.

First Bank has a strong earnings record and will contribute positively to our 1990 performance."

DALLAS (JAN. 24) BUSINESS WIRE - Centex Corp. (NYSE:CTX), a Dallas-based company with operations in home building and mortgage banking, construction products, general construction and savings and loan, Wednesday announced record net earnings for the quarter ended Dec. 31, 1989, and for the first nine months of the company's 1990 fiscal year.

For the quarter, corporate revenues were $530,014,000, a 15 percent improvement over $461,703,000 for the same quarter last year. Net earnings rose 57 percent to $15,468,000 or $1 per share, an all-time high for the third quarter, from $9,831,000 or 64 cents per share for the same quarter a year ago.

For the nine months, revenues totaled $1,515,954,000, 12 percent higher than $1,358,486,000 for the same period in fiscal 1989. Net earnings for the nine months rose 73 percent to $46,376,000, or $3.01 per share, a record for the period, from $26,873,000, or $1.77 per share, for the same period last year.

#90024b0706 01/24/1990 ~Business Wire

SAN ANTONIO, TX (JAN. 24) BUSINESS WIRE - Diamond Shamrock R&M Inc. Wednesday reported record 1989 earnings from continuing operations of $60.1 million or primary earnings per share of $2.20, compared to $54.3 million or $2.14 per share from continuing operations in 1988.

The company has taken a non-cash extraordinary charge of $32 million after-tax, establishing a reserve for future obligations to its former parent company. This results in net income of $28.1 million for 1989 or primary earnings per share of 90 cents compared to $53.5 million or $2.10 per share for 1988.

Earnings for the fourth quarter from continuing operations were $8.2 million or primary earnings per share of 27 cents compared with $27.4 million or primary earnings per share of $1.08 for fourth quarter 1988.

Sales for the year were $2.1 billion, up 16 percent over $1.8 billion in 1988. Fourth quarter sales were $557.7 million, compared to $449.5 million in the same quarter last year.

As a condition of its spin-off from Maxus Energy Corp. in April 1987, Diamond Shamrock contractually agreed to share environmental costs and certain other liabilities of Maxus Energy related to businesses that were discontinued or disposed of prior to the spin-off date.

The cost of such liabilities are to be borne solely by Maxus up to $75 million, thereafter, solely by Diamond Shamrock until Diamond Shamrock has reimbursed Maxus for $37.5 million. At that time, Diamond Shamrock will be obligated to pay one-third of such future costs until Diamond Shamrock's total share equals $85 million, which is an absolute cap on Diamond Shamrock's potential liability.

As of Dec. 31, 1989, Maxus advised Diamond Shamrock that it had spent approximately $56.2 million, a portion of which is disputed by Diamond Shamrock.

Diamond Shamrock is a regional refiner and marketer of petroleum products. The San Antonio-based corporation has two Texas refineries with a throughput capacity of 160,000 barrels per day, markets gasoline through about 2,000 Diamond Shamrock branded outlets, processes natural gas, and stores and markets natural gas liquids.

NEW YORK (JAN. 24) BUSINESS WIRE - American Express Company reported today that net income from continuing operations rose 17 percent to a record $1.2 billion in 1989, driven by double-digit gains in its Travel Related Services, IDS Financial Services and Information Services Company operating units. Per share earnings from continuing operations were $2.70, up 17 percent from $2.31 in the prior year.

Net income for 1989, also $1.2 billion, was up 11 percent from $1.0 billion in 1988. Net income per share of $2.70 rose 11 percent from the prior year's $2.43. Net income in 1988 included $51 million from the Company's share of the earnings of Fireman's Fund Corporation (renamed The Fund American Companies, Inc.), which is now being treated as a discontinued operation.

Revenues for 1989 reached $25 billion, a 20 percent increase over 1988's $21 billion. Return on equity remained over 20 percent.

Travel Related Services (TRS) net income rose 17 percent in 1989 to a record $830 million. Revenues totaled $8.4 billion, a 22 percent increase. TRS's results for 1988 have been restated to exclude the businesses of Information Services Company (ISC), a unit that now reports separately.

IDS Financial Services (IDS) had a strong year, with earnings up 19 percent to a record $175 million. Information Services Company completed its first year as a separate operating unit with impressive results. Net

income rose 32 percent to $83 million.

American Express Bank (AEB) earned $122 million, down 18 percent from 1988. As previously announced, American Express has agreed to sell TDB American Express Bank, AEB's Geneva-based private banking subsidiary, for approximately $1 billion. American Express will take a 20 percent equity position in a new TDB CBI bank to be formed after the sale.

Income from continuing operations for the fourth quarter ended December 31 1989 was $257 million, up 16 percent from $221 million in 1988. Earnings per share from continuing operations for the quarter ended December 31, 1989 were $0.61, up 17 percent from $0.52 in the prior year's quarter. Net income for the fourth quarter of 1989 was $257 million or $0.61 per share, compared with $231 million or $0.54 per share in 1988. Revenues for the quarter were $6.3 billion, up 8.9 percent from $5.8 billion in 1988's fourth quarter.

Figures for the quarter and year ended December 31, 1989 reflect new Financial Accounting Standards Board (FASB) rules relating to accounting for certain long-duration life insurance and annuity products. Revenues and expenses for 1988 have been restated for comparative purposes. The impact on consolidated earnings was not material.

CLEVELAND (JAN. 24) BUSINESS WIRE - National City Corporation today announced that it had signed a letter of intent with Buckeye Financial Corporation to acquire the $900 million asset thrift holding company based in Columbus, Ohio.

Under the terms of the merger, which is subject to the execution of a definitive agreement as well as the approval of regulatory authorities, Buckeye shareholders would receive $10.63 per share based on National City's January 23 closing price of $37.75 per share, a combination of stock and cash valued at approximately $29 million. Buckeye's thrift subsidiary, Buckeye Federal Savings and Loan Association, would become a wholly owned thrift subsidiary of National City Corporation, pending its consolidation with National City's existing Columbus subsidiary, BancOhio National Bank. A total of 533,020 National City shares and cash of $8.7 million would be issued in the transaction.

Edward B. Brandon, Chairman and Chief Executive Officer of National City, said, ''We are especially pleased with this affiliation. Buckeye's 18

branch offices in greater Columbus will substantially enhance our share of the bank deposit market in Columbus from the current 20 percent level to over 30 percent.'' Mr. Brandon also noted that the transaction, which is expected to close in the third quarter, is not dilutive to National City stockholders.

National City Corporation is a $23 billion financial services company headquartered in Cleveland, Ohio. Its common stock is traded on the New York Stock Exchange under the symbol NCC.

#90024b0717 01/24/1990 ~Business Wire

RESEARCH TRIANGLE PARK, NC (JAN. 24) BUSINESS WIRE - Northern Telecom (NYSE:NT) announced the general availability of its DMS-10 400E Processor -- a Reduced Instruction Set Computer (RISC)-based processor that enables telephone companies to offer their rural customers a broader range of advanced services.

The 400E Processor is the telecommunications industry's first use of a RISC-based processor in a central office telephone switching system.

The DMS-10 family of digital central office switches, introduced by Northern Telecom in 1977, is designed primarily for telephone operating companies serving small towns and rural areas. The 400E Processor is based on the RISC microprocessor architecture developed by MIPS Computer Systems Inc. of Sunnyvale, Calif.

The 400E recently completed several successful field trials. The initial 400E processor went into service in November in North Central Telephone Cooperative's central office in Lafayette, Tenn.

Lafayette, located about 60 miles northeast of Nashville, is a host office which supports three satellites ad six remote systems containing approximately 7,000 lines. Since Lafayette is a billing center, the increased capability of the 400E helps the operating company to better manage heavy trunking and toll activity in the Tennessee and Kentucky exchanges of its network.

It also allows the cooperative to lead the way in providing Signaling System No. 7 services for its subscribers.

The 400E is installed simply by removing 11 line cards and replacing them with three new line cards. Upgrading software to the 404 generic stream

is also required. The new processor increases processing speed, expands memory sixfold, and increases the maximum line size from 10,800 to 12,000 lines.

Northern Telecom has already received orders for 100 of its new processors.

MIPS Computer Systems Inc. (NASDAQ:MIPS) is a leading supplier of RISC-based products, including technology designs, computer systems, optimizing compilers, and operating systems. The company markets a full range of binary-compatible, high-performance computer systems based on RISC and UNIX, which it sells through OEMs, VARs, and system integrators worldwide.

Northern Telecom is the leading global supplier of fully digital telecommunications switching systems. The company provides products and services to the telecommunications industry, businesses, universities, governments and other institutions worldwide. Northern Telecom Inc., with its headquarters in Nashville, Tenn., employs more that 22,000 people across the United States.

MERIDEN, CT (JAN. 24) BUSINESS EDITORS - Cenvest Inc. (NASDAQ:CBCT), the bank holding company for Central Bank, First Central Bank and Meriden Trust and Safe Deposit Co., announced net income for the quarter of $710,000, or 18 cents per share, and for the year ended Dec. 31, 1989, of $1,313,000, or 33 cents per share.

Results for 1989 were affected by a $3.6 million increase in general loan loss reserves taken in the quarter ended Sept. 30, 1989. Net income for the quarter ended Dec. 31, 1988, was $1,288,000, or 34 cents per share, and for the year $4,203,000, or $1.15 per share.

On Dec. 31, 1989, the ratio of non-performing loans to total loans stood at 0.80 percent and non-performing assets to total assets at 1.69 percent. Net interest income after provision for loan losses for the quarter was $5,303,000 and for the year, $17,362,000, compared with $5,450,000 and $17,001,000 for the corresponding 1988 quarter and year.

Net interest spread at 2.34 percent for the 12 months ended Dec. 31, 1989, was up from 2.22 percent for the same 1988 period. Net interest spread

for the fourth quarter 1989 was 2.15 percent compared with 2.55 percent reported for the same quarter in 1988.

James H. Doak Jr., chairman and chief executive officer, said, ''We are pleased that, despite the continuing softness in the New England real estate market, our loan loss reserves represent over 118 percent of non-performing loans and stand at 0.95 percent of total loans at year end.''

Total assets grew 7.9 percent to $835.2 million at Dec. 31, 1989, up from $744 million reported Dec. 31, 1988. Total loans grew to $711.2 million at year end 1989 from $631.6 million at year end 1988. Total deposits increased 23.1 percent to $627.6 million at Dec. 31, 1989, from $510 million reported Dec. 31, 1988. This growth reflects the fourth quarter acquisition of National Industrial Bank deposits of $37 million, of which $35 million were core.

Cenvest, through its three banking subsidiaries, operates a 16-branch network in the Central Connecticut region.

SANTA CLARA, CA (JAN. 24) BUSINESS WIRE - Stanford Telecommunications Inc. (STII-NASDAQ/NMS) announced Wednesday that its revenues, operating earnings, net income and quarterly bookings reached record highs for the third quarter of fiscal year 1990, ended Dec. 31, 1989.

Revenues of $24,290,000 for the third quarter of FY 90 increased 10 percent over third quarter revenues achieved during the previous fiscal year. Net income of $882,000 and earnings per share of 18 cents compare with net income of $877,000 and earnings per share of 18 cents achieved for third quarter last fiscal year.

A record $44,200,000 of funded contract bookings was posted during the third quarter of FY 90 compared to $22,000,000 booked during the third quarter of FY 89. These bookings increase the funded portion of Stanford Telecom's backlog to $71,200,000 and increase total backlog to $88,900,000.

Revenues of $67,897,000 posted for the first three quarters of FY 90 increased 11 percent from revenues recorded for the first three quarters of last fiscal year. For the first three quarters of FY 90 net income and earnings per share, effected by reserves taken during the second quarter of FY 90, were reported at $745,000 and 15 cents. Net Income and earnings per share for the first three quarters of the previous fiscal

year were $2,308,000 and 48 cents respectively.

In announcing the third quarter FY 90 results, James J. Spilker Jr., president and chairman said, ''The fine performance achieved during the past quarter was in line with our expectations. Although the results were much improved over those posted earlier in the fiscal year, we will continue to position the company to increase its operating efficiency.''

LONDON (JAN. 24) BUSINESS WIRE - LASMO plc, a leading independent oil and gas exploration and production company, confirmed Wednesday that an oil discovery has been made on its Al Bishri permit in eastern Syria.

Four zones were tested on the Wadi Aabeid well, between 1,950 and 2,060 meters (6,396 and 6,757 feet), and a cumulated flow of 6,800 barrels per day of oil of 15 to 20 degrees API was recorded.

''These are very encouraging results and we look forward to early evaluation of the commercial potential of the discovery which lies approximately 12 kilometers (7.44 miles) from an existing pipeline system '' commented LASMO's Chief Executive, Chris Greentree.

This is the second well to be drilled on the Al Bishri permit by the Total group which LASMO joined in mid-1989. Partners in the license are:

Total Syria (Operator)	60 per cent
Fina Exploration Syria B.V.	20 per cent
LASMO Oil (Syria) Limited	20 per cent

LASMO plc is a leading oil and gas exploration and production company, with 1988 revenues of 135 million ($244 million at year-end exchange rates) and operations in 16 countries. Current production is in excess of 85,000 barrels of oil equivalent per day.

LASMO shares trade on London's International Stock Exchange and in the US in ADR form. Shares are quoted on the SEAQ International System and prices may be accessed on the Reuters Equities 2000 service under the symbol LSMR.L, and on Quotron under the symbol LSMRU.EU.

NEW YORK (JAN. 24) BUSINESS WIRE - Allegheny Power System Inc. (NYSE: AYP) Wednesday reported 1989 earnings per share of $3.72 compared with $3.96

per share for 1988.

Consoldiated net income was $194.9 million and total operating revenues were $2,258.2 million for 1989 compared with $205.1 million and $2,170.5 million, respectively for 1988.

For the three months ended Dec. 31, 1989, earnings per share were 88 cents compared with 99 cents for the corresponding 1988 period. Consolidated net income was $46.1 million and total operating revenues were $571.6 million for the 1989 three month period compared with $51.4 million and $524.9 million respectively, for the corresponding 1988 period.

The decline in net income for the 1989 periods resulted primarily from higher maintenance and depreciation expenses and, effective on March 1, 1989, additional West Virginia taxes imposed on electric generation within that state. Earnings for both periods benefited from continued growth in kilowatthour sales to retail customers.

LOUISVILLE, Ky.(JAN. 24) BUSINESS WIRE - Rally's Inc. (NASDAQ: RLLY), the largest double drive-thru hamburger restaurant chain, Wednesday reported that systemwide sales in 1989 increased substantially over 1988.

Chairman and Chief Executive Officer Richard Sherman said total sales at both franchised and company restaurants grew to $132.6 million for the 12 months ending Dec. 31, 1989. The figure is 77 percent higher than sales of $74.7 million for calendar 1988.

''We're pleased with the growth we achieved during 1989 and we're very optimistic regarding our growth prospects for 1990,'' Sherman said.

At the end of 1989, Rally's owned or franchised 192 restaurants in 23 states from coast to coast. That's an increase from 107 stores in operation when the year began.

Today, Rally's operates and franchises 197 double drive-thru, quick-service hamburger restaurants in 23 states. The restaurants provide extremely fast service and feature a low-priced, high-quality limited menu.

The company's stock is traded on NASDAQ National Market under the symbol RLLY.

#90024b0794 01/24/1990 ~Business Wire
LOUISVILLE, KY (JAN. 24) BUSINESS WIRE - The following two press announcements relating to the restructuring plans of B.A.T. Industries and the U.S. operating division, BATUS Inc., are being released in the United States by BATUS Inc.

Key Appointments at B.A.T. Industries:

Pat Sheehy, chairman of B.A.T. Industries, announces that Michael Butt, chairman and chief executive of Eagle Star and a director of B.A.T.

Industries, and Martin Broughton, finance director of B.A.T. Industries will join the Chairman's Policy Committee with immediate effect.

The Chairman's Policy Committee acts as the key executive body of the board.

Michael Butt, who will continue as chairman and chief executive of Eagle Star, will join the board of Farmers Group. Martin Broughton, in addition to his responsibilities as a finance director, will assume responsibility for Group Personnel on the retirement of Tom Long, currently Personnel Director and Chairman of B.A.T. Stores Ltd., who will reach retirement age on June 30, 1990.

As a result of the Group's focus on financial services and tobacco and the demergers and disposals of the paper and retailing interests, there will no longer be a management role for BATUS in the United States and BATIG in Germany.

Batus Announces Restructuring Plan:

Batus Inc. announced Wednesday the 1990 restructuring of BATUS, including the closure of its Louisville headquarters and the elimination of approximately two thirds of its 150 jobs over the course of the year.

BATUS also announced a commitment to maintain the headquarters of Brown & Williamson Tobacco Corp., with 1,000 empoyees, in Louisville.

The restructuring of BATUS follows the Sept. 26, 1989 statement by B.A.T. Industries p.l.c. in London, announcing a program to increase shareholder value. B.A.T. will concentrate on two businesses, financial services and tobacco. It will demerge its paper companies into a public company and sell its retail holdings.

NEW YORK (JAN. 24) BUSINESS WIRE - Deborah Salerno, president, West End Ventures Inc. (OTC), and Deanne Van Leeuwen, spokesperson for Future Medical Technologies (''FMT''), Wednesday announced the signing of a letter of intent calling for the acquisition of FMT by West End Ventures Inc. in a tax free exchange of shares.

At the consummation of the acquisition, West End will change its name to Future Medical Technologies Inc.

According to Leeuwen, upon fulfillment of the contractural agreement with Human Medical Laboratories Inc., FMT will own the worldwide rights to a patented, FDA approved, medical device called the ''Qualture.'' The Qualture is a disposable plastic device designed to test all types of body fluids for microorganisms.

The company believes the Qualture represents a substantial advancement over current methods of microbiological testing. Based upon the clinical findings, the company believes the Qualture affords the following advantages: speed of detection, isolation, identification and quantification of the bacteria as compared to conventional techniques.

Other advantages the company believes the Qualture will provide are: a more cost effective means of testing for the hospital or lab, a safer testing method for the technician and an easier method of diagnosing the

bacterial disease.

FMT intends to concentrate its efforts initially on the $100 million U.S. urine testing market.

#90024b0802 01/24/1990 ~Business Wire

EVENDALE, OH (JAN. 24) BUSINESS WIRE - GE Aircraft Engines today announced a $187 million investment plan which will be implemented over the next few years.

This investment program will be directed toward maximizing use of facilities, equipment and people as the business responds to unprecedented growth in engine orders.

The initial phase of this plan includes:

o Enlarging Evendale facilities for engineering, administration and continuous improvement training as well as leasing additional office space in Springdale, Ohio.

o Expanding development testing capabilities with the addition of a new engine test cell at GE's outdoor test facility at Peebles, Ohio, plus upgrade of two existing cells at Peebles.

o Enhancing Aircraft Engines customer service response worldwide through expansion of the Commercial Product Support Parts Distribution Center near Greater Cincinnati Airport in Erlanger, Ky., already underway.

o Increasing GE Aircraft Engines compressor blade and vane manufacturing capacity by establishing a new satellite component manufacturing plant in Durham, N.C., a vacant manufacturing facility already owned by GE, and expanding GE's Bromont, Canada, engine compressor blade and vane facility, which is nearing completion. These improvements will complement GE's Rutland, Vt., compressor blade and vane manufacturing plant, which is operating at full-capacity.

o Improving aircraft engine overhaul and repair capacity for GE customers including additional engine test facilities at the GE Aircraft Engine Maintenance Cneter located at Strother Field near Arkansas City, Kan.

Currently, GE's Aircraft Engines business employs approximately 37,250 people worldwide.

     #90024b0809 01/24/1990 ~Business Wire
BUFFALO, NY (JAN. 24) BUSINESS WIRE - Barrister Information Systems Corp. (AMEX:BIS) reported Wednesday the results for its fiscal 1990 third quarter.

For the quarter ended Dec. 29, 1989, the net loss from operations was $1,238,000, or 41 cents per share, compared to a net loss of $2,018,000, or 66 cents per share for the third quarter last year. There were no income tax effects for the third quarters of either fiscal year.

Total revenues for the quarter decreased from $7,454,000 for the comparable period last year to $7,272,000. Product revenues decreased from $3,343,000 for the third quarter last year to $3,194,000. Service revenues declined slightly from $4,111,000 to $4,078,000.

Microcomputer sales improved over last year, as they increased to $850,000 for the quarter compared to $698,000 total for the third quarter last year.

Sales of Barrister/Eagle software and IBM AS/400 systems generated $990,000 in total revenue. The company's business partnership with IBM continues to have a positive effect on product sales.

For the nine months ended Dec. 29, 1989, the pre-tax loss was $4,318,000, compared to a pre-tax loss of $5,245,000 for the comparable period last year. The net loss from operations for the nine month period was $4,318,000, or $1.41 per share, compared to a net loss of $3,820,000 or $1.25 per share for the same period last year.

The net loss for the first nine months of last year would have been $1.72 per share if the company had not received the benefit of a tax credit of $1,425,000, or 47 cents per share.

Revenues for the nine month period declined to $21,699,000 from $22,598,000 for the comparable period.

Henry P. Semmelhack, president of Barrister, stated, ''Although the loss for the quarter was greater than expected due to lower than anticipated product sales, management remains confident that we are moving towards profitability. Barrister continues to tightly control expenses and has generated positive cash from operating activities on a cumulative basis

for the past five quarters.''

Barrister is a leading supplier of office automation to the legal profession.

#90024b0816 01/24/1990 ~Business Wire

WALLINGFORD, CT. (JAN. 24) BUSINESS WIRE - LPL Technologies Inc. (NASDAQ:LPLI), Wednesday reported fourth quarter net income of $4,121,000, or 55 cents per share, compared to $4,015,000, or 42 cents per share, for the 1988 quarter.

The 1988 amount includes a net after tax gain of $1,274,000, or 15 cents per share, from the sale of marketable securities. Excluding the effect of the gain on sale of marketable securities in the 1988 quarter, net income per share for 1989 increased 104 percent.

Sales for the fourth quarter were $171,484,000 compared to $150,585,000 for the 1988 quarter, a 14 percent increase. Per share amounts for 1988 have been adjusted to reflect the three-for-two stock split of the company's common stock effective Aug. 18, 1989.

Net income for the year ended Dec. 31, 1989 was $27,933,000, or $3.68 per share, compared to $9,291,000, or 89 cents per share, for the 1988 period. The 1989 amount reflects a net after tax gain of $14,478,000, or $1.91 per share, from the sale in the first quarter 1989 of Times Microwave Systems.

Excluding the effect of the Times Microwave sale in 1989 and the marketable securities sale in 1988, net income was $13,455,000, or $1.77 per share, for 1989, an increase of 139 percent per share over net income of $8,017,000, or 74 cents per share, for 1988. Sales for the year 1989 were $630,505,000 compared to $585,422,000 for 1988, an 8 percent increase. The company's 1989 results include Pyle National and related companies that were acquired in August 1989 and exclude Times Microwave which was sold in January 1989.

''I am pleased to report that the fourth quarter and full year 1989 results continued our trend of increasing profitability, operating performance and shareholder value. Sales and net income were all-time records for the company. Furthermore, in August we completed the acquisition of the Pyle National companies.

With this acquisition and the continuing growth of Amphenol, LPL is

clearly the second largest connector company in the world. This has been a strategic objective and should give us significant leverage in the marketplace,'' commented Lawrence J. DeGeorge, chairman and chief executive officer.

''The fourth quarter and full year 1989 results reflect the continued strong performance of the company's Times Fiber subsidiary. Amphenol Corporation's Bendix Connector operation's performance for the fourth quarter and full year was adversely impacted by the well publicized slowdown in military expenditures and customer inventory reduction programs.

The Pyle National companies are performing satisfactorily and made a positive contribution to 1989 results. Overall, we are pleased with 1989 accomplishments and performance and we believe 1990 will continue our trend of increasing shareholder value.''

LPL Technologies Inc. operates through its subsidiaries Times Fiber Communications Inc., Amphenol Corp., Amphenol Interconnect Products Corp., Pyle National and American Lightwave Systems Inc.

These companies manufacture coaxial cable, principally for cable television applications, connectors, fiber optic systems and interconnect systems for the electronic, communications and aerospace industries. Their products are engineered and produced in the United States, Canada, Europe and the Far East and sold by its worldwide sales and marketing organization.

LPL Technologies Inc.
Financial Summary
(Unaudited)

	Three Months Ended Dec. 31,		12 Months Ended Dec. 31,	
	1989	1988-(d)	1989-(a) (audited)	1988-(d)
Sales	$171,484,000	$150,585,000	$630,505,000	$585,422,000

#90024b0825 01/24/1990 ~Business Wire
MUNCIE, IN (JAN. 24) BUSINESS WIRE - Ball Corp. (NYSE:BLL) reported Wednesday that its board of directors has adopted certain amendments to the company's shareholder rights plan.

Among the amendments is a reduction of the rights plan's ''flip- in'' trigger from 40 percent to 20 percent.

As amended, the rights plan provides that if any person becomes the beneficial owner of 20 percent or more of the outstanding common stock of the company, each right not owned by such person or related parties will enable its holder to purchase, at the right's then- current exercise price common stock of the company having a value of twice the right's exercise price.

In addition, the rights plan was amended to include among the ''flip-in'' triggers a determination by the board of directors that a person is an ''adverse person.''

An ''adverse person'' is a person who holds at least 10 percent of the outstanding common stock of the company and who the board of directors determines intends to cause the company to take certain actions not in the best long-term interests of the company or whose ownership is determined by the board of directors to be reasonable likely to cause a material adverse impact on the company.

The rights plan was also amended to provide that the ''flip-in'' provisions would not be triggered by the acquisition of the company's common stock pursuant to a tender or exchange offer for all outstanding shares of the company's common stock determined to be fair to and otherwise in the best interests of the company and its shareholders by a majority of the company's independent directors.

The text of the amendments to the rights plan will be filed with First National Bank of Chicago, the rights agent, and with the Securities and

Exchange Commission and may be obtained from the company.

Ball Corp. manufactures and markets packaging, industrial and consumer products, and provides aerospace systems and professional services to the federal sector.

The company participates in the domestic glass container industry and Canadian packaging market through two joint venture companies, Ball-InCon Glass Packaging Corp., and Ball Packaging Products Canada, Inc.

     #90024b0827 01/24/1990 ~Business Wire

NEW YORK (JAN. 24) BUSINESS WIRE - The Dun & Bradstreet Corporation Wednesday reported record annual earnings per share of $3.14, up 17.6 percent from $2.67 per share in 1988.

Excluding the impact on 1988 results of one-time non-tax-deductible costs of $.08 per share associated with the acquisition of IMS International, 1989 earnings per share grew 14.2 percent.

Net income for 1989 grew 17.5 percent to a record $586,380,000 from $498,960,000 reported in 1988.

Operating revenue in 1989 grew 1.3 percent to $4,321,794,000 from $4,267,377,000 in 1988. Revenue in 1989 was held down by the absence of revenue from Official Airline Guides, the impact of a strengthened U.S. dollar, the impact of the expiration in 1988 of a yellow pages sales agency contract, the closing of certain proprietary directory operations and the sale of IMS' South African operations.

Excluding the impact of these items, 1989 revenue grew 9 percent.

Full-year revenue growth also was held down by the decline in sales at U.S. Credit Services; the effect of price competition in Nielsen Marketing Research, Nielsen Clearing House and Donnelley Marketing; and the effect of market conditions on Moody's Investors Service, D&B

Plan Services and McCormack & Dodge.

Operating income in 1989 grew 17 percent, excluding operating income from OAG and net restructuring expense in 1988. Operating-income growth in 1989 was enhanced by increased operating efficiencies and other benefits from restructuring actions initiated in 1988. Reported operating income in

1989 increased 11.7 percent to $897,812,000 from $803,514,000 in 1988.

Non-operating income--net in 1989 was $16,921,000, compared with an expense of $12,846,000 in 1988, which included one-time costs of $14.3 million associated with the 1988 acquisition of IMS. The improvement in 1989 also was due, in part, to higher income from the company's portfolio of marketable securities and increased benefits from tax-sharing agreements with an Alaska Native corporation. As a result of continuing global tax-planning actions, the company's 1989 effective tax rate was lowered to 35.9 percent from 36.9 percent a year ago.

On November 15, 1989, the company announced that earnings per share in 1990 are expected to decline to the range of $2.80. A number of operating and non-operating factors were cited for the decline, including the impact of lower sales at U.S. Credit Services and the costs of repositioning actions in that division. During 1989, because of allegations and negative publicity about past sales practices, customers reduced their purchases of Credit Services' products. Over the past several months, the company began to implement actions to address the problems at U.S. Credit Services.

These actions include: a 30 percent increase in the size of the sales force; changes in pricing and usage policies; data-collection enhancements to improve the depth and timeliness of information in the database; and the introduction of a number of new products and services. The company also noted that 1990 earnings were expected to be held down by a possible operating loss at Nielsen Clearing House, as a result of continuing price competition and production problems. Actions being taken to strengthen the business include shortening production turnaround time and improving computer systems.

Additionally, while Nielsen Marketing Research is expected to have solid revenue growth in 1990, operating income is expected to be essentially unchanged. This is due to continuing price competition in the U.S. and certain European countries, as well as accelerated expenditures on new product development.

Due to the lead times involved, the return on the above and other actions will not be immediate. However, the company believes that improved performance in Credit Services and other businesses will lead to long-term low-double-digit revenue growth for the corporation by mid-1991. Long-term net income and earnings per share are expected to grow at a somewhat higher rate, with margin expansion resulting primarily from the development of high-margin new products and services, as well as lower production costs.

The following table and comments reflect 1989 business- segment operating revenue and operating income. The change in operating income is based on

a comparison with 1988 operating income before restructuring expense.

CLEVELAND, OH (JAN. 24) BUSINESS WIRE - TRANSOHIO Savings Bank today announced the introduction of ''Hassle-Free Checking'', a free checking account being offered through every TRANSOHIO branch office across Ohio. Just $50.00 will open a Hassle-Free Checking account. TRANSOHIO's Hassle-Free Checking has no monthly service charge, no minimum balance requirement, no per-check fees and allows unlimited check writing.

Commenting on this new product, Executive Vice President-Retail Banking Philip M. Essig said, ''We designed Hassle-Free Checking for people who desire a truly free checking account without monthly service charges, who prefer not to worry about maintaining a high minimum balance and for those looking for the best value in low-cost checking in Ohio.'' Other features of TRANSOHIO's Hassle-Free Checking account include a free Green Machine ATM (automated teller machine) card with no-fee transactions, detailed monthly statements which include cancelled checks and FDIC insurance up to $100,000. The monthly statement for Hassle-Free Checking can be combined with a savings account statement and the account can accommodate direct deposits.

For a limited time only, TRANSOHIO is offering Hassle-Free Checking customers their first 200 personal checks free with their choice of any check design. To kick off the introduction of Hassle-Free Checking, TRANSOHIO is sponsoring a Special Hassle-Free Checking Sweepstakes with a grand prize of $1,000 per month for 12 months deposited to the winner's Hassle-Free account. The Official Rules are available at any TRANSOHIO branch.

TRANSOHIO Savings Bank is a wholly owned subsidiary of TransCapital Financial Corporation, Ohio's largest savings and loan holding company and the State's sixth largest financial institution with approximately $6 billion in assets. TransCapital is a majority owned subsidiary of American Capital Corporation, (AMEX: ACC).

TRANSOHIO has offices in the Cleveland, Akron, Columbus and Cincinnati markets of Ohio. Through two other affiliates, AmeriStar Financial Corporation and OMNI Mortgage Company, TransCapital has additional mortgage origination offices outside Ohio. TransCapital's stock is traded on the New York Stock Exchange under the symbol, ''TFC''.

FAIRMONT, WV (JAN. 24) BUSINESS WIRE - CB&T Financial Corp. (NASDAQ: CBTF) announced Wednesday that for the fourth-quarter ended Dec. 31, 1989, net income rose 44 percent to a fourth-quarter record of $1,303,000, or 54 cents a share, fully diluted, from $907,000, or 38 cents a share, fully diluted, for the same period a year ago.

For the year ended Dec. 31, 1989, net income increased 30 percent to a record $4,944,000, or $2.01 per share, full diluted, vs. $3,802,000, or $1.55 fully diluted, for the previous year.

The company noted that for the quarter, the improved earnings were a result of a seven percent increase in net interest income combined with a five percent reduction in overhead expenses. Reduced overhead expenses reflect the first full quarter of savings and increased efficiencies from the merger with Consolidated Banc Shares Inc.

The full year results reflect a ten percent higher net interest income, flat overhead expenses a lower effective tax rate, partially offset by a greater provision for possible loan losses.

The Fairmont, W. Va., bank holding company had consolidated assets of approximately $500 million at year end.

#90024b0834 01/24/1990 ~Business Wire

EVANSVILLE, IN (JAN. 24) BUSINESS WIRE - Old National Bancorp (NASDAQ: OLDB) Wednesday reported 1989 net income of $22.2 million, up 8.3 percent

from the $20.5 million earned in 1988.

Net income per share was $1.93, 12.2 percent higher than the $1.72 reported for 1988. Per share figures are adjusted for the recent five percent stock dividend.

The strong 1989 results were boosted by fourth quarter net income of $5.5 million which was 14.6 percent ahead of the $4.8 million results of the fourth quarter of 1988. Fourth quarter net income per share increased 19.5 percent to 49 cents from 41 cents for 1988.

Dan W. Mitchell, chairman and chief executive officer stated: "1989 was a very good year, with improved earnings as expressed in actual dollars and also in key industry ratios. Our return on equity increased to 12.86 percent and our return on assets to 1.04 percent.

"Under the new risk based capital ratios, our total capital will be approximately twice the minimum required by regulatory authorities. Credit quality remains a top priority of the company, especially in the face of a possible economic downturn. In this regard, net charge-offs in 1989 were .50 percent of average loans, far superior to the most recently reported FDIC industry ratio of .88 percent."

Old National completed the year with consolidated assets of $2.2 billion, an increase of 22 percent over the $1.8 billion reported in 1988. The increase results from the addition of three new banking affiliates in 1989. These were the First State Bank - Greenville, Ky.; Morganfield National Bank, Morganfield, Ky.; and the First National Bank of Harrisburg Ill.

Completion of Old National Bancorp's pending merger with SBT Bancorp of Mount Carmel, Ill., by mid-1990 will bring total affiliate banks to 14 and total assets to $2.3 billion.

HOUSTON (JAN. 24) BUSINESS WIRE - The Coastal Corp. said Wednesday that its Belcher Oil Co., Miami subsidiary will change its name to Coastal Fuels Marketing, Inc., effective Feb. 1.

Purpose of the name change is to more clearly identify the subsidiary as affiliated with the Coastal parent company. Five other Belcher company subsidiaries adopted similar name changes on Jan. 1 of this year.

Belcher Oil Co., Miami, was founded in 1915 as a provider of road paving oils. Today, it operates 16 terminals, including nine in Florida, and provides a full range of petroleum products and services including gasolines, fuel oil, asphalt, aviation fuels, lubricants and marine bunkering.

The company has approximately 400 employees in Florida, including 230 in the greater Miami area, where its headquarters are located. The Coastal Corp. is a Houston-based diversified energy corporation. Together with its subsidiaries, it has assets of $8 billion and operations in natural gas transmission and storage, oil and gas exploration and production, refining and marketing, coal and chemicals, trucking and independent power production.

HIGH POINT, NC (JAN. 24) BUSINESS WIRE - Old Stone Bank of North Carolina, FSB, a $583 million asset federal savings bank, headquartered in High Point, N.C., Wednesday announced net income for the year ending Dec. 31, 1989 of $4.8 million.

The North Carolina institution is a subsidiary of Old Stone Corp. located in Providence, R.I. Their 1989 net income compares to $5.1 million for the year ending Dec. 31, 1988.

Net interest income (spread) was $14.7 million or 11 percent higher than 1988's $13.3 million. Although total spread income was higher in 1989 due to an acquisition, net interest margins were lower as a result of rising interest rates in the first half of 1989.

Non-interest income was $4.4 million or $1.9 million higher than the 1988 level. Operating expenses for 1989, excluding provision for loan loss, were $12.4 million compared to 1988's level of $9.7 million. In February, 1989, Old Stone Bank of North Carolina acquired the former Fidelity Federal Savings and Loan of Hickory, N.C. The acquisition accounted for most of 1989's increased income and expense.

Effective Dec. 7, 1989, thrift institutions must meet separate capital requirements relating to tangible, core and risk-based capital. Old Stone Bank of North Carolina's capital levels are in excess of all three requirements. Risk-based capital requirements phase in from 6.4 percent of risk-weighted assets effective Dec. 7, 1989, to eight percent at year-end 1992.

Old Stone Bank of North Carolina's risk-based capital ratio as of Dec. 31, 1989, is 10.8 percent, well in excess of the minimum 1992 level. Its tangible capital ratio of five percent is more than three times the minimum 1.5 percent requirement.

The company has operated profitably and grown from $182 million in assets when it was acquired by Old Stone Corp. in 1983, through acquisitions of its own. It now operates 16 branches in central and western North Carolina.

NEW YORK (JAN. 24) BUSINESS WIRE - Elk Associates Funding Corp. (the ''company'') announced Wednesday that at a meeting of the board of directors held Wednesday the company has decided to omit its quarterly dividend for the second quarter of its fiscal year (quarter ending Dec. 31 1989) in order to increase its reserves for potential loan losses which may result from certain of its loans secured by real estate.

The board intends to re-evaluate payment of a dividend at its meeting to be held during the latter part of March 1990.

Elk Associates Funding Corp. is a closed end, non-diversified, registered investment company licensed to operate as a Minority Enterprise Small Business Investment Company. The company provides financing to persons who qualify under Small Business Administration regulations as socially or economically disadvantaged persons, and a majority of its loans are for the purpose of financing or refinancing purchases of New York City taxi medallions, taxicab vehicles and related assets, and for radio car services operating in New York City, and for other diversified business loans secured by real estate mortgages or other collateral.

The company's shares are listed in the ''Pink Sheets'' and M.H. Meyerson & Co. Inc. of Jersey City, N.J., is the market maker, 212/425-1212. The company maintains offices at 600 Third Ave., New York, N.Y. and the company contact is Gary C. Granoff, president, 212/972-8550.

#90024b0856 01/24/1990 ~Business Wire

CLEVELAND (JAN. 24) BUSINESS WIRE - Cleveland-Cliffs Inc today reported record net income of $60.6 million for the year 1989 versus $39.2 million

in 1988 and the previous record of $55.1 million in 1979. Earnings per share were a record $5.20 in 1989 compared with $2.86 in 1988 and the previous record of $4.50 in 1979.

For the fourth quarter of 1989, earnings were $13.3 million, or $1.12 per common share. In the fourth quarter of 1988, earnings were $6.9 million, or 59 cents a share.

Earnings in 1989 and 1988 included various unusual items and discontinued operations. Without those special effects, total year 1989 earnings would have been $54.8 million, or $4.71 per share, versus comparable 1988 earnings of $39.6 million, or $2.89 per share. Likewise, earnings for the fourth quarter of 1989 would have been $14.4 million, or $1.22 per share, versus $10.6 million, or 91 cents per share in 1988.

The improvement in total year earnings was primarily due to increases in sales margin, sales volume, royalties and management fees. The increase in earnings per share for the year also reflected 1988 stock repurchases. The improvement in fourth quarter earnings was largely due to increases in sales margin and sales volume and lower net interest expense.

The loss from discontinued operations in 1989 represents the results of the metallurgical sales segment sold in November, 1989. The 1988 results from discontinued operations also include the oil and gas subsidiary, timber mills, and 26 percent interest in MLX Corp. which were disposed of in 1988.

Cliffs-managed mines in North America produced a record 39.3 million tons of pellets for the full year 1989 compared with the previous record of 39.0 million tons in 1988. Fourth quarter production was 9.3 million tons in 1989 versus 10.1 million tons in 1988.

Cliffs' share of full year 1989 production was 6.6 million tons versus 6.7 million tons in 1988. The new magnetite operation at the Tilden Mine, which commenced production in August, achieved 90 percent of the design production rate in December with satisfactory pellet quality.

Cliffs' pellet sales for the full year 1989 were a record 7.5 million tons versus 6.7 million tons in 1988. Fourth quarter sales were 2.1 million tons in 1989 versus 1.9 million tons in 1988.

To meet sales commitments, Cliffs purchased 1.4 million tons of ore in 1989 as compared with 100,000 tons in 1988. Year-end inventories were 1.1 million tons in 1989 and .6 million tons in 1988. December weather conditions on the Great Lakes were unfavorable in 1989.

#90024b0857 01/24/1990 ~Business Wire
RICHMOND, VA (JAN. 24) BUSINESS WIRE - Scott & Stringfellow Financial Inc. (OTC: SCOT) posted higher operating results on an unaudited basis for the second quarter of fiscal 1990 ended Dec. 31, 1989.

The company's primary subsidiary is Scott & Stringfellow Investment Corp., a regional brokerage, financial services and investment banking firm headquartered in Richmond.

Francis A. Pineno, president and chief executive officer said gross revenues for the second quarter increased to $9,762,265 from $7,336,403, a 33.1 percent increase over last year's results.

Second quarter income before taxes increased to $797,552 from a year ago level of $454,433. Net income for this quarter increased to $522,552 from $291,433. Earnings per share increased to 26 cents from 16 cents.

For the six months, gross revenues increased 23.9 percent to $17,378,412 vs. $14,024,280. Income before taxes for the like period advanced 49.8 percent to $1,336,153 vs. $891,956. Net income rose 60.3 percent to $902,153 compared with $562,956. Earnings per share were 46 cents vs. 31 cents.

Average common shares outstanding for the second quarter increased from 1,835,875 a year ago to 2,041,858. Average common shares outstanding for the six months increased from 1,836,823 a year ago to 1,921,451. The increased shares outstanding reflect the issuance of stock for the acquisition of the net assets of Investment Corporation of Virginia during the quarter.

On Oct. 19, 1989, Scott & Stringfellow Inv. purchased substantially all of the assets of Investment Corporation of Virginia, headquartered in Norfolk Va.

As a result of the joining of the two firms, Scott & Stringfellow Inc. changed its name to Scott & Stringfellow Investment Corp. The firm, which now has combined equity capital of almost $20 million, has 23 branch offices throughout Virginia, West Virginia and North Carolina and 400 employees of which 160 have full time investment broker positions.

BOCA RATON, FL (JAN. 24) BUSINESS WIRE - The Boca Juniors, 1989 Gold Coast

Soccer League Group A Champions, will challenge Schalke 04, a leading German professional soccer team, on Sunday, Jan. 28 in a benefit for the Boca Raton Youth Soccer Association. The game will be held at Patch Reef Park on Yamato Road at 1 p.m. A donation to the Youth Soccer Association is requested.

H. Werner Krause, president and chief executive officer of Siemens Information Systems and captain of the Boca Juniors, announced the company will make a contribution to the Youth Soccer Association matching donations collected at the game.

Schalke 04 is the most well known German soccer team from Gelsenkirchen, West Germany. It is recognized worldwide for its eight Bundesliga championships. In addition the team was twice German Open Cup champion.

Despite this strong record, Schalke 04 has had its ups and downs, developing a love-hate relationship with the German soccer fans, never drawing less than 40,000 visitors for their games.

Two seasons ago Schalke was downgraded to the second division. However, new management and sponsors this season have allowed the team to recruit several internationally recognized players including Alexander Borudjuk from Dynamo Moscow and Matthias Herget from Germany's Bayer Verdingen. With these additions, the team has improved greatly and is on its way back to first division status.

The Boca Juniors, sponsored by Siemens Information Systems of Boca Raton, is made up of local amateur and top caliber college players from Palm Beach and Broward Counties. Several former members of the Ft. Lauderdale Strikers play regularly with the team.

Since being revitalized and captained by Krause, and coached by Kos Donev, Florida's collegiate soccer coach of the year from FAU, the Boca Juniors have consistently been the leader of the Gold Coast League.

"No other soccer team in the world is as generally well known as Schalke. We are looking forward to the challenge of meeting these excellent players on our local field," said Krause. "It promises to be an exciting afternoon and a demonstration of great soccer for the young players in South Florida. We are pleased to have the donations at this game benefit our youngsters who are our future soccer players and fans."

OWENSBORO, KY (JAN. 24) BUSINESS WIRE - Cardinal Financial Group Inc. (NASDAQ:CAFS), a thrift holding company, Wednesday announced net income for the three months ended Dec. 31, 1989, of $216,180, or 18 cents per share, compared to $245,519, or 20 cents per share, for the quarter ended Dec. 31, 1988.

The company previously announced, on Jan. 19, 1990, a quarterly dividend in the amount of $.125 per share of its common stock, payable on Feb. 12, 1990, to stockholders of record on Jan. 29, 1990. This was the ninth consecutive quarterly cash dividend declared by the company or its wholly owned subsidiary, Cardinal Federal Savings Bank.

Commenting on the results for the first quarter, William R. Spurrier, president, said: ''Net interest income, our primary source of income, continued its upward movement for the first quarter of fiscal 1990. This quarter's net interest income total of $1,411,000 is 9 percent more than the total for the first quarter of last year and is 33 percent above the total for the quarter ended June 30, 1989, and 9 percent above the total for the quarter ended Sept. 30, 1989.

''While our net income decreased somewhat from the quarter ended Sept. 30, 1989, our core earnings for the current quarter of approximately $202,000, calculated by excluding nonrecurring net gains, exceeded the core earnings for the quarter ended Sept. 30, 1989, by approximately $32,000.

At Dec. 31, 1989, the company's stockholders' equity totaled $23.2 million or 7.1 percent of total assets. The book value of the company's common stock was $19.21 per share at Dec. 31.

Market makers in the company's common stock are J.J.B. Hilliard, W.L. Lyons Inc., Ryan, Beck & Co. Inc., and Herzog, Heine & Geduld Inc.

Cardinal Federal operates eight offices in Daviess, Hancock, McLean and Barren counties with its home office located in Owensboro.

SAN DIEGO (JAN. 24) BUSINESS WIRE - Loral TerraCom, a unit of Loral Corp., has been awarded an $11.1 million contract to provide UHF multichannel digital radios for the U.S. Marine Corps' new mobile Digital Wideband Transmission System (DWTS).

Loral TerraCom will provide 34 complete systems that consist of multiple

UHF interoperable radios and associated equipment. Designated the AN/MRC-142, the new product is one of three subsystems of the DWTS.

The DWTS program is a key element of command, control and communications (C3) requirements for the Marine Amphibious Force.

Loral TerraCom will begin delivering equipment in 19 months. The company expects to provide up to 500 radio systems over the next several years, making the program worth potentially more than $50 million.

The Loral TerraCom systems will be deployed in the high-mobility, multipurpose wheeled vehicle (HMMWV), which will be outfitted with two complete rugged UHF communications systems with antennas and rapidly deployable, portable telescoping masts.

The Marine Corps intends to use the new system to transmit secure digital wideband communications, linking together tactical switches and other communications equipment.

Loral TerraCom, based in San Diego, is a leading worldwide producer of rugged, high-frequency portable military radios and terminals, as well as a full range of analog and digital microwave communications equipment.

Loral Corp. (NYSE:LOR) is a high technology company that primarily designs and manufactures defense electronics.

#90024b0870 01/24/1990 ~Business Wire

SCARSDALE, NY (JAN. 24) BUSINESS WIRE - Terminal Applications Group Inc. (NASDAQ:TAGI) Wednesday reported revenues of $1,354,070 for the fourth quarter ended Oct. 31, 1989 compared to $1,324,419 for the same period a year ago, with a net income of $99,157 for the quarter, or $.016 a share on a weighted average number of shares outstanding of 6,069,540 compared to net income of $63,680 or $0.021 per share on a weighted average number of shares outstanding of 3,057,040 a year ago.

For the 12 months ended Oct. 31, 1989 the company posted revenues of $3,296,855 vs. $4,776,378 for the prior year. For the fiscal 1989, there was a loss of $1,681,062 or 29 cents a share on a weighted average number of shares outstanding of 5,811,207 compared to a net income of $301,142 or 10 cents per share on a weighted average number of shares outstanding of 3,057,040 for the prior fiscal year.

According to Gerald D. Kaplan, president of the company, the results for

the 1989 fiscal year were adversely affected by the ongoing program of translation and enhancement of the company's proprietary computer software programs and the significant expansion of the company's sales and marketing department and by the absence of the vice president of sales who was on maternity leave from October 1988 until May 1989.

However, with the completion of the extensive training program for the new sales staff and the return of the vice president of sales, there has been an upturn in the sales volume, which was reflected in the strong turnabout for the fourth quarter. Kaplan believes that the overall sales and marketing efforts will continue improving, positively affecting revenues and earnings.

The company continues to enhance and translate its proprietary computer software programs, the first version of which will be released in the marketplace in 1990.

#90024b0872 01/24/1990 ~Business Wire

BIRMINGHAM, AL (JAN. 24) BUSINESS WIRE - Vulcan Materials Co. (NYSE: VMC) Wednesday announced that 1989 fourth quarter sales from continuing operations were $257,740,000, down four percent from 1988 sales of $267,435,000.

Pretax earnings from continuing operations in the fourth quarter totaled $34,930,000, declining eight percent from the $38,145,000 reported for 1988. Net earnings and earnings per share from continuing operations of $23,707,000 and 60 cents were down six percent and three percent, respectively, from 1988 earnings of $25,099,000 and 62 cents.

The company recorded a loss of $4,051,000, or ten cents per share, from discontinued operations in the fourth quarter of 1989 as compared with no results from discontinued operations in 1988. After including the loss from discontinued operations in 1989's fourth quarter, net earnings and earnings per share were $19,656,000 and 50 cents, falling 22 percent and 19 percent, respectively, below 1988 levels.

The Construction Materials segment reported sales in the fourth quarter of $157,897,000, down six percent from the 1988 result. The reduction is attributable principally to lower volume, and reflects the impact of severe weather conditions during December in most of the segment's markets.

Through the first two months of the quarter, stone shipments were ahead of 1988 volume by six percent, however, in December stone shipments fell 35

percent from the 1988 level. Chemicals sales of $99,843,000 in the fourth quarter of 1989 were approximately equal to 1988 sales of $100,301,000, reflecting higher prices and volume for inorganic products, offset by weaker solvent volume and prices.

Construction Materials fourth quarter segment earnings of $22,706,000 were 26 percent lower than comparable 1988 earnings of $30,605,000. The decline reflects primarily lower volume and higher operating costs, including provisions totaling $3,283,000 for shutdown and related expenses at two plants. Customers served from these plants will continue to be served from other Vulcan facilities.

Chemicals segment earnings of $12,050,000 in the fourth quarter were up 61 percent from 1988 earnings of $7,466,000. The increase reflects higher sales of inorganic products, lower raw material costs and lower net charges for environmental remediation, offset in part by lower sales of organic products and additional costs incurred as a result of a weather-related shutdown of the Geismar, La. plant.

The estimated pretax earnings impact of the shutdown, which idled most production units for four to six days in December, approximated $4,000,000. Environmental remediation provisions were $10,000,000 in 1989's fourth quarter, as compared with $11,150,000 in the fourth quarter of 1988.

#90024b0877 01/24/1990 ~Business Wire

CUYAHOGA HEIGHTS, OH (JAN. 24) BUSINESS WIRE - American Steel & Wire Corp. (NASDAQ:RODS) Wednesday announced a net loss for the second fiscal quarter ended Dec. 31, 1989, of $1,676,000, or 20 cents per share, compared with net income of $1,727,000, or 23 cents per share, for the quarter ended Dec. 31, 1988.

Net sales for this year's second quarter were $41,709,000 vs. $50,700,000 in the like period last year.

For the six months ended Dec. 31, 1989, the company reported a net loss of $1,283,000, or 15 cents per share, on net sales of $82,216,000 vs. net income of $3,369,000, or 50 cents per share, on net sales of $97,855,000 for last year's first half.

The company had previously announced that fiscal 1990 second quarter results were expected to be off substantially from last year's comparable quarter. The actual results for the second quarter were even lower than initially expected because of softness in the company's automotive-related markets and due to certain unusual expenses related to the prepayment of AS&W's senior bank debt and the Chicago West Pullman Corp. acquisition proposal. The company also increased its allowance for doubtful trade accounts receivable by $500,000, due to the poor financial condition of two of its customers.

Thomas N. Tyrrell, president and chief executive officer, said, ''Sales and profit margins for the second quarter were adversely impacted beyond our expectations by the extremely cautious buying patterns during November and December of many of our automotive and construction-related customers as they significantly reduced inventories in anticipation of possible recessionary conditions in their industries. Although most of our customers remain cautious, we have experienced a good pickup in orders to date in January as we head into our second fiscal half which is typically our stronger seasonal half. We believe that market conditions will continue to be difficult during our second half, but barring any significant further deterioration in our automotive markets, we expect to be profitable in our third and fourth quarters and for our fiscal 1990 year.''

American Steel & Wire Corp. specializes in manufacturing high-quality steel rod and wire from semifinished steel billets at its two facilities in Cleveland and one facility in Joliet, Ill. The company's customers are in the automotive, fastener, welding, appliance and aerospace industries.

DAYTON, OH (JAN. 24) BUSINESS WIRE - DPL Inc. Wednesday reported earnings of $3.27 per share for the 12 months ended Dec. 31, 1989 up from $3.01 per

share recorded in 1988.

Strong economic growth in the DP&L service area and colder than normal weather contributed to increased retail sales and the improved financial results.

Mr. Peter H. Forster, DPL Inc. chairman and chief executive officer, said ''The economy of West Central Ohio continued to set new records throughout 1989, as sales to business customers increased for the year. Results for 1989 were helped by a six percent increase in retail sales in the fourth quarter, which included a 10 percent gain in sales to residential customers due to bitter December temperatures.

''The record setting weather was 36 percent colder than normal for the month of December. These extreme temperatures resulted in our customers setting an all-time winter peak of 2,520 MW in December 1989 which represents a nine percent increase over the previous all time winter peak.

''Efficient operations and outstanding productivity also played a major role in increasing earnings for the year.''

Earnings per share for the fourth quarter of 1989 were 59 cents, as compared to 43 cents per share for the like period a year ago.

CHARLESTON, WV (JAN. 24) BUSINESS WIRE - National Banc of Commerce Co. announced Wednesday that its board of directors has authorized the purchase of up to 100,000 shares of its capital stock

The shares will be purchased on the open market, and will be used by the company for general corporate purposes. All purchases will be subject to the availability of shares at prices which are acceptable to the company.

Commenting on the plan, Charles R. Smith, the company's chairman and chief executive officer, said, ''The board of directors and management believe current prices of the stock make it a very attractive investment for the company. Our performance continues to improve, and we think this is an excellent time to reaffirm our confidence in West Virginia and the bright prospects of National Banc of Commerce Company.''

Smith added, ''Consolidated net income was $6.31 million, a 42.7 percent increase over 1988 earnings of $4.42 million. The company's return on average assets was 1.06 percent in 1989, up from 1.05 percent in 1988.

Earnings per share were $1.10 in 1989, compared to $1.20 in 1988.

National Banc of Commerce Co., with 6.2 million shares outstanding, is the holding company for the National Banc of Commerce of Charleston, Belle, Nitro, South Charleston, The Guaranty National Bank, and The Bank of Man.

#90024b0901 01/24/1990 ~Business Wire

WESTBOROUGH, MA (JAN. 24) BUSINESW WIRE - New England Electric System (NEES) Wednesday reported earnings of $2.36 per average share for the year ended December 1989.

In December 1989, two NEES subsidiaries consummated a settlement agreement with a joint venturer, which resolved pending arbitrations and resulted in the sale of our ownership interest in a jointly owned coal-carrying ship.

The agreement resulted in a nonrecurring gain in NEES' 1989 earnings of approximately 16 cents per average share due to tax benefits from the sale of the ship and the reversal of previously accrued litigation reserves.

The 1989 earnings compare to a loss of $.94 per average share for the year 1988. The 1988 loss was the result of a rate settlement announced in June 1988 by New England Power Co. (NEP), NEES' wholesale generating subsidiary.

The 1988 rate settlement resulted in an after-tax write-down of $179 million, which reduced earnings per average share by $3.14 for the year 1988. The settlement rssolved a number of rate cases outstanding at that time, including all issues associated with our investments through the end of 1987 in the Seabrook 1 nuclear unit.

If Seabrook 1 is in commercial operation and various other conditions are met, NEP would be able to reverse a portion of the write-down. This could increase net income by up to about $85 to $115 million after tax. The settlement also allows NEP to recover from customers costs resulting from an affiliate's oil and gas exploration and development activities undertaken from 1974 through 1983.

#90024b0902 01/24/1990 ~Business Wire

JACKSON, TN (JAN. 24) BUSINESS WIRE - Ray U. Tanner, chairman, president and chief executive officer of Volunteer Bancshares Inc., (NASDAQ:VOLB) Wednesday announced earnings for the fourth quarter and fiscal year 1989.

Year-to-date earnings for the company in 1989 were $2,376,000 compared to $3,015,000 in 1988. Fourth quarter 1989 earnings were $751,000 compared to $817,000 for the like period a year ago and $562,000 compared to the third quarter 1989.

Tanner stated ''he is encouraged by the improved earnings during the fourth quarter of 1989 which sets the pace for 1990.'' Year-to-date earnings per share for 1989 were $1.11 vs. $1.37 in 1988. Quarterly earnings per share were 35 cents for 1989 compared to 37 cents for fourth quarter 1988.

The return on average assets was .70 percent and .92 percent for 1989 and 1988, respectively; and the return on average equity was 8.33 percent and 10.58 percent for 1989 and 1988, respectively. Average total assets of the company were $339.6 million during 1989 compared to $326.5 million during 1988, representing a 4.01 percent increase.

Total interest income for the year end 1989 was $32,707,000 compared to $29,149,000 in 1988, a 12.21 percent increase. Year-to-date total interest expense was $20,504,000 vs. $16,191,000 for 1989 and 1988, respectively, representing an increase of 26.6 percent. Net interest income declined to $12,203,000 in 1989 from $12,958,000 in 1988.

The decline in 1989 primarily resulted from increased cost associated with interest bearing liabilities. Volunteer operated in a highly competitive market this past year and the corporation's costs of funds increased as a result of this competition.

The company paid $1,402,000 in dividends to its shareholders in 1989 compared to $1,286,000 in 1988, which represents a 9.02 percent increase.

The dividend payout ratio was 59.01 percent in 1989 vs. 42.64 percent in 1988.

Volunteer Bancshares Inc., is traded over the counter under the symbol (VOLB) and has been quoted on the NASDAQ system since August 1985. Principal market makers for the company stock are Equitable Securities Corp., Sterne Agee & Leach, Morgan-Keegan & Co., and J.C. Bradford and Co.

CINCINNATI (JAN. 24) BUSINESS WIRE - Belvedere Corp. and Emery Realty, Inc. announced Wednesday that they have signed an agreement concerning the leasing, management and retail renovation of the Carew Tower in downtown Cincinnati.

Under the terms of the agreement, Belvedere will immediately assume responsibility for leasing and management of the Carew Tower complex. In addition, Belvedere will be responsible for the retail renovation of the property in conjunction with the adjacent Tower Place project.

The agreement was signed today in the anticipation of joint ownership of the property.

The agreement was reached to expedite the Carew Tower renovations and help meet the financial needs of the projects.

Carew Tower currently has an 85 percent occupancy rate with major tenants including: the Greater Cincinnati Chamber of Commerce; Kohnen, Patton & Hunt; Thomas E. Wood, Inc.; Cors, Basset, Kohlhepp; Benesch, Friedlander, Coplan & Aronoff; Cincinnati Equitable Insurance and the Cincinnati Business Courier among others. Financial details of the agreement were not disclosed.

In making the announcement, Stuart Warm, president of the Belvedere Corp. said, ''our long- standing experience in quality office and retail renovation coupled with our sincere interest in downtown Cincinnati makes our involvement in the Carew Tower a logical choice for our continued growth. We look forward to the successful completion of the proposed retail renovations and to immediately start developing a close relationship with Carew Tower tenants.''

Belvedere and Emery anticipate the Carew Tower phase of the project to be completed on or before the opening of the Tower Place project.

''The identity and image of Carew Tower is unmatched by any facility in

Cincinnati,'' Warm continued.

''While there is a great deal of work to be done to bring the Carew Tower into the 21st century, we bring the commitment and experience to accomplish that goal in a manner which Cincinnati deserves for its most important building.''

''This agreement achieves one of Emery Realty's primary goals,'' said Addison Lanier II, of Emery Realty at today's signing.

''That goal being to bring in a strong, experienced local real estate developer who can take the Carew Tower property to the high level of quality exemplified by our Omni Netherland renovation.''

''We have been concerned with taking steps to ensure no further delays in Carew Tower projects,'' Lanier continued. ''Belvedere Corp. is well known for its ability to expedite renovations and development projects making these delays a thing of the past and accomplishing our goals quickly.''

Belvedere and Emery Realty reaffirmed their commitment to completing the retail renovation of the Carew Tower in the finest style. Work on this project has been underway since 1989 and is continuing without disruption.

''Belvedere looks forward to working with Faison on the Carew Tower retail project and his Tower Place project,'' said Warm. ''Faison's track-record of quality developments and their historic commitment to this project meet the standards set by Belvedere for this project.''

For over eighty years Belvedere Corp. and its affiliates have been involved in the growth and development of Cincinnati and other metropolitan areas including, most recently, Society Bank Center. Belvedere recently announced plans for a $100 million development, Central Parke, on the former General Motors plant site, in Norwood, Ohio.

Currently Belvedere owns and/or manages several million square feet of prime downtown office and retail space as well as hotels and suburban industrial and commercial properties.

Downtown Cincinnati facilities include the 496,000 square foot Society Bank Center on the corner of 7th and Walnut, the 100,000 square foot Tri-State Office Building at 432 Walnut, the 185,000 square foot 125 E. Court Street Building and the 120,000 square foot Executive Building at 35 East 7th Street.

CAMBRIDGE, MA. (JAN. 24) BUSINESS WIRE - American Science and Engineering Inc. announces Wednesday that it will extend the expiration date of its Stock Purchase Warrants to March 15, 1991.

The Stock Purchase Warrants currently expire on March 16, 1990. This extension will not change any other term or condition of the warrants.

AS&E stated that all warrantholders will be given the opportunity to accept the extended expiration date or, as already provided by the Warrants, receive one share of AS&E's Common Stock for 50 Warrants on the current expiration date.

Dr. Martin Annis, president of AS&E, stated that the extension was being offered in order to protect the interests of the warrantholders and that a letter would shortly be sent to each warrantholder informing them of their rights under the extension.

WASHINGTON (JAN. 24) COMTEX - Rose's Stores Inc. filed a Form 8-K with the NASD stating on Jan. 12, 1990, Mr. Jack E. Bush resigned as president and chief operating officer of the company. On the same date, Harold F. Compton resigned as senior vice president of operations and customers.

Rose's Stores reports both officers submitted their resignations to pursue other business opportunities.

Rose's Stores also announced in the 8-K filing that it is undertaking a reorganization of its executive personnel. It does not intend to replace either officer immediately. The duties of their offices will be assumed by Mr. Lucius H. Harvey II, chairman of the board and chief executive officer and by other current officers of the company.

On Jan. 12, 1990 Mr. David C. Rose was appointed to the new position of chief administrative officer of the corporation, retaining his title as senior vice president. Mr. R. Edward Anderson was appointed chief financial officer of the corporation in addition to his existing position as senior vice president.

WASHINGTON (JAN. 24) COMTEX - The 10-Q report filed at the NASD shows Robotic Lasers Inc. lost $17,713, or $0.00 per share, on no revenues for the quarter ended Nov. 30, 1989.

This compares with a loss of $25,283, or $0.00 per share, on no revenues for the same period in 1988.

The company is in the development stage and its funds have been provided from JEC Lasers Inc., Saddle Brook Investors and borrowings from an officer and shareholder. The company reports that due to a lack of funds, it has suspended operations.

The company further states that it is seeking to obtain funds through a public offering of securities and through other sources. If it is successful in these efforts, it intends to devote its resources primarily towards research, laboratory and development work of laser applications and the manufacturing, assembly, importing, exporting and selling of lasers and associated equipment and devices.

#90024c0104 01/24/1990 ~Comtex

WASHINGTON (JAN. 24) COMTEX - Provident American Corp. filed a form 8-K with the NASD stating on Dec. 29, 1989, it appointed Coopers & Lybrand as its independent accountants, replacing Ernst & Young.

Ernst & Young's report on Provident American's financial statements for the years ended Dec. 31, 198,7 and 1988, contained a going concern qualification because of Provident American's operating losses and deficiency in stockholders' equity.

In connection with the audits of the two most recent fiscal years and the subsequent interim period, there were no disagreements with Ernst & Young on any matter of accounting principles or practices, financial statement disclosures, or auditing scope or procedure.

-30- 891

#90024c0105 01/24/1990 ~Comtex

WASHINGTON (JAN. 24) COMTEX - Health Care Products Inc. filed a Form 6-K with the NASD announcing Jan. 15, 1990, that due to the recent increase in the price of the company's shares, its previously announced private placement of 158,154 Class A shares as payment for certain incurred indebtedness was cancelled.

Health Care further stated that in lieu of payment by means of treasury shares, it will settle these matters through the normal course of business.

-30- 635

#90024c0106 01/24/1990 ~Comtex

WASHINGTON (JAN. 24) COMTEX - The 10-K report filed at the NASD shows Aquasearch Inc. lost $183,333, or $0.01 per share, on no revenues for the fiscal year ended Oct. 31, 1989.

This compares with a loss of $65,060, or $0.00 per share, on no revenues in fiscal 1988.

The company has completed the development of a prototype proprietary system for culturing algae. Having completed development of the prototype system, the company is now considering a number of business applications for the technology. These applications include constructing systems in

joint venture agreements with fish farmers, the culture and sale by Aquasearch of specific varieties of algae for fish food, food coloring and medical or scientific purposes.

The company's executive office is located at 11828 Rancho Bernardo Road, Suite 180, San Diego, CA 92128 and its telephone number is (619) 487-1985.

-30- 1037

#90024c0107 01/24/1990 ~Comtex

WASHINGTON (JAN. 24) COMTEX - Landmark/Community Bancorp Inc. filed a Form 8-K with the NASD stating on Jan. 3, 1990, its subsidiary, Community National Bank, entered into an agreement with the Officer of the Comptroller of the Currency.

The agreement pertained to various aspects of Community National's operations and requires the development of a three-year capital program within 90 days after the date of the agreement. This program is to include Community National's specific plans to maintain its ratio of primary capital to total assets at not less than 7% or the minimum regulatory ratio, whichever is greater.

The agreement also provides that Community National shall not declare or pay dividends except with the prior written approval of the OCC district administrator. Community National has paid no dividends since its formation.

#90024c0108 01/24/1990 ~Comtex

WASHINGTON (JAN. 24) COMTEX - Eurocapital Corp. filed a Form 8-K with the NASD stating on Jan. 11, 1990, it dismissed Rachlin & Cohen as its independent accountants. Eurocapital states the reason for the dismissal was over a dispute with Rachlin & Cohen's professional fees charged to the company.

In connection with the audits of the two most recent fiscal years and the subsequent interim period, there were no disagreements with the former accountant on any matter of accounting principles or practices, financial statement disclosures, or auditing scope or procedure.

Rachlin & Cohen's report on the financial statements for the past two years contained no adverse opinion or disclaimer of opinion. During the same period, the financial statements of the company were qualified as to the outcome of an uncertainty (going concern), but otherwise were neither qualified or modified as to audit scope or accounting principles.

Eurocapital's executive office is located at 2151 LeJeuene Road, Suite 310,

Coral Gables, FL 33134 and its telephone number is (305) 442-2633.

#90024c0109 01/24/1990 ~Comtex

WASHINGTON (JAN. 24) COMTEX - The 10-Q report filed at the NASD shows Tel-Instrument Electronics Corp. lost $200,429, or $0.13 per share, on revenues of $506,961 for the quarter ended June 30, 1989.

This compares with a loss of $73,435, or $0.10 per share, on revenues of $525,926 for the same period in 1988.

-30- 465

#90024c0111 01/24/1990 ~Comtex

WASHINGTON (JAN. 24) COMTEX - Ultrak Inc. filed a registration statement with the NASD in which it proposes to offer 5 million shares of its common stock at an offering price of $0.60 per share. The company's common stock is traded on the NASDAQ system under the symbol "ULTK".

The company intends to use the proceeds from this offering to repay debt owed to First Interstate Bank of Denver and for expansion of working capital and general corporate purposes.

Ultrak markets, distributes, and sells products used in the electronic security industry for the protection of people and property against the threat of violence, theft and fire.

In a previous registration statement, Ultrak reported it was offering 3 million common shares.

The company's executive office is located at 660 Compton Street, Broomfield, CO 80020 and its telephone number is (303) 466-7333.

-30- 1048

#90024c0112 01/24/1990 ~Comtex

WASHINGTON (JAN. 24) COMTEX - Digital Sound Corp. filed a registration statement with the NASD in which it proposes to offer 2.50 million shares of its common stock with an additional 1.20 million shares being offered by selling shareholders of the company.

It is currently estimated the initial public offering price will be between $6.50 and $8.00 per share.

Goldman Sachs & Co. and Montgomery Securities are underwriting the offering.

Digital Sound designs, manufactures and markets general purpose platforms that can operate multiple voice processing applications simultaneously.

The company's executive offices are located at 2030 Alameda Padre Serra, Santa Barbara, CA 93103 and its telephone number is (805) 569-0700.

HONG KONG (JAN. 24) - The Hang Seng Index dropped 6.06 points to 2,756.39 Wednesday as inaction stayed the norm before a Chinese new year holiday here starting Friday.

Wednesday's turnover stayed at a low of 442 million Hong Kong dollars (56.6 million U.S.), unchanged from Tuesday's reading.

Dealers said trading was likely to remain dull Thursday. They added, however, that local share prices appeared to have bottomed out and there could be a rebound on Tuesday, when the market reopens after a four-day

break.

JAKARTA (JAN. 24) - A subsidiary of Southern Cross Ltd., a U.S. oil concern, has discovered oil and gas from its operation on the western Indonesian island of Sumatra, the state oil firm Pertamina said Wednesday.

Enim Oil Co. Ltd. made the discovery in the Lematang Block concession in southern Sumatra, Pertamina said in a statement.

Several tests conducted on the discovery Harimau No. 1 well flowed up to 1,408 barrels of crude oil and up to 3.43 million standard cubic feet (102,900 cubic metres) of natural gas a day, it said.

Enim Oil operates the area under a production-sharing contract with Pertamina with output split formulas of 85:15 for oil and 70:30 for natural gas, both in favour of the Indonesian firm.

TOKYO (JAN. 24) - Japan's Ministry for International Trade and Industry is to set up an association to promote Japanese investment in China, a MITI official said Wednesday.

MITI's initiative, which follows last week's decision by Tokyo to resume talks on loans to China, revives an idea proposed prior to the June military crackdown on pro-democracy protests in Beijing and on hold since then.

Some 110 Japanese firms have already agreed to take part in the association, which is due to be launched by the end of March, the officials said.

Tokyo was to discuss the association with the head of China's powerful State Planning Commission, Zou Jiahua, who is visiting Japan.

MITI gave its approval to setting up the association because of the improved situation in China following the lifting of martial law in Beijing earlier this month after nearly nine months, authoritative Japanese sources said.

The decision should pave the way for a normalisation of bilateral economic ties, the sources added.

Japan's Prime Minister Toshiki Kaifu told Mr. Zou during talks here Tuesday

that the two sides should improve relations and called on the Chinese official to lead the way in moves to open up the country's economy, the sources said.

Sino-Japanese trade rose in 1989 by 1.7 percent to reach 19.66 billion U.S. dollars, with a negative trade balance to Japan of 2.62 billion dollars.

Trade levels between the two are expected to remain stable in 1990 at about 19 billion dollars, Japan External Trade Organisation said recently, adding that Japanese exports to China were expected to fall by 20 per cent while Japan's imports of Chinese goods should rise by between five and seven percent.

#90024d2170 01/24/1990 ~French/German News Agency

Tokyo (JAN. 24) - Sales of condominium apartments in Japan increased by 16.1 percent in 1989 from the previous year to hit a record high of 128,259 units, a private real estate research agency reported Wednesday.

It was the second consecutive year in which condominium sales marked a record high, said the Real Estate Economic Institute.

In terms of sales price, sales jumped 39.5 percent to 4.80 trillion yen (33 billion dollars) with the average per-unit price rising 22 percent to 38.33 million yen (262,534 dollars).

#90024d2380 01/24/1990 ~French/German News Agency

Jakarta (JAN. 24) - Indonesia, one of the world's largest rubber producers, invited European Community investors here Wednesday to tap the vast opportunities in rubber-based manufacturing in the Southeast Asian region.

Industry Minister Hartarto issued the invitation while opening a two-day E.C.-Asean (Association of Southeast Asian Nations) investment workshop.

Indonesia together with Malaysia and Thailand are the world's biggest producers of natural rubber, yet their rubber was exported in the raw form mostly to the United States, Japan and Europe.

Hartarto said Indonesia was providing various incentives to encourage the growth of its export-oriented manufacturing plants which should not be overlooked by potential investors.

He said that of Indonesia's 1.3 billion dollars in earnings from rubber exports in 1988, only some 200 million dollars were finished rubber-based

products such as tyres, shoes and gloves.

Indonesia's Investment Board reported that Jakarta so far has approved 624.3 million dollars in foreign investment commitments for the development of 41 rubber-based manufacturing plants and another 1.3 billion dollars from domestic investors.

Board chairman Sanyoto Sastrowardoyo said he hoped the establishment of a unified E.C. market in 1992 could stimulate the flow of European investments into Indonesia.

Four E.C. countries - West Germany, Belgium, the Netherlands and Britain - had assigned investment advisors to assist Indonesia in promoting investments here, he added.

MOSCOW (JAN. 24) - The Soviet Union and Israel are to resume economic and trade relations after a 23-year break, Tass said Wednesday.

A protocol agreement was signed here by Dan Gillerman, chairman of the Federation of Israeli Chambers of Commerce, and Vladislav Malkievich, chairman of the Presidium of the Soviet Chamber of Commerce and Industry.

The two countries have not yet restored diplomatic ties, broken after the 1967 Arab-Israeli war. But the status of their chambers of commerce as non-government organizations allows them to resume economic relations, Mr. Malkievitch said.

The Soviet Chamber of Commerce plans to open an office in Tel Aviv later this year, while the Israeli federation is to do the same in Moscow.

Businessmen are to make visits to both countries, with an Israeli export fair scheduled here, Mr. Malkievitch said.

Sectors slated for cooperation include agriculture, pharmaceuticals and medical equipment, electronics and industrial waste disposal, he added.

Soviet-Israeli political relations have thawed in the past two years, with several Israeli government officials visiting Moscow in recent months.

#90024d2840 01/24/1990 ~French/German News Agency

TOKYO (JAN. 24) - Japan's Fujisawa Pharmaceutical Co. Ltd. said Wednesday it had signed a joint marketing agreement with Warner Lambert Co. of the United States allowing the two companies to sell each other's drugs.

The agreement allows Warner to market Fujisawa's antibiotic Cefdinir in the United States and Europe while the Japanese firm will be able to sell Warner's anti-epilepsy drug Gabapentin in Japan, South Korea and Taiwan, it said.

Cefdinir is expected to be put on the Japanese market later this year pending approval from the Health and Welfare Ministry, a company spokesman said. Sales are estimated at 20 billion yen (138 million dollars) a year.

Fujisawa said it hoped to be able to market Gabapentin in Japan within eight or nine years. Sales in Japan alone are estimated at seven billion yen (48 million dollars) a year, the spokesman said.

The Osaka-based drugmaker, an affiliate of Sanwa Bank Ltd. specialising in antibiotics, is one of Japan's leading pharmaceutical firms. Antibiotics accunted for 31 percent of its sales of 208 billion yen (1.43 billion dollars) in the year to March followed by digestive agents with 23 percent.

#90024d3480 01/24/1990 ~French/German News Agency

TOKYO (JAN. 24) - North Korea on Wednesday denied a Japanese newspaper report which said it would let a Taiwan trade mission visit the country.

"This is a completely unfounded false report," the official Korean Central News Agency (KCNA) said in a dispatch monitored in Tokyo. "We have never invited any Taiwan delegation nor do we have the intention to receive it."

The Nihon Keizai Shimbun reported Saturday that some 50 Taiwan businessmen would fly to Pyongyang on April 2 for a visit of up to 10 days.

The group hoped to encourage Taiwan exports of consumer goods and imports of North Korean herbal medicines and raw materials, the financial daily said.

KCNA said the report was "obviously motivated by a very sinister political purpose" and noted that Pyongyang had always recognised Beijing as the sole legitimate government of the Chinese people.

"It is quite unthinkable that we invite a Taiwan economic delegation or receive it," the agency said.

#90024d3490 01/24/1990 ~French/German News Agency

NEW DELHI (JAN. 24) - India and Czechoslovakia on Wednesday signed an agreement to step up bilateral trade to about 443 million dollars this

year, an increase of 26 per cent over the targeted amount in 1989.

The agreement, signed here by officials V.N. Kaul of India and Otomar Louda of Czechoslovakia, provides for some 221 million dollars of imports from Prague and the remaining as exports from New Delhi.

But officials said the actual trade turnover in 1990 would be more.

India's main exports to Czechoslovakia include coffee, pepper, cashew, tobacco, castor oil, iron ore and leather, while imports include fertilisers,

newsprint, alloy steel items, plastic materials and printing machinery.

#90024d3580 01/24/1990 ~French/German News Agency

TOKYO (JAN. 24) - Foreign orders for Japanese ships soared 91 percent from a year earlier to 7.89 million gross tons in 1989, climbing from 131 vessels to 204, the Japan Ship Exporters Association said Wednesday.

The association said the increase reflected a jump in new orders for oil tankers, particulalrly very large crude carriers (VLCC's).

Foreign shipping concerns ordered 77 oil tankers amounting to 4.29 million tonnes, 70 bulk carriers of 2.77 million tons, 42 cargo vessels amounting to 0.68 million tons and 15 other vessels of 0.16 million tons, it said.

Orders for VLCC's of more than 200,000 tons rose from five vessels a year earlier to 13 vessels.

The proportion of orders from the United States and Europe doubled in terms of tonnage from 17 percent a year earlier to 34 percent of the total, climbing from 20 vessels to 51, the association said.

Greek-registered orders grew from 2.7 percent of the total to 4.3 percent, rising from three vessels to seven, it added. Orders from Hong Kong fell from 4.9 percent to 3.9 percent of total tonnage although the number of ships ordered from the British colony rose from eight to 12.

#90024d3830 01/24/1990 ~French/German News Agency

STUTTGART, West Germany (JAN. 24) - West German sports car maker Porsche said Wednesday it more than doubled its net consolidated profit in the year ended in July to 54.2 million Deutsche marks (31.8 million dollars).

The net consolidated profit for the year to July 1988 was 25.3 million Deutsche marks.

Consolidated turnover in 1988-89 rose from 2.48 billion Deutsche marks to 2.53 billion.

Contracts for third parties increased 50 percent during the year, and are expected to account for 200 million Deutsche marks of a three billion mark turnover in the current financial year ending in July, chairman Heinz Branitzki told a press conference.

The company is anxious to boost this sector of its activities, which would represent a return to its original role, when Porsche did not produce its own cars, but developed models for others, notably the Volkswagen Beetle.

"Porsche is the only firm capable of developing a complete vehicle for a third party," Mr. Branitzki said.

Porsche found itself short of engineers last year, but resolved this by setting up a joint venture with Delta Design of the United States to share certain development projects.

The company said it was raising the dividend by one mark to 11 Deutsche marks.

#90024d3880 01/24/1990 ~French/German News Agency

Munich (JAN. 24) - Bayerische Motoren Werke (Bmw) said here Wednesday it achieved record sales and production figures in 1989, and said that the car market in Europe looked to remain robust at least until next autumn.

Presenting preliminary figures for last year, Bmw chairman Eberhard von Kuenheim said the group's turnover volume reached around 26.5 billion marks (15.7 billion dollars), some two billion marks above the 1988 volume.

Production reached 511,000 cars, well exceeding the 484,121 in 1988, and 24,000 motorcycles, slightly above the 1988 figure.

Kuenheim warned against exaggerated expectations about business prospects in East Germany. Bmw, with service centres in Dresden and East Berlin, planned soon to set up five more stations elsewhere in East Germany.

But the East German market would be a limited one for Bmw, he said. The company had no plans to introduce a ''Volks (peoples)-Bmw'' for East Germany.

#90024d4140 01/24/1990 ~French/German News Agency

BRUSSELS (JAN. 24) - France has been authorised to bar more than three-quarters of a million car radios from South Korea, Japan, China and Taiwan, the European Economic Community's executive announced Wednesday.

It said it was allowing the ban, valid until June 30, in order to protect French manufacturers who are reeling from an influx of cheaper-priced Asian imports.

French production of car radios plummeted from 2.392 million sets in 1986 to 1.984 million in 1988, while market share fell from 21 percent in 1986 to 19 per cent in 1988, the European Commission said.

Sales of imported radios, meanwhile, rose from 1.215 million units in 1986 to 2.320 million in 1988, while their market share rose from 50 percent to 65 percent, it added.

The ban will not apply to direct imports but to car radios that enter the French market via other EEC countries.

#90024d4750 01/24/1990 ~French/German News Agency

MUSCAT (JAN. 24) - Oman and Poland have agreed to establish diplomatic relations at the level of ambassador, it was officially announced here.

Both countries pledged to set up ties that respected "peaceful coexistance, mutual respect and non-interference in the internal affairs of one another " an official statement said.

Oman and three other members of the six-nation Gulf Cooperation Council -- Kuwait, Qatar and the United Arab Emirates -- also maintain relations with the Soviet Union.

Saudi Arabia and Bahrain have no diplomatic relations with Moscow or any other east bloc country.

#90024d4850 01/24/1990 ~French/German News Agency

BUCHAREST (JAN. 24) - About 300 people demonstrated here Wednesday against a decision by the ruling National Salvation Front to stand in

legislative elections scheduled for May 20.

The demonstrators, who included supporters of Romania's two leading independent parties, the Liberal Party and the Peasants' Party, gathered outside the headquarters of the National Salvation Front Council in central Bucharest and shouted slogans hostile to its president, Ion Iliescu.

Some of them carried banners reading: "Doina Cornea for president".

Mrs. Cornea, one of the country's best-known dissidents under the former regime of Nicolae Ceausescu, resigned from the council Tuesday in protest at the front's decision to put up its own candidates in the elections.

The demonstration was called without the required 48 hours notice to the authorities. Police restricted access to the square where the demonstration was held. No violence were reported.

The Liberal Party and the Peasants' Party have called a demonstration for next Sunday to protest at the Council's "monopoly on politics" and its choice of May 20 for the poll, which they say will leave them too little time to campaign.

#90024d4950 01/24/1990 ~French/German News Agency

AMSTERDAM (JAN. 24) - The Dutch central bank made it clear Wednesday it intended to pursue a policy independent of West Germany's Bundesbank, while reaffirming the guilder's link with the Deutsche mark.

"If permitted by the guilder's exchange rate we shall not, of course, hesitate to lower interest rates independently of developments in (West) Germany," bank president Wim Duisenberg told the Amsterdam World Trade Center Association.

But he also stressed that "the cornerstone of the policy pursued by the Nederlandsche Bank is the maintenance of a fixed link between the guilder and the Deutsche mark."

"We seek to ensure the lowest possible level of rates which is considered acceptable from a domestic and external monetary viewpoint."

The Dutch central bank generally follows the monetary policy line taken by the Bundesbank, largely due to the fact that a quarter of its foreign trade is with West Germany.

But twice in the past two weeks the Dutch bank has lowered its intervention rate by 0.1 percent without any similar move by the Bundesbank.

The Dutch bank's intervention rate had stood at 8.5 percent at the beginning of January, its highest level in 10 years.

#90024d5420 01/24/1990 ~French/German News Agency

SOFIA (JAN. 24) - Details of a proposed constitution purged of Marxist-Leninist ideology and giving Bulgaria a form of market economy were published Wednesday by the official news agency BTA.

The document, which an informed source said would go to parliament Thursday but probably not be voted on for another month, also separates legislative, executive and judiciary powers, and grants freedom of religion.

Bulgaria is to have a "socialist market economy", introducing various forms of private and state ownership.

An article in the present constitution describing the country as part of a "socialist world economic system" has been scrapped, as has state monopoly of foreign trade.

The four-man Council of state, highest body in the land, is to be replaced by a "president of the republic", elected by parliament, and a vice-president.

The president must be at least 40 years old and is allowed no more than two terms in office.

Parliament has already scrapped the communist party's leading role.

Under the new constitution, the number of deputies in the National Assembly, or parliament, is to be cut from 400 to 300.

"The people's Republic of Bulgaria" is described as "a state of socialist and democratic law", while the terms "democratic centralism" and "socialist internationalism" are to disappear from basic law.

Education no longer needs to conform to the "communist spirit", based on "Marxist-Leninist ideology", and Bulgarians are to be allowed to embrace a religion and worship as they wish.

Changes enshrined in the new constitution are to go into effect before Bulgaria's first free elections in 40 years.

Although the communist party has proposed holding elections in May, the opposition prefers November, saying it needs more time to campaign.

A survey taken by the Academy of Sciences and reported on television Tuesday night gives the communists 30.3 per cent of the vote and the opposition only 13.6 per cent.

An extraordinary congress of the communist party is scheduled to begin Tuesday.

#90024d5550 01/24/1990 ~French/German News Agency

TOULOUSE, France (JAN. 24) - The Soviet carrier Aeroflot ordered five Airbus A310-300 airliners Wednesday and took options on another five in a deal believed by industry sources to be worth around 370 million dollars.

The deal, the first between the west European consortium Airbus Industrie and the Soviet Union, will make Aeroflot its biggest customer in eastern Europe, Airbus said at its head office in this southwestern city.

Soviet deputy civil aviation minister Alexander Aksenov was present with Jean Pierson, managing director of the Airbus consortium, at the signing of the contract. The exact value of the deal was not announced.

"This is just a small step in a partnership that is certain to expand in the future, for at least 25 years," Mr. Aksenov said.

Mr. Pierson said he was "delighted to welcome the biggest airline in the world into the club of Airbus clients".

The five airliners are to be delivered between November 1991 and June 1992. Aeroflot intends to use them on its services to the Far East, to Europe and to North America, Soviet sources said.

Airbus made its first sales to the east bloc last year when the East German airline Interflug bought three A310 airliners and the Czechoslovak airline CSA placed an order for two A310s.

The Airbus Industrie consortium includes Aerospatiale of France, MBB of West Germany, British Aerospace, and the Spanish company Casa.

Including the latest deal, Airbus has sold 612 Airbus A300s or A310s to 71 different customers.

The Airbus A310-300, a long-distance passenger airliner that seats 193 and has a range of about 8,000 kilometres (5,000 miles), was put into service in 1985.

MOSCOW (NOV. 24) - Ships of the Baku oil fleet, enforcing a protest blockade of the Azerbaijani capital Baku, exchanged fire with land-based Soviet troops after opening fire on port installations Wednesday, Soviet television said.

Two soldiers were wounded in the shooting, the television said.

A spokesman for the nationalist Azeri social-democratic group Leila Yunusova, contacted by telephone, told Agence France-Presse that soldiers fired cannon from the city's Lenin square in the direction of the port for some 40 minutes.

#90024k0124 01/24/1990 ~Japanese News Agency
NEW YORK (JAN. 25) KYODO - THE SOVIET UNION HAS DECIDED TO SUSPEND FOUR MAJOR GAS-BASED PETROCHEMICAL PROJECTS INVOLVING JOINT VENTURES AMONG JAPANESE, U.S., AND EUROPEAN CONCERNS, THE PREMIER ISSUE OF WORLD GAS INTELLIGENCE (WGI) REPORTED WEDNESDAY.

THE NEW MONTHLY NEWSLETTER BEING LAUNCHED BY THE PUBLISHERS OF PETROLEUM INTELLIGENCE WEEKLY SAID A MULTIBILION DOLLAR POLYPROPYLENE AND POLYETHELENE COMPLEX PLANNED FOR TENGHIZ IN NORTHWESTERN KAZAKHSTAN WITH U.S.-BASED OCCIDENTAL PETROLEUM CORP., ITALY'S ENICHEM AND MARUBENI CORP. OF JAPAN, HAS BEEN SUSPENDED.

THE SOVIET GOVERNMENT IS SUSPENDING THE JOINT VENTURES, WHILE PURSUING INVESTMENTS IN TOBOLSK AND SURGUT IN WESTERN SIBERIA INVOLVING JAPAN'S MITSUBISHI CORP. AND MARUBENI CORP., IT SAID.

THE PROJECTS ARE BEING PLACED ON HOLD AS THE NEW SOVIET BUDGET PLACES GREATER EMPHASIS ON PRODUCTION OF CONSUMER GOODS RATHER THAN SPENDING HARD CURRENCY ON HEAVY INDUSTRY.

ENVIRONMENTAL CONCERN BEING RAISED IN LOCAL COMMUNITIES WHERE THE PROJECTS WERE PLANNED WAS ANOTHER FACTOR IN THE DECISION, THE NEWSLETTER SAID.

#90024m0001 01/24/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JAN 24) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

Commenting on the sharp tumble in bond prices, STEVEN WOOD, economist at AMERICA CAPITAL MARKETS GROUP in San Francisco, says, "That's a sizable move for such a short time." ("USA Today", 1/24)

DREXEL'S MARIA FIORINI RAMIREZ says that the discrepancy between the expected and real demand for the REFCORP 40-year bonds may have reflected the unfamiliarity of 40-year bonds. "When you have something new like this, it's hard to tell where demand will come from." (WSJ, 1/24)

"The message the bond market is sending is rates are headed higher, not lower, at least for the next few weeks," says A.G. EDWARDS' ALFRED GOLDMAN. (UPI, 1/23)

"Basically, this is a case where fundamentals haven't changed much," says ROBERT HATCHER, currency dealer at BARCLAYS BANK PLC. "People shied away from 1.73 [marks] pretty violently, and we won't retest that unless we get good [U.S.] economic numbers or Eastern Europe deteriorates dramatically." ("Investor's Daily", 1/24)

DOUGLAS MADISON, corporate trader at BANK OF AMERICA in Los Angeles, does not foresee sustained bullishness for the dollar and recommends, that after the U.S. currency climbs because of safe haven considerations, investors should use the opportunity to go short dollars. "You take away that political aspect and suddenly people refocus on economic fundamentals. The U.S. just doesn't stack up well" against West Germany and Japan. Mr. Madison also sees signs that the mark is poised for another move up. (WSJ, 1/24)

"The market is fairly bearish on the dollar and we could see it trade lower," says ROBERT MORRISSEY, a currency trader at the BANK OF BOSTON. (NYT, 1/24)

THE ECONOMY:

"Is the U.S. economy becoming less vulnerable to shifts in the Federal Reserve's money-supply and interest-rate policies?" asks "Investor's Daily". "We've had a diffusion of policy levers," says GAIL FOSLER, chief economist for the CONFERENCE BOARD. "You really have to wonder how much control the Fed actually has." But DONALD HAYS, a devoted Fed watcher and chief investment strategist for WHEAT FIRST BUTCHER SINGER, based in Richmond, Va. discounts theories about 1 the Fed's declining influence. "I just in gut do not believe it. I've read articles my whole life about how conditions have changed, and most of the time it just wasn't the case." ("Investor's Daily", 1/24)

"The Fed's policy is to restrain inflation. There is no doubt that," says NIKKO SECURITIES' STEPHEN AXILROD who believes that there are "differences of opinion" between the Bush administration and the Fed. Mr. Acuff believes that inflation is a problem , but that it needs to come down gradually so that we don't tip over into a recession. He says, "I think it is about 50 - 50 that we can avoid" a recession. (FNN's "Marketwrap", 1/23)

FED VICE CHAIRMAN MANUEL JOHNSON quells any fears from yesterday's declines in treasuries. "None of these financial market conditions suggest further weakening in the economy looking forward. So I think as I pointed out, that bears a cautionary note in terms of monetary policy but it doesn't necessarily pre-empt any further easing." (CNN's "Business Morning", 1/24)

IN WASHINGTON:

FEDERAL RESERVE BOARD CHAIRMAN ALAN GREENSPAN says he doesn't think last weeks calls by the administration to lower interest rates were made to pressure the Fed. He says he views the remarks as meaning lower rates

benefit the nations economic health. "We all agree on that. But we may disagree on the methods to achieve those goals." Mr. Greenspan added that it would be "inappropriate" for the White House to pressure the fed into cutting rates. ("USA Today", 1/24)

A social security tax cut will be studied by the SENATE FINANCE COMMITTEE amid signs of growing support of SENATOR DANIEL MOYNIHAN's plan. The proposed cut, which is becoming the focus of this year's fiscal debate, could threaten other pending tax-cut proposals, including PRESIDENT BUSH's reduction in capital gains taxes and SENATOR LLOYD BENTSEN's plan for expanding IRAs. (WSJ, 1/24)

DEPUTY TREASURY SECRETARY JOHN ROBESON told the HOUSE BANKING COMMITTEE that $50 billion allocated in the S&L bailout bill might not be enough to rescue all insolvent S&Ls. This was the first such admission by an administration official though independent experts had predicted this earlier. ("USA Today", 1/24)

-30- 4800

#90024m0002 01/24/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JAN 24) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2)MONEY & ECONOMY.

WHAT'S AHEAD:

A 600 point drop in the NIKKEI is blamed on plunging U.S. T-bond futures and nervousness about U.S. stocks. ... FORD and MAZDA plan to jointly produce compact cars in Europe, probably West Germany. This would make Mazda the first Japanese automaker to manufacture on the European continent. ... WARNER-LAMBERT says it can turn starch into a biodegradable plastic that can be molded into such products as knives, forks and coffee cups. The product, called Novon, should be on the market within three years. ... FORD MOTOR COMPANY tells its 55,000 workers not to expect merit raises this quarter because of needs to cut costs. ... HILTON HOTEL stock plunges 8 3/4 amid rumors of restructuring and decreasing chance on takeover by JMB REALTY. ... PERKIN-ELMER is negotiating to sell a semiconductor-equipment business to the SILICON VALLEY GROUP, possibly ending speculation that the unit would be purchased by a Japanese firm. ... BIRMINGHAM STEEL announces that HARBERT CORP.'s buy out attempt for $525 million has been scuttled because a major bank lender has backed out of the deal.

FROM THE BULLS:

"What's good in the market is that earnings expectations are being lowered " says ANDREW ADDISON of the "Addison Report". "That will ultimately be

positive as the Fed sees signs of a weakening economy and lowers interest rates." Mr. Addison is also encouraged by high cash levels and strong bearish sentiment: "Once the market reaches a low and we see the technical indicators stop deteriorating, then we'll have the pieces in place for a much better market as we come into the second quarter." (FNN, 1/24)

FROM THE BEARS:

"Longer-term this market is sick and is going to disintegrate," says STAN WEINSTEIN, editor of "The Professional Tape Reader" citing the fact that few stocks have rallied since the year began. "I don't think a rally could do much more than 2700 and then the next decline will break the 200-day [moving] average." (NYT, 1/24)

"It's just a matter of how ugly or panicky the market will get this morning," says SHEARSON's MICHAEL BENSON, from London where U.S. blue chips are down 1-1 1/2 points. "Anyone in this market is going to need a snorkel." He says 2580 should be support for the market on the opening today: "The big question is, if we don't open above 1 [2580], it's no longer support and we're in the freefall -- then it's a matter of how emotional the market wants to get." Benson predicts some delayed openings today to calm sellers and make "the market not look quite as low as it is." (FNN, 1/24)

"The correction ... could very well resume and carry us down another 50 to 100 points in the next couple of months," says ARNOLD KAUFMAN, editor of STANDARD & POOR'S "The Outlook" newsletter. ("USA Today", 1/24)

"These lifts are fake-out rallies and shouldn't be trusted," says ALFRED GOLDMAN, market strategist with A.G. EDWARDS & SONS, INC. "Yesterday showed the market has more work to do on the downside. From this level I don't think the market has the momentum or spirit to take it up. The best place to be is on the sidelines with cash, waiting for a sign of a bottom, but I don't see it yet." (UPI, 1/23)

STOCK MARKET:

"I think a lot of investors are willing to invest in the face of various uncertainties, but in order to do that they demand a much better value and with the backup in interest rates that we have been getting more and more value will probably evolve," says SMITH BARNEY's MARSHALL ACUFF. Mr. Acuff believes that the technicals have been damaged and will need time to heal. He agrees that the trend in the market is on the downside for the moment and says this suggests that "probably over the near-term we are going to have lower levels with periodic rallies." (FNN's "Marketwrap", 1/23)

Analysts are calling for a significant decline in the market by year- end. KIDDER PEABODY's DENNIS JARRETT explains, "When we see the market having down days there is very little bargain hunting. That's the sign that is most worrisome because that's something that can go on for prolonged periods." M. KIMELMAN's BERNADETTE MURPHY says we're already in a correction. "The market has been losing momentum. We've had lower volume. In August we had over 300 new highs. Yesterday we had over 100 new lows. In contrast the market has been losing momentum and I think this will be a continuing situation." (CNBC's "Business View", 1/23)

SHEARSON's JACK BAKER expects a drop in the Dow because of yesterday's treasuries auction. "If you equate [the auction] with what happened in the Dow I would say Tokyo probably construed this as very negative also and I would think the market should open below 2575 tomorrow. With this calamity coming at a time when we don't really need any bad news, I would think it would be a double-whammy and both will follow suit." (CNBC's "Business View", 1/23)

Tuesday's market recovery "is helping calm some of the ruffled feathers on Wall Street," says JAMES SOLLOWAY, chief economist at ARGUS RESEARCH. "But it's premature to say all the damage is over with. The broader market is still showing weakness." ("USA Today", 1/24)

"Another 100 points down [on the DJIA] would make me buy," says BOSTON CO. ADVISERS' J. DAVID MILLS, but price-earnings ratios of many stocks are still to high now. (WSJ, 1/24)

"It looks like the market finally got its technical rally off the ground," says PRU-BACHE's HILDEGARD ZAGORSKI. "I don't know whether the market is going to go anywhere or if this was just a one-day affair." ("Investor's Daily", 1/24)

"Nothing goes down in a straight line," says MABON, NUGENT trader EDWARD SHOPKORN who sees the recovery yesterday as little more than a brief respite from the overall market correction. ("USA Today", 2 1/24)

STOCK TIPS:

"We are midway through the correction: a little too late to sell some stocks and too early to buy," says GAIL DUDACK, stock market analyst at S.G. WARBURG SECURITIES. She says investors should start selling consumer non-durable stocks, such as COCA-COLA, to raise money for a better buying opportunity later. If investors want to start committing money to stocks, she recommends defensive issues such as gold stocks or stocks with hefty dividends such as TEXACO and TEXAS UTILITIES. (WSJ, 1/24)

Which takeover deal will be hit next? CNN's DAN DORFMAN lists and comments on some vulnerable stocks: Trading at 25 3/4, STRIDE RITE's takeover value is only $23 which is much less than a talked-about $32 per share buyout for the shoemaker. LOCKHEED, which depends on the U.S. government for 86% of its sales is also vulnerable -- "Make sure you've got a good defense if you own this defense company ... Uncle Sam is talking peace, not war." OHIO CASUALTY has an excessively high percentage of its portfolio in junk bonds. UAL is vulnerable to another 10-15 point decline if no deal materializes. (CNN's "Moneyline", 1/23)

ROBINSON-HUMPHREY CO. recommends stock in SHAW INDUSTRIES INC., one of the worlds biggest carpet makers. Their earnings should grow 15% to 18% annually during the next few years. Their dominate position in the market and the cost cuts generated by the company owning its own yarn and distribution centers help the company to maintain low operating costs. ("USA Today", 1/24)

BIOMET CORP. fell 2 1/4 to 25 3/4 and STRYKER CORP. dropped 1 5/8 to 22 7/8, after CHICAGO CORP.'s MICHAEL HARSHBARGER cut his short term rating to a "hold" from a "buy", on the two orthopedic implant manufacturers. "The bloom is off the rose from procedures going from none to current levels. The growth period is finished," says Harshbarger. ("Investor's Daily", 1/24)

MINORCO, a highly liquid holding company, is a very attractive stock for this market, says ANDREW ADDISON of the "Addison Report". With a net asset value of $24 per share, Mr. Addison projects the stock to move up to the 19 - 20 area from its current 16 3/4. He also likes CANADIAN PACIFIC which will be spinning off its real estate assets to shareholders. (FNN, 1/23)

JANNEY MONTGOMERY SCOTT's EUGENE PERONI, JR. says, "I would be very careful here" about investing since we are at a tentative support level of about 2600. It is not certain that this level will hold. Mr. Peroni sees volatility and listlessness in the market over the next several months. He does, however, find a few selected issues in which to invest. These companies all are very attractive long-term. He recommends: PROCTER & GAMBLE, which has a good basis from which to grow when the market stabilizes; SUN ELECTRIC, which is a speculative play with a good base and potential to benefit from environmental concerns; SEAGRAM CO. LTD., which has a very aggressive management and a big position in DUPONT. Mr. Peroni sees more {opportunities in four to five weeks when the market reaches a "more tradable bottom." (FNN's "Marketwrap", 1/24)

LEONARD BOGNER, chemical analyst at PRU-BACHE SECURITIES, likes MONSANTO on higher earnings in a soft industry. He also recommends ETHYL and AMERICAN CYANAMID -- "ready to break out." (CNN's "Business Day", 1/24)

DREXEL puts out a "buy" recommendation on AMR, DELTA and SOUTHWEST. 3
MERRILL LYNCH downgrades ARTIC ALASKA FISHERIES and cuts '90 earnings projections. (NBR, 1/23)

Commenting on the problems plaguing BOLAR PHARMACEUTICAL CO. with both the FDA and the SEC, DAVID SAKS of WEDBUSH MORGAN SECURITIES says, "The stock will fall because of the perception that earnings will drop. What's worse is that the credibility of management has been severely damaged." ("USA Today", 1/24)

#90024p0003 01/24/1990 ~PR Newswire

SAN DIEGO (JAN. 24) PR NEWSWIRE - BSD Bancorp Inc. (AMEX: BSD) today reported a 46 percent gain in earnings to $3,955,000, or $1.13 per share for the year ended Dec. 31, 1989, from $2,716,000, or $.78 per share for 1988.

Earnings for the fourth quarter were $1,405,000, or $.40 per share compared to $1,172,000, or $.34 per share for the fourth quarter of 1988.

Reflecting on the company's year, James S. Brown, chairman, stated: "1989 was an eventful year for BSD Bancorp. All five of our banks are anticipated to be rated 'premier performers' for the year by the Findley Reports. Because of our strong performance, financial position and favorable outlook, our stock price more than doubled in 1989 and we paid two five cent per share dividends.

"In addition," added Brown, "we purchased the remaining 47 percent of Bank of La Costa and announced the spinoff of Datatronix Financial Services to our shareholders." Brown noted the spinoff of Datatronix was facilitated by BSD Bancorp's holding company structure and representative of the company's strategy of value creation.

Commenting on BSD Bancorp's performance, Brown said: "We attribute our third consecutive year of record earnings to a number of factors. In particular, these results reflect a higher level and more favorable mix of assets, as well as a lower level of loan loss provision reflecting continued improvements in loan quality.

"Also," noted Brown, "in addition to The Bank of San Diego, two more banks -- Coast Bank and American Valley Bank -- reached the milestone of $100 million in assets. The rapid growth in the San Diego area, coupled with the concentrated marketing efforts of each of our subsidiaries contributed to this accomplishment," he added.

As of Dec. 31, 1989, BSD Bancorp had total consolidated assets of $425 million, compared to $355 million at 1988 year-end. The total loan

portfolio grew to $316 million at the close of 1989, from $266 million at the end of 1988. The allowance for possible loan loss at the end of 1989 was $4.2 million, or 1.3 percent of gross loans. This compared to $4 million, or 1.5 percent of gross loans at the prior year-end.

BSD Bancorp Inc. is a diversified holding company serving banking and trust markets predominately in Southern California.

CONTACT: Vito J. Guarino Jr., president and COO, 619-237-5365 or Marilyn Creson Jones, CFO, 619-237-5366, both of BSD Bancorp

#90024p0004 01/24/1990 ~PR Newswire

ENGLEWOOD, COL (JAN. 24) PR NEWSWIRE - Marquest Medical Products Inc. (NASDAQ: MMPI) today reported record revenues of $18,068,000 for the fiscal third quarter ended Dec. 30, 1989.

This compares to revenues of $15,538,000 for the like period last year and represents a 16 percent increase in revenues over the prior year. The operating income produced by these revenues, prior to interest, equity, currency and other income and expenses, was $1,576,000 for the third quarter, compared to $876,000 for the like quarter last year, an increase of 80 percent.

The third quarter revenues this fiscal year produced earnings of $478,000, or 11 cents per share, compared to a loss in the third quarter last fiscal year of $407,000, or 10 cents a share. These earnings were affected by a pre-tax foreign currency transaction loss of $264,000. This compares to a currency loss of $862,000 for the like period last year. This quarter's currency loss reflects the recent weakening of the U.S. dollar against the Swiss currency and equates to approximately 4 cents per share. The company is protected against additional currency losses by means of a hedge that is in place.

The third quarter earnings this year also reflect the company's expensing of approximately $215,000 in fees associated with hedging its Swiss Franc debt. These expenses were offset to some extent by a pre-tax book profit of $78,000 resulting from the company buying its bonds back out of the Swiss market at a discount.

For the nine months just ended, the company experienced record revenues of $52,749,000 compared to revenues of $45,105,000 for the like period last year. This represents a 17 percent increase in revenues over the like period last year. The operating income that resulted for the nine months this year was $4,569,000, compared with $2,830,000 for the like period last year, an increase of 61 percent.

The nine-month period results produced earnings of $1,912,000, or 46 cents per share, compared with $2,141,000, or 54 cents per share from the prior fiscal year. This year's earnings were affected by the pre-tax foreign currency loss of $264,000, compared to a currency gain of $1,685,000 in the like period last year.

Marquest Medical Products is a leading innovator and manufacturer of specialty respiratory and anesthesia disposable products, a $500 million market growing at 15 percent a year.

#90024p0017 01/24/1990 ~PR Newswire

HANCOCK, Mich. (JAN. 24) PR NEWSWIRE - D&N Financial Corporation (NASDAQ: DNFC) today reported a net loss of $9.4 million, or $2.57 per share, for the year ended Dec. 31, 1989. In 1988, D&N earned $13.3 million, or $3.65 per share. For the fourth quarter of 1989, D&N recorded a net loss of $11.7 million, or $3.20 per share, compared with net income of $2.6 million, or $0.72 per share, in the fourth quarter of 1988.

The financial results are primarily attributable to a previously announced restructuring of D&N's balance sheet and additions to reserves for possible loan and real estate losses. These actions resulted in an aggregate after-tax charge to earnings of $11.9 million in the fourth quarter of 1989.

"Results for 1989 largely reflected an action plan to increase D&N's future profitability and to decrease interest rate risk," said Kenneth D. Seaton, chairman and chief executive officer. "The financial restructuring effectively retired certain high cost funding sources and replaced a portion of that funding with lower rate borrowings, sold certain fixed rate assets and acquired variable rate assets," he added.

Seaton also stated that D&N's capital ratios continue to exceed all minimum regulatory requirements. D&N Savings Bank, FSB, the wholly owned subsidiary of D&N Financial Corporation, had ratios of tangible capital to total assets of 2.8 percent, core capital of 4.3 percent, and risk-adjusted capital of approximately 6.6 percent at Dec. 31, 1989. Federal regulations require tangible, core, and risk-adjusted ratios of 1.5 percent, 3.0 percent, and 6.4 percent, respectively. At Dec. 31, 1989 stockholders' equity was $106.7 million, or $28.96 per share.

The restructuring efforts in the fourth quarter of 1989 included the retirement of $202 million of high cost interest rate swaps, part of which was replaced with $90 million in longer term financing at lower rates.

Also, D&N sold $105 million of fixed-rate loans and securities and committed to purchase $100 million in variable-rate loans. D&N incurred a pretax charge of $6.9 million to retire the interest rate swaps and a pretax loss of $1.1 million on the sale of fixed rate assets.

Separately, D&N recorded a provision for possible loan and real estate owned losses of $10.4 million during 1989, including a fourth quarter charge of $8.4 million. "We are committed to maintaining adequate loss reserves, and felt it was prudent to strengthen our reserves given the softness in the commercial real estate market," noted Seaton. He added that at Dec. 31, 1989, the total reserves were $17.3 million, or 37.79 percent of non-performing assets and 1.27 percent of total loans (excluding mortgage-backed securities) and real estate owned. At year end 1988, loss reserves were $8.0 million, representing 27.04 percent of non-performing assets and 0.58 percent of total loans and real estate owned.

Net interest income after provision for loan losses in 1989 was $28.5 million, compared with $45.0 million reported for 1988, as a result of the increased loan loss provisions, generally higher short term interest rates and flatter yield curve during 1989. Total non- interest expenses in 1989 were $42.0 million, compared with $36.8 million in 1988, with the difference due mainly to employee severance costs, expenses incurred in connection with productivity improvement programs and retail deposit acquisition programs, and provisions for losses on real estate owned.

Seaton said that D&N's emphasis on retail banking activities during 1989 led to strong mortgage loan production of $343.6 million and consumer loan volume of $101.1 million, both in excess of the 1988 levels. At Dec. 31, 1989, D&N had assets of $2.0 billion, total loans and mortgage-related securities of $1.8 billion, and deposits of $1.2 billion.

Seaton further described the expected benefits of the company's restructuring and commented on additional plans to improve future profitability:

"Across a broad range of interest rate scenarios, our net interest margin is projected to be approximately 10 percent greater in 1990 than if the restructuring had not occurred, and is expected to show further improvement in future years.

"We will continue to pursue an expense control program begun in 1989, which includes staff reductions through attrition and retirement, and more productive operating systems. This is expected to hold 1990 operating costs below the 1989 level.

"Our continued emphasis on core retail banking activities should lead to greater profitability as we generate lower cost funding from our growing

checking account base, and produce assets such as adjustable- rate mortgages and consumer loans that meet our portfolio needs.

"Overall, D&N's goals are to operate the most productive retail banking franchise we can, to maintain solid asset quality, and to build shareholder value through steadily increasing core earnings," he concluded.

D&N Financial Corporation, through its subsidiary, D&N Savings Bank, FSB, has 40 financial services branches and agency offices throughout Michigan's Upper Peninsula and mid-Michigan, as well as 12 mortgage banking offices in Michigan and four other states. D&N is the fourth largest savings institution in Michigan based on asset size.

ROLLING HILLS ESTATES, CA (JAN. 24) PR NEWSWIRE - Panatech Research and Development Corp. (NASDAQ: PNTC) today reported operating income of $268,200 for the three-month period ending Dec. 31, 1989, and net income of $149,900, or $.035 per share. For the comparable period ended Dec. 31, 1988, the company reported an operating loss of $135,700 and a net loss of $62,900, or $.017 per share.

The results reflect the acquisition of Allied Interstate Datanet Corp. (AIDCO) in August 1989, and of ASM Company in October 1989. AIDCO designs installs and maintains data networking and communication systems. ASM manufactures patented accessories for high pressure spraying equipment. Prior to these acquisitions Panatech had no operating activities since the sale in September 1988 of its Dutch subsidiary, Duracarb, b.v.

Net income in the nine months ended Dec. 31, 1989, was $60,200 or $.015 per sh r4 on net sales of $4,566,700. In the prior year the company lost $165,100 on continuing operations but registered non-recurring gains of $645,300 from the discontinued operations and sale of Duracarb.

"It's important to remember that Panatech has been financially very strong " said Arthur J. Rosenberg, chief executive officer of the company. "That strength has allowed us to acquire two excellent operating companies. AIDCO has a solid foundation in the western datacomm market and is well positioned to expand nationally. ASM occupies a classic, high-margin niche, and will contribute to the financial growth of the company."

Panatech was originally formed in 1982 as a research and development management company.

SUNNYVALE, CA (JAN. 24) PR NEWSWIRE - Identix Inc. (OTC: IDXX), manufacturer of electronic finger scanning systems for identity verification and security applications, today announced results for the second quarter of fiscal 1990, ended Dec. 31, 1989.

Revenues were $306,000 for the quarter, with a net loss of $768,000, compared to revenues of $276,000 and a loss of $706,000 from last quarter. These results compare to revenues of $524,000 and a loss of $842,000 for the like quarter in 1989.

The loss per share dropped two cents to eight cents per share on 9,592,661 weighted average shares, compared to 10 cents on 8,659,331 weighted average shares in the second quarter of fiscal 1989.

During this quarter, Identix has continued to devote a considerable amount of its resources to testing procedures and production requirements for a contract from the California Department of Justice that would be worth between $7 million and $40 million.

Identix president, Randall Fowler said that the financial performance of the company was not as strong as expected because contract details with the state proceeded slower than originally anticipated. "The California contract will be the largest ever in the biometric industry. During this quarter, we also intend to concentrate more of our resources on closing sales of our basic biometric equipment through our direct sales force as well as with system integrators and Value Added Resellers (VARs)."

Identix, headquartered in Sunnyvale, designs, manufactures and markets a family of identity verification systems that combine high accuracy with user friendliness. These systems are used in a wide range of security applications in the public and private sectors.

The company's stock is traded over the counter (symbol: IDXX) and is listed on the Pacific Stock Exchange (symbol: IDX).

#90024p0025 01/24/1990 ~PR Newswire

NEW YORK (JAN. 24) PR NEWSWIRE - Bristol-Myers Squibb Company (NYSE: BMY) today reported record sales for the year and the fourth quarter ended Dec. 31, 1989.

For the year, sales increased 7 percent to a record $9.2 billion, and fourth quarter sales increased 10 percent to a record $2.4 billion.

Richard L. Gelb, chairman, said that domestic sales for the year increased 7 percent while international sales increased 8 percent, and for the quarter domestic sales increased 10 percent while international sales increased 11 percent. The effect of exchange rate fluctuations negatively impacted total company sales by 2 percent for the year and by 1 percent for the quarter.

The company announced on Jan. 9, 1990, a fourth quarter 1989 charge of $740 million before taxes in connection with its plans to integrate the operations of Bristol-Myers and Squibb and to organize its pharmaceutical, nutritional, medical device and consumer businesses on a global basis. This charge included the costs of reducing the number of production facilities and employment levels worldwide, employee relocations and other related items. The fourth quarter of 1989 also included an additional $115 million charge for the costs of professional fees and other expenses related to the merger. The after-tax effect of both these charges was $693 million, or $1.32 per share.

Gelb said, at the time the charges were announced, that the company is well along in developing its plans to realize the benefits afforded by the merger and that, in particular, the coordination of sales and marketing activities and the scope and quality of the combined pharmaceutical research and development effort promise to fulfill the substantial business opportunities that were anticipated. He added that the company will continue to increase its investment in sales, marketing and research in support of its leadership objectives in worldwide markets. He said that significant integration benefits and operating efficiencies will be realized in the administrative and manufacturing areas of the company. These savings will provide additional resources to invest in the company's businesses and to help offset the earnings per share dilution that resulted from the merger.

Because of the charges, net earnings for the year decreased 40 percent to $747 million or $1.43 per share compared to $2.39 per share last year. For the fourth quarter, a net loss of $353 million or $.67 per share was recorded compared to earnings per share of $.56 last year.

#90024p0026 01/24/1990 ~PR Newswire

ANNAPOLIS, MD (JAN. 24) PR NEWSWIRE - UNC Incorporated (NYSE: UNC) announced today that the company has initiated a series of steps which will result in a more streamlined and efficient organization to deal with current and anticipated defense budget reductions.

These actions are directed at reducing production capacity and employment levels in certain operating units.

In its Aerospace Group, UNC has previously announced the consolidation and transfer of its Norwich (Conn.) Aerospace Division into its Tri-Industries subsidiary located in Indiana. The costs associated with this action will result in a fourth quarter non- recurring pre-tax charge of approximately $4.4 million.

At its Naval Products Division in Montville, Conn., the company has announced that, as a result of notification received from the Department of Energy (DOE) regarding potential decreases in future orders for submarine components, reductions in staff and other overhead expenses will be implemented beginning next month. The DOE notification centered on orders in Fiscal Years 1991 through 1995, relating to the U.S. Navy's current class of attack submarines. The exact number of employees who will be affected will not be determined until discussions with DOE are completed.

In addition, it was announced that the company will incur an approximate $1.9 million pre-tax charge connected with the startup of its Florida subsidiary, UNC Reclamation.

The company estimates that its fourth quarter earnings from continuing operations, before non-recurring writedowns and charges, will approximate $1 million, or about $.06 per share, compared with $1.4 million, or $.08 per share in the fourth quarter of 1988. Including the writedowns and charges, the company anticipates an approximate loss in the quarter of $5.5 million, or about $.32 per share. The company's preliminary estimate of earnings for the full year 1989 is now at a breakeven.

UNC Incorporated, listed on the New York Stock Exchange, is engaged in providing high technology products and services in the aerospace/aviation,

defense, and environmental industries.

#90024p0029 01/24/1990 ~PR Newswire

PRINCETON, NJ (JAN. 24) PR NEWSWIRE - Cytogen Corp. (NASDAQ: CYTO) today reported revenues of $2,655,000 for the 13 weeks ended Dec. 30, 1989; a three-fold increase over the $851,000 in revenues reported for the fourth quarter of 1988.

The increase was primarily attributable to a licensing fee paid by EuroCetus, under terms of a distribution and supply agreement signed in October 1989. In this agreement, Cytogen granted EuroCetus exclusive rights to market its OncoScint(R) and OncoTec(TM) cancer diagnostic imaging product lines in Europe. Cytogen will begin to supply EuroCetus with OncoScint finished product in 1990.

Operating expenditures for the fourth quarter of 1989 were $5,633,000 or 27.4 percent below the $7,762,000 reported during the same period in 1988. The reduction in spending was attributable in part to a one-time charge recorded in 1988 of $3,452,000, incurred when the company abandoned its facilities relocation plans. The net loss of $2,978,000 or 26 cents per share was 54.4 percent less than the net loss of $6,911,000 or 57 cents per share reported for the 13 weeks ended Dec. 31, 1988.

For the 52 weeks ended Dec. 30, 1989, contract revenues and interest income of $7.5 million were 26.4 percent above the $5.9 million reported for the same period of 1988. Operating expenditures of $21.4 million were 9.7 percent below the $23.7 million recorded in 1988. The company's 1989 net loss of $14 million was 21.7 percent below the net loss of $17.8 million recorded in 1988. The net loss per share of $1.18 includes accrued preferred stock dividends of $.02 per share of common stock and compares favorably to the prior year loss per share of $1.49. On Dec. 30, 1989, Cytogen held $28.9 million in cash, having successfully raised $17.3 million through the sale of preferred stock in the fourth quarter.

Cytogen Corp. is a biopharmaceutical company which has developed proprietary systems for linking drugs and diagnostic agents to monoclonal antibodies in such a way that the function of the antibody as a delivery vehicle is optimized. With major emphasis on human cancer, current development efforts at Cytogen are focused on improved cancer diagnostic imaging agents and the targeted delivery of cancer therapeutic agents directly to tumor sites.

LOS ANGELES (JAN. 24) PR NEWSWIRE - Rifkind Pondel & Parsons and Doremus & Co. today announced they have combined their respective Southern California-based financial advertising divisions to form a new joint venture company, Doremus/Pondel & Parsons.

The new entity will be managed by Steven E. Rosenblum, most recently, director of financial advertising, Doremus/Los Angeles and formerly accounts manager in Doremus' New York Office. Billings were not disclosed.

The two firms' corporate and investor relations operations will remain independent.

"Our new organization offers clients the resources of Doremus, which is the world's largest financial advertising agency, along with Rifkind Pondel & Parsons' well-established investment community presence and senior management expertise," said Rosenblum.

The new firm's clients include leading investment bankers, brokerage and law firms and other financial institutions, with headquarters or regional offices in the Western states.

Specialized services of Doremus/Pondel & Parsons include the creation and placement of advertising notices for mergers and acquisitions, divestures, public offerings and tender offers, redemption and dividend notices and related corporate informational announcements.

Rifkind Pondel & Parsons and Doremus are long-standing affiliates for corporate and financial public relations services. Doremus/Pondel & Parsons is located at 12100 Wilshire Blvd., Los Angeles, 90025; 213-207-3210.

WILMINGTON, DE (JAN. 24) PR NEWSWIRE - Du Pont (NYSE: DD) and DNA Plant Technology Corp. (NASDAQ: DNAP) today announced that their branded produce joint venture, FreshWorld Inc., has signed a five-year exclusive sales, merchandising, and distribution agreement with Sunkist Growers Inc.

Under terms of the agreement, Sunkist, one of the largest distributors of premium fresh produce in North America, will sell and distribute FreshWorld products, including "VegiSnax" carrots and celery, to supermarkets and grocery stores, restaurants, hospitals, schools and other institutional outlets in the United States and Canada.

Sunkist, based in Sherman Oaks, Calif., will offer "VegiSnax" in selected markets early this year, with a national rollout proceeding in planned stages thereafter.

"VegiSnax" carrots and celery, along with other forthcoming FreshWorld

branded produce products, have been developed to provide consumers with fresh vegetables and fruits having taste, texture, shelf life and other qualities that are superior to anything commercially available today. FreshWorld is currently completing a processing facility for "VegiSnax" vegetables in California, and has engaged the advertising services of Young and Rubicam.

"With a full service marketing organization enabling it to bring products to the produce section of supermarkets anywhere in North America, Sunkist is the ideal partner for FreshWorld," said William D. MacDowell, president of FreshWorld. "Their record for delivering quality products and service sets the standard for the industry and we look forward to a successful, long-term relationship."

"VegiSnax" vegetables and other forthcoming FreshWorld products will provide the consistently superior quality, 100 percent natural fresh produce today's health-conscious consumer is seeking," said Russell Hanlin president of Sunkist. "Sunkist's experienced 'face-to-face' sales force knows our customers and we are confident that FreshWorld is addressing a major market opportunity."

DNAP is a leading agricultural biotechnology company, applying a spectrum of technologies to the commercial development of product and processes for industrial and commercial markets.

Du Pont's Agricultural Products Department is committed to using advanced technology to improve the quality and quantity of the world's food supply.

Sunkist is one of America's oldest and largest agricultural marketing cooperatives. The company, which serves 6,000 California and Arizona citrus growers, recorded revenues of $887 million in 1988.

HOUSTON (JAN. 24) PR NEWSWIRE - The board of directors of American Capital Management & Research, Inc. (NYSE: ACA) has announced the recent election of Don G. Powell as the company's chairman. Powell, who has served as president and chief executive officer since joining the company in March 1987, now takes on the additional responsibilities of chairman of the board, succeeding George F. Reed who is retiring.

Powell has 25 years of experience in the investment industry. Prior to joining American Capital, he served as president and chief executive officer of the Frank Russell Investment Management Company in Tacoma, Washington.

Powell has also served as head of the trust and investment department of Mellon National Bank, Pittsburgh, and head of the trust department and chief investment officer for State Street Bank & Trust Company, Boston. Powell founded the Houston office of Citicorp Investment Management Incorporated in 1973, and later became the national manager for all Citicorp Investment Management offices. He began his career in 1966 as a financial analyst in the treasurer's department of Exxon Corporation in New York City.

"It's an honor and a privilege to follow in the footsteps of George Reed, whose able leadership has guided this company for the last 13 years," said Powell. "I look forward to continuing the progress we are making in all areas of our company as we enter the decade of the 1990s."

Recently elected to the board of governors for the Investment Company Institute, Powell is a member of the Houston Society of Security Analysts and holds the designation of chartered financial analyst.

Powell is a member of the board of United Way of the Texas Gulf Coast and serves on its audit committee. He also serves on the board of advisors for the Houston Symphony, the Dean's Executive Advisory Board for the College of Business Administration at the University of Houston, and the board of advisors for the School of Business Administration at the University of Kansas. In addition, he is a member of the Southwest Regional Committee for Campaign Kansas.

American Capital Management & Research, Inc. is a Houston-based investment management and marketing organization which provides investment advisory services to 37 mutual funds and closed-end investment companies. Primerica Corporation (NYSE: PA) owns approximately 83 percent of the outstanding common shares of American Capital.

BENTON HARBOR, MI (JAN. 24) PR NEWSWIRE - Whirlpool Corporation (NYSE: WHR) announced today that the first stage of European-wide advertising to support the dual branding project, Philips Whirlpool appliances, will begin in February with comprehensive television, print and radio placements.

The dual branding project, which adds the Whirlpool name to the Philips name in 16 European countries and many other markets, was launched by Whirlpool International B.V. (WIBV) on January 10 in Cannes, France at a conference attended by 2000 appliance dealers representing 40 countries. The $110 million project over the next several years is the largest ever within the industry. Advertising spending is a significant portion of the campaign.

WIBV is the joint venture that was formed in 1989 when Whirlpool Corporation acquired a 53 percent interest in the Major Domestic Appliance business of N.V. Philips Gloeilampenfabrieken of The Netherlands.

Initial advertisements across Europe will introduce the dual branding campaign, with subsequent placements to be product-specific advertising. The campaign positions the company as a caring company with quality as a central theme: the two companies have joined forces to offer consumers quality appliances and quality service delivered at a cost-effective price.

Publicis/FCB of Paris, France is the agency executing the pan- European campaign. Timing of the advertisements, as well as volume and message channels, will vary country to country.

Whirlpool Corporation is the world's leading manufacturer and marketer of major home appliances. Headquartered in Benton Harbor, Mich., the company manufactures in 10 countries and markets products under nine major brand

names in more than 45 countries.

BLOOMFIELD HILLS, MI (JAN. 24) PR NEWSWIRE - Stoneridge Resources, Inc. (NYSE: SRE) announced today that the Nebraska director of insurance has issued an order approving Stoneridge's pending acquisition of Acceptance Insurance Holdings Inc. (NASDAQ: ACPT), a Nebraska-based specialty property and casualty insurance company.

Stoneridge and Acceptance entered into a merger agreement in August 1989 contemplating the payment of $22.55 in cash per share to Acceptance shareholders. Subject to remaining regulatory approvals, Stoneridge expects Acceptance's shareholders to vote on the merger during February 1990. Stoneridge currently owns 19.3 percent of the approximately 1.7 million outstanding shares of Acceptance.

For nine months ended Sept. 30, 1989, Acceptance had net income of $2.9 million on total revenue of $34.7 million.

Stoneridge also owns over 50 percent of Florida-based Orange-co, Inc. (NYSE: OJ), a fully integrated citrus grower, processor and owner of 26,000 acres of Florida land, 29 percent of Radice Corporation (NYSE: RI), a Florida-based real estate developer, and 27 percent of Major Realty Corporation (NASDAQ: MAJR), a Florida-based real estate company.

PITTSBURGH (JAN. 24) PR NEWSWIRE - Landmark Savings Association (AMEX: LSA) reported net income of $4.5 million, or $1.90 per common share for the year ended Dec. 31, 1989, compared to net income of $8.7 million, or $3.68 per common share for 1988.

Net income for the fourth quarter of 1989 was $1.1 million, or $.48 per common share compared to $2.3 million, or $.98 per common share for the same period in 1988. Lower net interest income and higher provisions for credit losses were the primary reasons for the reduction in net income in 1989.

J. Richard Eshleman, president and chief executive officer, also announced

that Landmark's board of directors declared a quarterly cash dividend of $.075 per common share. The dividend is payable on Feb. 23, 1990, to shareholders of record on Feb. 9, 1990.

Eshleman pointed to improved operating earnings during the fourth quarter, compared to the third quarter of 1989. Net interest income increased to $7.6 million in the fourth quarter from $6.6 million in the third quarter of 1989. The interest rate margin improved to 2.13 percent from 1.80 percent during the same periods.

Net interest income was $7.6 million and $28.1 million for the three and 12 months ended Dec. 31, 1989, respectively, compared to $8.0 million and $31.8 million for the same periods in 1988. Lower net interest income in 1989 compared to 1988 was caused by competitive forces within the financial services industry and by the flat yield curve that persisted through most of 1989. Short-term rates were at virtually the same levels as long-term rates.

Landmark increased the provision for credit losses in the fourth quarter of 1989 to $1.6 million from $747,000 in the fourth quarter of 1988. Provision for credit losses for the year 1989 totaled $3.7 million, compared to $2.1 million for 1988. The increase in the provision, which was primarily for the automobile loan portfolio, was based on recent loss experience and the outlook for an economic slowdown. Landmark terminated dealer-originated auto lending in May 1989.

Non-interest income was $11.9 million in 1989, compared to $10.5 million in 1988. The increase was primarily the result of higher gains recognized on sales of loan servicing and improved results from secondary mortgage market activities.

Non-interest expenses increased 3.4 percent to $31.5 million in 1989, compared to $30.4 million in 1988 due primarily to costs relating to a data processing conversion in 1989.

Landmark Savings Association is a Pennsylvania state chartered, publicly owned savings association with assets of approximately $1.6 billion. It is the 148th largest thrift institution in the United States. Landmark common stock is listed on the American Stock Exchange (AMEX), trades under the symbol "LSA," and is reported in the financial press as "LdmkSv."

CAMBRIDGE, MA (JAN. 24) PR NEWSWIRE - T Cell Sciences, Inc. (NASDAQ: TCEL), SmithKline Beecham and Yamanouchi Pharmaceutical Co., Ltd.,

announced today the signing of a development and marketing agreement relating to T Cell Sciences' complement blocker, a new drug entity for limiting heart tissue death resulting from a heart attack.

Under terms of this agreement, SmithKline Beecham and Yamanouchi would co-market the complement blocker in Japan and T Cell Sciences would receive significant royalty payments on these sales. Yamanouchi would fund preclinical and clinical trials, specifically related to meeting Japanese regulatory requirements, as well as sharing the responsibility for obtaining Japanese regulatory approval. In addition, Yamanouchi would make prepaid royalty payments to T Cell Sciences over the next few years on a milestone basis, as would SmithKline Beecham pursuant to the previously signed T Cell Sciences and SmithKline Beecham agreement announced Nov. 21, 1989.

As previously announced, SmithKline Beecham will provide $10-12 million to T Cell Sciences to conduct the remaining preclinical studies over the next 12-16 months, and will assume full responsibility for funding human clinical trials and obtaining regulatory approvals. SmithKline Beecham will receive exclusive worldwide marketing rights with the exception of the United States and Canada, where T Cell Sciences has co-marketing rights once sales reach a specified level, and Japan, where Yamanouchi Pharmaceutical Co., Ltd., now has co-marketing rights.

Initial animal studies of the compound showed significant reduction in the size of tissue damage (myocardial infarct) following an ischemic event. Details of these studies were reported in two papers presented at the American Heart Association Convention in New Orleans, Nov. 13-16, 1989. Additional animal studies will continue through 1990.

Utilizing proprietary T cell receptor and soluble receptor technology, T Cell Sciences, Inc., is developing pharmaceutical products to treat heart disease and autoimmune diseases as well as products for diagnosing and monitoring immune system disorders and cancer. Located in Cambridge, Mass., the company currently markets products to the scientific community and an FDA-approved test kit to the diagnostic market.

CONTACT: James D. Grant, chairman and CEO, or Susan Primrose (investors) of T Cell Sciences, 617-621-1400; or Fredric Spar of Kekst and Company, 212-593-2655, for T Cell Sciences

#90024p0048 01/24/1990 ~PR Newswire

NEW YORK (JAN. 24) PR NEWSWIRE - Norfolk Southern Corporation (NYSE: NSC) today reported 1989 net income of $606.2 million, or $3.48 per common share, down 4.6 percent from last year's record high of $635.1 million, or $3.51 per common share, earned in 1988.

Fourth quarter net income was $148.2 million, or 87 cents per common share down 17.2 percent from $179.0 million, or $1.00 per common share, in the fourth quarter of 1988.

"Delays caused by severe winter weather impacted fourth quarter revenues, and a steep jump in fuel prices increased expenses," said Arnold B. McKinnon, chairman, president and chief executive officer. "In the first quarter of 1990, we expect to recover coal traffic delayed by weather, and we also expect fuel prices to begin coming back down.

"For the year," McKinnon said, "an increase in carloadings in the first half was offset by a decline in the second half relative to 1988, due to the slowing of the economy."

Coal, paper, automotive and intermodal revenues in 1989 increased by 6.5 percent, 0.8 percent, 1.4 percent and 23.3 percent, respectively. Coal and intermodal revenues increased in the fourth quarter compared to 1988, while all other commodities declined.

Total transportation operating revenues for 1989 were $4.54 billion, 1.7 percent higher than the $4.46 billion for 1988. Railway operating revenues were 2.1 percent higher and motor carrier revenues were 0.4 percent lower than 1988.

For the fourth quarter, transportaion operating revenues were $1.11 billion, down 4.4 percent from the $1.16 billion for the fourth quarter of 1988. Railway operating revenues of $912.0 million for the fourth quarter were 3.0 percent lower than the fourth quarter of 1988. Motor carrier revenues were 10.6 percent lower.

Total transportation operating expenses for 1989 were $3.71 billion, up 5.5 percent over 1988, with railway expenses up 6.9 percent and motor carrier expenses up 1.2 percent.

For the fourth quarter, total transportation operating expenses were $911.7 million, up 0.7 percent over the fourth quarter of 1988. Railway expenses for the quarter increased 3.8 percent, while motor carrier expenses decreased 8.5 percent.

The railway operating ratio - the percentage of revenues that goes into operating the railroads - was 77.5 for the year, compared with 74.1 in 1988, and 76.8 for the fourth quarter, compared with 71.7 in 1988.

HIGH POINT, NC (JAN. 24) PR NEWSWIRE - Preferred Savings Bank, Inc., (NASDAQ: PSLA), headquarted in High Point, North Carolina, today announced a net loss of $3.8 million for the quarter ended December 31, 1989, compared to a net loss of $342,000 for the same quarter a year earlier. For the six months ended December 31, 1989, the Company recorded a net loss of $4.7 million compared to a net loss of $288,000 in the prior year. Assets at December 31, 1989 , were $276 million with deposits at $210 million.

The primary reason for the quarterly loss was additional provisions for losses on loans, real estate, and investments totalling $3 million. The additional provisions for losses were the result of an on-going review of the Bank's assets, which include approximately $17.7 million of nonperforming assets. "This review should be completed, and any additional loss provisions taken prior to June 30, 1990," Chief Executive Officer Charles L. Huff said.

On January 8, 1990, Preferred Savings Bank submitted a comprehensive capital plan as required by FIRREA. This plan identifies the need of infusing new capital in order to met the more stringent Federal requirements. Directors and Management of the institution are having conversations with groups interested in infusing new capital.

Preferred currently operates under Consent and Supervisory Agreements with State and Federal regulators dated September 7, 1989. As a result of these agreements, current Management is cooperating with the regulatory authorities in addressing Preferred's financial difficulties.

During the past twelve months, Preferred has undergone a number of changes. In August, Charles L. Huff, Jr. was named Chief Executive Officer and Vice Chairman of the Board. On November 15, Robert A. Culler was elected Board Chairman, replacing James F. Morgan who chose not to seek re-election as a board member. William J. Spillers, Joe C. Rowe, J. Robert Gaither, Jr. and James P. Petree have resigned as board members.

Preferred Savings Bank has full-service branches in High Point, Greensboro Burlington, Hickory, Charlotte, and Winston-Salem, North Carolina.

WASHINGTON (JAN. 24) PR NEWSWIRE - United Press International has named UPI Paris Bureau Manager Elizabeth Ricci as the new regional editor for New England.

State editors from Maine, Vermont, New Hampshire, Rhode Island and Connecticut will report to Ricci, a former UPI Massachusetts state editor. Based in Boston, she will also serve as Massachusetts state editor.

"Betsy is a New England native and very familiar with regional issues, the people and the marketplace," said Steve Giemann, assistant managing editor for regional and state news. He added that "her broad UPI experience, at home and overseas, will be an advantage in her new job."

Ricci replaces Charles Goldsmith, a veteran wire service editor recently transferred to Brussels as chief diplomatic correspondent for Europe.

Since becoming Paris bureau manager in September 1988, Ricci has managed UPI's stringer network in France, its overseas territories and French-speaking Africa. She covered major foreign stories, including the first U.S./PLO talks in Tunis; European Community summits in Paris and Strasbourg; the terrorist bombing of a French jetliner; visits by Andrei Sakharov, Lech Walesa and Yasser Arafat; and international conferences on chemical warfare, human rights and Cambodia.

As UPI's Massachusetts state editor from 1986 to 1988, Ricci managed UPI's Boston and Springfield bureaus. Previously, she worked for three years as a reporter and editor in Boston and in Albany, N.Y.

Ricci was raised in the Boston area and attended the University of Massachusetts, spending her senior year abroad at the University of Paris. She holds a master's degree in international affairs from Columbia University with a concentration in journalism.

UPI, founded in 1907, is a news and information services company, with more than 180 bureaus worldwide. UPI is owned by Infotechnology Inc. (NASDAQ: ITCH), an information and communications firm.

BILLERICA, MA (JAN. 24) PR NEWSWIRE - Optrotech Ltd. (NASDAQ: OPTKF) today announced that it has entered into an agreement in principle with Claridge Israel Inc. (Canadian corporation) and Elron Electronic Industries Ltd., Optrotech's major shareholder, regarding a $16 million (U.S.) investment by Claridge in Optrotech.

Pursuant to the agreement, Claridge will purchase $6 million worth of new shares at $9 per share and $10 million convertible notes yielding 4 percent annual interest with an $11 conversion price with and average term

of five years.

On a fully diluted basis, after full conversion, Claridge will own approximately 23 percent and Elron approximately 31 percent of Optrotech's capital.

Claridge Israel Inc. is a Canadian based investment company controlled by Charles Bronfman and Jonathan Kolber, with investments in various export oriented companies. Bronfman is co-chairman of the Seagram Company Ltd. and a director of Dupont (25 percent owned by Seagram).

Kolber, CEO of Claridge Israel, Inc., said that Claridge looks forward to its involvement with Optrotech and considers Optrotech the world leader in automated inspection and design systems for the printed circuit board industry.

Optrotech Ltd., founded in 1981 by Dr. Shlomo Barak and a team of scientists, and Elron Electronic Industries Ltd., is a world leading manufacturer of integrated solutions for the automation of the printed circuit board (PCB) industry. It was the first company to supply automated optical inspection (AOI) equipment based on advanced vision and artificial intelligence technologies.

FOUNTAIN VALLEY, CA (JAN. 24) PR NEWSWIRE - FHP International Corp. (NASDAQ: FHPC) reported today that net income for the second quarter ended Dec. 31, 1989, totaled $6,482,000, up 31 percent from $4,947,000 reported for the same period last year. Earnings per share were $.25 for the current quarter versus $.24 in the prior year. Revenue for the quarter increased 38 percent to $222,550,000 compared with $160,940,000 reported last year.

Net income for the six month period ended Dec. 31, 1989, totaled $13,265,000, up 47 percent from $9,011,000 for the same period last year. Earnings per share for the six-month period totaled $.51 versus $.44 in the prior year. Revenue for the first half of fiscal 1990 rose 38 percent to $432,594,000 from $312,919,000 reported last year.

Earnings per share were diluted by $.02 for the quarter and by $.04 for the six-month period as the result of FHP's common stock offering of approximately 2.2 million shares in May 1989. Dilution figures are net of interest income associated with the proceeds of the offering. Earnings per share figures also reflect a two-for-one common stock split which became effective on Dec. 13, 1989.

FHP International Corp. through its wholly owned subsidiary, FHP Inc., operates staff and IPA model health maintenance organizations, hospitals, and a life, health and accident insurance plan. FHP has operations in Southern California, Utah, Arizona, New Mexico and Guam. The company is one of the largest Medicare risk contractors in the nation.

#90024p0058 01/24/1990 ~PR Newswire

BOSTON (JAN. 24) PR NEWSWIRE - Uno Restaurant Corporation (ANEX: UNO)

today announced that both revenue and net income rose 34 percent for the first quarter, compared to the comparable period last year. Revenue increased to $12.6 million from $9.4 million for last year's first quarter while net income increased to $830,000 from $620,000 a year ago. Earnings per share increased to 13 cents for the quarter from 11 cents last year, and was based on a 10 percent increase in shares outstanding.

In making the announcement, Aaron D. Spencer, chairman and chief executive officer, stated, "Considering all factors, revenue and earnings growth for the first quarter were very satisfactory." Comparable-store sales for company-owned units increased 6 percent from a year ago, highlighted by 17 percent sales growth in our New York market. Expansion plans also proceeded on schedule, with five franchise units and two company units opening during the quarter. In fact, our newest company unit in Dedham, Mass. produced the strongest unit opening ever, with initial sales averaging better than $60,000 per week. In addition, restaurant margins for Pizzeria Uno operations held steady with last year's first quarter at 20 percent, despite an extremely cold December, substantially higher cheese costs than last year, and a considerably weakened Massachusetts economy. Massachusetts' weak economic environment, in fact, led to flat sales and somewhat lower profitability in the Boston market. However, this shortfall was offset by continuing strength in the New York market, and particularly from four newer units that averaged sales growth of 23 percent compared to last year.

The company continues to expect strong sales and earnings growth for fiscal 1990. However, the faltering New England economy could make it difficult to achieve our aggressive net income growth target of 40 percent for the year. Certain factors, though, such as the anticipated decline in cheese costs later in the year, and the possibility of better than average new unit openings, could temper the impact of the weak Massachusetts economy. The company's accelerated unit expansion and revenue growth will continue as planned, with some 17 company and franchise units currently in some stage of development. Therefore, we could experience slightly lower operating margins during the next two quarters until these newer units achieve normal operating efficiencies, at which time we shold step up to a new level of sales and profitability.

Uno Restaurant Corporation operates and franchises a chain of casual dining, full-service restaurants under the name "Pizzeria Uno Restaurant & Bar".

#90024p0060 01/24/1990 ~PR Newswire

SAGINAW, MI (JAN. 24) PR NEWSWIRE - Mark L. Nelson, president and chief executive officer of Polar Molecular Corporation (NASDAQ: PMCX), announced that the company has decided not to proceed with its proposed warrant exchange offer.

The company had previously contemplated conducting an exchange offer with the holders of the company's outstanding Class A Warrants whereby those warrantholders would receive shares of the company's common stock and additional warrants in exchange for the Class A Warrants and a cash payment. Although the company had filed a registration statement with the Securities and Exchange Commission regarding the proposed warrant exchange offer, the exact terms of that proposed offer had not been finalized. Nelson said that the company had decided not to proceed with the proposed warrant exchange offer because the company had obtained additional equity financing and is in the process of securing additional financing to meet its future cash requirements.

Nelson also announced that, as a result of the anti-dilution provisions of the company's Class A Warrants, issuances of the company's common stock through Dec. 31, 1989, had caused the number of shares issuable upon exercise of each Class A Warrant to be increased from 1.19 shares (an exercise price of approximately $1.89 per share) to 1.20 shares (an exercise price of approximately $1.87 per share). The Class A Warrants remain exercisable through Aug. 3, 1992, at an exercise price of $2.25 per warrant.

Lastly, Nelson announced that the company's Board of Directors had established March 20, 1990 as a new date for the company's postponed 1989 annual meeting of shareholders. Jan. 31, 1990, was established as the record date for that meeting.

The company's common stock is tralded on NASDAQ under the symbol "PMCX" and the company's Class A Warrants are traded on NASDAQ under the symbol "PMCXW."

HOUSTON (JAN. 24) PR NEWSWIRE - Sysco Corporation (NYSE: SYY) today reported results for the fiscal 1990 second quarter and first six months ended Dec. 30, 1989.

Sales during the quarter increased to $1.9 billion, 9 percent ahead of the $1.7 billion attained during the second quarter of the prior year. Net earnings of $33.7 million, or $0.37 per share, were 23 percent higher as compared to fiscal 1989 second quarter earnings of $27.5 million, or $0.30 per share.

For the first half of fiscal 1990 sales grew 14 percent to $3.8 billion from $3.3 billion a year earlier. Net income rose to $65.3 million, or $0.72 per share, a 22 percent increase above the $53.6 million, or $0.59 per share, earned during the same period last year.

Sysco, listed on the New York Stock Exchange, is the nation's largest foodservice marketing and distribution organization. The company provides its products and services to approximately 225,000 customers located across the United States and western Canada. The Sysco distribution network currently covers virtually the entire continental United States including all of its 150 largest cities.

NEW YORK (JAN. 24) PR NEWSWIRE - A powerful new software system that simultaneously edits medical claims for costly errors and questionable billing practices while it processes them, was announced today by Dun & Bradstreet's Erisco.

The system, called "ClinicaLogic," will become a significant tool in the ongoing battle to rein in physician and hospital overpayments, according to the company. Experts estimate such overpayments cost hundreds of millions of dollars annually.

Erisco will publicly demonstrate the product for the first time at the IBM Insurance Industry Executive Conference, Monday, Feb. 5, in Palm Springs, Calif.

The software is the first offered to the industry that automatically checks claims as they are entered on-line, or in batch mode, quickly identifying coding errors, so-called unbundled procedures in coding, and other deviations from accepted clinical billing practices.

Because the system was designed exclusively for use with Erisco's ClaimFacts claims processing software, it offers users the economy and time-saving advantages of immediate and simultaneous claims processing and auditing, according to Pat D'Amato, Erisco vice chairman.

The editing system will check claims against a broad medical database designed exclusively for Erisco by Los Angeles-based Pace Healthplan Management, Inc. Pace's team of board-certified physicians, working with utilization review nurses, will serve as the central analytical group responsible for developing and reviewing all the medical data. Pace will provide periodic updates to the database as medical criteria change.

Erisco's auditing system has, during numerous test runs, demonstrated impressive success in flagging potential reimbursement abuses. The subsystem accurately and consistently detected both minor and major billing and CPT coding errors, provider strategies to circumvent reasonable and customary payment limits, and abusive billing practices.

In one trial run, dramatically underscoring the new software's cost-saving capabilities, Erisco entered more than three million past claims by clients, totaling $1 billion in charges, into the editing system. Of the total, "ClinicaLogic" was able to pinpoint nearly $18 million in questionable surgeon fees, said Faith Glover, the company's director of health care information services.

#90024p0066 01/24/1990 ~PR Newswire

ROCHESTER, NY (JAN. 24) PR NEWSWIRE - Curtice Burns Foods, Inc. (AMEX: CBI), a major food processor today announced results for the second quarter ended Dec. 29, 1989. Earnings declined moderately while sales increased for the first six months of fiscal 1990.

For the half year, earnings decreased 5.3 percent to $7,395,000 or $.88 per share, from $7,808,000 or $.93 per share for the same period last year. Sales increased 16.5 percent to $468,317,000 from $401,895,100 in fiscal 1989.

In the second quarter, net income fell 12.7 percent to $4,153,000 or $.49 per share, from $4,758,000 or $.57 in the second quarter of last year. Sales rose 12.2 percent to $254,917,000 from $227,137,000 in fiscal 1989.

David J. McDonald, president, said, "We look forward to improving our underperforming operations in the last two quarters of this fiscal year. As we recently announced, most of the factors contributing to this quarter's lower earnings are short term in nature.

"We anticipate a positive year-end earnings comparison, and will continue to pursue acquisitions that enhance our portfolio of businesses, and complement our successful marketing strategy."

Curtice Burns Foods is a food processor and marketer of regionally branded private label, and food service products sold throughout the United States and Western Canada. The company had net sales of $856 (A) million in the fiscal year ended June 30, 1989.

NEW YORK (JAN. 24) PR NEWSWIRE - ITT Corporation (NYSE: ITT) confirmed

today that it sold, principally through international private placements, its approximately two million share investment in Paris- based Compagnie Generale d'Electricite (CGE), its major partner in Alcatel N.V., the telecommunications equipment joint venture, for $184 million.

The shares had been acquired from CGE in December 1988 in exchange for Alcatel shares that ITT had purchased from Soceite Generale de Belgique, a former minority partner in the joint venture.

ITT realized a pre-tax gain on the sale of the CGE shares of approximately $71 million, which will be recorded in the first quarter of 1990. ITT retains its 37 percent interest in Alcatel N.V.

AGORDO, BELLUNO, Italy (JAN. 24) PR NEWSWIRE - Luxottica Group S.p.A. (NYSE: LUX) announced today that it has commenced an initial public offering of 4,500,000 American Depositary Shares ("ADSs") representing 9,000,000 ordinary shares at $19.00 per ADS. All of the 9,000,000 ordinary shares are being sold by Luxottica's chairman and chief executive officer, Leonardo Del Vecchio. A registration statement covering the offering was filed with the Securities and Exchange Commission on Nov. 13, 1989.

A total of 3,600,000 ADSs are being offered through a U.S. syndicate lead-managed by Merrill Lynch Capital Markets and 900,000 ADSs are being offered through an international syndicate lead-managed by Merrill Lynch International Limited.

Luxottica Group S.p.A. designs, manufactures and markets high quality eyeglass frames in the mid- and premium-price categories. The company manufactures frames and sunglasses in Italy and distributes its products through wholly owned distributors in the United States, Canada, Italy, France, Sweden and West Germany and 50 percent-owned distributors in Spain and the United Kingdom. These affiliated distributors coordinate a network of over 440 independent sales representatives, approximately 250 of whom work in the United States.

A written prospectus meeting the requirements of Section 10 of the Securities Act of 1933 may be obtained from Merrill Lynch Capital Markets, World Financial Center, North Tower, New York, NY 10281-1201.

#90024p0074 01/24/1990 ~PR Newswire
WAYNE, N.J. (JAN. 24) PR NEWSWIRE - Drake Bakeries Inc. today announced completion of a two-year product reformulation program, which includes removal of highly saturated tropical oils from all its products.

James F. Pomroy, president, said, "Most importantly, in our reformulation efforts, we made certain to maintain the great taste of each Drake's snack cake. Now, our reformulated products are good as always and better than ever."

Drake's is the leading marketer of snack cakes in the Northeast and the first such producer to have removed coconut oil, palm oil and palm kernel from all its products. It replaced those ingredients with soybean, cottonseed and canola oils.

The company noted that consumer concern about highly saturated oil ingredients led to its program.

The National Heart, Lung and Blood Institute stated that heart disease is linked to high cholesterol and that highly saturated fats are the primary contributor to high blood cholesterol. It noted that more than half of all Americans over the age of 20 have high cholesterol levels.

In addition to removing tropical oils, Drake's also has reduced or eliminated its use of certain other ingredients, such as egg yokes, to attain a no-and-low cholesterol status. Drake's products are also low in sodium.

Drake's no-and-low cholesterol products include Drake's Coffee Cake, Devil Dogs, Ring Dings, Yodels, Funny Bones and Fruit Pies.

LOWELL, MA (JAN. 24) PR NEWSWIRE - As expected, Wang Laboratories, Inc. (AMEX: WAN) today reported a loss for its second fiscal quarter, but said that the company remains on track with its debt restructuring and operational reorganization. Wang said it is making steady progress toward returning the company to profitability. The loss had been anticipated as the company restructures its operations for sustainable profitability.

The loss from continuing operations for the fiscal second quarter ended

Dec. 31, 1989, was $5.5 million, compared with a loss from continuing operations of $62.1 million for the preceding quarter and earnings of $4.2 million for the same quarter last year.

Included in this quarter's loss from continuing operations is a $62.8 million pre-tax restructuring charge and a $116.0 million pre-tax gain resulting from the sale of a 30 percent interest in the company's Taiwan manufacturing subsidiary.

The net loss for the 1990 fiscal second quarter was $10.5 million, or 6 cents per share, compared with a net loss of $62.1 million, or 38 cents per share, in the prior quarter, and compared with net earnings of $1.0 million, or 1 cent per share, for the second quarter of fiscal 1989.

Revenue from continuing operations for the second quarter was $637.7 million compared with revenue of $596.8 million for the preceding quarter, and compared with a restated $722.2 million in the second quarter of fiscal 1989.

For the six-month period that ended Dec. 31, 1989, the net loss was $72.6 million, or 44 cents per share. Six-month revenue was $1,234.5 million.

"I am very pleased with our progress,'' said Richard W. Miller, Wang's president and chief operating officer. ''The results for the second quarter are in line with our expectations. Based on our steady progress in the last few months, I remain confident that the company will be positioned for profitability by the end of the fiscal year, although we still anticipate losses during the remainder of the year as well as some further restructuring expenses. We are taking the necessary and difficult actions to successfully turn the business around.

"The company is moving forward in all respects with the restructuring plan I oulined in October," he continuted. "We are on target with our primary goal of rebuilding the company's financial strength.

SAN ANTONIO, TX (JAN. 24) PR NEWSWIRE - Adtec Incorporated (NASDAQ: JAIL) a San Antonio, Texas-based manufacturer of prison locking devices and detention hardware, reported its operating results for the second quarter of the fiscal year ending May 31, 1990.

Revenues during the quarter decreased 7 percent from the second quarter of last year primarily due to the timing of work available on pending contracts and the overall decrease in the backlog of work available in connection with major contracts in Crescent City, Calif. During the second quarter of the 1989 fiscal year, the Crescent City contracts accounted for approximately 34 percent of the company's total revenues, compared to less than 4 percent in the current second quarter. This reduced dependence on large contracts to generate revenue is reflected in the backlog of work at Nov. 30, 1989, of approximately $14 million of which there is only one contract ($2,225,000) over $1,600,000.

Cumulative revenues for the first two quarters of the 1990 fiscal year increased 19 percent over the same period for the prior year. This overall increase is primarily due to the timing of work available on a number of contracts in the first quarter ended Aug. 31, 1989. Adtec experienced an operating loss of $2,361,619 in the second quarter of 1990, as compared to operating income of $160,767 for the second quarter of 1989. The company had an operating loss of $2,085,770 for the six months ended Nov. 30, 1989, as compared to an operating income of $291,020 for the first two quarters of the 1989 fiscal year. The company had a net loss of $1,759,821 for the second quarter of the 1990 fiscal year, as compared to net income of $89,377 for the second quarter of 1989. The net loss for the first two quarters of the 1990 fiscal year was $1,670,631 as compared to net income of $267,274 for the comparable period in the 1989 fiscal year.

The company's cost of revenues for the second quarter ended Nov. 30, 1989, increased to 132 percent of revenue, compared to 83 percent in the same period last year. This was mostly due to cumulative adjustments in the second quarter of approximately $2 million of expected costs on certain contracts, primarily in Crescent City, resulting from increased costs to complete these jobs, as previously reported. The company has previously disclosed that a material supplier of its wholly owned subsidiary, American Detention Services, Inc. (ADS) furnished material to ADS for the Crescent City projects which did not conform to the prototype design,

causing ADS to incur substantially increased costs during installation. Management has been advised that the supplier is in receivership. Further, the supply contract in question is not covered by a performance bond, contrary to requirements of the contract, thereby requiring ADS to incur the increased cost to properly complete installation.

Although management is continuing to explore remedies that may be pursued against the supplier, it is not presently expected that the supplier has sufficient assets available to satisfy any claim that ADS may assert. Certain other contracts also incurred overruns primarily resulting from a hollow metal supplier not delivering the products timely to the jobsites.

The company designs, produces, markets and installs detention equipment for correctional facilities.

#90024p0080 01/24/1990 ~PR Newswire

RALEIGH, NC (JAN. 24) PR NEWSWIRE - Exide Electronics Group, Inc. (NASDAQ-NMS: XUPS) today announced results for its first fiscal 1990 quarter ended December 31, 1989, and the successful completion of an industrial revenue bond financing for expansion of its manufacturing capacity in North Carolina.

Revenues for the first quarter were $35,310,000 compared to $33,169,000 in fiscal 1989, a record for the Company's first fiscal quarter. Earnings per share were $.05, based on net income of $226,000 compared to earnings per share of $.29, based on net income of $1,203,000 in fiscal 1989.

Weighted average shares outstanding for the quarter were 4,462,000, an increase of 8.1 percent over the 4,127,000 outstanding in the first quarter of fiscal 1989. The increase reflects the completion of the Company's initial public offering of common stock on December 21, 1989.

James A. Risher, President and Chief Executive Officer, reported that "record first quarter revenues were consistent with our plans and reflected continued strong sales of the Company's Powerware(R) products, including three of our newest models, the Powerware 50, 150, and 375. The results are particularly gratifying considering our record fourth fiscal quarter and the seasonal factors in our business." According to Risher, "orders for the quarter remained very strong. Our backlog hit an all time high at the end of the first quarter, increasing by over $8,000,000 from the fourth quarter of fiscal 1989 and over $10,000,000 from the first quarter of last year."

The Company also reported the successful closing on January 4, 1990, of a $9.0 million industrial revenue bond issue to finance the construction for a manufacturing facility in Brunswick County, North Carolina. With a final maturity of ten years and an interest rate of just over 7 percent, Risher noted that "with the IRB financing, we have obtained additional long-term financing at an attractive fixed rate that, in connection with our recent public offering of common stock, provides financial stability for our future growth and completes the transformation of the Company's balance sheet."

Exide Electronics designs, manufactures, markets and services a broad line of uninterruptible power supply (UPS) products which protect computers and other electronic equipment against electrical power loss and distortions. The Company's products are used in diverse applications, including large computer facilities, mainframe and mini-computer systems, communications systems, and distributed computing environments. Its stock is traded over the counter on the NASDAQ National Market System under the symbol XUPS.

FAIRFIELD, CT (JAN. 24) PR NEWSWIRE - Preliminary results indicate that General Electric Company's (NYSE: GE) net earnings for the fourth quarter of 1989 were $1.173 billion, Chairman John F. Welch Jr. announced today.

This was an increase of 16 percent over last year's $1.011 billion. Net earnings per share for 1989's fourth quarter were $1.30, or 16 percent ahead of the $1.12 for the final quarter of 1988.

Consolidated revenues of $16.2 billion for the last quarter of 1989 were up 5 percent from $15.5 billion for the comparable 1988 period.

Net earnings for the year 1989 were $3.939 billion, an increase of 16 percent from the $3.386 billion reported for 1988. Net earnings per share were $4.36, also up 16 percent from $3.75 in 1988.

Consolidated revenues were $54.6 billion in 1989, an increase of 9 percent from the prior year's $50.1 billion.

ORLANDO, FL (JAN. 24) PR NEWSWIRE - The Coca-Cola Company (NYSE: KO) and The Walt Disney Company (NYSE: DIS) today announced the signing of a new global agreement that will extend their nearly 50-year association into the 21st century.

The new 15-year agreement assures that soft drink products of The Coca-Cola Company will be available exclusively in all Disney theme parks, including Disneyland in Anaheim, Walt Disney World in Orlando and EuroDisneyland in France (opening in 1992). Coca-Cola soft drinks are available in Tokyo Disneyland under a separate agreement.

In addition, The Coca-Cola Company will have right of first negotiations for joint promotional programs with Disney motion pictures in the beverage category and exclusive rights in the same category to use certain Disney characters in advertsing and consumer promotions.

"This new agreement continues the partnership of two of the world's greatest brand names," said Donald R. Keough, president and chief operating officer of The Coca-Cola Company. "Coca-Cola and Disney share a passion for serving consumers and always providing a reflection of the bright side of life."

Frank G. Wells, Disney president and chief operating officer, said: "One of Coca-Cola's famous advertising slogans noted that 'things go better with Coke.' We at Disney agree completely, and are extremely pleased to renew and enlarge a relationship that has been mutually beneficial over the past half century."

The two firms first became formally associated in December, 1942, when The Coca-Cola Company's Sunday afternoon radio show presented Andre Kostelanetz conducting an orchestra featuring music and characters from a Disney movie, "Saludos Amigos."

In 1950, Coca-Cola was sponsor of the first television show ever produced by Disney.

HOLLYWOOD, FL (JAN. 24) PR NEWSWIRE - General Rent-A-Car today announced it has successfully won the bid as the official car rental company for the state of California.

Under the contract signed earlier this month, General will provide car rental services to employees of 12,000 state agencies, through its 94 rental facilities nationwide. In the state of California, General operates 19 locations, including Sacramento and Fresno, which the company opened as part of the contract's agreement.

"This is General's largest state account to date," commented Tony Phelps, General's Western Regional Manager. "General is pulling out all the stops in order to ensure first class service and products to its corporate and leisure customers."

Since the company was purchased in May 1989, General has increased the number of rental locations by 300 percent, eliminated mandatory fuel charges and airport access fees, and extended the value of General rentals with free unlimited mileage and unrestricted interstate travel.

#90024p0087 01/24/1990 ~PR Newswire

PITTSBURGH (JAN. 24) PR NEWSWIRE - National Steel Corp. today reported a net profit of $28.4 million for the fourth quarter of 1989, bringing the company's net profit for the year to $83.2 million.

In 1988, National Steel had a net profit of $33.2 million for the fourth quarter and $88.2 million for the year.

Net sales for the fourth quarter of 1989 were $638.9 million, a 5.3 percent decrease compared to fourth quarter 1988 sales of $674.6 million. For the year 1989, sales were $2.6 billion, nearly identical to 1988. Steel shipments in the fourth quarter of 1989 were 1,223,000 tons, a slight decrease compared to the 1,234,000 tons shipped in the fourth quarter of 1988. For the year 1989, National shipped 4,957,000 tons, down slightly from record 1988 shipments of 4,970,000 tons. Raw steel

production for 1989 totaled 5,394,000 tons, nearly the same as the 5,393,000 tons produced in 1988. In the fourth quarter of 1989, raw steel production totaled 1,347,000 tons, compared to 1,387,000 tons in the fourth quarter of 1988.

Fourth quarter 1988 net income includes an unusual charge of $10.3 million due to the shutdown of the Great Lakes Division sinter plant and the write off of certain idle coal mining equipment.

Net income for the year ended Dec. 31, 1988 was increased by $2.7 million from the recognition of an additional investment tax credit refund during the first quarter of 1988. This additional refund was received in the first quarter of 1988.

National Steel is the nation's sixth largest steelmaker with major production facilities in Ecorse, Mich., near Detroit; Portage, Ind., near Chicago; and Granite City, Ill., near St. Louis. The company is headquartered in Pittsburgh and employs approximately 12,000. It operates as a joint venture corporation owned equally by National Intergroup Inc. (NYSE: NII) and NKK Corp. of Japan.

#90024p0088 01/24/1990 ~PR Newswire

BALTIMORE (JAN. 24) PR NEWSWIRE - T. Rowe Price Associates, Inc. (NASDAQ: (TROW) today reported that its 1989 net income and earnings per share had increased 11 percent on a 12 percent gain in revenues over the comparable 1988 period. Excluding nonrecurring items, earnings per share increased 24 percent in 1989.

Net income for 1989 totaled $29,671,000 on revenues of $159,531,000. That compares favorably with $26,629,000 and $142,161,000, respectively, in 1988. Earnings per share were $2.00 in 1989, up from $1.81 in 1988. Included in these per-share amounts are previously reported nonrecurring gains of $0.04 in 1989 and $0.23 in 1988.

Revenues for 1989 fourth quarter were also quite strong, increasing almost 16 percent to $42.6 million. Net income was $7,419,000 and earnings per share were $0.50. These amounts compare to 1988 results of $9,262,000 and $0.63 per share which included the nonrecurring pension- related gain of $0.23 per share. Excluding the nonrecurring item, earnings per share increased 25 percent form 1988.

All per-share amounts, of course, have been adjusted for the December 1989 two-for-one stock split.

In announcing these results, George J. Collins, president said, "The firm experienced increased advisory revenues on higher total average assets under management during the year. Administrative revenues also increased considerably as our sub-transfer agent and defined contribution record keeping services continue to grow. Investment income on our cash reserves and larger investments also contributed to 1989 gains."

In closing, Collins added, "We are pleased with our results for the fourth quarter and year. Several milestones were achieved in 1989 as record assets under management produced record revenues, net income, and earnings per share. Entering 1990, we have a diverse base of assets under management totaling $28.2 billion, including $17.3 billion in the T.Rowe Price Funds. We are optimistic about our future prospects and look for continued growth in assets under management and related advisory revenues an earnings."

T. Rowe Price Associates serves as investment adviser to the T. Rowe Price family of no-load mutual funds and to institutional and individual clients.

PHILADELPHIA (JAN. 24) PR NEWSWIRE - Bell Atlantic International, Inc. and Industrias Unidas S.A., a leading Mexican company, today announced that a jointly owned company has submitted bids to the Government of Mexico for concessions to provide cellular mobile telephone service in three regions of that country.

If awarded the concessions, the new company, Telecomunicaciones del Pacifico, S.A. de C.V., would build and operate cellular mobile networks in the three regions that include the Cities of Guadalajara, Tijuana, Culiacan and Hermosillo.

The Mexican Government is awarding 20-year concessions to provide cellular mobile telephone service in eight regions of the country. It is expected to award the concessions by mid-March.

Industrias Unidas S.A. is a diversified manufacturing and services company.

Through a subsidiary, it has provided mobile telephone service in Mexico City since 1957, and it began operating the first cellular mobile telephone network there in October 1989.

Bell Atlantic International, a subsidiary of Bell Atlantic (NYSE: BEL), markets software products, telecom consulting and systems integration services to telephone authorities throughout the world. It also is the principal subsidiary through which Bell Atlantic conducts operations outside the United States.

Phildelphia-based Bell Atlantic also is the parent company of the Bell telephone companies that serve the mid-Atlantic region of the United States. It also is a leading supplier of computer maintenance, mobile communications and financial services in national and international markets.

Bell Atlantic's mobile communications company is the largest cellular carrier in the mid-Atlantic region of the United States. It provides service in five of the top 15 U.S. markets, including continuous coverage from New York City to Northern Virginia.

HAIFA, ISRAEL (JAN. 24) PR NEWSWIRE - Elron Electronic Industries Ltd. (NASDAQ: ELRNF) today announced that together with its 42 percent affiliate, Optrotech Ltd. (NASDAQ: OPTKF), it has entered into an agreement in principle with Claridge Israel Inc. (a Canadian Corporation) regarding a $16 million investment by Claridge in Optrotech.

Pursuant to the agreement, Claridge will purchase $6 million of new ordinary shares at $9 per share, and $10 million convertible notes yielding 4 percent annual interest, with an $11 conversion price and an average term of five years.

Subsequent to the initial purchase by Claridge, Elron's share in Optrotech will be decreased to approximately 37 percent, and after full conversion by Claridge, Elron's share will be about 31 percent while Claridge's share will increase to approximately 23 percent.

Elron and Claridge also agreed to enter into a shareholders' agreement regarding the composition of the board and its mode of functioning.

Claridge Israel Inc. is a Canadian-based investment company controlled by Charles Bronfman and Jonathan Kolber with investments in various export-oriented companies.

Jonathan Kolber, CEO of Claridge Israel Inc., said that Claridge looks forward to its involvement with Optrotech and considers Optrotech the world leader in automated inspection and design equipment for the printed circuit board (PCB) industry.

Uzia Galil, Elron's chairman and CEO, said that "Claridge's investment in Optrotech opens new avenues in positioning Optrotech in the world market." He added that "Elron looks forward to a close cooperation with Claridge in the future development of Optrotech."

Elron Electronic Industries Ltd., a diversified high technology company based in Israel, operates through subsidiaries and affiliates, each one focused in well-defined market segments. Elron also develops state-of-the-art technologies with nuclei of engineers and scientists with the purpose of creating new entrepreneurial high-tech companies.

ROCHESTER COMMUNITY SAVINGS BANK EARNS $6.6 MILLION IN FOURTH QUARTER

ROCHESTER, NY (JAN. 24) PR NEWSWIRE - Rochester Community Savings Bank (NASDAQ: RCSB) today reported net income of $20 million, or $1.45 per share, for the fiscal year ended Nov. 30, 1989, an increase of 31.1 percent from net income of $15.3 million, or $1.11 per share, in fiscal 1988.

Net income for the 1989 fourth quarter was $6.6 million, 64.3 percent higher than net income of $4 million in the 1988 fourth quarter. On a per-share basis, net income was 48 cents per share in the 1989 fourth quarter, compared to 29 cents per share in the 1988 fourth quarter.

All amounts for fiscal 1988 have been restated to reflect the adoption of Statement No. 91 of the Financial Accounting Standards Board, requiring deferral of certain loan origination fees and costs.

Significant growth in other income, as well as increased net interest income, contributed to strong results in 1989. Leonard S. Simon, RCSB chairman and CEO, commented, "Not only did we surpass our stated goal of increasing core operating earnings by 15 percent to 25 percent in a year when many other institutions are reporting decreased earnings, we maintained a low level of non-performing assets and increased our capital ratio to above 8 percent, a level among the highest in the industry."

Net interest income increased by 8.7 percent in 1989 to $79.9 million from $73.5 million, largely due to growth in the loan and mortgage-backed securities portfolios. The net interest margin for fiscal 1989 remained stable at 2.05 percent, compared to 2.04 percent for fiscal 1988, despite an inverted yield curve during much of 1989 which narrowed interest rate spreads.

Other income increased to $58.9 million in 1989, a 42.4 percent increase from $41.4 million in 1988. This increase was largely due to mortgage banking activities, which contributed $40.1 million in 1989, a 66.4 percent increase over 1988.

Simon commented, "Our mortgage banking subsidiary, American Home Funding, Inc. (AHF), had an outstanding year in 1989. Earnings were enhanced by a strong emphasis on productivity and cost control. Consolidation of all loan servicing operations at AHF headquarters in Richmond, Va., was instrumental in increasing productivity and profitability significantly." He added that a streamlined production network increased AHF residential

mortgage originations by 25 percent to $1.3 billion in 1989 despite a difficult mortgage market.

A 48 percent increase in net gains on the sale of loans and securities to $6.1 million was largely attributable to a $200 million securitization and sale of auto receivables in the 1989 fourth quarter. Income from joint ventures and unconsolidated subsidiaries for the year was $3.9 million, compared to $7.9 million in 1988, reflecting the cyclical nature of this line of business. Bank fees, service charges, and other income increased by 69 percent to $8.8 million in 1989, primarily due to servicing fee income from sold auto loans.

Operating expenses for 1989 were $93.1 million, up 11.1 percent from expenses of $83.8 million for 1988, reflecting the first full year of additional expenses from the expanded mortgage banking operation, as well as the impact of severance costs associated with an expense reduction program largely implemented in the 1989 second quarter. Simon explained, "To increase our long-term profitability, RCSB intensified its efforts to cut costs and improve productivity in 1989. We're already realizing the expected long-term benefits from this effort since in the last three quarters of 1989, operating expenses increased by only 5 percent, compared to 17.5 percent growth in revenues for the same period."

Total assets at Nov. 30, 1989, were $3.98 billion, compared to $4.22 billion at the end of fiscal 1988, reflecting the bank's conservative standards for asset growth. At year-end, non-performing assets were 1.51 percent of total assets, down from 1.56 percent at the end of the 1989 third quarter and substantially below current industry averages. Although the bank's level of non-performing assets remained stable, the allowance for loan losses was increased by 29 percent in 1989 to $9.3 million to ensure continued balance sheet strength. The bank's one-year rate sensitive gap, the amount of deposits and borrowings exceeding assets that reprice within one year, remained low at .9 percent of total assets at Nov. 30, 1989, down from 4.7 percent at Nov. 30, 1988.

There were many positive business developments during the year. Rochester Community remained the leading retail bank in Rochester with a 21 percent share of retail deposits. A 25 percent increase in consumer loan originations contributed to the bank's growing market share in consumer loans. The bank announced its intention to acquire Shadow Lawn Savings Bank SLA, a $740 million institution located in central New Jersey, which is a market with strong potential for deposit and loan growth.

A centralized operations center was established in the Rochester area to provide cost-efficient data processing and backroom support functions at one site. American Credit Services Inc., the bank's auto lending subsidiary, increased its production by 22 percent during the year to a record $265.7 million.

In commenting on the outlook for 1990, Simon concluded, "Continued increases in other income from our diverse lines of business are a strong indicator of our ability to sustain steady growth in core operating earnings. Our fundamental strengths -- an excellent retail banking franchise, a solid balance sheet, and minimal interest-rate sensitivity, also position Rochester Community for earnings growth in 1990. Our goal is to again increase core operating earnings by 15 percent to 25 percent."

Deposits at Nov. 30, 1989, were $2.63 billion, compared to deposits of $2.80 billion at the end of fiscal 1988. Shareholders' equity increased to $325.6 million or $23.57 per share from $312 million or $22.60 per share at Nov. 30, 1988. The ratio of equity to assets was 8.19 percent at year end, which substantially exceeds the industry average and all regulatory requirements.

In 1989, the company declared four quarterly dividends totaling 30.3 percent of earnings or 44 cents per share, an increase of 33.3 percent over total 1988 dividends. The company had 13,816,180 shares of common stock outstanding at Nov. 30, 1989.

Rochester Community Savings Bank is state-chartered, FDIC-insured through the Bank Insurance Fund (BIF) and headquartered in Rochester, N.Y. The company operates 24 retail banking offices in the greater Rochester area, and owns subsidiaries engaged in mortgage banking, automobile financing, commercial real estate banking, insurance, and securities brokerage.

#90024p0096 01/24/1990 ~PR Newswire

RADNOR, PA (JAN. 24) PR NEWSWIRE - Sun Co. today reported a 1989 fourth quarter net loss of $173 million, or $1.62 per share of common stock, compared with net income of $76 million, or $.72 per share, for the fourth quarter of last year. Included in fourth quarter results for 1989 and 1988 are after-tax charges of $177 and $17 million, respectively, for provisions for write- down of assets and other matters. Before these adjustments, Sun's income was $4 million in the fourth quarter of 1989, compared with $93 million in the fourth quarter of 1988.

For the year 1989, net income was $98 million, or $.92 per share of common stock, compared with $7 million, or $.06 per share of common stock, in 1988. Included in results for 1989 and 1988 are after-tax charges of $177 and $314 million, respectively, for provisions for write-down of assets and other matters. The 1988 special charges were primarily associated with domestic exploration and production. Sun distributed its domestic exploration and production business to the company's shareholders on Nov. 1, 1988. Excluding these adjustments and domestic exploration and production earnings of $13 million for 1988, Sun's income was $275 million in 1989 compared with $308 million in 1988.

As announced on Dec. 21, 1989, Sun completed a comprehensive review of its asset base and a reassessment of its energy resources development plan and concluded that it is no longer likely that certain energy resource assets will be developed and produced. As a result, Sun record ed a write-down of such assets to their net realizable value.

There were three major components in the $177 million of 1989 fourth quarter special charges. The first component was a $35 million after-tax write-down of foreign nonproducing oil and gas assets, principally in the United Kingdom sector of the North Sea. The second component was a $74 million after-tax write-down of coal assets in Utah, Virginia and West Virginia. In conjunction with the coal write- down, Sun's proven and probable coal reserves at Dec. 31, 1989, were revised downward by 145 million tons, or 15 percent. The last component was a $68 million after-tax provision caused by accruals for environmental matters, employee terminations and certain other matters.

MORRIS TOWNSHIP, NJ (JAN. 24) PR NEWSWIRE - Allied-Signal Aerospace Company has been awarded a contract with a potential value of $24 million to supply auxiliary power units (APU's) for new Army and Navy helicopters.

The U.S. Army has awarded the company's Garrett Auxiliary Power Division in Phoenix, a one-year contract with four option years to supply APU's for the next production phase of the Sikorsky H-60 series helicopter. The H-60 is used for troop and cargo transport, rescue, antisubmarine warfare and other duties. The APU's will supply pneumatic power to start the main engines and operate the environmental control system.

Additional options could raise the total contract value to $43 million. Deliveries will begin in July 1991.

Garrett Auxiliary Power Division designs and manufacturers auxiliary power units, jet fuel starters, aircraft-mounted auxiliary drives, secondary power systems, ground power units and ground vehicular power systems.

Allied-Signal Aerospace is a unit of Allied-Signal Inc. (NYSE: ALD), an advanced technology company with businesses in aerospace, automotive products, and engineered materials.

PITTSBURGH (JAN. 24) PR NEWSWIRE - Two Pittsburgh greats will come together next month when Pepsi-Cola moves its regional operations to the historic D.L. Clark Building on Pittsburgh's North Side, company officials announced today.

Offices for field management functions of Pepsi Penn-West, which serves western Pennsylvania and West Virginia, will occupy a full floor of the landmark building, still widely referred to as the "Clark Candy Building." These functions include sales, marketing, finance, employee relations, manufacturing and distribution.

"Pepsi's move to the Clark Candy Building links two established Pittsburgh favorites," said Larry Woods, vice president, retail sales. "Pepsi is the single largest selling food item in food stores here. And, Clark candy bars are a Pittsburgh tradition once produced in the very building we will occupy."

Approximately 80 employees of Pepsi's Penn-West operation will move from existing offices in Bridgeville, Pa., and McKees Rocks, Pa., beginning Feb. 12. The new offices will occupy approximately 26,000 square feet of the newly renovated Clark Candy Building, allowing for expected staff growth during 1990.

"Pepsi's continued strength in the Pittsburgh region requires that we have ample space for additional field staff," said Woods. "Our new location at the Clark Candy Building also provides us with centralized access to our major retail, vending and fountain accounts throughout western Pennsylvania and West Virginia." Pepsi-Cola is the only national brand soft drink made in Pittsburgh.

In addition to the Penn-West field management office, Pepsi operates five bottling plants and 22 sales distribution offices in western Pennsylvania and West Virginia. The company employs approximately 1,800 people in the region.

The move also represents a return to the Pittsburgh's North Side, where Pepsi first began its operations in the area at the turn of the century. The timing of Pepsi's move coincides with a similar announcement made 32 years ago this week, when the firm consolidated its operations and moved into its bottling facility under the McKees Rocks Bridge.

To celebrate the move, Pepsi plans to conduct a number of activities honoring great Pittsburgh traditions. Details of the plan will be announced over the next few months. Pepsi already sponsors activities each year at Kennywood, Seven Springs and the Three Rivers Regatta.

Ironically, Pepsi was once owned by Loft Inc., a candy maker which acquired the top-selling soft drink's formula and trademark in 1938. The immortal "Twice as Much for a Nickel" jingle and "Pepsi-Cola Hits the Spot" advertising campaign resulted in skyrocketing sales for the soft drink and led Loft Inc. to eventually change its name to the Pepsi-Cola Co.

#90024p0100 01/24/1990 ~PR Newswire

PHILADELPHIA (JAN. 24) PR NEWSWIRE - Rohm and Haas Co. (NYSE: ROH) today announced fourth quarter earnings of $21.4 million, or $.32 per share, a 50 percent decrease from fourth quarter 1988 results.

Sales of $623 million were 5 percent higher than the $595 million reported for the fourth quarter of 1988.

Earnings for the full year were $176.4 million, a 23 percent decrease from the record earnings achieved in 1988. Earnings per share were $2.65, compared with $3.46 for 1988. Nineteen eighty-nine sales of $2.6 billion were 5 percent higher than the $2.5 billion reported for last year.

J. Lawrence Wilson, chairman of the board, said, "The major problems of the fourth quarter were carried over from prior periods: high costs stemming from operating monomer plants above design capacity; limited product availability of acrylic acid derivatives; increased startup and depreciation costs, and adverse currency movements. In addition to these continuing problems, the fourth quarter showed the impact of a slowing U.S. economy on some product lines, and the extreme cold weather in the United States during December. About ten days of monomer production were lost because of freeze damage to the Houston, Texas, plant; output was reduced at other plants as well. Finally, results for the fourth quarter were reduced by provisions for asset disposals."

The company estimated that cold weather reduced earnings $.07 per share. Provisions for asset disposals reduced earnings by $.02 per share. While the provisions for asset disposals were not large in the aggregate, they had a significant effect on regional and business segment results. For example, a provision for the shutdown of an electronic chemicals manufacturing facility in Toledo, Ohio, and the discontinuance of a business in Switzerland by an affiliate, the Shipley Company, reduced earnings in North America and in the Industrial Chemicals segment. The sale of a 25 percent interest in a plastics additives plant in Grangemouth Scotland, raised earnings in Europe and in the Plastics segment.

Wilson concluded, "We have completed a difficult year at Rohm and Haas. Many of the factors which hurt our 1989 earnings will continue until new plant capacity becomes available beginning in the third quarter of this year. We anticipate that earnings in 1990 will be roughly equivalent to 1989."

#90024p0105 01/24/1990 ~PR Newswire

HUDSON, OH (JAN. 24) PR NEWSWIRE - ALLTEL Corporation (NYSE: AT) reported today that its audited 1989 financial results were the best in the company's history.

Earnings per share for 1989 rose 20 percent to $2.32 from the $1.94 posted in 1988, on 4 percent more average common shares outstanding. Net income was $154 million, up 23 percent from $125 million in the previous year, and revenues and sales were $1.2 billion, up 15 percent from $1.1 billion in 1988.

1988 results include a net loss on investments and merger expenses of $9 million, or 15 cents per share.

Excluding 1988's one-time charges, ALLTEL's consolidated results from operations continued to show strong improvements with net income advancing 15 percent from $134 million in 1988 and earnings per share increasing 11 percent from $2.09 in the prior year.

Fourth quarter 1989 earnings were 60 cents per share and net income was $40 million. Excluding fourth quarter 1988 one-time charges, net income was up 10 percent from $37 million and earnings per share were up 5 percent from 57 cents.

ALLTEL President and CEO Joe T. Ford said, "1989's strong results are due largely to continued strong performance by the company's regulated telephone operations, which showed solid line growth, increased use of the network and continuing cost control efforts."

Non-regulated operations also made an increased contribution, with ALLTEL Distribution sales and operating income up sharply -- due in large part to the acquisition of HWC Distribution. ALLTEL Mobile, the company's cellular subsidiary, also made gains, increasing the number of customers it serves to 24,300, up more than 80 percent over 1988.

ALLTEL Corporation (AT) provides local telephone service to 1.1 million customers in 25 states and has subsidiaries or investments in companies that provide cellular telephone and long-distance service, communications products and other related services.

#90024p0106 01/24/1990 ~PR Newswire

SAN ANTONIO, TX (JAN. 24) PR NEWSWIRE - Diamond Shamrock R&M Inc. (NYSE: DRM) today reported record 1989 earnings from continuing operations of $60.1 million, or primary earnings per share of $2.20, compared to $54.3 million, or $2.14 per share, from continuing operations in 1988.

The company has taken a non-cash extraordinary charge of $32 million after-tax, establishing a reserve for future obligations to its former parent company. This results in net income of $28.1 million for 1989, or primary earnings per share of $0.90, compared to $53.5 million, or $2.10 per share for 1988.

Earnings for the fourth quarter from continuing operations were $8.2 million, or primary earnings per share of $0.27, compared with $27.4 million, or primary earnings per share of $1.08, for fourth quarter 1988.

Sales for the year were $2.1 billion, up 16 percent over $1.8 billion in 1988. Fourth quarter sales were $557.7 million, compared to $449.5 million in the same quarter last year.

Commenting on the 1989 results, Diamond Shamrock Chairman and Chief Executive Officer Roger R. Hemminghaus said:

"Despite a sluggish fourth quarter, we are pleased with the record 1989 operating earnings. Industry conditions improved at the end of December as the extreme cold weather squeezed petroleum product supplies and strengthened refining margins.

"These improved refining margins late in the fourth quarter together with strong margins earlier in the year contributed to record 1989 operating profits.

"Revenues reflect an increase in refined product prices and a full year's benefit from the acquisition of 80 stores in December 1988, which, along with 44 new retail Corner Stores opened during 1989, resulted in higher gasoline volumes and merchandise sales."

As a condition of its spin-off from Maxus Energy Corp. in April 1987, Diamond Shamrock contractually agreed to share environmental costs and certain other liabilities of Maxus Energy related to businesses that were discontinued or disposed of prior to the spin-off date. The cost of such liabilities are to be borne solely by Maxus up to $75 million, thereafter, solely by Diamond Shamrock until Diamond Shamrock has reimbursed Maxus for $37.5 million. At that time, Diamond Shamrock will be obligated to pay one-third of such future costs until Diamond Shamrock's total share equals $85 million, which is an absolute cap on Diamond Shamrock's potential liability. As of Dec. 31, 1989, Maxus advised Diamond Shamrock that it had spent approximately $56.2 million, a portion of which is disputed by

Diamond Shamrock.

Diamond Shamrock is a regional refiner and marketer of petroleum products. The San Antonio-based corporation has two Texas refineries with a throughput capacity of 160,000 barrels per day, markets gasoline through about 2,000 Diamond Shamrock branded outlets, processes natural gas, and stores and markets natural gas liquids.

#90024p0108 01/24/1990 ~PR Newswire

BEVERLY HILLS, CA (JAN. 24) PR NEWSWIRE - Qintex Entertainment Inc. (NASDAQ: QNTQE) today reported revenue of $85,714,000 and a net loss of ($33,168,000), or ($1.55) per share, for the fiscal year ended July 31, 1989.

The company noted that prior-year figures are not directly comparable. QEI was formed following the merger of Hal Roach Studios Inc. and Robert Halmi Inc., which became wholly owned subsidiaries on April 11, 1988.

The company reported revenue of $6,770,000 and a net loss of ($6,894,000), or ($0.38) per share, for the four months of operations ended July 31, 1988. Hal Roach Studios, the predecessor of QEI, reported revenue of $14,949,000 and a net loss of ($4,331,000), or ($0.47) per share, for the fiscal year ended March 31, 1988.

As announced on Oct. 19, 1989, QEI filed for protection under Chapter 11 of the Federal Bankruptcy Code when the company could not meet a material obligation under a distribution agreement with MCA Television Limited. Adjustments for events related to the Chapter 11 filings increased the year-end loss by approximately $27,000,000.

These adjustments were primarily the result of the write down to net realizable value of television series distributed under the agreement with MCA; write down to net realizable value of QEI's film library as a result of the discontinuance of direct domestic broadcast syndication distribution activities; and increased reserve for notes receivable related to the company's stock.

The major portion of revenue for the fiscal year was derived from production and delivery of programming that included:

- Six television movies-of-the-week: "Face to Face," a Hallmark special for CBS, "The Prize Pulitzer" for NBC, "Spies, Lies and Naked Thighs" for CBS,

"The Margaret Bourke-White Story" for the TNT Network, "Bridesmaids" for CBS and "Trouble in Paradise" for CBS.
- The eight-hour miniseries, "Lonesome Dove," which dominated television ratings during its February 5-8, 1989 airing on CBS.
- Fifteen episodes of "Crossbow," a half-hour television series
- "Cheetah and Friends," a theatrical feature for the The Disney Company

QEI is continuing to pursue production, development and subdistribution operations under Chapter 11 protection. These operations include:

- "The Incident," a recently completed television movie for CBS starring Walter Matthau
- A colorized film package featuring "It's A Wonderful Life" for the holiday season
- Completion of production of the third season of "T and T," a half-hour action series starring Mr. T.
- Development of a half-hour comedy for CBS with Jonathan Winters
- A series of productions in association with RHI Entertainment, such as "White Gold," a television movie principal photography for the TNT Network, and "Josephine Baker," a television movie for Home Box Office currently in development.
- "Getting Out," a television movie in development from the play by Marsha Norman.

#90024p0110 01/24/1990 ~PR Newswire

CINCINNATI (JAN. 24) PR NEWSWIRE - Robert J. Ready, president of LSI Industries Inc., (NASDAQ: LYTS) today reported operating results for the periods ending Dec. 31, 1989 as follows:

(Amounts in Thousands)	Three Months 1989	Three Months 1988	Pct. Change
Net Sales	$23,634	$13,011	+82
Gross Profit	8,569	5,068	
Operating Income	2,711	1,836	
Net Income	1,442	1,177	+23
Per Share Amounts:			
Net Income from Operations	$.31	$.26	+19
Moving Costs	(.02)	---	
Net Income	.29	.26	+12
Average Shares			

Outstanding	4,908	4,443	+10

(Amounts in Thousands)	Six Months 1989	Six Months 1988	Pct. Change
Net Sales	$43,889	$23,149	+90
Gross Profit	15,887	8,969	
Operating Income	4,813	3,143	
Net Income	2,562	2,049	+25
Per Share Amounts:			
Net Income from Operations	$.55	$.46	+20
Moving Costs	(.04)	---	
Net Income	.51	.46	+11
Average Shares Outstanding	4,886	4,443	+10

The above results represent LSI's eleventh consecutive quarter of record sales and earnings. Net income per share amounts include the effect of the pro forma reduction in income resulting from the assumed issuance of contingent consideration for acquisitions. Net income per share was reduced by $.02 per share for the quarter and $.04 per share for six months due to costs related to consolidating four Cincinnati manufacturing operations into two.

LSI designs, engineers, manufactures and markets a wide range of high-quality indoor, outdoor, and landscape lighting fixtures and graphic products. The Company is the leading supplier of outdoor lighting and graphic products to retail gasoline facilities and a major supplier to the fast-food restaurant and automobile dealership markets. The Company's common shares are traded on the NASDAQ National Market System under the symbol LYTS.

FORT WORTH, TX (JAN. 24) PR NEWSWIRE - The Western Company of North America (NYSE: WSN) commenced an offering today of $78,500,000 of 7-1/4 percent convertible subordinated debentures due Jan. 15, 2015, through Drexel Burnham Lambert Inc. and PaineWebber Inc. Interest is payable semi-annually.

The debentures are convertible into Western common stock at a price of $17 per share, subject to adjustment under certain circumstances and reset on March 1, 1990, at a price equal to a 15 percent premium over the average New York Stock Exchange closing sale price for the preceding 20 trading

days. Under no circumstances will the reset conversion price be lower than $15 or higher than $17 per share.

Net proceeds to Western from the offering of approximately $75,740,000 will be used principally to repurchase, for $73,025,000, Western's Series B notes in the principal amount of $115 million delivered in response to its tender offer for such notes.

Western has applied for listing of the debentures on the New York Stock Exchange. The Western Company of North America provides pressure pumping services which include cementing, fracturing and acidizing, and offshore drilling internationally. Western's common stock is traded on the New York Stock Exchange.

#90024p0113 01/24/1990 ~PR Newswire

DES MOINES, IA (JAN. 24) PR NEWSWIRE - Meredith Corporation (NYSE: MDP) today announced second quarter earnings of $9,451,000, or 51 cents per share, down from $10,387,000, or 54 cents per share, a year ago.

Revenues for the quarter ended Dec. 31 improved to $211,917,000 because of higher ad pages and ad rates in magazine operations and acquisitions in the book direct mail operation. Revenues were $195,853,000 for the same period a year earlier.

"While earnings improved significantly in magazine operations, profits declined in our other businesses, said Jack D. Rehm, president and chief executive officer. "Earnings in our real estate business were hurt by soft market conditions in the California and New York area housing markets where we have made investments in residential real estate companies.

"Lower revenues and onetime restructuring expenses incurred for a new customer focus program reduced MMT Sales results. Competitive pricing pressures lowered margins in the commercial printing business. Soft advertising revenues lowered earnings in our broadcasting operations."

Magazine operations generated higher earnings on the strength of improved contributions from "Ladies' Home Journal" and Successful Farming" magazines and Craftways Corporation, a wholly owned subsidiary which publishes "Cross Stitch & Country Crafts" and "Cross Quick." Gains resulted from increased ad pages in "Ladies' Home Journal," an improved farm economy which helped "Successful Farming" and lower costs at Craftways.

Profits in book publishing were even with last year. "Popular Science" Book Club and "Outdoor Life" Book Club, both acquired early in the second quarter, contributed to earnings. However, higher promotional costs for other book club operations held earnings flat.

For the first six months of its fiscal year, Meredith reported earnings of $18,768,000, or $1.01 per share, on revenues of $407,638,000. For the same period a year ago, earnings were $21,046,000, or $1.10 a share, on revenues of $386,358,000.

"Our first half performance reflects many of the same factors that held down our second quarter results," Rehm said.

Meredith Corporation is a diversified media company involved in magazine and book publishing, television broadcasting, residential real estate marketing and franchising, and commercial printing.

NORTH FALMOUTH, MA (JAN. 24) PR NEWSWIRE - Benthos, Inc. (OTC) today announced first quarter sales of $1,573,000 for the period ended Dec. 31, 1989, a 3 percent decrease as compared with record first quarter sales of $1,616,000 last year. Because of lower gross margins in the quarter, the company experienced a net loss of $32,000 or 4 cents net loss per share. This result compares with a net income of $23,000 or 2 cents net income per share for the first quarter of last year.

Benthos, Inc. designs, manufactures, sells, and services oceanographic equipment for underwater exploration and naval defense, and electronic inspection equipment for the on-line testing of the seal integrity of food beverage, medical, and petrochemical consumer packages.

GLENWOOD, IL (JAN. 24) PR NEWSWIRE - Tech/Ops Landauer, Inc. (AMEX: TO) reported that while revenues and operating income from the company's traditional radiation dosimetry business increased in the quarter, there was a sharp year-to-year decline in radon gas testing services.

As a result, net income of $1,438,000, or $.34 per share, for its first fiscal quarter ended Dec. 31, 1989, was 12 percent lower than the $1,631,000, or $.39, reported for the same quarter of the previous year. The company, a recognized leader in radiation monitoring and radon detection services, had revenues for this year's first quarter of $5,731,000, a decline of 29 percent from the $8,100,000 recorded in last year's first quarter.

In September 1988, just before the first fiscal quarter of 1989, the U.S. Surgeon General and the Environmental Protection Agency jointly made a public announcement that naturally occurring radon gas was a serious health hazard. This resulted in an extraordinary demand for radon test kits during the period from October to December 1988. Subsequently, however, demand at the retail level for radon gas test kits declined sharply. The company continues to provide its radon services primarily to institutional users such as the American Lung Association and government agencies, but total revenues from radon gas testing are not expected to approach those of last year.

#90024p0121 01/24/1990 ~PR Newswire

BELLEVUE, WA (JAN. 24) PR NEWSWIRE - U S WEST NewVector Group Inc. (NASDAQ: USWNA) today reported revenues of $189.5 million for the year ended Dec. 31, 1989, an increase of 42.5 percent compared with 1988 revenues.

Net loss for the year was $11.1 million versus a $24.8 million loss in 1988. NewVector said $10.7 million of that improvement resulted primarily from sustained customer growth which increased each quarter, the introduction of new revenue-producing services, and improved operating efficiencies. The remaining $3 million improvement resulted primarily from a change in accounting for income taxes.

NewVector reported a positive operating cash flow for the year of $17.1 million, a $24.4 million improvement over last year. Operating cash flow is defined as operating loss excluding depreciation and amortization expense.

The company attributed the revenue increase to sustained customer growth in NewVector's cellular and paging operations.

U S WEST Cellular, NewVector's cellular division, served 134,800 subscribers at year end, a 62 percent increase in customers over the prior year. NewVector also finished the year with 16.5 million "adjusted pops," a 6.8 percent increase when compared to 1988. Approximately 600,000 "adjusted pops" resulted from lotteries held by the Federal Communication Commission in 1989 to award Rural Service Area (RSA) licenses, bringing to 1.6 million the number of RSA "adjusted pops" in NewVector's portfolio.

NewVector said that its paging company, U S WEST Paging, had 134,300 pagers in service which represented a 48.2 percent increase compared with 1988. During the year, NewVector added four paging markets through acquisitions bringing to 55 the number of markets served.

"During 1989, NewVector developed increased synergies between its cellular and paging operations and acquired interests, either directly or with settlement partners, in wireline cellular construction applications for strategic RSAs," said John DeFeo, NewVector president and chief executive officer. "Together, these developments give NewVector the ability to enhance the demand for cellular in 1990 by providing new services and through the development of a seamless network."

U S WEST NewVector Group Inc. is headquartered in Bellevue, Wash., with operations in 16 midwestern, western, and southwestern states. NewVector is a majority-owned subsidiary of U S WEST Inc., a diversified corporation based in Englewood, Colo.

ANAHEIM, CA (JAN. 24) PR NEWSWIRE - Standard Logic Inc. (OTC) today announced the results for its fiscal year ended Oct. 31, 1989.

Revenues for fiscal 1989 were $1,922,811 which resulted in a net loss of $238,861. This compares to revenues of $2,407,950 and a net loss of $915,503 in fiscal 1988.

Wes Baumgardner commented on the year end, stating "that the losses of the first five months of fiscal year 1989 were too great to overcome and that the company was profitable for the last seven months of its fiscal year."

MORRIS PLAINS, N.J. (JAN. 24) PR NEWSWIRE - Philip M. Gross has joined Warner-Lambert Co. (NYSE: WLA) any as president of its newly created Environmental Polymers Division.

Gross, who served with General Electric Co.'s plastics operations for 26 years, will be responsible for the commercialization of Novon, a biodegradable starch-based material with the physical characteristics of many plastics in use today.

"We're extremely fortunate to have an executive of Mr. Gross's experience and achievement join us at this critical time," said Joseph D. Williams, Warner-Lambert's chairman and chief executive officer. "We're convinced that Novon presents important business opportunities, and we're committed to pursuing them with the best people available."

Gross most recently served as president and general manager of General Electric's Silicone Division, a $600 million operation with headquarters in Schenectady, N.Y. He had also served as vice president and general manager of its specialty products and ventures division, as well as its

thermoplastic resin business.

Gross received his master's in chemical engineering from Massachusetts Institute of Technology in 1963. His undergraduate work was done at Rensselaer Polytechnic Institute.

Novon was developed by scientists at Warner-Lambert's Capsugel Division in their efforts to improve production of empty hard gelatin capsules for the pharmaceutical industry. They discovered that naturally occurring starch when melted, could be injection molded to very precise engineering tolerances. This led to the development of Capill, an all-starch capsule, and to the prospect of producing other biodegradable materials having the properties of crystalline polystyrene. Warner-Lambert said it expects to begin generating revenue from Novon within two to three years.

Warner-Lambert is a health care and consumer products company employing some 34,000 people worldwide.

JACKSON, MI (JAN. 24) PR NEWSWIRE - Patrick Petroleum Company President U.E. (Pat) Patrick today reported the successful completion of its fifth Michigan deep gas Prairie du Chien well in the past year and a half. The State Grant 1-32A, operated by Northern Michigan Exploration Company (NOMECO), is located on Patrick's Colfax prospect in Mecosta County, near Big Rapids.

In a series of tests using various choke sizes, the State Grant 1-32A tested as high as 2.4 million cubic feet of gas and 264 barrels of condensate per day (20/64-inch choke, flowing tubing pressure of 1,079 pounds per square inch).

The company said it owns approximately 32-percent working interest in the State Grant 1-32A, a wildcat which was directionally re-drilled from an earlier non-commercial test. Three zones were encountered in the well, which was drilled to a total depth of 9,703 feet. Patrick's partners in the well include NOMECO, ARCO and Petrostar Energy.

Patrick Petroleum Company (NYSE: PPC) is an independent exploration and production company listed on the New York Stock Exchange since 1976. The company has interests in producing properties and undeveloped acreage in 11 states, including various interests in approximately 510 oil and gas wells located primarily in Michigan, North Dakota, Texas, Oklahoma, and Louisiana.

#90024p0132 01/24/1990 ~PR Newswire

DEERFIELD, IL (JAN. 24) PR NEWSWIRE - Baxter today reported 1989 sales of $7.4 billion, an 8 percent increase over 1988. Operating income increased 15 percent to $766 million. Net income increased 15 percent to $446 million and earnings per common share increased 15 percent to $1.50.

"Our overall sales increase in 1989 was good, and reflects continued growth in the U.S. hospital-supply market as well as strong sales gains in our alternate site businesses," said Vernon R. Loucks Jr., chairman and chief executive officer. "Throughout the year, we were able to leverage operating expenses, which contributed significantly to our 15 percent increase in operating income."

Sales for the fourth quarter of 1989 were $2.0 billion, an increase of 7 percent over the same period in 1988. Net income was $139 million, an increase of 15 percent over the 1988 fourth quarter. Earnings per common share were 47 cents, an increase of 15 percent.

Domestic sales for 1989 were $5.7 billion. Sales from international markets were $1.7 billion. For the fourth quarter, domestic sales were $1.5 billion and international sales were $456 million. International sales growth in local currency was approximately 9 percent for the quarter and 12 percent for the year.

The increase in other non-operating income for the year reflects a higher level of net gains associated with the disposition or discontinuance of minor non-strategic or unprofitable business units and investments, as well as the disposition of a 50 percent equity interest in a portion of the company's worldwide nutrition products business.

"We feel the merger with American Hospital Supply Corp. has progressed to the point where we can now take more aggressive actions to capitalize on the obvious opportunities that were created," Loucks said. "As a result, the company has initiated a comprehensive evaluation of structural alternatives it may wish to pursue in order to achieve significantly higher levels of operational efficiency, global market penetration and stockholder returns. The outcome of this study, which is expected to be completed before the end of the first quarter, could result in decisions to divest and/or consolidate various businesses and facilities and to significantly reduce staffing levels, particularly at corporate headquarters."

Baxter International Inc. (NYSE: BAX) is the leading international manufacturer and marketer of health-care products, systems and services. It offers 120,000 products to health-care providers in more than 100 countries.

#90024p0135 01/24/1990 ~PR Newswire

RIVERHEAD, NY (JAN. 24) PR NEWSWIRE - Suffolk Bancorp (NASDAQ: SUBK) today released the results of its operations during the fourth quarter and for the year-to-date. Net income was $1,089,000 and $5,233,000 for the quarter and year, respectively, behind 27 and 7 percent, respectively, compared with $1,501,000 and $5,618,000 posted during the same periods last year. Earnings-per-share were $0.33 versus $0.46 for the quarter, and $1.58 versus $1.71 for the year. A financial summary appears below.

President and CEO Edward J. Merz commented, "Our original projections for 1989 anticipated that earnings would be even with or slightly behind 1988. We finished the year down modestly, 7 percent behind last year for three primary reasons.

"More than half of the decline is attributable to management's decision to add $235,000 to the loan loss reserve at year-end. We believed that the prudent course of action was to provide the bank with additional reserves to protect 1990 earnings from unforeseen contingencies, particularly in light of uncertainties in the regional economy. Even before this provision, reserves were adequate by current industry standards, and our delinquencies and losses remain among the lowest in the industry.

"Next in importance was a greater-than-forecast narrowing in our net interest margin, owing to unexpectedly severe competition for funds during the first half of the year.

"Finally, as we had planned, the ongoing expenses in connection with converting Island Computer to new systems and marketing them to regional financial institutions continued to exert downward pressure on net income. We expect that Island Computer will begin to contribute revenue during 1991."

Suffolk Bancorp is a one-bank holding company engaged in the commercial banking business through the Suffolk County National Bank, a full-service commercial bank headquartered in Riverhead, N.Y. "SCNB" is Suffolk Bancorp's wholly owned subsidiary. Organized in 1890, the Suffolk County National Bank is the second-largest independent bank headquartered on Long Island, with offices in Center Moriches, Cutchogue, Hampton Bays, Medford,

Mattituck, Riverhead, Wading River, and Westhampton Beach, N.Y. Suffolk Bancorp also owns Island Computer Corporation of New York, a bank data-service company located in Bohemia, N.Y.

WILTON, CT (JAN. 24) PR NEWSWIRE - Preferred Health Care, Ltd. (AMEX: PY) today announced that it has entered into agreement with the Federal Express Corporation for the delivery of Preferred Health Care's managed mental health and substance abuse service delivery system to Federal Express employees and their families beginning on March 1, 1990.

Federal Express Corporation, headquartered in Memphis, Tenn., provides

benefits to 50,000 employees and their families throughout the United States.

"We are very pleased to have been chosen by Federal Express to provide our managed mental health and substance abuse services in support of their health benefit plans," said David J. McDonnell, D.S.W., Preferred's chief executive officer.

Earlier this month, Preferred announced that it had entered into agreements with Episcol Church Clergy and Employees' Benefit Trust and Maricopa County, Ariz., for the delivery of its managed mental health and substance abuse service delivery system to employees and their families. These two programs cover a total of 19,200 employees and their families.

Preferred Health Care, located in Wilton, Conn., is the nation's leader in managed mental health and substance abuse care. The clients served by Preferred Health Care represent many of the Fortune 500 companies and include over 4.5 million lives.

#90024p0139 01/24/1990 ~PR Newswire
BOSTON (JAN. 24) PR NEWSWIRE - NASA has awarded Stone & Webster Engineering Corp. work at its space centers in Alabama and Houston.

Stone & Webster will oversee construction associated with an ongoing $30 million upgrading and expansion program at the Marshall Space Center in Huntsville, Ala. The services provided by the firm will include construction management and inspection, controlling shop drawings submitted by contractors, and monitoring schedules. Stone & Webster also will prepare preliminary and final budget estimates.

The scope of work includes all construction activities to be undertaken at the center during 1990 - about 70 projects of varying sizes. Although the contract covers the single calendar year, NASA has an option to exercise two, one-year extensions.

At the Johnson Space Center, Houston, Stone & Webster will design and prepare cost estimates for modifications to the extravehicular activity systems facility. The new space simulation chambers to be added will be used for training and testing participants in the space flight training program.

Stone & Webster Engineering Corp., a subsidiary of Stone & Webster Inc. (NYSE: SW) of New York City, engineers and constructs civil works

facilities, as well as oil/gas processing, petrochemical, chemical, electric power, and industrial plants around the world. The engineering corporation is headquartered in Boston and has full-service offices in Houston, New York, Denver and Cherry Hill, N.J., and affiliates in Canada and the United Kingdom.

DENVER (JAN. 24) PR NEWSWIRE - Dr. Tito Tettamanti, chairman of the board of Saurer-Gruppe Holding Aktiengesellschaft (Saurer-Group Holding Inc.), one of the largest engineering and industrial companies in Switzerland, announced today that its Textile Machines Division had completed the acquisition of a majority controlling interest of Melco Industries Inc., a Denver-based designer and manufacturer of embroidery and monogramming machines and supplies.

The terms of the transaction were not disclosed. Financing for the acquisition was obtained through Union Bank of Switzerland's New York Branch.

As Dr. Tettamanti pointed out, "The Melco acquisition has two primary goals: the strengthening of Saurer's market position in embroidery machines in the USA and the close cooperation with Melco in the development of new electronics and software systems for these products." According to Dr. Tettamanti, "There are also considerable opportunities for synergy in the range of products offered by the two companies; in fact while Melco mainly supplies smaller embroidery machines, Saurer is the leader in the production of larger embroidery machines."

Willy Pfister, head of Saurer's Textile Machines Division, also commented, the acquisition of Melco is a perfect match for Saurer.

"We're very pleased to welcome Melco into the Saurer family," said Pfister "Melco is a well-managed company, with an excellent track record in the development of state of the art technologies in the industry. Melco's market niche of small embroidery machines is complimentary to Saurer's line of larger embroidery and twisting machines. We are very impressed by the entrepreneurial spirit of Melco's management and look forward to a mutually satisfying, long-term relationship."

Kenneth Glass, vice president of finance and administration, stated, "We are excited at the prospects of joining with Saurer. We believe this partnership will allow us to continue to develop new products which can be sold in additional markets around the world. In addition, we look forward to the marriage of our technological and software expertise and Saurer's

engineering and industry prowess. The real winners of this partnership will be the employees and customers of both companies."

Melco's management will continue to have operating control of the company. Melco will proceed with its plans to expand its 52,000 square foot headquarters manufacturing and warehouse facility in Westminster, Colo., by 25,000 square feet this spring.

Randall Melton, currently president of Melco Industries, will continue as chief executive officer and William Childs, formerly chairman, will serve as a director and consultant to the company.

ST. PAUL (MINN. JAN. 24) PR NEWSWIRE - Green Tree Acceptance, Inc. (NYSE: GNT), announced further expansion of its financial services business with the formation of the Consolidated Casualty Insurance Company.

"Our purpose in forming the company is to actually do the underwriting of many of the property and casualty policies that we write for our customers " said Robert A. Hegstrom, the subsidiary's president and chief operating officer. "This decision is significant for Green Tree when you consider in 1989, Green Tree wrote over 76,000 manufactured housing property and casualty policies for its customers. These policies had a premium value of over $23 million and a face value of $1.5 billion."

"The establishment of a property and casualty reinsurance subsidiary is a natural extension of our business," said Lawrence M. Coss, chairman, president and chief executive officer of Green Tree Acceptance. "Green Tree has been involved in the manufactured housing insurance business as a broker for over 12 years, and we are comfortable in taking this additional step."

Green Tree purchases, pools, sells and services conditional sales contracts for manufactured homes on a nationwide basis through 40 regional offices. Its common stock is traded on the New York and Pacific Stock Exchanges under the symbol GNT.

#90024p0150 01/24/1990 ~PR Newswire

STATE COLLEGE, PA (JAN. 24) PR NEWSWIRE - Uni-Marts Inc. (NASDAQ: UNMA A) today announced results for the first quarter of fiscal year 1990.

Net sales for the first fiscal quarter ended Dec. 28, 1989 were $58.0 million, a 22.9 percent increase over net sales of $47.2 million for the previous year's first quarter ended Dec. 29, 1988. Net earnings were $840,606 as compared with first quarter net earnings of $831,646 for the prior year. Earnings per share were $.13, which is the same per share earnings for the comparable quarter of the previous year.

Henry D. Sahakian, president and chief executive officer of Uni-Marts Inc. stated, "The increase in first quarter net sales is attributable to increased petroleum gallons as well as selling prices, higher dairy sales to unaffiliated customers and merchandise sales at the increased number of convenience stores in operation. Although first quarter merchandise sales increased over the prior year's first quarter, they did not increase as much as we had anticipated due to colder than normal weather conditions in the Northeast. Comparable merchandise sales were slightly higher than last year while gasoline margins per gallon were flat. As a result, the additional depreciation, amortization and interest expenses associated with last year's acquisitions were not absorbed as planned and affected net earnings."

He added, "During the first quarter, we opened one new store and closed five unprofitable locations. At the end of the quarter, two stores were under construction and nine additional sites were in various stages of negotiation."

Uni-Marts Inc. is a leading independent operator of convenience stores

that are located throughout Pennsylvania and in southern New Jersey, western New York, Delaware and Maryland. At Dec. 28, 1989, 338 stores were in operation with 197 offering self-service gasoline. The company also processes and distributes milk and ice cream products through its dairy division and distributes home heating oil and gasoline through its petroleum division.

BALTIMORE (JAN. 24) PR NEWSWIRE - Senior management reassignments, designed to further strengthen the manufacturing and sales management focus of Arcata Graphics, were jointly announced by William Hepler, executive vice president, sales and development, and John Boylan, president of Arcata Graphics Book Group.

Effective immediately, Luther M. Odom Jr. is the new vice president and general manager of Arcata Graphics/Kingsport. Prior to his new assignment, Odom was vice president of strategic operations for Arcata Graphics Book Group. Since joining Arcata Graphics in 1962, Odom has held numerous management assignments.

Located in Kingsport, Tenn., the Kingsport division is the largest manufacturing facility operated by Arcata Graphics Book Group. With annual sales in excess of $100 million, Arcata Graphics/Kingsport is considered the most complete book manufacturer in the industry.

In making the announcement, Boylan said, "I am exceptionally pleased to have Luther's talents to draw upon at a time when we have exciting plans for the future of the Kingsport facility."

Odom replaces Dennis Zimmerman, who had been vice president and general manager since 1987. Zimmerman assumed the position of vice president/regional sales manager New York. As a ten-year former R.R. Donnelly sales and marketing representative, Zimmerman brings an extensive background to his new position.

"Dennis will be extremely successful and will strengthen our sales management team immediately," Hepler said.

As part of Hepler's Arcata Graphics' sales team restructuring, he also announced that John Doyel will become vice president-national accounts. Doyel will also relocate to the New York sales office.

"John Doyel's excellent credentials and reputation with major book

publishers will be a definite plus for Arcata Graphics," Hepler said.

WASHINGTON (JAN. 24) PR NEWSWIRE - The Soviet Union "flag carrier" Aeroflot has ordered five A310-300s from Airbus Industrie, becoming a new client and the consortium's largest customer in Eastern Europe. The sale is the first Western aircraft acquisition for the Soviet carrier.

Aeroflot, which transports more than 130 million passengers a year, will receive the Airbus A310-300s, the first widebody twin-engine aircraft in its fleet, between November 1991 and June 1992. It will use them on international services to the Far East, Europe, and North America.

The aircraft, which Aeroflot will call the Airbus A310-300 Intercontinental, will seat 193 passengers in a three-class layout of 12 first, 35 business, and 146 economy seats. The Airbus A310-300 Intercontinental will be powered by either General Electric CF6-80C2 or Pratt & Whitney PW4152 engines.

Aeroflot will be the first airline to receive the 361,600-pound maximum take-off weight version of the Airbus A310-300, which will give it further increased payload and range flexibility. Application for the required export licenses for the aircraft has been made. With this order, Airbus Industrie has now sold 612 A300 and A310 widebody twin-engine aircraft to 71 customers.

#90024p0161 01/24/1990 ~PR Newswire

NEW YORK (JAN. 24) PR NEWSWIRE - Apple Bancorp, Inc. (NYSE: APK) reported net income of $6.6 million, or $1.44 per share, and $25.1 million, or $5.46 per share, for the fourth quarter and year ended Dec. 31, 1989, respectively.

This compares with $7.0 million, or $1.52 per share, and $24.3 million, or $5.29 per share, for the same periods in 1988. Net income for the quarter ended Dec. 31, 1989, represented an annualized return on average assets of .72 percent.

Commenting on the bank's performance, Jerome R. McDougal, chairman, said "Our solid performance in the fourth quarter is very gratifying in view of the weaknesses in the banking system that are being revealed almost on a

daily basis. Our discipline and insistence on quality position us well for the challenges of the current banking environment. This will be borne out in 1990 with a performance that we expect will exceed that of the past year.

"Based on the positive outlook for Apple Bank and an analysis of our capital position under the new regulatory rules, the board of directors last week authorized the establishment of a dividend policy at this time.

"As a public company for more than five years, shareholders have patiently observed the dramatic growth within prudent guidelines Apple Bank has experienced. It is timely that they now share directly in the fruits of that growth," McDougal said.

The initial quarterly dividend of $.35 per share will be payable on April 4, 1990 to holders of record as of March 7, 1990.

Total assets on Dec. 31, 1989, were $3.84 billion, up $505 million from the comparable 1988 figure of $3.34 billion, primarily as a result of continued growth of the loan portfolio during 1989 and the acquisition of Sag Harbor Savings Bank on Nov. 30, 1989. The Sag Harbor Savings Bank merger has increased the bank's branch network in the New York metropolitan area to 33 by adding 5 branches in Suffolk County.

Total loan originations for the quarter ended Dec. 31, 1989, were $447.6 million. Deposits totaled $3.41 billion at the end of the current quarter, up $567 million from the comparable 1988 figure of $2.84 billion, mainly due to special certificate of deposit campaigns instituted by the bank during the first half of 1989.

While borrowed funds decreased $94 million, net income provided the funding for the remaining increase in total assets. Shareholders' equity of $253.8 million represents 6.61 percent of total assets and a book value of $55.21 per share.

#90024p0162 01/24/1990 ~PR Newswire

HOUSTON (JAN. 24) PR NEWSWIRE - Noble Drilling Corp. (NASDAQ: NDCO) today announced financial results for 1989 and the date of the 1990 annual shareholders' meeting.

For the year ended Dec. 31, 1989, Noble Drilling reported a net loss of $6,883,000 ($10,531,000 net loss before extraordinary items) on revenues of $107,104,000 compared with a net loss of $8,427,000 on revenues of $44,244,000 in 1988.

The increase in revenues is generally attributable to the addition of foreign operations in November 1988 through the acquisition of the Peter Bawden Drilling Ltd. group of companies.

For the quarter ended Dec. 31, 1989, the company reported net income of $165,000 ($3,483,000 net loss before extraordinary items) on total revenues of $31,932,000 compared with the fourth quarter of 1988 net loss of $2,247,000 on revenues of $12,787,000.

Even though revenues were up by 142 percent due to the addition of international operations, the net loss, before extraordinary items, for the year worsened due principally to expense accruals of $550,000 for the cost of corporate office relocation from Tulsa, Okla. to Houston, and $2,361,000 for outstanding stock appreciation rights, as well as the inability to recognize income tax benefits from current year losses for financial reporting purposes. The net loss per share for the year was further impacted by a $775,000 accretion on the stock subject to put option which was issued in conjunction with the acquisition of the Bawden group of companies.

Extraordinary income totaling $3,648,000 was recognized during the fourth quarter as the result of an insurance settlement and a gain on the restructuring of debt related to the Noble Drilling Building in Tulsa. Separately, the building carrying value was written down by $884,000, which amount is not classified with such extraordinary income.

Noble's average domestic rig utilization rate for the year was 28 percent compared with 1988's average of 25 percent. However, during the fourth quarter, the company experienced an increase in domestic utilization to 37 percent for the 1989 quarter compared with 18 percent for the 1988 quarter.

The company's international rig utilization rate of owned and leased rigs averaged 33 percent for the year ended Dec. 31, 1989 and 39 percent for the fourth quarter. As a comparison, the international fleet experienced a 38 percent utilization for the fourth quarter of 1988. In addition, at year end 1989 the company operated 15 labor contracts.

James C. Day commented, "Even though the domestic rig count reached a new low during the year, our field operations began to improve. Both operating arenas, domestic and international, appear poised for the long anticipated recovery."

"While most indicators are positive for activity to improve, the recovery process will be erratic," Day added.

Noble Drilling announced that the 1990 annual shareholders' meeting will be held at 10 a.m. on April 26, 1990 in Houston for shareholders of record

on March 9, 1990.

Noble Drilling Corp. is a major drilling contractor providing offshore and onshore contract drilling services worldwide with operations in the United States, Canada, Latin America, the United Kingdom, East Africa and the Far East. The company's common stock is listed in the NASDAQ/NMS under the symbol "NDCO."

#90024p0164 01/24/1990 ~PR Newswire

HOUSTON (JAN. 24) PR NEWSWIRE - At its annual shareholders meeting today, Sterling Chemicals, Inc. (NYSE: STX) reported revenues and earnings for the first quarter of its 1990 fiscal year ended Dec. 31, 1989, as well as results of its current stock repurchase program.

Revenues for the first quarter were $88.0 million compared to revenues of $165.6 million for the first quarter of fiscal 1989, a decrease of 46.9 percent. Net income was $4.4 million for the quarter vs. $47.0 million for the same quarter of the previous fiscal year, a decrease of 90.6 percent. On a per share basis, net income was $.08 for the first quarter of fiscal 1990 vs. $.78 for the first quarter of fiscal 1989.

Sterling attributed the decreases in revenues and earnings to several factors. The company's performance was negatively impacted by greater

availability of its main products, styrene and acrylonitrile resulting in lower selling prices. Revenues were further impacted by movement from normal sales to more conversions transactions. Also affecting Sterling's performance were the continued strong dollar, a general slowdown in the housing and automobile industries and reduced worldwide demand for acrylic fiber.

For the second consecutive quarter, Sterling's results were also impacted by unusual factors. First, all of the company's operating units were forced to shut down beginning on Dec. 22, 1989, due to extremely cold weather. The units all experienced severe freeze damage. This caused inefficient operations and lost sales in some of its key products. The freeze related financial impact in the quarter just ended was approximately $.05 per share. There was an additional $.03 per share negative impact associated with acrylonitrile inventory sold during the quarter which contained higher cost raw materials from the previous quarter. The company expects to incur continuing freeze related inefficiencies and additional lost sales during the current quarter, but the future financial impact should be lessened by existing insurance coverage.

Sterling announced on April 14, 1989, that its board of directors had authorized a stock repurchase program covering up to six million shares of common stock, representing approximately 10 percent of the company's outstanding shares. Pursuant to this program, the company has purchased 4,896,285 shares to date. The company has not, under this program, purchased privately any shares from officers or directors.

Sterling Chemicals is a major producer of seven intermediate petrochemical products - styrene monomer, acrylonitrile, acetic acid, plasticizers, lactic acid, tertiary butylamine and sodium cyanide. Sterling Chemicals is headquartered in Houston.

#90024p0165 01/24/1990 ~PR Newswire

QUINCY, MA (JAN. 24) PR NEWSWIRE - Clean Harbors of Braintree, Inc. submitted its final environmental impact data to the state for review. This submission brings to a close the research process required for the state to make the final decision that the company's proposal adequately complies with the Massachusetts Environmental Policy Act.

Secretary of Environmental Affairs John DeVillars now has 60 days to make his decision. Should the state rule favorably, a mandatory negotiation/arbitration procedure commences with the host community. The

report indicates that the company's proposed rotary kiln incinerator will have no significant impact on the community or the environment.

In initially reviewing Clean Harbors' 6,000-page impact report in October 1989, DeVillars said, "This environmental impact report had to meet a higher standard than perhaps any other (impact report) to come before the Secretary in order to receive an adequacy determination."

He further said, "I find that the quantity and quality of data and analysis is excellent, that the reports are clear and well organized, and that the reports show a commitment to excellence and full-disclosure by the preparers." The secretary then requested supplemental information on meteorological data, air emissions, equipment design, and health and socio-economic studies.

The results of this additional data conclude - as did the preliminary impact report - that there will be no negative impacts resulting from building and operating an incinerator at the Clean Harbors' facilty.

Also included in the report was an analysis of the state's need for this facility. The analysis determined that the Commonwealth has a real need for in-state capacity for disposal of its own hazardous wastes. Massachusetts exports 67 percent of the 250,000 tons of waste it generates each year.

Alan McKim, CEO of Clean Harbors, said of the submittal of supplementary data, "We are confident that we can build and operate a safe and efficient incinerator and it will be judged in this process on its merits. We are happy to provide this additional data to meet that goal."

Clean Harbors, Inc. is the Northeast's largest provider of environmental services which operates from 32 locations in 11 states and furnishes a wide range of environmental remediation, hazardous waste management, and engineering and laboratory services to a diversified customer base.

#90024p0169 01/24/1990 ~PR Newswire

MCLEAN, VA. (JAN. 24) PR NEWSWIRE - Cordatum, Inc. (NASDAQ: CDAT) today announced a new training curriculum for users of CASE (Computer-Assisted Software Engineering) technology.

Training will be offered by Cordatum's Institute of Technology, beginning March 1, 1990.

CASE tools are state-of-the-art software functions which enable trained analysts to create a very comprehensive database, called a Repository (IBM) or an Encyclopedia (KnowledgeWare), from which computer programs can be generated automatically. CASE tools and analytical techniques directly eliminate many current software problems, such as the high costs of software program integration, program maintenance and software development. The major vendor of CASE tools is KnowledgeWare, Inc. of Atlanta, which recently signed an agreement allowing International Business Machines (IBM) to sell its product, called Information Engineering Workbench (IEW).

Cordatum's Institute of Technology is offering a CASE curriculum which will emphasize the skills of using IEW as well as constructing the

Repository. For organizations just getting started, the institute offers three week-long courses in planning, analysis and design. For organizations which have already chosen a CASE application, expert coaching is available through the institute's Action Training program. For organizations which wish to implement CASE using institute personnel, Cordatum provides CASE Support Services.

Merle Garvis, president of Cordatum, Inc., commented: "We strongly believe that CASE is the wave of the future which is breaking on the shores of the present. The technology answers problems which we in the software industry have been enduring for a generation. But people must be trained to master and advance the technology. That is the job to which the institute is dedicated."

Cordatum is a diversified high technology company. Since 1972 Cordatum has specialized in information systems consulting, software development and information center support as well as computer-related training/education services for a variety of federal and private clients. Cordatum is experienced with a wide range of languages, operating systems software packages, and special utilities. Cordatum has extensive expertise with computer architectures ranging from microcomputers to large scale mainframes.

#90024p0170 01/24/1990 ~PR Newswire

SAN ANTONIO, TX (JAN. 24) PR NEWSWIRE - The board of directors of Valero Natural Gas Company, the general partner of Valero Natural Gas Partners, L.P. (NYSE: VLP), today declared a quarterly cash distribution of $.625 per unit to holders of the partnership's publicly traded preference units. A like amount was declared for the partnership's common units held by subsidiaries of Valero Energy Corporation, which have an approximate 49 percent interest in the partnership. The distribution is payable March 1 1990 to holders of record at the close of business Feb. 6, 1990.

Valero Natural Gas Partners, L.P. owns a 7,100-mile intrastate network of natural gas transmission and gathering lines throughout Texas, purchases and sells natural gas to distribution companies, electric utilities, other pipelines and industrial customers throughout the U.S., and provides gas transportation services to third parties. The partnership also owns 11 gas processing facilities and markets natural gas liquids to refineries, petrochemical plants and domestic fuel distributors.

SOMERVILLE, NJ (JAN. 24) PR NEWSWIRE - UNIMED Inc. (NASDAQ: UMED) today announced that the Israel Ministry of Healthy has completed its review of the Marinol(R) (dronabinol) registration file and has concluded that the product is "approvable" for marketing in Israel.

Final registration and introduction in Israel is expected to occur later this year following resolution of labelling, scheduling and distribution requirements. Marinol will be marketed in Israel by ABIC Ltd. Pharmaceutical and Chemical Industries, the leader in the Israeli market for anticancer pharmaceuticals. ABIC has recently initialed clinical evaluations of the product at leading hospitals in Israel.

"This is an important step in the internationalization of Marinol and will facilitate subsequent registrations worldwide," said Harold J. Tenoso, Ph.D., president and chief executive officer of UNIMED. "ABIC has done an excellent job as our liaison with the Ministry of Health and by helping with the approval process."

UNIMED is a pharmaceutical company specializing in the early acquisition, development and marketing of new cancer therapeutic compounds. With its unique "technology management" strategy, the company bridges the gap between university research centers and pharmaceutical manufacturers to bring promising new therapeutics to market.

NEW YORK (JAN. 24) PR NEWSWIRE - Marking its entry into a new and thriving market, R.H. Macy & Company, Inc. announced today that it will open a new 240,000 square foot Bullock's department store in The Regional Shopping Center complex now under development in Burbank, Calif. This new Bullock's, the first in the Burbank area, is scheduled to open in the fall of 1992. It will be the anchor department store in the new complex and will be a state-of-the-art, full-line flagship store offering the most complete line of fashion merchandise in Southern California.

The new Bullock's store is part of a major commitment by Macy's to expand the Bullock's franchise in Southern California, and is one of seven new stores Macy's plan to open during the next forty-eight months. In addition to the Burbank store, the company is scheduled to open new Bullock's stores in Canyon Spring, Riverside in 1992 and the Marina Place, Culver City Center in 1993. Extensive renovation is also underway in the Sherman Oaks store as well as a scheduled complete remodeling of the Del Amo store. New Macy's stores are scheduled to open in Springfield, Va., in 1991; Plainville, Conn., in 1992; Mall of America, Minneapolis in 1992; and downtown Oakland, Calif., in 1994.

"Burbank is a rapidly growing, thriving entertainment industry capital and we feel there will be strong customer support for a major presence by Bullock's in this market," said Edward S. Finkelstein, chairman and chief executive officer of R.H. Macy. "Bullock's has a wonderful relationship with the Southern California customer and we see the market as a fine growth opportunity for our franchise."

The announcement of the new Bullock's was simultaneously made by Burbank Mayor Robert Bowne at a City Council meeting held today. The mayor was joined by Alexander Haagen, the developer of the shopping center and founder and president of The Alexander Haagen Company, a Manhattan Beach-based developer with over 50 shopping centers to its credit. The much applauded 41-acre shopping center has recently been awarded the Golden Nugget Award for architecture for the best urban design and site plan in the west.

WASHINGTON (JAN. 24) PR NEWSWIRE - AT&T today said it plans to give customers of its out-of-state calling plan, Reach Out(R) America, a five percent discount based on their AT&T in-state direct-dialed calls. Customers who subscribe to the Reach Out America one-hour calling plan

will receive the discount at no additional charge.

AT&T said the additional discount means that now Reach Out America customers have opportunities to save on all their direct-dialed calls. The company last year added a five percent discount on direct-dialed international calls to the Reach Out America plan.

In a proposal filed Tuesday with the Federal Communications Commission, AT&T said the additional discount would take effect March 9. Reach Out America customers will automatically receive the additional discount once billing is available in their area.

AT&T's proposal says the discount will not exceed the amount of a customer's total interstate Reach Out America charges and will not apply to in-state calls already included under another AT&T calling plan, such as one of AT&T's in-state Reach Out plans. The discount also will not be included in the Reach Out Half-Hour Plan.

AT&T said the new discount on in-state calls is the latest in a series of enhancements to the Reach Out family of long-distance calling plans. On Jan. 1, the company increased its daytime discount to ten percent and its evening discount to 25 percent for customers of the 24-hour Reach Out plan.

The company also has added the AT&T Card Discount option, so that customers can receive Reach Out discounts on their AT&T Card calls, and the Reach Out Half-Hour Plan for customers who don't make enough out-of-state calls to benefit from other long-distance calling plans.

AT&T said the $5 sign-up fee for Reach Out America has been waived through Jan. 31. For more information about any Reach Out calling plan, customers can call toll-free 1-800-222-0300.

MARIETTA, GA (JAN. 24) PR NEWSWIRE - Healthdyne Inc. (NASDAQ: HDYN) announced today that its board of directors has authorized management to take the necessary steps to repurchase up to $2 million of the company's outstanding common stock in open market transactions.

These shares will be used to cover future obligations under the company's existing employee benefit plans and any excess will be available for general corporate purposes.

Parker H. Petit, chairman and CEO of Healthdyne stated that: "It is my

opinion that at current market prices Healthdyne's shares represent an attractive opportunity for the company in view of our current cash position. The timing of these purchases and the number of shares purchased will be dictated by market conditions and other relevant factors."

Healthdyne is a national provider of high technology home care medical services, including infusion therapy through its partially owned subsidiary HNS and home obstetrical care through its Perinatal Services division, and a manfuacturer of high tech home care products through its Healthdyne Technologies division.

PHILADELPHIA (JAN. 24) PR NEWSWIRE - Plaskon Electronic Materials Inc., a subsidiary of Rohm and Haas Co. (NYSE: ROH), announced today that it will discontinue manufacturing operations at its Toledo, Ohio, facility and that it is negotiating the sale of its passive molding compound and powder coatings product lines.

The closing of the Toledo facility will result in the layoff of 88 employees beginning March 31, 1990, and is expected to be completed by mid-year. Details on the potential sale of the passive product lines were not disclosed. Passive product lines include encapsulants for use in capacitors, resistors, coils, and other electrical devices.

Plaskon will continue manufacturing encapsulant products for the strategically important and larger semiconductor market, according to company president Frank T. Maher. That segment accounted for more than 85 per cent of Plaskon's sales in 1989. Last June, Plaskon began consolidating its semiconductor encapsulant manufacturing at its new plant in Singapore to place production closer to its customer base. More than 90 percent of the world's usage of molding compound occurs outside the United States.

"We believe the time has come to focus our research and development efforts on the growing needs of the semiconductor market", said Maher. "This can best be done by concentrating on the products that have made us the largest U.S.-based manufacturer of semiconductor encapsulating materials".

Maher said that Plaskon will provide counseling in an attempt to assist employees in finding other positions in the Toledo area. Employees and local union officials were notified of the closing in meetings held earlier today. Plaskon will maintain its Philadelphia headquarters and

establish a U.S.-based customer service facility to assist customers in order processing.

In an announcement released earlier today, Rohm and Haas said the Plaskon shutdown would result in a one-time charge of approximately $13 million, or 20 cents per share, against earnings for the fourth quarter 1989.

OAKBROOK TERRACE, IL (JAN. 24) PR NEWSWIRE - Telesphere Communications Inc. (AMEX: TSP), a full-service interexchange carrier and provider of enhanced telecommunication services, announced today that it has signed a major agreement with the Florida Hotel and Motel Association (FHMA).

Under the agreement, FHMA will actively endorse Telesphere as a preferred vendor of enhanced communications services to its more than 1,000 members representing some 116,000 hotel rooms. According to the agreement, FHMA will promote Telesphere's services through direct mail campaigns to members and through the association's monthly news magazine.

Nick Jent, senior vice president for sales and marketing at Telesphere, noted the mutual advantages of the agreement. "This agreement means that FHMA members will be introduced to a wide range of sole source telecommunication services which are available on the nation's finest network. In turn, Telesphere will gain introductions to hotels and motels on a scale which would be hard to achieve on a direct marketing basis."

Thomas Waits, executive vice president of FHMA, was equally enthusiastic about the agreement. "We chose to endorse Telesphere's services due to the quality of their network and to the full range of turnkey services which they offer. In addition to providing our members with a dependable source for all of their telecommunication needs, Telesphere is offering particularly attractive commission rate."

Telesphere Communications Inc. operates a nationwide state-of-the-art, digital fiber optic network and provides long distance network services, operator services, interactive 900 services and other enhanced communications services. The company's common stock is traded on the American Stock Exchange.

JACKSONVILLE, FL (JAN. 24) PR NEWSWIRE - For the 16 week quarter, Winn-Dixie's (NYSE: WIN) net earnings were $41.8 million, or $1.05 per share compared to $34.6 million, or $0.87 per share, an increase of 20.8 percent. For the 28 weeks ended Jan. 10, 1990, net earnings were $66.8 million, or $1.68 per share compared to $54.8 million, or $1.37 per share, an increase of 22.0 percent.

Sales for the quarter ended Jan. 10, 1990 increased seven percent to $3.0 billion, a $194.0 million increase over the comparable quarter ended January 11, 1989. For the 28 weeks ended Jan. 10, 1990, sales were $5.1 billion, a $334.4 million increase, or seven percent, over the prior year.

James Kufeldt, president stated: "We are pleased with our sales growth, especially the 5.9 percent increase in identical store sales for the quarter. Combining sales growth with better control of expenses has improved operating results. Our locations currently average 30,058 square feet, a new high for the company.

We continue to have confidence in our Everyday-Low-Price program. Effective Jan. 11, 1990, we converted the Louisville and Fort Worth Divisions to this program. Currently seven of our 12 divisions operate on an Everyday-Low-Price program."

For the 28 week period, Winn-Dixie opened 21 stores, averaging 39,300 square feet, acquired three stores, averaging 32,500 square feet, closed 26 older stores averaging 25,000 square feet and remodeled or enlarged 17 locations.

As of Jan. 10, 1990, there are 1,227 stores in operation, compared with 1,239 last year. Of the 1,227 stores, 339 are larger than 35,000 square feet. Twenty-two new stores are presently under construction. Winn-Dixie is the Sunbelt's largest food retailer.

#90024p0194 01/24/1990 ~PR Newswire

TECUMSEH, MI. (JAN. 24) PR NEWSWIRE - Tecumseh Products Company (OTC: TECU) announced today record sales and net income for both the fourth quarter and full year of 1989 as set forth in the following consolidated Summary of Income. Dollars are shown in millions except per-share data:

TECUMSEH PRODUCTS COMPANY

Three Months Ended Dec. 31		12 Months Ended Dec. 31	
1989	1988	1989	1988

Net sales	$348.3	$259.2	$1,509.8	$1,093.5
Income before taxes	$30.0	$29.3	$133.5	$110.8
Provision for taxes	11.3	11.3	50.9	40.6
Net income	$18.7	$18.0	$82.6	$70.2
Earnings per share	$3.42	$3.29	$15.10	$12.84

The company's previously announced acquisitions of L'Unite Hermetique and Tecnamotor, SpA, contributed significantly to growth in sales and earnings. Had these European companies been owned beginning Jan. 1, 1988, consolidated sales for 1988 would have been $1,426.8 million and net income would have been $70.6 million or $12.91 per share. For the fourth quarter of 1989, sales would have been $340.4 million and earnings would have been $17.7 million or $3.24 per share.

In comparison with the above pro forma results for 1988, sales for 1989 were up 5.8 percent, and earnings were up 17.0 percent. On the same basis fourth-quarter sales were up 2.3 percent, and net income was up 5.6 percent.

In addition to the favorable impact of European operations, significant growth was achieved in 1989 by the company's Brazilian subsidiary, SICOM, Ltda.

Although foreign operations remained strong in the fourth quarter of 1989, domestic activity weakened noticeably, reflecting lower demand in the refrigeration and air conditioning markets and more aggressive competition in the engine sector. Because of these influences, as well as growing Brazilian economic difficulties, the company expects its sales and earnings to moderate in 1990.

NEWARK, NJ (JAN. 24) PR NEWSWIRE - The Prudential Insurance Company of America has announced that its subsidiary, The Prudential Home Mortgage Co. Inc. (PHMC), has entered into an exclusive, two-year agreement with IBM Credit Corp. to offer mortgage origination services to U.S. employees of International Business Machines Corp. (NYSE: IBM) and its subsidiaries.

The IBM Credit program is similar to a private-label origination program Prudential said it expects to make available to selected residential mortgage lenders through its new subsidiary, Residential Services Corporation of America (RSCA).

Under the IBM Credit program, all loan applications will be taken and processed through a nationwide toll-free telephone origination system by PHMC. IBM Credit will set the guidelines for mortgages originated through the program which will be purchased by IBM Credit or sold into the secondary market. The new IBM Credit contract follows an existing PHMC program which has offered residential mortgage finance to employees of IBM since 1984.

RENO, NV (JAN. 24) PR NEWSWIRE - Ferdinand Alexander Porsche, 54, has been selected to become chairman of the Supervisory Board of Porsche AG. He will take the place of his father, Prof. Ferdinand (Ferry) Porsche, 80, who founded the West German sports car manufacturer in 1948. Ferdinand A. Porsche is his father's eldest son. The appointment is expected to be confirmed at the annual shareholder's meeting on March 9, 1990.

Since 1972, Ferdinand A. Porsche has headed his own company, Porsche Design, with headquarters in Zell Am See, Austria.

He began his professional career at Porsche AG in 1956. He also attended Germany's leading school for product designers, the "Hochschule fuer Gestaltung" (Design Institute) at Ulm. In 1962 he was placed in charge of the Porsche AG Design Studio and was responsible for the styling of all the firm's sports and racing cars between 1960 and 1967.

Ferdinand A. Porsche's best-known design is the Porsche 911 sports car

which was introduced to the public in 1963 and remains one of the most widely recognized automotive designs in the world.

Porsche AG also announced that on March 9, Prof. Ferdinand (Ferry) Porsche will become honorary chairman of the Supervisory Board of Porsche AG. At the same time, Dr. Michael Piech also will be nominated to the Porsche AG Supervisory Board.

BIRMINGHAM, AL (JAN. 24) PR NEWSWIRE - Energen Corp. (NYSE: EGN), Chevron U.S.A. Inc., and TECO Energy Inc. (NYSE: TE) today announced a joint coalbed methane development project in Alabama's Black Warrior Coal Basin.

TECO Coalbed Methane Inc., a subsidiary of TECO Energy, and Chevron U.S.A. each own 44 percent in the new project. Taurus Exploration Inc., Energen's oil and gas exploration and production subsidiary, owns the remaining 12 percent and will function as operator of the project. The development property, located in the southwest portion of the Basin near Tuscaloosa, Ala., is adjacent to acreage being developed by Taurus and TECO in a separate project.

Energen Chairman and Chief Executive officer Rex J. Lysinger said: "The intital commitment is for 50 to 60 wells, which we plan to drill by year-end in order to qualify for a federal tax credit on production through the year 2000. The project has potential for up to 200 wells, and production from these wells will be sold under a long-term contract to Southern Natural Gas Co."

John L. Rowland, vice president of Exploration, Land and Production of Chevron U.S.A.'s Central Region, said, "At a time when approximately half of our country's energy is imported, the production of natural gas from coal seams provides an important new source of domestic energy."

Timothy L. Guzzle, president and chief executive officer of TECO Energy, said: "We're pleased with results thus far in our initial development program and look forward to similar results from this new effort. The further development of coalbed methane reflects TECO's strategy to employ our management expertise and financial resources in energy-related businesses."

Energen Corp. is a diversified energy holding company with headquarters in Birmingham, Ala. Its major lines of business are gas distribution and oil and gas exploration and production.

Chevron U.S.A. is the largest domestic subsidiary of Chevron Corp., a San Francisco-based integrated petroleum company.

TECO Energy is a diversified energy-related holding company headquartered in Tampa, Fla.

HOUSTON (JAN. 24) PR NEWSWIRE - Baker Hughes Inc. (NYSE, PSE: BHI) Chairman, President and Chief Executive Officer J. D. Woods today

announced results for the first fiscal quarter ended Dec. 31, 1989.

Revenues were $578.9 million, 2.2 percent above the like quarter a year earlier. Net income of $25.4 million was 46 percent higher than the $17.4 million reported in the first fiscal quarter of 1989. Earnings per share were 20 cents compared to 13 cents a year ago.

Woods stated, "The increase in revenues in the first quarter of 1990 was achieved despite a 1.6 percent decrease in worldwide drilling activity. Additionally, the year earlier quarter included revenues of $57.8 million from Mining Equipment operations which were sold in July 1989."

"The increase in earnings was a result of the continuing favorable mix in the oilfield operations as well as significant improvement in the quality of revenues in Baker Hughes Process Equipment," Woods stated.

Woods reported that the progress of the previously announced acquisition of Eastman Christensen Co. is on schedule and the company is still confident of closing the transaction by March 31, 1990.

Woods concluded, "The acquisition of Eastman Christensen will allow Baker Hughes to be a prominent participant in the rapidly growing high performance directional drilling markets, which will benefit the company, its stockholders and the community."

Also, the Baker Hughes board declared the regular quarterly cash dividend of $.115 per share of common stock payable Feb. 23, 1990 to holders of record Feb. 2, 1990. Additionally, the board declared the quarterly cash dividend of $.875 per share of the company's Convertible Exchangeable Preferred stock, payable Feb. 15, 1990.

INDIANAPOLIS (JAN. 24) PR NEWSWIRE - RELM Communications, Inc. (NASDAQ: RGCY) reported a net loss of $257,000 ($.02 per share) on sales of $5,274,000 for the quarter ending Dec. 31, 1989. Second-quarter pro forma results for last year, which exclude restructuring activities, were sales of $5,812,000 and a net loss of $613,000 ($.06 per share).

Steven L. Wilkening, president and COO, noted that sales in two product categories (components and land mobile) declined during the quarter. In addition, scheduled deliveries of contract manufactured products were reduced or rescheduled. The declines and rescheduling are apparently attributable to general economic conditions. Some of the weakness was offset by Demand Side Management revenues which doubled from a year ago

and are expected to remain strong for the remainder of the fiscal year.

The balance sheet at Dec. 31, 1989, remained strong with working capital of $18.4 million ($1.67 per share), a current ratio of 9.8:1, long-term debt to equity of 14 percent and a book value of $21.5 million ($1.95 per share).

The company further announced that its board of directors has selected TM Capital Corp. to assist in searching for suitable acquisition candidates. The company is primarily interested in manufacturers or wholesalers of products with applications that enhance the strengths of the company.

RELM designs, manufactures and sells land mobile communications equipment, utility demand side management systems, electronic components and engages in contract electronic manufacturing. Its 11 million common shares are traded in the NASDAQ National Market System under the symbol RGCY.

ROCKVILLE, MD (JAN. 24) PR NEWSWIRE - H. William Willoughby was named president of CRI, Inc., the real estate finance, management, and development firm based in metropolitan Washington.

Willoughby succeeds Martin C. Schwartzberg, who resigned from the position to form a new non-profit foundation seeking to promote affordable housing. The announcement was made by CRI's chairman, William B. Dockser.

Dockser, Schwartzberg and Willoughby co-founded CRI in 1974. Willoughby has served as senior executive vice president, principally overseeing the firm's commercial real estate, hotels and resorts, and European business ventures.

Since its founding in 1974, CRI's portfolio of real estate investments has grown to $4.3 billion and includes the nation's third largest portfolio of apartments.

The firm's acquisitions also include the site of the PGA West Golf and Tennis Resort, which CRI is developing in LaQuinta, Calif., as well as 1.5 million square feet of commercial office space, and 23 hotels in 11 states.

CONTACT: James T. Pastore of CRI, Inc., (301) 231-0323.

#90024p0221 01/24/1990 ~PR Newswire

SAN ANTONIO (JAN. 24) PR NEWSWIRE - The board of directors of Valero Natural Gas Co., the general partner of Valero Natural Gas Partners L.P. (NYSE:VLP), today declared a quarterly cash distribution of $.625 per unit to holders of the partnership's publicly traded preference units. A like amount was declared for the partnership's common units held by subsidiaries of Valero Energy Corp., which have an approximate 49 percent interest in the partnership. The distribution is payable March 1, 1990 to holders of record at the close of business Feb. 6, 1990.

The partnership reported 1989 net income of $13.3 million, or 67 cents per limited partner unit, compared to 1988 net income of $20.8 million, or $1.07 per limited partner unit. Fourth quarter 1989 net income was $3.1 million, or 16 cents per limited partner unit, which is essentially the same as 1988's fourth quarter net income of $3.2 million, or 16 cents per limited partner unit.

1989 partnership operating income was $68.3 million, slightly below 1988's operating income of $71.0 million. Fourth quarter operating income was $17.3 million and $16.0 million for 1989 and 1988, respectively.

Both natural gas pipeline and natural gas liquids (NGL) operations were hampered by low margins and depressed product prices due to intense competition throughout most of 1989. Yearly and fourth quarter operating income from pipeline operations for 1989 was $64.5 million and $17.6 million, respectively, compared to operating income of $70.5 million and $18.3 million for the like periods in 1988.

Lower natural gas sales volumes were offset by higher transportation volumes to increase total throughput for 1989 to levels slightly above those of 1988. However, transportation fees were significantly depressed during 1989 due to excess pipeline capacity as well as the availability of discounted transportation rates on many pipelines as a result of take-or-pay settlements. Sales volumes under traditionally higher margin contracts increased during the severe cold weather experienced late in 1989. Although these volumes have returned to lower levels during the early part of 1990 as warmer weather has prevailed, a return of lower temperatures would positively impact the partnership's pipeline system

operations.

#90024p0222 01/24/1990 ~PR Newswire

WILMINGTON, DE (JAN. 24) PR NEWSWIRE - Du Pont (NYSE: DD) today reported 1989 preliminary net income of $2,480 million, compared with $2,190 million earned in 1988.

Earnings per share were $3.53 in 1989, 16 percent higher than the $3.04 per share in 1988. Earnings per share for all periods reflect the 3-for-1 split of common stock that became effective on Dec. 21, 1989.

Net income for the fourth quarter 1989 was $483 million, compared with $500 million in the same quarter of 1988. Earnings per share were 71 cents compared with 70 cents in the fourth quarter of 1988, reflecting lower average number of common shares outstanding. Total company sales for the fourth quarter were $9 billion, eight percent above 1988.

Edgar S. Woolard, Jr., chairman, said, "Our earnings in 1989 increased for the fourth consecutive year. This performance was achieved despite softening in sectors of the economy important to Du Pont, such as automotive, housing, and electronics, which depressed fourth quarter results.

"In addition, we raised the dividend twice, carried out a 3-for-1 stock split and initiated a stock buyback program, an especially strong performance for our shareholders."

Total company sales for 1989 were $35.5 billion, ten percent over $32.4 billion in 1988. Combined sales for Industrial Products, Fibers, Polymers and Diversified Businesses improved nine percent, reflecting a five percent increase in volume and a four percent increase in selling prices.

In the U.S. market, volume for these businesses improved one percent and selling prices were eight percent above 1988. In markets outside the U.S., volume increased 11 percent but dollar equivalent selling prices declined two percent due to the stronger dollar.

Earnings for the Industrial Products segment in 1989 were 77 percent over 1988, establishing a new high. The improvement was achieved from the strong contribution of most businesses within the segment, led by white pigments and industrial chemicals.

Fibers earnings for the year increased eight percent, primarily reflecting high demand for nylon apparel fibers, and improved results for "Lycra"

spandex fiber and "Kevlar" aramid fiber.

Earnings for the Polymers segment declined 14 percent from 1988 levels, reflecting softening market conditions, particularly in engineering polymers, cost increases, and price pressures on ethylene-based polymers. These effects were partly offset by improved results for fluoropolymers and acrylics.

#90024p0225 01/24/1990 ~PR Newswire

FORT WASHINGTON, PA. (JAN. 24) PR NEWSWIRE - Synergistic Capital Corporation (OTC) announced today that it had reached an agreement to acquire approximately 60 percent of Americanino S.p.A (Americanino), a leading Italian manufacturer of sports- and leisure-wear. Maximum consideration in the transaction is $43 million in a combination of cash and common stock. Closing is scheduled for a date not later than Feb. 15 1990, subject to the satisfaction of certain conditions by both Synergistic and Americanino.

Americanino designs, produces and distributes, under a variety of trade names, a full-range of sports- and leisure-wear through approximately 7,000 outlets, the majority of which are in Italy. As a result of its most recent acquisition, consummated in July in 1989, Americanino has annualized revenues of $180 million, with pro forma earnings in excess of $7 million.

Americanino's current business plan calls for further expansion of its operations throughout Europe, capitalizing upon the increasing opportunities for growth in cross-border trade and commerce afforded by the tariff reductions of 1992.

Synergistic Capital, a development-stage company founded in 1986, recently received a substantial injection of equity capital from a group of European institutions and private investors. The company plans now to pursue intensively a strategy of acquiring majority stakes in well-established, well-managed, solidly profitable businesses in the high fashion leisure-wear markets, both in Europe and the United States. The acquisition of Americanino is a major step toward that goal, and, to further affirm its new identity, Synergistic has changed its name to Americanino Capital Corporation.

#90024p0227 01/24/1990 ~PR Newswire

STAMFORD, CT (JAN. 24) PR NEWSWIRE - Citicorp Information Resources and Heart of England Building Society today announced an agreement under which Citicorp will provide Heart of England Building Society, Warwick, England, with an advanced data processing system utilizing the global version of Citicorp's Comprehensive Banking System software.

Heart of England will convert all of its central operations and core business products from its existing NCR mainframe to Citicorp's global Comprehensive Banking System on the AS/400. Adapted specifically for building societies in the UK, the global Comprehensive Banking System will provide Heart of England with a systems platform from which to deliver all its existing products and services, as well as a significant number of new products and services, at a lower cost than it is presently incurring today. The global Comprehensive Banking System is a parameter-driven, real-time system that will operate Heart of England's core business. In addition, the system's data base design will give management the ability to generate customized information and reports for directing their business into the 90s.

Heart of England, one of the fastest growing building societies in the UK, is located in the Midlands of England. Management plans to use the Comprehensive Banking System as the cornerstone in their strategy to become the region's dominant financial institution. They believe that the total investment of approximately $10 million (6 million Pounds Sterling) over the next five years will help them gain greater competitive advantages in the financial services marketplace by providing new levels of customer service as well as offering new investment and loan products.

The global Comprehensive Banking System is installed and running in 22 countries on five continents worldwide. This diverse user group helps Citicorp Information Resources to focus on the needs of a international client base and keeps the Comprehensive Banking System product on the leading edge of financial services technology.

Citicorp Information Resources is a Citicorp (NYSE: CCI) company that specializes in data processing services, software and consulting services for financial institutions worldwide.

NEW YORK (JAN. 24) PR NEWSWIRE - Salomon Brothers today announced the issue of warrants linked to the price of oil. This is a market first for long dated oil warrants, and was developed by Salomon Brothers and Phibro Energy Inc.

Five million warrants are being issued at a price of US$3.50 per warrant. One warrant will be linked to the price of oil exerciseable quarterly during the seven year period from March 9, 1990 to March 14, 1997, the first exercise date being June 7, 1990. The strike price will be US$20.00 per barrel and will give a gearing of approximately 5.72 times which represents a total premium of 17.72 percent.

The reference price will be the closing price of the sixth month contract on the New York Mercantile Exchange for Light Sweet Crude Oil on the Friday immediately succeeding the exercise date. (Current reference price US$20.01). If the reference price is greater than US$20.00 on exercise date, each warrant holder will receive a U.S. dollar payment of the difference.

Neil Bresolin of Phibro Energy said, "These warrants provide an excellent opportunity for investors to participate directly in the oil market and to take advantage of the relative cheapness of oil in the long dated forward markets."

The issue will be lead managed by Salomon Brothers International Limited.

Phibro Energy, Inc., a wholly owned subsidiary of Salomon Inc. (NYSE: SB), is the world's largest trader of energy-related commodities, a major chartered shipper of those products, and the fourth largest independent oil refiner in the United States. Phibro Energy is also recognized as a global leader in the development of energy derivative products, which

include risk management tools that provide producers and end-users of energy products with a means to control price volatility. The company maintains the network of 35 offices and agencies located around the world.

#90024p0240 01/24/1990 ~PR Newswire

ST. PAUL, MN (JAN. 24) PR NEWSWIRE - Northwest Airlines today announced low fares for spring and summer travel from the United States to popular European destinations.

According to John Temple, Northwest's vice president of marketing programs the fare bargains - averaging $50 to $70 below the lowest summer prices - are designed to encourage passengers to make their European reservations early for travel from late-April through mid-September.

Northwest's Trans-Atlantic Seat Sale offers Europe-bou.rapassengers the opportunity for their best summer prices on scheduled flights.

Temple urged passengers interested in European vacations to call a travel agent or Northwest because seats are limited and fares carry advance purchase and other restrictions. Tickets must be purchased by March 14.

The fares, as low as $408 roundtrip from the East Coast, are for travel April 23 through June 14 and will be slightly higher during the peak travel season of June 15 through Sept. 14. Seats are available from all Northwest cities in the United States to London, Frankfurt, Amsterdam, Paris and Glasgow.

This summer Northwest will offer 49 roundtrip flights each week between the United States and Europe with nonstop service from its gateways of Boston, Detroit and Minneapolis/St. Paul.

Temple said the low airfares can be combined with Northwest's WORLDVACATIONS, offering a full line of vacation packages for independent travelers and those interested in escorted tours. The packages include rental cars, hotels, tour options, city stays and even special arrangements for the sports-minded vacationer.

NEW YORK (JAN. 24) PR NEWSWIRE - Marking its entry into a new and thriving market, R.H. Macy & Company, Inc. announced today that it will open a new 240,000 square foot Bullock's department store in The Regional Shopping Center complex now under development in Burbank, Calif. This new Bullock's, the first in the Burbank area, is scheduled to open in the fall of 1992. It will be the anchor department store in the new complex and will be a state-of-the-art, full-line flagship store offering the most complete line of fashion merchandise in Southern California.

The new Bullock's store is part of a major commitment by Macy's to expand the Bullock's franchise in Southern California, and is one of seven new stores Macy's plan to open during the next forty-eight months. In addition to the Burbank store, the company is scheduled to open new Bullock's stores in Canyon Spring, Riverside in 1992 and the Marina Place, Culver City Center in 1993. Extensive renovation is also underway in the Sherman Oaks store as well as a scheduled complete remodeling of the Del Amo store. New Macy's stores are scheduled to open in Springfield, Va., in 1991; Plainville, Conn., in 1992; Mall of America, Minneapolis in 1992; and downtown Oakland, Calif., in 1994.

"Burbank is a rapidly growing, thriving entertainment industry capital and we feel there will be strong customer support for a major presence by Bullock's in this market," said Edward S. Finkelstein, chairman and chief executive officer of R.H. Macy. "Bullock's has a wonderful relationship with the Southern California customer and we see the market as a fine growth opportunity for our franchise."

In addition to Bullock's, the shopping center will contain the first IKEA store in the Western United States, a Sears store of the future, an upscale Mervyn's store, 350,000 square feet of retail shops including theaters and restaurants, a 1.1 million square foot high-rise office building and a 300-room all-suite hotel. When complete, the project will contain over two-and-one-half million square feet on retail, office and hotel space.

The announcement of the new Bullock's was simultaneously made by Burbank Mayor Robert Bowne at a City Council meeting held today. The mayor was joined by Alexander Haagen, the developer of the shopping center and founder and president of The Alexander Haagen Company, a Manhattan Beach-based developer with over 50 shopping centers to its credit. The much applauded 41-acre shopping center has recently been awarded the Golden Nugget Award for architecture for the best urban design and site plan in the west.

#90024p0247 01/24/1990 ~PR Newswire

WASHINGTON, (JAN. 24) PR NEWSWIRE - The United States Postal Service today selected Hotelcopy, Inc. (NASDAQ-NMS: FAXM), to expand its FaxMail service to the entire nation. Currently implementing the credit card-operated, self-service fax terminal program in 54 post office lobbies in Northeastern states, Miami-based Hotelecopy provides FaxMail and other business services to the public via operation of the world's largest facsimile network, now available in nearly 2,000 hotel locations.

Encouraged by Northeastern consumers reactions to the pilot FaxMail program -- which allows users to send and receive documents instantaneously, around the corner or around the world -- the Postal Service and Hotelecopy will extend the service to an additional 209 post offices in the Southern, Western, Central and Eastern Postal Regions. If proven successful, FaxMail could be introduced to many of the nation's 40,000 post offices.

Announcement of the expanded program was made jointly by Assistant Postmaster General Gordon C. Morison, who heads the Postal Service's Philatelic and Retail Services Department, Edd Helms, chairman and president of Hotelecopy, Inc., and Jerry Edgerton, vice president, government systems of MCI Telecommunications Corporation.

Postmaster Hails Program Citing Hotelecopy FaxMail's initial success in the Northeast, Mr. Morison hailed the extended national program as a "milestone for the Postal Service and the public it serves.

"We are pleased to announce that Hotelecopy, Inc., is now the sole contractor to furnish and install 263 facsimile terminals nationwide," he said. "This contract award expands an already successful service to other areas of the country.

"Hotelecopy's FaxMail, a leader in the fax industry, lends credibility and credence to an idea conceived by the Postal Service approximately 18 months ago," Morison observed. "The Postal Service and Hotelecopy, Inc., share a partnership and common interest to provide a new product, technology, and service to meet the growing needs of our small business and residential customers. Different from commercial pay service, this state-of-the-art technology reassures the confidentiality of transmitted documents."

Morison said he is encouraged by the favorable comments from customers who have used Hotelecopy FaxMail in the Northeast Region. "We are confident that this service will also meet the urgent need for information by our customers in other areas of the country," he said. "We anticipate total deployment of 209 terminals within 135 days from the date of contract award, beginning with 66 terminals in the Southern Region, 49 in the Western Region, 44 in the Central Region, and 50 in the Eastern Region.

"We look forward to a long-standing, successful partnership with Edd Helms and other members of Hotelecopy, Inc."

Convenience, Confidentiality, Competitiveness Hotelecopy Chairman Helms sees the expanded effort as a boon to the faxless society. "Our aim continues to be assisting the Postal Service in making available to the public-at-large the convenience and confidentiality of sending and receiving urgent documents at an affordable price. Communications is the business of the Postal Service and Hotelecopy FaxMail brings state-of-the-art quality to that endeavor.

"Keep in mind, " advised Helms, "that despite the so-called fax revolution fewer than thirty-three percent of U.S. businesses and less than one percent of American homes have fax capability. We intend to fill that gap by providing FaxMial service to the overwhelming number of small businesses, business travelers and residential customers who comprise that primary market. Our ultimate goal, therefore, is to make the post office lobby the fax document sending and receiving point for all of America."

Hotelecopy Extends MCI Agreement Helms said he was pleased to continue working with another industry leader, MCI, in providing the Postal Service with optimal available fax service. Under terms of an agreement with Hotelecopy, MCI now provides long-distance service to 54 Northeast post office locations and will continue to furnish that service to the additional postal regions through its specially designed fax network," he explained. "MCI will also support Hotelecopy in promoting and advertising the new FaxMail service to the public."

MCI Vice President Jerry Edgerton said that "combining our state-of-the-art communications network with Hotelecopy's nationwide FaxMail network, will enable the Postal Serivce to provide the general

public with the best possible end-to-end communications transmissions. Our agreement with Hotelecopy allows MCI to exhibit its versatility and capabilities, while simultaneously providing a vital link that enhances the success of the program."

MCI owns and operates the world's second largest communications network, employing advanced fiber optics, digital microwave, satellite and digital switching technologies. The company provides a full range of global telecommunications services to businesses, residences and government agencies.

Consumer Cost A Major Consideration Helms re-emphasized the importance of cost in relation to the national program. "No matter how convenient a service is," he pointed out, "it must be affordable if it is to be useful to significant numbers of consumers. Accordingly, we are introducing an attractive pricing structure for the expanded national program which allows consumers to send or receive up to six pages (three minutes minimum usage) for just $8.50. Each additional minute (approximately two pages) is only $1.50."

CHICAGO (JAN. 24) PR NEWSWIRE - Waste Management of North America Inc. and Du Pont Co. (NYSE: DD) today announced that Chicago has been selected as the site for a plant that will clean, sort and recycle plastics recovered from the upper Midwest's municipal solid waste stream.

The facility, located at 1700 W. 119th St., will have the capacity to recycle 40 million pounds of plastics a year. The 100,000-square foot plant will ultimately employ about 70 workers from the community.

The recycling facility is the second for the newly formed Waste Management/Du Pont recycling joint venture, the Plastic Recycling Alliance L.P. The first, in Philadelphia, will begin commercial operations by late March and be part of the largest and most comprehensive plastics recycling and recovery system in the nation.

In December, Waste Management and Du Pont announced the formation of the Plastic Recycling Alliance. Waste Management and Du Pont estimated the alliance will have the capacity to recycle up to 200 million pounds of plastics per year from a network of nationwide facilities by 1994.

The Chicago facility will divert 40 million pounds of plastics from the municipal solid waste stream and collect, separate and recycle the used materials into a broad range of applications in the automotive, consumer

and building industries.

The primary types of plastic that the venture will be reclaiming are polyethylene terephthalate (PET), used in soft drink bottles, and high density polyethylene (HDPE), used in milk, water and a variety of household cleaning products containers.

George Schreiber of Du Pont will serve as general manager for the joint venture and Ryan McKendrick of Waste Management will be operations manager.

PHILADELPHIA (JAN. 24) PR NEWSWIRE - Hopper Soliday Corporation (NYSE: HS), a financial services holding company, today announced the promotion of William E. Bierlin, Jr. to president of W.H. Newbold's Son & Co., a division of the company's securities brokerage subsidiary.

Bierlin, 48 years old, had been managing director of Newbold's since 1980. As president, he replaces J. Dexter Newbold, who resigned to pursue other business interests.

James D. Lowry, chairman and chief executive officer of Hopper Soliday Corporation, said Bierlin was also being given corporation-wide responsibility for retail sales and retail brokerage products.

Bierlin joined Newbold's in 1978 when it merged with De Haven & Townsend Crouter & Bodine, of which Bierlin was a member of the board of directors and the executive committee. Bierlin joined De Haven & Townsend Crouter & Bodine in 1965.

A graduate of Wake Forest University and of its graduate school, Bierlin is a resident of Buckingham Township, where he serves on the Parks and Recreation Board.

Hopper Soliday Corporation's major subsidiaries are W.H. Newbold's Son & Co./Hopper Soliday & Co., Inc., which offers securities brokerage and public finance through two regional securities brokerage firms with 21 offices in Pennsylvania, New Jersey, New York and northern New England, and Surety Trust Company, which offers personal money management.

#90024p0255 01/24/1990 ~PR Newswire

HOUSTON (JAN. 24) PR NEWSWIRE - Shell Oil Co. earned $264 million in the fourth quarter of 1989, an increase of $52 million, or 25 percent, over the like period in 1988. Full-year earnings were $1,405 million, up $166 million, or 13 percent, president Frank H. Richardson announced today.

"The major factor in the improvement in both periods was higher crude oil prices, which benefited oil and gas exploration and production earnings, but resulted in a margin squeeze in the latter half of the year in our downstream businesses," Richardson said.

"Even so, chemical products earnings for 1989 were a record and oil products net income was second only to last year's record."

Cash flow provided by operating activities totaled $1,014 million for the quarter, compared with $1,241 million last year. For the full year 1989, it was $3,406 million, compared with $3,779 million in 1988. The main factor in the declines in both 1989 periods was higher working capital requirements. Total debt was reduced by about $800 million in 1989 and our debt ratio fell to 18 percent, its lowest level in the last 10 years. Capital expenditures were lower in 1989, primarily because of fewer producing property and lease acquisitions.

Revenues were $5.5 billion for the quarter and $21.9 billion for the full year 1989, compared with $5.5 billion and $21.4 billion for the respective 1988 periods.

These preliminary results are subject to audit.

#90024p0256 01/24/1990 ~PR Newswire

GALVESTON, TX (JAN. 24) PR NEWSWIRE - American Indemnity Financial Corp.,

(NASDAQ: AIFC) today declared a regular quarterly cash dividend on its common stock of 14 cents per share payable Feb. 15, 1990, to stockholders of record on Feb. 8, 1990, and announced 1989 fourth quarter and year-end financial results on a preliminary and unaudited basis.

For the fourth quarter ended Dec. 31, 1989, the company reported a net loss of $2,539,719 or $1.32 per share, compared with net income of $643,668 or 33 cents per share for the fourth quarter ended Dec. 31, 1988.

For the year ended Dec. 31, 1989, the company reported a net loss of $5,999,533 or $3.12 per share, compared with net income $2,943,107 or $1.53 per share for the year ended Dec. 31, 1988.

Catastrophic weather related losses was the principal factor that adversely impacted the company's earnings in 1989 as a result of 21 separate occurrences of severe hail, wind, tornadoes, and floods in Texas and other states, including the effects of Hurricane Chantal which struck the upper Texas coast in August. The cost to the company of such weather losses for the year ended Dec. 31, 1989 was approximately $7,169,000 or $3.73 per share, compared with approximately $3,037,000 or $1.58 per share for the year ended Dec. 31, 1988. The company was not involved in losses resulting from Hurricane Hugo in the Carolinas or the California earthquake.

COSTA MESA, CA (JAN. 24) PR NEWSWIRE - Arthur E. Svendsen, chairman of the board of the Managing General Partner of Standard Pacific L.P. (NYSE: SPF) today reported that the board of directors declared a $1.00 per unit cash distribution representing the final quarterly distribution relating to 1989 results. The distribution is payable of Feb. 28, 1990, to unitholders of record on Feb. 15, 1990.

Svendsen reported that this February 1990 distribution was based on the company's 1989 policy to pay cash distributions to unitholders approximating 60 percent of the per unit partnership earnings for the year ended Dec. 31, 1989.

Standard Pacific L.P. operates primarily as a geographically diversified builder of medium-priced single family homes with a majority of its operations in California.

ST. PAUL, MN. (JAN. 24) PR NEWSWIRE - The St. Paul Companies Inc. (NASDAQ: STPL) announced today that its board of directors has authorized the company to establish a new $150 million employee stock ownership plan (ESOP) to enhance its employee benefits package.

This will be a leveraged, convertible preferred stock ESOP funded with borrowings guaranteed by the company. The proceeds will be used to repurchase (up to $150,000,000 of) common shares of the company from time to time through a combination of private transactions and open market purchases.

With the establishment of this second employee stock ownership plan (ESOP) employee ownership of the company will approach 10 percent.

"All shareholders will benefit from that," Chairman Robert J. Haugh said. "With a significant ownership stake in the company, our employees' interests are more clearly aligned with those of other shareholders."

The company said that when the preferred shares are issued and the common shares repurchased, the result will not materially dilute earnings per share or change the number of common share equivalents outstanding.

NEW YORK, N.Y. (JAN. 24) PR NEWSWIRE - The board of directors of Primerica Corporation (NYSE: PA) today declared the regular quarterly dividend on the company's common stock of $.08 per share, payable Feb. 23,

1990, to stockholders of record on Feb. 5, 1990.

Separately, Primerica's board of directors today authorized the repurchases of up to 3.0 million shares of its common stock, subject to market conditions. The share repurchase authorization is in addition to previous authorizations totalling approximately 2.5 million shares, which were substantially completed during 1989.

The repurchases, which may be made from time to time on the New York Stock Exchange, will be used for stock issuance in conjunction with employee benefit plans.

Primerica Corporation is a diversified financial services company principally engaged in life, credit, accident & health, and property & casualty insurance, investment banking and securities brokerage, mortgage banking, mutual funds, asset management, consumer lending, credit cards and direct marketing. On Dec. 31, 1989, Primerica had assets of approximately $18 billion, and 102.3 million average common and equivalent shares.

HAMILTON, BERMUDA (JAN. 24) PR NEWSWIRE - Challenger International, Ltd. ("Challenger') (NASDAQ: CSTIF) reported a net profit of $448,000, equal to 10 cents per share, for the fiscal year ended Oct. 31, 1989. The loss in fiscal 1988 amounted to $8,856,000 or $2.05 per share. After the costs and expenses of discontinued operations, the major contribution to net income in 1989 came from the settlement of litigation against Odyssey Partners, which produced a gain of $1,170,000 net of related costs.

As previously announced, Challenger concluded the Savage acquisition on Nov. 1, 1989. Consolidation and expansion are the planning objectives for Challenger and Savage, respectively, during 1990. Challenger's overhead has been materially reduced by staff reductions and cost eliminations; all ongoing activities are being conducted by the directors comprising the executive committee. Savage will be implementing programs intended to increase production capacity, improve manufacturing efficiency and broaden product lines.

Challenger's annual general meeting of shareholders is scheduled for March 5, 1990.

Challenger's special restricted voting shares are traded on NASDAQ (CSTIF) the Toronto Stock Exchange (CTT) and the Montreal Stock Exchange (CTT).

The Class A restricted voting shares are traded on the Toronto Stock Exchange (CTTA) and the Montreal Stock Exchange (CTTA). Steps have been taken by Challenger to de-list its shares from the Montreal Stock Exchange.

NEW YORK (JAN. 24) PR NEWSWIRE - The First Boston Corporation and associates announced today the public offering of $150 million principal amount of Arkansas Power & Light Company, first mortgage bonds, 10 percent due Feb. 1, 2020, at 99.70 percent of their principal amount, plus accrued interest from Feb. 1, 1990, to yield 10.03 percent.

Associated with First Boston are: Bear Stearns & Co. Inc.; PaineWebber Incorporated; and Smith Barney, Harris Upham & Co. Incorporated. The underwriters were awarded the issue on their bid of 10.0992 percent cost of funds to the company.

The bonds are not redeemable prior to Feb. 1, 1995, through certain refunding operations at an effective cost to the company of less than 10.10 percent per annum. Otherwise the bonds are redeemable at the option of the company at prices beginning at 109.70 percent of their principal amount for those redeemable prior to Feb. 1, 1991, declining to par on or after Feb. 1, 2015.

The net proceeds from the sale of the bonds will be used to retire debt and provide for general corporate purposes.

The company, a wholly owned subsidiary of Entergy Services, Inc. (formerly known as Middle South Utilities, Inc.), is an electric public utility company with substantially all of its operations in the State of Arkansas. The company also has operations in the State of Missouri and in portions of other states adjoining Arkansas.

#90024p0269 01/24/1990 ~PR Newswire

PHILADELPHIA, (JAN. 24) PR NEWSWIRE - International Mobile Machines Corporation (NASDAQ: IMMC) today reported that preliminary 1989 results indicate record sales and a sizable net loss, as expected. The company, developer of Ultraphone(R), one of the world's leading wireless digital telephone systems, said that the product is gaining accelerated acceptance among major telephone companies which should result in a major 1990 sales surge and profitability in 1991.

Richard W. Pryor, chief operating officer, explained: "Revenues for 1989 were approximately $4.7 million, compared to $4.3 million in 1988. Ultraphone sales for the year ended Dec. 31, 1989, were up 30 percent to $3.6 million from $2.7 million in 1988. The estimated net loss for the year is $18.5 million, down from the 1988 reported net loss of $21.4 million." He added that all figures are subject to the usual fiscal year-end audit.

Pryor said: "In 1989, we experienced an increasing acceptance of our Ultraphone product by the telephone industry, as evidenced by the steady growth in the number of systems sold during the year. In fact, following the first quarter, sales in each subsequent quarter doubled.

"Ultraphone sales in the fourth quarter included several major independents -- Contel, Pacific Telecom, Citizens Utilities Company, and GTE -- as well as two Bell operating companies, BellSouth and Southwestern Bell.

"The rapidly expanding acceptance of Ultraphone should boost 1990 sales to over $30 million and significantly reduce the net loss vs. the 1989 level. It is still our goal to be profitable by 1991. The 1990 sales expectations have been developed by IMM working with senior executives of regional Bell operating companies, major independent telephone companies, and international firms.

"Based on these discussions, we project delivery of 60 Ultraphone systems -- approximately 20 percent to international customers, 40 percent to the regional Bell operating companies, and 40 percent to major independent

operating companies."

Citing the applicability of the technology to digital cellular telephones, Pryor mentioned a recent IMM proposal to Nippon Telephone and Telegraph (NTT) of Japan for a digital cellular system in response to a Request for Proposal from NTT related to a digital cellular program for Tokyo. Award of the competitive procurement will be announced in late March.

IMM has also had great interest in its Ultraphone product from the Ministry of Communications in the U.S.S.R. and from agencies in other Eastern Bloc countries and the Peoples Republic of China, Pryor noted.

He added: "Our game plan is to make the United States our first marketplace. We have the only spectrum-efficient digital radiotelephone network in the world for local telephone service. It's been subjected to strenuous testing by the Bell companies, GTE, Contel and others. Telephone companies are beginning to realize their customers can use this highly mobile, low-cost product in their cars, boats or homes. Hundreds of thousands of people have no telephone service, or poor- quality telephone service, including four million with party lines in rural America. Moreover, our product is particularly suited to the rural telephone company aiming to grow by adding new services, like mobile telephone service. Finally, the inherent privacy of Ultraphone is very attractive to commercial and government customers."

IMM is a world leader in wireless digital access technologies. The company is engaged primarily in the production, sales and installation of Ultraphone, a digital radiotelephone system. Ultraphone systems are currently operated by telephone companies in the United States, Canada, and Mexico.

MADISON, NJ (JAN. 24) PR NEWSWIRE - Schering-Plough Corp. (NYSE: SGP) today reported that 1989 fourth quarter net income increased 20 percent to $111.1 million, or $0.98 per share, vs. $92.9 million, or 83 cents per share, in the prior year. Fourth quarter 1989 sales of $776.9 million were five percent higher than last year's $739.9 million.

Net income for the 1989 full year rose 21 percent to $471.3 million vs. $389.8 million in 1988. Earnings per share for the year totaled $4.18, a 20 percent increase over last year's $3.48. Sales for 1989 were $3.16 billion, a six percent increase from the $2.97 billion in 1988.

Sales growth for the fourth quarter and full year was reduced by 1989 divestitures and fluctuating foreign currency exchange rates. Excluding the impact of these factors, the company's consolidated sales would have increased 13 percent for the fourth quarter and 12 percent for the full year vs. comparable 1988 periods.

As reported during the 1989 third quarter, the company completed the sale of its European cosmetics businesses, divested a majority interest in its Brazilian affiliate, and announced the reorganization of its over-the-counter (OTC) businesses into a new business unit, Schering-Plough HealthCare Products. These actions had no significant effect on 1989 earnings.

Robert P. Luciano, chairman and chief executive officer, said, "The strong performance in 1989 follows several consecutive years of outstanding growth in earnings per share and net income.

"We are achieving higher operating margins as a result of our ongoing efforts to gain greater productivity and efficiency in our businesses. As we continue to invest heavily in research, we have taken important steps to strengthen our pharmaceutical and health care businesses."

Luciano noted that when the impact of the Brazil divestiture and foreign currency exchange is excluded, 1989 sales for the company's worldwide pharmaceutical operations would have grown an estimated 16 percent, with solid performances both domestically and overseas.

U.S. pharmaceutical sales in 1989 rose 18 percent, led by the allergy asthma and cold; dermatological; cardiovascular; and anti-infectives and anticancer product groups.

Significant contributors included the "Proventil" and "Vancenase" lines of asthma products; "Eulexin," a prostatic cancer therapy approved in January 1989; "Lotrisone," an antifungal agent; "K-Dur," a sustained-release potassium supplement tablet; "Nitro-Dur," a transdermal nitroglycerin patch; and "Intron A," the company's brand of alpha-2 interferon.

LOS ANGELES (JAN. 24) PR NEWSWIRE - Angus Twombly has been appointed to

the newly created position of Times Mirror's director of multimedia projects, it was announced by W. Thomas Johnson Jr., Times Mirror vice chairman. Until this appointment, which is effective immediately, Twombly served as vice president, marketing for The Hartford Courant, a Times Mirror newspaper.

The creation of this position is an outcome of the first-ever advertising sales meeting, attended last December by the chief executive officers and senior advertising executives of each of Times Mirror's media subsidiaries. Twombly will work closely with a newly created, intercompany senior executive task force chaired by Johnson.

"Angus' nine-year career with The Courant and his strong background in marketing and media make him the ideal person for this new position," Johnson said.

"He will develop strategies for Times Mirror operating units to participate in joint ventures on various marketing fronts, such as group advertising sales, promotion, merchandising and marketing research. This cross-fertilization of resources and expertise should have great benefits for Times Mirror in the 1990s." Twombly will report to Johnson.

Before joining The Courant in 1980 as director, marketing, Twombly was vice president, marketing, for the Trenton Times. He previously served in various administrative positions with the Washington Post and also served as assistant to the president of the Washington Post Company. Early in his career, Twombly served as reporter and assistant city editor of the Knickerbocker News, Albany, New York.

Times Mirror (NYSE: TMC) is a Los Angeles-based media and information company. It publishes the Los Angeles Times, Newsday and New York Newsday, the Baltimore Sun newspapers, The Hartford Courant, The Morning Call, The (Stamford) Advocate and Greenwich Time.

The company also has interests in cable and broadcast television, and book, magazine and other publishing. Times Mirror stock is listed on the New York and Pacific stock exchanges, and traded under the symbol TMC.

CONTACT: Juli B. Kinrich (media), (213) 237-3733, or Jean M. Jarvis (investors), (213) 237-3955, both of Times Mirror.

CHICAGO (JAN. 24) PR NEWSWIRE - Chicago-based Allied Products Corp. (NYSE: ADP) has reached agreement with its lenders to restructure its existing bank loans, it was announced today.

Under the new agreement, Allied Products will replace its existing unsecured bank debt with an 18-month secured credit facility of $205 million. In addition, the company will receive a secured short-term loan of $35 million to be used for working capital.

Commenting on these developments, Richard A. Drexler, president and chief executive officer of Allied Products, said, "This agreement gives us the freedom and resources needed to focus all our energies on the continuing effort to strengthen our operations by reducing costs and improving performance."

Allied Products Corp. manufactures agricultural equipment, transportation and industrial products and chemical specialties.

WELLESLEY, MA (JAN. 24) PR NEWSWIRE - The board of directors of EG&G, Inc., (NYSE: EGG) meeting on Jan. 24, 1990, declared a regular quarterly dividend of nineteen cents per share on the company's common stock. The dividend is payable on May 10, 1990, to each stockholder of record at the close of business on April 20, 1990. EG&G has paid consecutive cash dividends to its stockholders for twenty-five years and has increased its dividends every year since 1974.

EG&G is a Fortune 300 company with annual sales in excess of $1.4 billion. It employs more than 30,000 people in the design and manufacture of laboratory and field-test instruments and electronic and mechanical components for commercial customers worldwide. The company markets specialized automotive, security, and biomedical testing services and products to both the government and private business sectors, and provides systems engineering, custom equipment, and test-site operating and management support to many agencies and laboratories of the U.S. government. The company's shares are traded on the New York Stock Exchange under the symbol EGG.

#90024p0293 01/24/1990 ~PR Newswire

BIRMINGHAM, AL (JAN. 24) PR NEWSWIRE - The results of the first quarter of fiscal 1990 were announced today at the annual shareholders meeting of Energen Corp. (NYSE: EGN) held at corporate headquarters in Birmingham, Ala.

Rex J. Lysinger, Energen's chairman and chief executive officer, reported net income for the first quarter of fiscal 1990, ended Dec. 31, 1989 of $1,674,000, or 17 cents per share on 9,707,000 average shares outstanding. This compares with first quarter 1989 net income of $2,083,000 or 25 cents per share on 8,456,000 average shares outstanding.

Income from continuing operations for the first quarter of 1990 totaled $1,674,000, or 17 cents per share, compared with $1,907,000, or 23 cents per share, for the same period last year.

Lysinger said the decline in first quarter 1990 income from continuing operations was due primarily to a delay in the recognition of allowed rate relief for the utility and to increased utility operations expense. This was partially offset by weather in the utility's service area which was 2.1 percent colder than normal during the quarter and 10.4 percent colder than the same period last year.

Earnings contributions from the extreme cold weather in late December will not be realized until the second fiscal quarter due to the utility's billing cycle.

Net income for the 12 months ended Dec. 31, 1989 totaled $8,176,000 (including a fourth quarter 1989 loss of $(2,061,000) on the disposal of our specialty well drilling company), or 87 cents per share on 9,363,000 average shares outstanding. This compares with $12,807,000, or $1.59 per share on 8,064,000 average shares outstanding, for the same period last year.

Income from continuing operations for the 12 months period totaled $10,888,000, or $1.16 per share, compared with $12,500,000, or $1.55 per share for the same period last year.

The decline in 12 months income from continuing operations was due primarily to a delay in the recognition of allowed rate relief for the utility and to increased utility operations expense. Also affecting 12 months earnings was weather in the utility's service area which was 5.1 percent warmer than normal and 4.4 percent warmer than the same period last year.

At the monthly meeting of the board of directors, which followed today's annual shareholders meeting, the board declared a quarterly cash dividend of 22 cents per share payable March 1, 1990, to shareholders of record on Feb. 15, 1990.

CHARLOTTE, N.C. (JAN. 24) PR NEWSWIRE - The Board of Directors of NCNB Corp. (NYSE: NCB) today declared a quarterly cash dividend of 35 cents per share on its common stock, an increase of five cents per share over the 30 cents paid in the last two quarters of 1989. The 1990 indicated annual dividend of $1.40 per share represents a 27-percent increase over the $1.10 per share paid in 1989.

The last increase was in the third quarter of 1989. The increased dividend is payable March 23 to shareholders of record March 2.

"This action by our board reflects NCNB's outstanding financial performance for 1989 and its strong long-term earnings power. It is exciting news both for existing and potential investors in our company," said Hugh L. McColl Jr., chairman.

In addition, the NCNB board declared a regular quarterly preferred stock dividend of $1.00 per share, payable April 1 to shareholders of record on March 2.

NCNB Corp. is a Charlotte-based bank holding company with $66.2 billion in assets. NCNB has more than 850 banking offices in seven states.

SAN FRANCISCO (JAN. 24) PR NEWSWIRE - Robert A. Keyes Jr. has been appointed vice president-corporate controller at United States Leasing International Inc., the diversified equipment leasing and financing company announced today.

Keyes, 37, was formerly a senior vice president and chief financial officer at Wells Fargo Leasing Corp., a Wells Fargo Bank subsidiary that was sold in late 1989. Earlier, between 1978 and 1980, he had been an accounting manager and assistant controller with U.S. Leasing Corp., one of U.S. Leasing International's principal subsidiaries.

In his new position, Keyes reports to executive vice president and chief financial officer Frank H. Mason.

Keyes holds a bachelor's degree in economics from Bates College, Lewiston, Maine, and a master's degree in accounting from Rutgers University. After graduation, he was with Arthur Andersen & Co. for three years, in the public accounting firm's Boston and San Francisco offices.

U.S. Leasing, which was organized in San Francisco in 1952, is a subsidiary of Ford Motor Co.

#90024p0298 01/24/1990 ~PR Newswire

SPRINGFIELD, IL. (JAN. 24) PR NEWSWIRE - Firstbank of Illinois Co., (NASDAQ: FBIC) citing higher net interest margins resulting from continuing loan growth, today reported record net income for the fourth quarter and the full year of 1989.

Net income for the fourth quarter ended Dec. 31, 1989, increased 21 percent to $2,882,000 from $2,382,000 a year earlier. Earnings per share rose 20.5 percent to 53 cents on slightly more shares outstanding from 44

cents a share in the comparable period a year ago.

For the full year 1989 net income rose 26.9 percent to $10,696,000 from last year's income from continuing operations of $8,498,000. On a per share basis, net income for the year increased 24.5 percent to $1.98 from $1.59 per share from continuing operations. The 1988 results exclude a loss of $3,068,000, or 57 cents a share, from discontinued mortgage banking operations.

Mark H. Ferguson, Firstbank's president and chief executive officer, said, ''The record results for the quarter, our fifth consecutive record quarter are attributable to improving net interest margins, continuing strong loan demand, and the success of our cost containment program. These actions have resulted in a return on average assets of 1.07 percent for the fourth quarter versus 0.93 percent a year ago, and an ROAA of 1.02 percent for the full year against 0.84 percent during 1988.''

Net interest income, before provision for possible loan losses, climbed 14.2 percent in the fourth quarter ended Dec. 31, 1989, to $10,621,000 from $9,304,000 a year earlier. Net interest income, before provision for possible loan losses for 1989 was $40,273,000 a gain of 13.9 percent from the $35,352,000 reported a year ago.

Ferguson said, ''Our strong performance during the quarter and the year allowed us to increase our provision for possible loan losses. This increase reflects our conservative nature and our desire to protect against possible fluctuations in economic conditions in the year ahead. We increased our provision in the fourth quarter to $1,054,000 from $610,000 a year ago, and for the full year to $2,315,000 from $1,664,000 for all of 1988. The end result is an increase in our reserve for possible loan losses as a percent of loans to 1.25 percent.

''We believe this action will position Firstbank to continue to take advantage of healthy economic conditions as well as protect the company, its depositors, and its shareholders in the event of a weakening or downturn in the general economy,'' Ferguson stated.

Total assets at Dec. 31, 1989, were nearly $1.083 billion, up 4.6 percent from $1.035 billion at year end 1988. Loans, net of unearned income, rose 9.1 percent to $667.5 million at the end of 1989 from $611.7 million one year ago. During the same period, deposits increased 6.4 percent to $951.6 million from $894.1 million. Shareholders' equity at Dec. 31, 1989 was $87.9 million, or $16.32 per share, up 8.2 percent from $80.9 million or $15.08 per share, at the end of 1988. Shareholders' equity-to-assets increased to 8.11 percent from 7.82 percent. Primary capital to assets rose to 9.09 percent from 8.76 percent and tangible primary capital to assets increased to 8.04 percent from 7.59 percent.

In discussing the bank holding company's performance, Ferguson pointed to the increase in Firstbank's net interest margin to 4.43 percent from 4.28 percent in 1988 as a major contributor to the higher net income. ''The increase in our loan-to-deposit ratio from 68.4 percent to 70.1 percent was a key factor in achieving the higher net interest margin, despite a leveling off of interest rates. Our noninterest expense as a percent of average assets at Dec. 31, 1989, declined to 3.05 percent from 3.13 percent at the end of last year,'' he said.

Firstbank of Illinois Co. is one of the largest bank holding companies in downstate Illinois providing banking, trust and other financial services through its subsidiary banks in ten counties in central, south and southwest Illinois. The subsidiary banks, which include The First National Bank of Springfield; Elliott State Bank (Jacksonville); First Trust and Savings Bank of Taylorville; and the United Illinois Banks of Benton, Collinsville, and New Athens, operates 21 banking offices.

WHEELING, WV (JAN. 24) PR NEWSWIRE - For the year ending Dec. 31, 1989, net income for Wesbanco Inc. (NASDAQ: WSBC) was $8,512,000, an increase of 12.3 percent over net income of $7,578,000 for the year 1988.

Per share earnings for the year 1989 were $3.55, compared to $3.16 for the same period in 1988. Net income for the fourth quarter 1989 was $1,974,000, as compared to net income of $2,068,000 for the fourth quarter 1988. Earnings per share for the fourth quarter 1989 were $.56, compared to 1988's fourth quarter earnings of $.64 per share.

Assets of Wesbanco on Dec. 31, 1989, were $659,788,000; deposits were $545,905,000; and shareholders' equity was $70,358,000. Return on average assets was 1.33 percent for the year 1989 and represents a 7.3 percent increase over the 1.24 percent achieved for the year 1988. Return on average equity for the year 1989 was 12.63 percent or a 3.2 percent increase over 1988's return on average equity of 12.24 percent.

As previously announced, Wesbanco increased its annual dividend by 8.3 percent to $1.30 from $1.20 per share, effective with the April 2, 1990, dividend payment.

Wesbanco Inc. is the parent company of Wheeling Dollar Bank and First National Bank of Wheeling, Wheeling, W.Va.; Mountain State Bank, Parkersburg, W.Va.; Brooke National Bank, Wellsburg, W.Va.; South Hills Bank, Charleston, W.Va.; Bank of Sissonville, Sissonville, W.Va.; New Martinsville Bank, New Martinsville, W.Va.; First-Tyler Bank & Trust Co., Sistersville, W.Va.; and the Wirt County Bank, Elizabeth, W.Va.

BALTIMORE (JAN. 24) PR NEWSWIRE - Century Engineering, of Towson, Md., has agreed to pay the Maryland Department of Transportation $313,000 as final settlement in the matter of the Governor Thomas Johnson Memorial Bridge.

The settlement follows the December release of the task force report on the closure and repair of the bridge, which carries MD Routes 2/4 over the Lower Patuxent River. The structure, which opened to traffic in 1977, was closed for emergency repairs on June 20, 1988.

The settlement amount represents costs incurred by the state over an 11-year period to monitor cracks that developed shortly after the bridge was opened. Also included were the state's costs associated with the task force review.

Century Engineering is the consulting firm that performed a post-construction inspection and analysis of the bridge's pier caps after cracks first appeared in several deep water piers in 1979. The task force report stated that Century should have been more thorough in its investigation of the initial pier cap cracking.

Century Engineering has maintained that the agreement reflects a business decision to resolve this dispute with the State Highway Administration (SHA), and is not an admission of any liability relating to the bridge.

Maryland Department of Transportation Secretary Richard H. Trainor characterized the settlement as "fair to all parties."

The report also noted that the bridge, which was repaired and opened to traffic on Aug. 21, 1988, is structurally adequate, and no other remedial or repair efforts are required.

#90024p0302 01/24/1990 ~PR Newswire

NORCROSS, GA (JAN. 24) PR NEWSWIRE - Stockholder Systems Inc. (SSI) (NASDAQ: SSIAA), the financial software company, today announced a 16 percent increase in net income for its fiscal third quarter ended Dec. 31, 1989.

For the third quarter, net income was $1.4 million, or 35 cents per share,

on revenues of $7 million compared with income of $1.2 million, or 31 cents per share, on revenues of $6 million for the same period a year ago. For the nine months, net income was $1.9 million, or 46 cents per share, on revenues of $16.7 million compared with a net income of $2.4 million, or 59 cents per share, on revenues of $15.1 million for the same nine months a year ago.

In reviewing the previous quarter's performance, Larry A. Dean, chairman and president of SSI, said: "We are pleased to announce record earnings for the quarter and are seeing significant results from acquisitions made during the past two fiscal years. Products gained through our acquisitions of Fannie Mae Software Concepts and Check Tech have proven to be very marketable to a variety of financial institutions. One software system," Dean stated, "LSAMS, used for mortgage loan servicing and formerly belonging to Fannie Mae, accounted for over 10 percent of our revenue for the quarter.

"We continued to have good revenue form our EFT software and securities division," Dean said. "We also have several areas where we are seeing growth that we believe will help us in the future; these areas include consulting in technical and user departments, remote computer processing and add-on software for our existing systems."

During the quarter, SSI also increased its annual dividend for the fifth consecutive year, signed agreements for remote processing and completed the SSI Conference Center which is being used for educational purposes.

SSI has recently gained marketing and development rights to a wide area network system to be marketed to banks for use in their cash management departments. The electronic reporting system includes a color graphical interface and will be called Network Banker.

Founded in 1971, SSI designs, markets and supports a line of financial application software for IBM and IBM-compatible computers. The company has over 1,200 customers who use SSI's software for check processing securityholder recordkeeping, electronic funds transfer, cash management, lease accounting loan origination, safe box accounting, loan recovery, loan servicing and secondary marketing. SSI also offers remote computer processing to its software customers.

PLAINVIEW, NY (JAN. 24) PR NEWSWIRE - ARX, Inc. (NYSE: ARX), today announced sales and earnings for the second quarter and first six months of fiscal 1990 ended Dec. 31, 1989.

Net sales for the three month period ended Dec. 31, 1989, were $29,179,000 compared with $22,396,000 in the same period of fiscal 1989. Net income for the current three months was $606,000 compared with a net loss of

$(6,031,000) in the second quarter of last year. Earnings per share were $.08 in the fiscal 1990 second quarter compared with a loss per share of $(.72) last year.

In the six months ended Dec. 31, 1989, net sales were $50,172,000 compared with $43,846,000 in the prior year. Net income was $838,000 or $.11 per share vs. a net loss of $(5,548,000) or $(.66) per share last year.

The company reported that its previously announced acquisition of Comstron Corporation was completed as of Nov. 1, 1989, and reported results include Comstron's sales and earnings from that date.

ARX, Inc., is engaged in the design and manufacture of a wide variety of electronic and magnetic products and mechanical systems with industrial and defense applications as well as providing consulting services for military contractors. The company also owns a controlling interest in VTX Electronics Corp. (AMEX: VTX).

NEW YORK (JAN. 24) PR NEWSWIRE - Exxon Corporation's (NYSE: XON) 1989 earnings, before provisions for costs associated with the Valdez accident and an accounting change, were $4,655 million, $3.65 per share, which compared to 1988 net income of $5,260 million, $3.95 per share.

The accounting change reflected adoption of the new income tax accounting standard, FAS 96, which increased first quarter and full year earnings by $535 million. In the fourth quarter, an added provision of $500 million was made for the Valdez accident, bringing the full year 1989 provision to $1,380 million. As a result, net income for 1989 totaled $3,810 million, $2.98 per share.

Fourth quarter earnings, before the Valdez provision, were $1,285 million, $1.01 per share, compared to $1,380 million, $1.06 per share, in the corresponding 1988 quarter. Including this provision, Exxon Corporation's net income was $785 million, $0.61 per share.

Fourth quarter revenue totaled $26,550 million, an increase of 15 percent over the comparable 1988 period. For the full year 1989, revenue was $96,076 million, up 8 percent over 1988.

Capital and exploration expenditures of $2,228 million compared to $2,417 million spent in the fourth quarter of the prior year. Full year 1989 capital expenditures reached an all-time high of $11,836 million, including an outlay of $3.9 billion for the acquisition of Texaco Canada. Capital spending in 1988 totaled $7,508 million.

Comparisons of 1989 fourth quarter earnings to the 1988 fourth quarter follow:

Earnings from exploration and production operations rose $368 million from the prior-year quarter to $855 million primarily on the strength of higher crude realizations, up $5.60 per barrel. Earnings from U.S. exploration and production operations rose $160 million to $279 million; earnings from foreign operations improved $208 million to $576 million. Worldwide, crude production totaled 1,834 kbd (thousands of barrels daily), down 4 percent, mostly reflecting disruptions in fields operated by others; natural gas production rose 358 mcfd (millions of cubic feet daily) to 6,246 mcfd.

Earnings from refining and marketing operations of $341 million compared to a very strong fourth quarter of 1988 of $563 million, when margins benefited from falling raw material prices. Earnings in the U.S. fell $144 million to $114 million. Foreign earnings dropped $78 million to $227 million. Worldwide, the effect of depleting relatively low-cost LIFO inventories resulted in a $46 million gain; 1988 earnings included a gain of $42 million. Product sales volumes of 4,893 kbd grew 8 percent.

BELLWOOD, IL. (JAN. 24) PR NEWSWIRE - Sanford Corp. (NASDAQ: SANF) today reported that for the fourth quarter ended Nov. 30, 1989, net income increased 22 percent to $6.6 million from $5.4 million in the comparable 1988 period. Earnings per share increased 22 percent to $.44 from $.36. Net sales increased 7 percent to $33.0 million from $30.7 million.

For the 12 months ended Nov. 30, 1989, net income increased 19 percent to $21.0 million from $17.6 million in the comparable 1988 period. Earnings per share increased 19 percent to $1.40 from $1.18. Net sales increased 27 percent to $130.1 million from $102.4 million.

Operating income for the fourth quarter increased 8 percent to $10.6 million from $9.8 million. For the twelve months operating income

increased 17 percent to $36.2 million from $30.8 million.

Pre-tax income for the fourth quarter increased 12 percent to $10.6 million from $9.5 million. For the twelve months pre-tax income increased 15 percent to $34.9 million from $30.2 million.

Henry B. Pearsall, chairman and chief executive officer, stated, "1989 was another record year of sales and earnings for Sanford even though fourth quarter sales increases were not as strong as in previous years. As we look at 1990, we anticipate another excellent year with a significant number of new products being introduced."

Sanford Corp. designs, manufactures and markets, under its brand names Sanford and Sterling, marking and writing instruments and other office and school supplies. The company's product lines, which include a wide variety of markers, porous tip pens, stamp pads, self inking stamps, adhesives, molded plastic office accessories, file storage boxes and other school supplies, are distributed primarily in the United States and also in numerous foreign countries.

COSTA MESA, CA (JAN. 24) PR NEWSWIRE - Parker Automotive Corporation (OTC) today announced the appointment of Refinco Ltd. as the exclusive distributor of CarbonClean products in the Republic of Chile.

Headquartered in Santiago, Chile, Refinco specializes in industrial decontamination and technical consulting in the Chilean transportation industry. Similarly and in addition, Refinco distributes numerous products suited to the Chilean contamination control movement, such as catalytic converters, hydraulic and cyclonic air filters and electronic lubrication devices. Distribution of CarbonClean is intended to compliment Refinco's product line, and will be an integral part of their decontamination program.

CarbonClean is a remarkable system that cleans harmful pollutants from the fuel systems of internal combustion engines, resulting in dramatically improved emission levels. Additional benefits of the cleaning process are increased fuel economy, restored performance and greater overall engine operating efficiency.

Included with changes in economic policy by the new Chilean government is a proposal to fight the serious pollution problems Chile currently knows. For this reason, Refinco will coordinate this integral new decontamination program through government channels, anticipating the cooperation of certain officials such as the former Chilean Ambassador to the United Nations, who has been appointed Special Emissary to the U.N. on Global Pollution.

Parker Automotive's CarbonClean products are rapidly gaining worldwide recognition for their proficiency in reducing exhaust emissions and improving economy. Domestically, CarbonClean products are approved and marketed by Exxon, Chevron, Gulf, Arco, Snap-on Tools, Nissan, Toyota and numerous Cummins Engine Co. distributors. Companies in more than 15 countries also market CarbonClean products, some in cooperation with government agencies.

Parker Automotive Corp. is headquartered in Costa Mesa. Manufacturing facilities are in Fountain Valley, Calif., and regional sales offices are maintained nationwide.

BRISTOL, VA. (JAN. 24) PR NEWSWIRE - Charter Federal Savings Bank (NASDAQ-NMS: CHFD) announced a net loss of $4,501,000 for the second quarter ended December 31, 1989, as compared with a net loss of $1,803,000 for the first quarter ended September 30, 1989. The loss was primarily attributable to (1) a $2,550,000 addition to reserves for possible losses on classified assets, the greater portion of the addition having been made on the recommendation of federal examiners upon completion of their regular examination of Charter Federal; (2) a reduction in the book value of high yield bonds maturing after July 1, 1994 to fair market value, which adjustment to fair market value is required under Generally Accepted Accounting Principles as a result of a provision of FIRREA requiring that such bonds be divested by July 1, 1994, and (3) the narrowing spread between cost of funds and yield on earning assets due to general economic conditions and the high level of competition in the markets in which the Savings Bank operates.

On December 29, 1989, Charter Federal announced major operational changes designed to respond to the new requirements of the Financial Institutions Reform, Recovery and Enforecement Act ("FIRREA") which became law in August 1989. The Savings Bank does not presently meet the three new capital standards established by FIRREA, but has submitted to the Office of Thrift Supervision a business plan which provides for a return to profitability and ultimately to capital compliance by drastically cutting operating expenses, reducing total assets, eliminating high cost funding, and restructuring certain high cost operations for greater efficiency. Those and other actions were intitiated January 1, 1990 and are expected to produce early positive results.

Prior to the passage of FIRREA, Charter Federal fully met, and in fact exceeded, its regulatory capital requirements. The Savings Bank's capital according to Generally Accepted Accounting Principles was $33.7 million at December 31, 1989. The capital deficiency under the new standards is a direct result of the exclusion from capital of intangible assets, including goodwill acceptable under Generally Accepted Accounting Principles, which previously were fully includable. Charter Federal carries on its books goodwill that resulted for the most part from the supervisory mergers of several savings and loans into Charter Federal between 1982 and 1985.

Assets at December 31, 1989 totaled $1.017 billion, as compared with $1.030 billion at September 30, 1989.

Charter Federal, which began operation in 1920, is a federally-chartered stock Savings Bank headquartered in Bristol, Virginia with 35 branch offices throughout Southwest and Southside Virginia and the Knoxville, Tennessee area.

HAMPTON, NH (JAN. 24) PR NEWSWIRE - Michael D. Dingman, chairman of The Henley Group, Inc.(NASDAQ: HENG) commented today that the negative action of Henley stock over the past few months and, specifically, the past few days, does not represent any weakness whatsoever in the fundamental, operational or financial strength of the company.

He said that, to the contrary, the company's Fisher and Pneumo Abex operations continue to meet or exceed improvement plans for revenues, cash flows and earnings. Each of these companies has revenues of close to $1 billion.

As of Dec. 31, 1989, the company has a stated net worth in excess of $1 billion. Investments in shares of Itel Corporation and Wheelabrator Technologies Inc. have a current market value of over $500 million, or $24 per Henley share.

Additionally, Dingman commented that he knew of no reason for the weakness in the stock when the fundamental strength of the company and its underlying value far exceed the current market price of its shares.

Henley is a diversified manufacturer of aerospace and scientific laboratory products.

LYNN, MA (JAN. 24) PR NEWSWIRE - Representatives of the Czechoslovakian Aviation Industry and GE (USA) Aircraft Engine (GEAE) have signed an agreement for a CT7-9B powered version of the 40-passenger L610 turboprop aircraft. The aircraft will be built by LET in Czechoslovakia and the engines manufactured by GE in the United States.

This new aircraft will be attractive to U.S. and worldwide regional airline operators. It is pressurized and will cruise at more than 260 knots with very low fuel consumption. It also has low direct operating costs and outstanding takeoff performance.

The initial L610 aircraft design, which uses Czechoslovakian (MOTORLET M602) engines, shall be simultaneously offered in some markets. This aircraft made its first flight in Dec. 1988 and is in the certification process.

Bruce Gordon, general manager of GE Small Commercial Engine Department, said, "The CT7-9B-powered L610 is expected to achieve first flight in mid-1991, obtain certification in 1992, and enter regional airline service in late 1992 or early 1993."

In addition, the Czechoslovakian Aeronautical Industry (AERO) and GEAE have agreed to develop a long-term relationship that will start with the manufacture of selected GEAE engine components by LET, MOTORLET, and other AERO factories.

All parties also expressed their thanks to those in both governments who have supported this effort, which will be beneficial to the people of both nations.

GE's CT7 turboprop engines entered airline service in June 1984 and have accumulated nearly 1.9 million engine flight hours, powering more than 190 aircraft in 16 countries. The CT7 engines power the Saab 340 regional airliner and the CASA-IPTN CN235 aircraft. The CT7 engines are manufactured in Lynn, Mass.

JACKSON, MI. (JAN. 24) PR NEWSWIRE - Mobile Telecommunication Technologies Corp. (Mtel) (NASDAQ: MTTL) said today that Inter-City Paging Ltd., a wholly owned U.K. subsidiary of Mtel, signed a memorandum of understanding with other European operators regarding the implementation of ERMES (European Radio Messaging System), the pan- European system to be constructed in the early 1990s throughout western Europe.

Inter-City Paging Ltd. was one of seven U.K. paging network operators that signed the memorandum, which provides a framework for the opening of standardized commercial paging service throughout Europe in the 169 MHz band by Dec. 31, 1992. Twelve European nations, including the United Kingdom, have agreed to participate in the agreement.

"Through Mtel's presence in the U.K. we look forward to being a major player in the pan-European paging market," said Jai P. Bhagat, president of Mtel International. "Our subsidiary, Paging Systems Ltd., expects to become a key supplier of ERMES paging infrastructure equipment and our technology will give us a competitive edge as the ERMES system develops."

By the year 2000, there may be almost 13 million pagers operating in Europe alone, according to a recent report prepared by BIS Mackintosh for the Commission of the European Communities. The ERMES memorandum stipulates that at the start of commercial paging service in 1992 the capital or major city in each member country as well as corresponding airports will be covered. The memorandum also specifies that by the end of 1993 at least 25 percent of the population of each member country, or the three largest cities, will have paging service.

Daniel J.N. Nabarro, managing director of Mtel's U.K. operating subsidiary said: "I see ERMES as a major factor in contributing to the rapid expansion of the U.K. paging market. ERMES offers a very high capacity paging system with a resulting reduction in infrastructure costs per pager. Additionally, standardization on the ERMES format will increase the competitive supply of radiopaging receivers further benefiting users and expanding the market."

Last December, Mtel acquired nationwide paging operations in the U.K. with the hope of gaining access to ERMES. The same month Britain's Department of Trade and Industry announced its intention to authorize the U.K.'s seven wide-area paging operators to operate ERMES.

Mtel, headquartered in Jackson, is engaged in businesses that include nationwide paging and voice messaging systems; interests in other satellite-based telecommunications systems; air-to-ground and marine telecommunications systems; telephone answering service operations; and a microwave relay system in southern California.

POMPANO BEACH, FL (JAN. 24) PR NEWSWIRE - Oriole Homes Corp., (AMEX:

OHC.A and OHC.B), a major South Florida residential builder, today reported the unaudited results of its operations for the fourth quarter and 12 months ended Dec. 31, 1989.

Revenues for the 12 months of 1989 totaled $103,382,142, as compared to $120,547,012 for the corresponding 12 months of 1988. The net operating profit after taxes for 1989, 12 months amounted to $7,542,452 or $1.97 per share versus the comparable 12 months of 1988 when net operating profit amounted to $10,031,664, or $2.61 per share. Net profit for the 1988, 12 month period included $1,569,563, or $.41 per share for the sale of a shopping center in Delray Beach, Fla.

For the 1989 fourth quarter, revenues totaled $31,132,979 compared to $35,838,616 in the same quarter of 1988. Net operating income after taxes was $2,954,979, or $.77 per share compared to $2,896,100, or $.76 per share in the same 1988 quarter.

Mark A. Levy, president of Oriole Homes Corp., stated that the company closed 267 units valued at $28,929,810 in the fourth quarter of 1989 compared to 342 units valued at $31,146,696 in the comparable three months of 1988. For the full year of 1989, 892 units were closed with a value of $90,533,025 as compared to 1,092 units valued at $104,866,898 during the same period of 1988.

Oriole's backlog of undelivered housing at the end of 1989 totaled 331 units valued at $38,376,921, which compares to a total of 364 units valued at $37,996,036 at close of 1988.

PALATINE, IL (JAN. 24) PR NEWSWIRE - Square D Company (NYSE: SQD) announced today a 10 percent increase in its quarterly cash dividend on common stock, raising the dividend 5 cents per share to 55 cents, a $2.20 annual rate.

The dividend will be payable April 2, 1990, to common stockholders of record March 15, 1990.

Square D last increased its common stock dividend in October 1988, when

the rate was increased from 48 to 50 cents per share.

The April 2, 1990, dividend will be paid to approximately 12,000 holders of common stock. It will be the 217th consecutive quarterly cash dividend paid by Square D.

"The dividend increase is an expression of the confidence with which we view the future and is consistent with our long-term financial goals," said Jerre L. Stead, Square D chairman, president and chief executive officer. "We continue to seek to provide an above-average total return to our shareholders through stock price appreciation and dividends."

Square D is a worldwide leader in industrial control and electrical distribution products, systems and services.

CONTACT: E.J. Schenk of Square D, 708-397-2600, or George Eisenhuth, 312-372-7090, for Square D.

BATTLE CREEK, MI (JAN. 24) PR NEWSWIRE - Kellogg Company (NYSE: K) has announced the national introduction of KENMEI (TM) Rice Bran (pronounced ken'my), a whole grain, brown rice and rice bran cereal.

The flaked cereal is available in two varieties, KENMEI Rice Bran and KENMEI Rice Bran with Almonds & Raisins. A serving of each provides 10 vitamins and minerals and is low in fat.

"The dietary tradition of the Orient has been captured in this great-tasting, nutritious product," said Gary E. Costley, executive vice president, Kellogg Company and president, U.S. Food Products Division. "We believe that KENMEI Rice Bran further responds to consumers' desire for value-added, grain-based products."

The product's Oriental image is reflected by its name and packaging graphics. KENMEI is an Oriental term that, when translated, is associated with wisdom or prudence.

Kellogg's KENMEI Rice Bran will be available early this spring. Marketing support includes television advertising and couponing.

Leo Burnett, Chicago handles the advertising.

SOMERS POINT, NJ (JAN. 24) PR NEWSWIRE - Actions Savings Bank SLA (NASDAQ: ANSL) announced today at its annual meeting of shareholders that it has plans to establish a holding company.

Steven E. Brady, president and chief administrative officer, stated, "To better position Action for the 1990s, the board of directors has decided to organize a holding company for the bank in 1990, subject to regulatory and shareholder approval. We believe that a holding company will give Action added flexibility to diversify its business activities in the future."

Also at the meeting, the shareholders re-elected Brady, John C. Rowe and Donald B. Vass to three-year terms as directors.

At the reorganization meeting held immediately after the annual meeting, Robert J. DiDomenico was reappointed chairman of the board and chief executive officer.

Actions Savings Bank SLA, with assets of $292.8 million, operates seven offices in Atlantic and Cape May counties, N.J.

PALO ALTO, CA (JAN. 24) PR NEWSWIRE - Collagen Corp. (NASDAQ: CGEN) today announced that an analysis by the U.S. Food and Drug Administration (FDA) Center for Devices and Radiation Health's Office of Science and Technology (OST) failed to detect a statistically significant association linking the company's injectable collagen products to the onset of a rare autoimmune disease.

A report in the Jan. 22 issue of M-D-D-I Reports, an industry newsletter, related that the OST's preliminary study has supported Collagen's data showing no association between injectable collagen and polymyositis/dermatomyositis.

"We are pleased to share this information with our patients, physicians and stockholders," said Howard Palefsky, Collagen's president and chief executive officer. "We are proud of our record of product safety, which the FDA's report confirms."

Collagen Corp. is a scientific and commercial leader in applying the science of cell biology to healing human tissue.

MEMPHIS, TN (JAN. 24) PR NEWSWIRE - Holiday Corporation (NYSE: HIA) today announced that the New Jersey Casino Control Commission has unanimously approved Holiday's spin-off of The Promus Companies Incorporated to stockholders, Holiday's merger with a new U.S.-based subsidiary of Bass PLC and the intended payment by Promus of a $30 cash dividend to stockholders, to be financed through borrowings.

Promus will own Harrah's Casino/Hotels, and the Embassy Suites, Hampton Inn and Homewood Suites hotel brands. The newly created Bass subsidiary will own the Holiday Inn hotel system.

Holiday also announced that it had received requisite consents and has executed supplemental indentures with respect to its 8-3/8 percent Notes due 1996 of its Holiday Inns, Inc. subsidiary. As a result, Holiday has

now received requisite consents from holders of all five issues of public debt securities as to which it is soliciting consents.

Since holders of less that $200 million in principal amount of the 10-1/2 percent Senior Notes due 1994 and the 11 percent Subordinated Debentures due 1999 submitted consents for consent-only payments, no conditional tenders of the 10-1/2 percent Notes or the 11 percent Debentures will be accepted in the tender offers.

Subject to conditions of the tender offers and upon their expiration, Holiday Inns will accept all 10-1/2 percent Notes and 11 percent Debentures validly tendered on a non-conditional basis prior to the tender offer expiration date.

Completion of the Bass transaction is subject to certain conditions, including Nevada gaming regulatory approvals, certain other third party approvals, and receipt of solvency opinions. The company said that it anticipates closing of the transaction in early February.

PITTSBURGH (JAN. 24) PR NEWSWIRE - Grant Street National Bank (in liquidation) announced today that asset liquidation activities during the quarter ended Dec. 31, 1989, coupled with appreciation that was recorded in the remaining portfolio, produced an increase in net assets allocable to shareholders' equity, following two quarters in which decreases in equity were recorded.

During the quarter, collections on assets were $56.7 million and a net unrealized gain of $7.8 million was recorded. Together, these exceeded the cost basis of the assets liquidated by $21.5 million. After financing costs, expenses, taxes and dividends accrued on the senior preferred stock net assets allocable to shareholders' equity increased $1.4 million to $38.4 million at Dec. 31.

For the full year, 1989, collections on assets were $327.8 million, which exceeded the cost of assets liquidated by $75.8 million after recording a net unrealized loss of $14.8 million. Net assets allocable to shareholders' equity declined $13.5 million for the year.

William B. Eagleson Jr., chairman, president and chief executive officer, said that the pace of liquidation is likely to slow somewhat in 1990. "The bulk of our remaining assets are real estate related," Eagleson said, "and competition among sellers in this market is strong." "Also," he said "we have now liquidated two-thirds of the original assets and must expect

that those remaining may be more difficult to resolve."

CONCORD, ONTARIO (JAN. 24) PR NEWSWIRE - Seagate Technology (NASDAQ: SGAT) announced today the availability of 40-day dealer financing on all Seagate products purchased from Computer Brokers of Canada between Feb. 1 and July 31 of this year. This joint Dealer Financing Program, administered by ITT Commercial Finance, is intended to provide computer resellers with greater purchasing flexibility, allowing them to stock a wider variety of Seagate drives and controllers.

"Computer dealers today have a tough task," explains Nir Shafrir, CBC president. "End-user requirements are more diverse and manufacturers are offering a greater variety of products. It's up to the dealer to pick and choose what products to carry to meet the most customers' needs. We believe that offering free financing will encourage dealers to stock many different Seagate drives so they can configure systems quickly and easily."

The Dealer Financing Program, launched with a five-city seminar series this week, is evidence of Seagate's increased focus on the Canadian market. George Karabatsos, Seagate's Canadian sales manager, describes the company's commitment. "We see a tremendous opportunity in Canada and have expanded our efforts in this growing market. Supporting our distributors and their dealers through these types of programs is key to our success in Canada."

Seagate Technology is the world's leading supplier of disc storage devices to original equipment manufacturers and remarketers. The company's common stock is traded on the NASDAQ National Market under the symbol: SGAT.

FORT WORTH, TX (JAN. 24) PR NEWSWIRE - Cash America Investments Inc. (AMEX: PWN) announces quarterly dividend and executive changes.

Jack R. Daugherty, chairman and CEO of Cash America announced today that the board of directors, at their regularly scheduled quarterly meeting held today declared a regular quarterly cash dividend of 2 cents per share on the company's 7,853,301 common shares outstanding. The quarterly dividend will be paid on Feb. 21, 1990 to stockholders of record as of the close of business Feb. 7, 1990. Daugherty stated that this dividend is reflective of the company's continued strong earnings performance and strong financial condition and represents the company's fourth consecutive quarterly dividend.

Further, Daugherty announced today the election of Daniel R. Feehan to the office of president. Feehan has been a director on the company's board and a member of its Executive Committee since October 1984 and joined the company full-time in June 1988 serving as executive vice president and chief financial officer. Daugherty stated, "Mr. Feehan has done an outstanding job in the short-time as an officer with the company and has gained the respect and loyalty not only of the employees of Cash America but of the community of Fort Worth and the financial community as a whole. Feehan has the abilities and integrity to help lead the continued expansion and development of Cash America into the 1990s and beyond."

Daugherty also announced the company completed the acquisition of two pawnshops in Oklahoma since the beginning of the year and expects to close the acquisition of two additional pawnshops in Oklahoma later this week. These four acquisitions, together with the pending start-up of the company's first pawnshop in Atlanta, Ga., and a new start-up in New Orleans, will bring the company's total operating locations to 129. Daugherty stated further that preliminary earnings for 1989 are generally in line with analysts' expectations and final results for the year will be released within three weeks.

CONTACT: Eugene M. Estep or Daniel R. Feehan, 817-335-1100, both of Cash America Investments Inc.

#90024p0372 01/24/1990 ~PR Newswire

CLEVELAND, (JAN. 24) PR NEWSWIRE - Society Corporation (NASDAQ: SOCI) a $16.2 billion asset Ohio-based financial services company, today reported the separate 1989 results for the former Trustcorp, Inc. Society's results were reported on Jan. 16, 1990. The merger of Trustcorp into Society, a pooling of interests, was consummated on Jan. 5, 1990.

Trustcorp recorded a net loss for 1989 of $104.1 million, compared to net income of $1.3 million in 1988. The fourth quarter 1989 loss was $32.2 million, which included charges of $22 million to recognize one-time expenses, incurred in connection with the merger with Society, for

severance costs and the write-off of computer software, operating systems and signage made obsolete by the integration of the two companies and other matters. Trustcorp's fourth quarter results also included $3.4 million in legal expenses and other fees incurred in connection with the merger; $4.3 million in securities losses associated mainly with the restructuring of the investment portfolio of the former Trustcorp Bank, Ohio, now renamed Society Bank & Trust; $4.1 million in venture capital and nonbank subsidiary write-offs; and $1.1 million in workout costs associated with nonperforming loans.

The most significant component of the net loss for 1989 was the provision for loan losses of $116.4 million, of which $96.6 million was recorded in the second quarter. The second quarter charge provided for downtown Toledo real estate loans, underperforming loans and established the loan loss reserve at a more prudent level after considering numerous events and circumstances arising in the first six months of 1989.

The net interest margin was 3.96 percent for 1989, compared to 4.28 percent in 1988. Earning assets averaged $5.2 billion in 1989, equivalent to the 1988 level. The net interest margin improved from a low of 3.83 percent in the second quarter to 3.90 percent in the fourth quarter; this improvement was attributable to various balance sheet restructuring initiatives. The effect of the margin improvements on net interest income in the fourth quarter was offset by a decrease of $269 million in average earning assets from the third quarter. This resulted in a net reduction of $2.9 million in net interest income from the third quarter to $48.0 million in the fourth quarter.

The pretax loss for 1989 was offset by only $768,000 in income tax benefits due to the inability of Trustcorp under Statement of Financial Accounting Standards No. 96 to tax effect its net operating losses for financial reporting purposes.

On a combined basis, at December 31, 1989, Society Corporation's total assets were $16.2 billion and total loans were $10.5 billion. Combined year-end nonperforming loans were $171.6 million, representing 1.64 percent of total year-end loans. The combined reserve for loan losses of $173.2 million represented 101 percent of combined nonperforming loans. On a combined basis, the company remains well capitalized with primary and total capital ratios of 7.07 percent and 7.83 percent at December 31, 1989 compared to the minimum required ratios of 5.5 percent and 6.0 percent, respectively.

Robert W. Gillespie, chairman and chief executive officer of Society Corporation, stated, "We are very pleased that the credit problems within Trustcorp were identified and provided for in 1989 after applying Society's rigorous standards. We are focusing on reducing the level of nonperforming assets and fully expect credit quality indicators to improve

throughout 1990 and beyond.

"Since we entered into the agreement to acquire Trustcorp on June 18, 1989 we have had the opportunity to extensively review their loan and investment portfolios and to complete detailed integration plans. These reviews and plans disclosed no significant new problems. Furthermore, our original expectation called for fully obtaining the cost reduction and revenue enhancements by the end of 1991, and to have the acquired banks earning at the levels of the other banks of Society Corporation by that time. Our detailed operating plans call for this timetable to be met or in some cases exceeded. In summary, the strategic and financial objectives we envisioned for this transaction are right on schedule."

Society Corporation has banking regions in Cleveland, Dayton, Columbus, Toledo, South Bend and Ann Arbor with 370 banking offices across Ohio, Indiana and Michigan.

NEW YORK, (JAN. 24) PR NEWSWIRE - GTEK Acquisition Co., a company formed by Donaldson, Lufkin & Jenrette Capital Corporation ("DLJCC") in connection with the $300 million management buyout of GTECH Corporation (NASDAQ: GTCH), announced it had accepted for payment all shares validly tendered pursuant to its cash tender offer to purchase all outstanding shares of GTECH common stock at $16-5/8 per share. The tender offer expired at midnight, New York City time on Jan. 23, 1990.

GTEK Acquisition has been informed by Marine Midland Bank, N.A., the Depositary, that a preliminary count indicates that approximately 9.4 million shares of GTECH common stock, or approximately 95 percent of the shares currently outstanding, were tendered prior to the expiration of the offer, including approximately 1.2 million shares (or approximately 13 percent of the shares currently outstanding) pursuant to guaranteed delivery.

As previously announced, members of senior management of GTECH Corporation including Guy B. Snowden, chairman, president and chief executive officer and Victor Markowicz, vice chairman, and certain other members of the company's management, are participating as equity investors in the acquisition, along with DLJCC and GTECH Bridge Partnership, an affiliate of DLJCC, which is also providing bridge financing of approximately $136 million in connection with the acquisition. As a result of management's equity participation and the purchase of shares in connection with the tender offer, GTEK Acquisition would own approximately 9.6 million shares (or approximately 97 percent of the shares currently outstanding).

It is anticipated that GTEK Acquisition's cash tender offer will be followed by a "short form" merger, in which the remaining shares of GTECH common stock will receive $16-5/8 per share in cash. It is currently expected that the merger will be consummated on or about Jan. 31, 1990.

Donaldson, Lufkin & Jenrette Securities Corporation ("DLJSC") and its affiliates have participated in over 25 leveraged buyouts and similar transactions valued at more than $18 billion. In addition, DLJSC and its affiliates control the DLJ Bridge Fund, which has committed capital in

excess of $1 billion to provide financing for such transactions.

RIDGEWOOD, NJ (JAN. 24) PR NEWSWIRE - Commonwealth Acquisitions Inc. (CAI) and the investment banking firm of Trautman & Co. Inc. (T&C) announced today their joint demand that no later than March 2, 1990, Cordatum Inc. (NASDAQ: CDAT), call a special meeting of stockholders to recall its present board of directors and elect five new directors to fill the vacancies that would then exist.

Timothy W. Bell, president and chief executive officer of Commonwealth Acquisitions, said, "The demand was made because subsequent to the substantial investment in Cordatum by CAI and T&C, Cordatum had repeatedly failed to take advantage of business and financial opportunities presented to it". Lawrence J. Trautman further added, "T&C has identified and recommended to Cordatum candidates for service on the Cordatum board of directors who, in the opinion of T&C, could bring to Cordatum valuable experience, knowledge, and business relationships. The present board of directors of Cordatum has not taken any action on numerous recommendations made by T&C, which should have created value for Cordatum shareholders, and has not made any attempt to expand its board with experienced directors." CAI and T&C announced that they intend to nominate a board of directors that will be attuned to maximizing the value of the investments of CDAT stockholders. CAI and T&C have today filed a Schedule 13D with the Securities and Exchange Commission announcing the formation of a group for the purpose of accomplishing those aims.

Commonwealth Acquisition Inc. is a Dallas-based company with interests in oil and gas production and reserves, financial services and computer software product companies. Trautman & Co. Inc., under the chairmanship of veteran investment banker Lawrence J. Trautman, conducts its merchant and investment banking business from its Ridgewood headquarters. Cordatum Inc., is a diversified high technology and professional services firm specializing in information systems consulting, software development, and information systems consulting, software development, and information center support, as well as computer-related education and training serving a variety of federal and Fortune 500 clients.

DANVERS, MA (JAN. 24) PR NEWSWIRE - Wheelabrator Technologies Inc. (NASDAQ: WHGP) announced this week that it commenced startup operations at its Gloucester County, N.J., trash-to-energy facility. The project is the first in the nation to be regulated as a public garbage utility, and will operate under a tariff rate and franchise system regulated by New Jersey's Board of Public Utilities.

Situated on a 152-acre site on the Delaware River in West Deptford Township, the facility will process up to 575 tons of municipal solid waste daily from 24 Gloucester County municipalities, and has an electric generating capacity of 14 megawatts.

Rodney C. Gilbert, president of Wheelabrator Technologies, said, "This facility is a tribute to the foresight of Gloucester County's officials. Their resolve to meet long-term public health and waste disposal goals for county residents has been met with the most advanced technology available." The Wheelabrator/Gloucester County project concludes a five-year effort to provide safe and resourceful disposal services for county residents well into the 21st century and results from a cooperative development approach between Gloucester County's Board of Chosen Freeholders, the Gloucester County Improvement Authority, West Deptford and Wheelabrator.

Wheelabrator has built and now operates 10 similar projects around the country. These facilities have recycled 22 million tons of trash from five million Americans into energy and reusable materials. The plant in West Deptford employs technologies and management procedures refined by Wheelabrator for the past 15 years.

The Gloucester plant's mass burn system directs both trash and accompanying dust and odors into highly engineered 2,500 degrees

Fahrenheit furnaces. Boiler gases generate high-pressure steam for the turbine, while ash residuals are collected and contained for disposal. The plant's state-of-the-art acid gas scrubbers and fabric filters, first introduced by Wheelabrator for commercial use in the trash-to-energy industry, will consistently meet stringent New Jersey emissions regulations.

Initial operations at the plant site this week include combustion of trash in one of the plant's two units and synchronization of the turbine generator with Jersey Central Power & Light. The facility's second unit will be fired up in the next two weeks as all ancillary systems are brought on line. "We're delighted to reach this important step," added Gilbert, "and are committed to being a good corporate neighbor and providing a valuable public service in Gloucester County."

Wheelabrator is one of the nation's leading suppliers of integrated recycling/trash-to-energy systems. It serves worldwide markets in the engineering, environmental and manufacturing fields.

SAN FRANCISCO (JAN. 24) PR NEWSWIRE - Chevron Corporation (NYSE: CHV) today announced preliminary 1989 consolidated earnings of $251 million, or $.73 per share, reflecting special charges totalling $1.207 billion after related taxes. Earnings in 1988 were $1.768 billion, or $5.17 per share, and included the benefit of $77 million from special items.

In the fourth quarter, the company charged $1.203 billion of special items against earnings, resulting in a loss for the quarter of $883 million, or $2.58 per share. Earnings in the 1988 fourth quarter were $175 million, or $.51 per share, including special charges of $266 million.

Excluding the effect of special items, operating earnings for 1989 were $1.458 billion, compared with the prior years $1.691 billion. Comparable earnings for the 1989 fourth quarter were $320 million versus $441 million for the fourth quarter in 1988.

The largest special charge in the fourth quarter was a $598 million write-down of the companys investment in certain producing and non-producing oil and gas properties. This included a $445 million write-down of the giant Point Arguello field, located offshore Southern California, where prolonged permitting delays have prevented production start-up. Other producing properties, also located mostly offshore Southern California, were written off, as well as certain non-producing leases where the current controversial climate precludes near-term

development.

SAN JOSE, CA (JAN. 24) PR NEWSWIRE - Wyse Technology (NYSE: WYS) announced today financial results for the third fiscal quarter ended Dec. 29, 1989, along with several actions, including a workforce reduction, to reduce operating expenses.

Revenue for the third quarter was $112.4 million compared with $65.5 million for the like period a year ago and $119.0 million for the previous quarter. Net loss for the quarter was $7.1 million compared to a net loss of $26.4 million for the third quarter of the prior fiscal year and $3.6 million for the previous quarter. Net loss per share was 48 cents, compared with a net loss per share of $1.79 for the like period a year ago and 25 cents for the previous fiscal quarter.

Dr. Daniel Wu, president of Channel International Corp., the Taiwan-based investor group that has commenced a tender offer to acquire Wyse, said, "These results are expected, and we are proceeding as planned with our acquisition of the company." The tender offer expires at midnight, Thursday, Jan. 25, Eastern Standard Time.

The company attributed the decline in revenue between the second and third fiscal quarters to lower unit volume in personal computers, as well as price reductions on selected PC models in December. However, terminal shipments were at a record level for the quarter. The company also began shipment of its new multiuser, multiprocessor computer systems late in the period.

Included in operating expenses for the quarter are approximately $1.0 million of costs associated with the pending acquisition of Wyse by Channel International.

As a result of its financial performance, the company has taken several actions to reduce operating expenses. These include reducing personnel costs through a combination of attrition, reductions in contract (temporary) workers, a lay-off of 70 North American employees, and a six-month deferral of scheduled salary increases for North American employees.

Wyse Technology is a leading independent supplier of microprocessor- based products, which include terminals, IBM PC-compatible computers, monitors and mulituser systems.

#90024p0395 01/24/1990 ~PR Newswire

HARRISBURG, PA (JAN. 24) PR NEWSWIRE - AMP Inc. (NYSE: AMP) Chairman and Chief Executive Officer H. A. McInnes today reported a dividend increase and year-end results.

Worldwide sales rose 5 percent in 1989 to a new high of $2.80 billion. U.S. sales were up 5 percent. International sales were up 11 percent in local currencies, but up only 4 percent in U.S. dollars because of the strengthening of the U.S. dollar in 1989. International sales would have been about $90 million higher in 1989 if exchange rates had remained constant at the 1988 average. In 1988, U.S. sales grew 10 percent, while international sales grew 13 percent in local currencies and 19 percent in U.S. dollars.

1989 of $2.63/share were down from 1988's record $2.96/share, but well above 1987's $2.31/share. 1988's record earnings had been boosted by the favorable exchange rate effects of a weaker U.S. dollar, and by receipt of a $10 million ($0.06/share) patent settlement payment. 1989's earnings were negatively impacted by restructuring charges in the U.S., the stronger U.S. dollar, and the exclusion of $40 million of sales due to the change to a Nov. 30 fiscal year by AMP's companies in Japan and several other Far Eastern countries.

The fourth quarter sales of $680 million after the $40 million exclusion for fiscal year change in the Far East were below the year- earlier $695 million and level with the $681 million in the preceding quarter. But on a constant year basis (i.e. before exclusion), the $720 million nearly equaled the record $723 million in the second quarter of 1989. The $39

million sales increase over the third quarter on a constant basis was entirely in the international operations, which resumed growth after the usual summer seasonal softness. U.S. sales declined slightly in the second, third and fourth quarters after reaching a new high in the first quarter, when worldwide sales also set a new high of $713 million. In contrast, international sales moved to new highs in the second and fourth quarters of 1989.

Net income was down 12 percent to $281 million or $2.63/share (10 percent of sales) from $319 million or $2.96/share (12 percent of sales) in 1988. The worldwide pretax margin declined from 20 percent to 16 percent because of rising wage rates and benefit costs, restructuring charges, higher copper prices, continued product pricing pressures, and in some areas, less than expected sales growth. The effective tax rate declined from 39.7 percent in 1988 to 38.3 percent in 1989.

Dividend increased to $0.34 per quarter from $0.30: The board of directors of AMP Inc. increased the regular quarterly cash dividend to $0.34 per share, payable March 1, 1990, to shareholders of record Feb. 5. The current rate indicates an annual dividend of $1.36 per share for 1990 compared to $1.20 in 1989, $1.00 in 1988, and $0.85 in 1987 -- and would result in the 37th consecutive annual increase.

Harrisburg-based AMP Inc. is the world's leading producer of electrical/electronic connection devices. It has 24,400 employees in nearly 160 facilities in the United States and 26 other countries. AMP stock is listed on the New York, Pacific and other regional stock exchanges.

SAN JUAN, Puerto Rico (JAN. 24) PR NEWSWIRE - Puerto Rican Cement Company Inc. (NYSE: PRN) today announced fourth-quarter net income of $2,987,000, or $1.54 per share, vs. $4,447,000, or $2.29 per share, in the comparable quarter of 1988. For the full year 1989, the company reported net income of $13,313,000, or $6.85 per share, compared with net income of $15,844,000, or $8.09 per share, in 1988.

Total net sales rose 7.64 percent in the fourth quarter of 1989 to $20,993,000 from $19,504,000 in 1988. Total net sales in 1989 were $79,336,000, a slight decrease from 1988 sales of $79,700,000. This decrease results from lower revenue from real estate operations in 1989.

Fourth-quarter total net sales for 1989 include revenue from real estate operations of $8,000 vs. $1,052,000 in 1988. Sales figures in 1989

include $708,000 of revenue from the company's real estate operations, compared with $2,075,000 in 1988. The company said that the Amelia Industrial Park is almost completely sold out, except for three lots that are not yet fully developed.

The company's total 1989 cement sales amounted to 18,012,000 bags, a slight increase over 17,896,000 bags sold in 1988. Overall cement consumption in Puerto Rico totaled 29,316,000 bags in 1989, compared with 30,125,000 bags in 1988, a decrease of 2.6 percent.

Puerto Rican Cement Company, Inc. produces cement and related products, including Portland grey cement and hydrated lime, and multiwall paper bags and engages in realty operations.

CLEVELAND (JAN. 24) PR NEWSWIRE - Banner Industries, Inc. (NYSE: BNR) today announced its intention to redeem all of its outstanding 8 percent Cumulative Convertible Preferred Stock at $26.40 per share on March 1, 1990. Holders of the Preferred also have the option of converting the Preferred to Class A Common Stock at a ratio of 3.75 shares of Class A Common for each Preferred share. The company also announced a Preferred Stock dividend payable on March 1, 1990 to holders of record on February 21, 1990.

A Banner spokesman said that the company expects all Preferred shareholders to convert to the Class A Common because of the favorable exchange ratio. Each share of Preferred Stock can be converted into shares of Class A Common Stock making the conversion worth approximately $50 per Preferred share as opposed to $26.40 per share if redeemed. Banner Class A Common closed at $13.375 per share on the New York Stock Exchange yesterday.

The company said that cash will be paid in lieu of fractional shares on conversion.

Banner has 1.4 million 8 percent Cumulative Convertible Preferred Stock shares outstanding, 383,600 of which are in the hands of non-affiliates of the company. All Preferred shares owned by affiliates will be converted. Banner has a total of 14,827,771 common shares outstanding which will increase by 1,438,500 to 16,266,271 if all Preferred stockholders convert.

Banner is a leading supplier of aerospace products, industrial products and communications services and has a minority interest in Rexnord

Corporation.

DALLAS (JAN. 24) PR NEWSWIRE - MCI Communications Corp. (NASDAQ: MCIC) announced today that it has been awarded a five-year contract worth nearly $5 million to provide long distance telephone service at all public pay phones operated by the City of Dallas.

Based on a resolution passed today by the Dallas City Council, MCI will provide "0+" services to customers making collect, third-party and credit card calls at nearly 600 public pay phones in Dallas. MCI will also provide service to an additional 500 pay phones on city premises over the next few months.

The national pay phone market--worth an estimated $2 billion annually--was opened by court order to non-AT&T carriers last year. The decision was the latest milestone in telephone deregulation.

Pay phone premise owners and managers may now select the long distance carrier of their choice for operator-assisted calls and receive commissions based on their volume of traffic.

"MCI is vigorously pursuing the pay phone market here in Texas and throughout the nation by offering quality service at competitive rates for pay phone customers, and substantial benefits to pay phone premise owners " Hall said.

Nationwide, MCI's roster of pay phone customers includes Chrysler Corp., Firestone Inc., Peoples Drug Co., Marshalls department stores and Cumberland Farms, a national chain of 1,200 convenience stores, among others.

Under its contract with the City of Dallas, Hall said MCI will provide service at all pay phones on city-owned sites, including such high-volume sites as Love Field and the Dallas Convention Center.

MCI is the world's second-largest long distance provider, supplying a full range of voice and data telecommunications services to businesses, residences and government agencies.

OAK BROOK, IL (JAN. 24) PR NEWSWIRE - Edwin G. Falkman has been elected a vice president of Waste Management, Inc. (NYSE: WMX), the company announced today.

Falkman was appointed president of Waste Management International, Inc. last June. Based in London, Falkman oversees the company's operations in Europe, South America, Saudi Arabia, Australia, New Zealand and Hawaii.

He previously served as vice president and secretary of Waste Management International. He directed the work that led to the company's entry into Venezuela. Earlier, he was involved in startup operations in Buenos Aires Argentina and Riyadh and Jeddah, Saudi Arabia. He also played a key role in the company's development activities in Australia.

Prior to joining Waste Management in 1977, Falkman was for three years an attorney with Sidley and Austin, a Chicago-based law firm. Earlier, he taught English classes in Paris, France; worked on political and legal research projects in Kampala, Uganda; and served as a Peace Corps volunteer in Liberia, West Africa.

Born on Aug. 11, 1944 in St. Paul, Minn., he now lives with his family in London. Falkman is an honors graduate of Northwestern University School of Law and received bachelors and masters degrees in political science from Augustana College and the University of Illinois, respectively.

#90024p0417 01/24/1990 ~PR Newswire

COLUMBUS (JAN. 24) PR NEWSWIRE - U.S. Marine personnel stationed in Panama will get a special taste of home on Friday - the taste of White Castle hamburgers. The idea originated at a Kansas City, MO, radio station, and White Castle executives at the company's Columbus, OH, headquarters enthusiastically agreed to arrange it. Soon 10,000 White Castle hamburgers were on their way to Panama City.

The project began when Randy Miller, morning disc jockey at KBEQ-FM/Q-104 in Kansas City, telephoned Marine Chief Warrant Officer Charles Row in Panama to talk about the conditions there. When Miller asked what the troops would like sent down to them, Row replied, "White Castle hamburgers!"

Miller went into action. "After talking with Charlie Row and hearing everything the troops had been through in Panama, I just wanted to do something to let them know how much we support them," he said.

Miller and Von Freeman, Q-104's promotions director, are accompanying White Castle director of marketing Christopher F. Thomas as he delivers the hamburgers to the troops in Panama City.

White Castle's Kansas City area manager, Ron Rowland, presented the idea to Thomas at White Castle's corporate headquarters in Columbus. Back in 1982, White Castle sent 3,000 hamburgers to the U.S. peacekeeping forces in Beruit, Lebanon. The company was enthusiastic about taking on a similar project.

Thomas immediately began coordinating the complicated task of sending 10,000 frozen hamburgers to Panama. "White Castle is proud to deliver our hamburgers to the armed forces, as we have done in the past. We're glad to give o1r troops in Panama a taste from home."

Workers at White Castle's Louisville one-of-a-kind frozen hamburger plant prepared 140 cases of microwaveable hamburgers, which left Louisville on Monday, Jan. 22, in refrigerated trucks headed for Miami, FL. They will be flown to Panama City on Thursday, Jan. 25 to be microwaved and served as the evening meal feature to the Marines on Friday, Jan. 26.

White Castle System, Inc. owns and operates 243 restaurants in 12 markets. White Castle -- hamburger specialists since 1921.

KANSAS CITY, MO (JAN. 24) PR NEWSWIRE - GRA Inc. President David L. O'Toole has announced the formation of a new subsidiary to provide professional financial valuation services.

The new company, GRA, Petty & Co. Inc., will provide valuations of closely held businesses and other intangible assets for merger and/or acquisitions. Employee Stock Ownership Plans, and estate, gift and inheritance tax assignments. Valuations of other financial transactions such as recapitalizations and restructurings will also be provided. The formation of GRA, Petty & Co., represents an expansion of GRA's current valuation services, which had been offered exclusively to financial institutions.

M. Curtis Petty, formerly a senior financial valuation specialist with Marshall and Stevens Inc., Houston, will assume the responsibilities of president and chief executive officer of GRA, Petty & Co. Petty has a BBA from the University of Oklahoma with a concentration in economics and marketing and a MBA from Southern Methodist University with a concentration in finance and accounting. He has over 15 years of experience in financial planning, analysis, reporting, consulting and valuations.

Petty will direct the activities of GRA, Petty & Co. from the company's main office in Houston. Additional support services will be provided by GRA's Kansas City area office. The company plans to offer a full spectrum of specialty valuation services, including fairness opinions, purchase/sale price allocations and litigation support. It will also offer appraisal services for various governmental agencies and consultations on other matters that require specialized financial expertise.

The formation of this new company signifies an industry diversification for the GRA organization, which is based in Merriam, Kan. For the past 14 years, GRA, and a related company, GRA, Thompson, White & Co., P.A., have provided accounting, audit, tax, regulatory and management consulting services exclusively to financial isntitutions. The new company will provide valuation services throughout the country to all types of businesses, including financial institutions.

For more information about the valuation services, contact M. Curtis Petty

#90024p0431 01/24/1990 ~PR Newswire

WASHINGTON (JAN. 24) PR NEWSWIRE - The Office of Thrift Supervision (OTS) today placed Empire of America, FSB (AMEX: EOA), Buffalo, N.Y., in conservatorship, appointing the Resolution Trust Corporation (RTC) as conservator.

Empire is a federally chartered stock savings bank with 123 branches located throughout New York, Michigan, California, Florida and Texas. With $10.2 billion in assets as of Sept. 30, 1989, Empire is among the 15 largest savings institutions in the nation. On Sept. 30, Empire's liabilities totaled $10.3 billion and the institution's tangible capital was a negative $900 million. Empire's negative position derives in part from goodwill booked in connection with its acquisition of 13 troubled thrifts in the 1980s.

OTS took the conservatorship action to protect the interests of insured depositors and the insurance fund. Empire will remain open for business as usual and continue to operate under the management of the RTC, pending eventual resolution.

This action was taken under authority granted by the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA) because Empire was in an unsafe and unsound condition to transact business, had substantially insufficient capital and has incurred or is likely to incur losses that will deplete all or substantially all of its capital, causing insolvency or severe dissipation of assets or earnings. There is no reasonable prospect for replenishment of Empire's capital without federal assistance, OTS said.

Empire's weak condition is due in part to sizable net operating losses. Additionally, Empire is burdened by a high level of non-earning and underperforming assets, including a substantial amount of supervisory goodwill and delinquent loans. As of June 30, 1989, goodwill totaled $709 million and delinquent loans totaled $304 million.

Some of the problem assets were originated under its management's aggressive and poorly executed growth strategies in commercial business, real estate, indirect auto and credit card lending.

Empire's outstanding supervisory goodwill relates to the acquisition by

Empire of 13 troubled institutions between 1981 and 1986. In connection with these federally assisted acquisitions, Empire received various combinations of assistance that included forbearances. Empire also took over a number of problem loans from the failed thrifts.

PITTSBURGH (JAN. 24) PR NEWSWIRE - Japonica Partners today filed a $650 million cash plan of reorganization for Allegheny International, Inc. (NYSE: AG) with the Bankruptcy Court for the Western district of Pennsylvania.

The plan provides for $120 million of cash equity to be contributed by Japonica Partners and $375 million of senior bank financing. This financial structure will enable Allegheny to emerge as a financially strong global business competitor.

Based on the current market prices of certain publicly held Allegheny securities, Japonica Partners' plan will provide these creditors with premiums ranging between 25 percent and 75 percent. The current market prices for these securities reflect in part the treatment of these securities under the terms of the debtor's latest (tenth) plan of reorganization (the stock plan).

Japonica Partners said it believes its cash offer provides a substantially greater value than the Company's competing stock plan and should allow Allegheny to be reorganized ahead of the Company's current March 31, 1990 target. Japonica Partners' financial sources are in a position to finalize on-site inspection as soon as mutually agreeable dates are determined.

Japonica Partners said it is assembling a seasoned management team, with excellent track records in the industry. It will announce this new management team within the next five to ten business days.

Japonica Partners, a New York based investment and merchant banking firm, began its formal review of Allegheny in July of last year.

ALEXANDRIA, VA (JAN. 24) PR NEWSWIRE - Technology Applications, Inc. (TAI), a professional and technical services firm, has won an $11.925 million contract from the U.S. Environmental Protection Agency Environmental Monitoring Systems Laboratory to provide analytical and technical support services to the Risk Reduction Engineering Laboratory (RREL) in Cincinnati.

The RREL provides engineering and technical support to EPA program offices in finding ways to minimize the environment and human health risks associated with the disposal and cleanup of municipal, industrial and hazardous wastes.

Some of the projects TAI chemists and laboratory technicians will support include removal of contaminants from drinking water; methods for response and remedial action for protecting personnel at hazardous waste sites (Superfund); current and novel technologies for treatment, detoxification and minimization of hazardous waste as an alternative to land disposal.

TAI has supported the EPA since 1982, first in the EPA's Environmental Research Laboratory in Athens, Ga., where TAI continues to provide chemists and other scientific support staff.

TAI has provided scientific support staff to the EPA's Cincinnati Environmental Monitoring Systems Laboratory since 1986. TAI environmental analysts are experienced in the full spectrum of EPA analytical chemistry methodology and have supported EPA in methods development and environmental research. Most recently, TAI personnel assisted in the continuing cleanup of the 1989 Exxon Valdez oil spill.

TAI provides information systems, supercomputer facilities management, C3I ILS, systems integration engineering and mission support services primarily to agencies of the Department of Defense, the National Aeronautics and Space Administration, and the Environmental Protection Agency.

TAI employs more than 800 people at 39 locations around the United States and overseas. Principal offices are in Cincinnati; in the Washington area; in Tidewater, Va.; and in Camarillo, Calif. For its last fiscal year, TAI posted revenues of $63.6 million.

ATLANTA, (JAN. 24) PR NEWSWIRE - Aaron Rents Inc. (NASDAQ: ARON), the nation's largest furniture rental and sales company, today reported an

improvement in net earnings and earnings per share for the third quarter.

For the three months ended Dec. 31, 1989 revenues were $34.6 million and net earnings were $1.2 million or $.25 per share, compared with revenues of $35.8 million and net earnings of $1.1 million or $.23 per share for the corresponding quarter last year.

For the nine months ended Dec. 31, 1989, revenues were $106.5 million and net earnings were $2.2 million, $.48 per share compared with revenues of $110.8 million, net earnings of $3.5 million and $.75 per share for the corresponding period last year.

The decrease in net earnings and earnings per share for the nine months is related to unusual charges before tax of $1.2 million or $.16 per share.

These charges, which were reflected during the second quarter were related in part to the exchange of certain rental contracts with Grantree Furniture Leasing, amounting to $613,000.

In addition, the company wrote off $400,000 of obsolete inventory at Ball Stalker, an Aaron Rents subsidiary, and established a $165,000 reserve to cover disputed tax liabilities. Had those second quarter charges not been made net earnings for the nine months would have been $3.0 million or $.64 per share.

Revenues were lower as a result of a decrease in Ball Stalker revenues. During the quarter last year Ball Stalker benefited from the completion and installation of unusually large projects. Rental revenues during the current period were $20.2 million for the quarter this year compared with $18.4 million for the corresponding quarter last year. R. Charles Loudermilk Sr., chairman and chief executive officer, said, "The increase in rental revenues confirms that the company is headed in the right direction after the operational restructuring we started one year ago."

#90024p0457 01/24/1990 ~PR Newswire

PITTSBURGH (JAN. 24) PR NEWSWIRE - Copperweld Corp. (NYSE: COS) today announced sales and income figures for the fourth quarter and full year 1989.

For the quarter ended Dec. 31, 1989, sales of $68.0 million compare to sales of $74.3 million for the fourth quarter of 1988, while net income in 1989 was $5.3 million compared to $6.1 million in 1988. Primary earnings per share in 1989's fourth quarter of $.60 compares to $.62 per share in 1988.

For the full year 1989, the corporation reported sales of $294.2 million vs. $294.3 million in 1988. Net income for 1989 of $17.6 million was below 1988 full year net income of $21.2 million primarily due to the financial restructuring costs incurred by the corporation in the second quarter of 1989, when it reached agreement with CSC Industries Inc. ("CSC") to restructure the $20 million promissory note owed to it by CSC. Primary earnings per share in 1989 were $1.85 vs. $2.13 in 1988. Excluding these second quarter restructuring costs of $6.9 million, net income and primary earnings per share year-to-date in 1989 would have been $24.5 million and $2.63, respectively, both representing increases over 1988.

Commenting on the fourth quarter results, John D. Turner, president and chief executive officer, stated, "Net sales and net income declined in the quarter from 1988's levels by 8.5 percent and 13.0 percent, respectively. The sales declines were concentrated in our tubing product lines due to slowing business conditions in the markets served by these products. In addition, a two-week work stoppage at our mechanical tubing plant in November further reduced shipments of these products in the fourth quarter."

Turner continued, "The year-to-year quarterly profit decline is virtually all concentrated within our mechanical tubing business, although modest construction-related expenses were also incurred during the 1989 quarter at our new Birmingham, Ala., structural tubing facility. The work stoppage noted above was the primary cause of the profit decline, although overall slowing market conditions for these tubing products also contributed to the reduction."

Continuing, Turner added, "Our structural tubing profits were similar between years for the fourth quarter, even on lower sales as this division continues to improve its productivity. Also, our bimetallic wire business in Fayetteville, Tenn., enjoyed increased sales and profits in the 1989 quarter compared to 1988. We expect the strength in our wire business to continue for the next several years which, coupled with the exit of a competitor from this business, has led Copperweld to begin a major capital expansion in Fayetteville, also, that was previously announced."

Regarding the full year results, Turner stated, "Sales were flat year-to-year as the higher rate achieved through the first nine months of 1989 was offset by the fourth quarter decline. Net income was 16.9 percent lower in 1989 compared to 1988.

After adding back the financial restructuring charges recorded in the second quarter of 1989, however, of $6.9 million, adjusted net income for 1989 would be $24.5 million, or 15.7 percent better than 1988, on the flat year-to-year sales. The better adjusted performance in 1989 was due to the strong performance of our wire business throughout the year, coupled with the consistent year-to-year performance in our structural tubing business.

In addition, certain unfavorable charges incurred in 1988 were not repeated in 1989. These 1988 charges related to the losses incurred in our Brazilian subsidiary, which was sold mid-year in 1988, and certain fixed asset write-downs taken in the second and third quarters of 1988.

Turner concluded by saying, "The year 1989 was another excellent year for the corporation. Sales were at the same high level as in 1988 and net profits, excluding the financial restructuring charges, exceeded 1988's net income.

"We are cautiously optimistic about our prospects for 1990 as of today; however, the economic signals continue to be mixed. The consensus is for slower growth than experienced over the last few years and, as noted above the corporation has begun to experience some softness in its tubing businesses during the second half of 1989.

"We are confident, however, that Copperweld's businesses are strategically positioned to minimize the effects of a business slowdown and take further advantage of any upswing in the economy."

#90024p0458 01/24/1990 ~PR Newswire

CALGARY (JAN. 24) PR NEWSWIRE - Shell Canada's (Toronto, Vancouver,

Montreal: SHC) 1989 consolidated earnings were $212 million or $1.89 per Class ''A'' Common Share, down from 1988 earnings of $427 million or $3.77 per share.

The 1989 return on average capital employed declined to 5.2 percent from the 1988 return of 10.1 percent. Earnings for the fourth quarter of 1989 were $34 million or 30 cents per share compared with $128 million or $1.15 per share for the corresponding period of 1988.

Earnings in 1989 were lower for all business segments compared with 1988. Chemicals earnings decreased dramatically as a result of a significant drop in world prices for styrene and polymers. Unplanned and scheduled refinery shutdowns, primarily at the Montreal East refinery, impaired the Oil Products 1989 earnings.

Resources earnings decreased, with the impact of higher crude oil prices more than offset by lower sales volumes for sulphur and reduced natural gas prices. A stronger Canadian dollar relative to the U.S. dollar reduced earnings from export sales.

Fourth-quarter 1989 results were also lower in all segments compared with the corresponding period of 1988. Chemicals fourth-quarter earnings were $9 million compared with $72 million for the same period in 1988, primarily as a result of the low world chemical prices.

Oil Products earnings were $22 million in the fourth quarter compared with $27 million for the corresponding period of 1988, mainly due to increased selling costs. Resources results were $22 million compared with fourth-quarter 1988 earnings of $38 million. The positive earnings effect of substantially higher crude oil prices and increased natural gas volumes was more than offset by lower sulphur prices and increased exploration well write-offs.

Cash flow from operations for the year was $642 million compared with $793 million for 1988, due primarily to reduced earnings.

Capital and exploration expenditures were $713 million for the year, up from $443 million for 1988. Resources spending of $520 million was concentrated on the exploration for and acquisition and development of natural gas prospects in Western Canada.

Expenditures in Oil Products comprised $92 million for marketing projects across Canada and $42 million for manufacturing projects, primarily at the Montreal East and Sarnia refineries.

Chemicals earnings for 1989 were $98 million, down from exceptional 1988 earnings of $237 million. The negative effects of lower world prices for chemicals, combined with a stronger Canadian dollar, resulted in the

downturn in Chemicals segments performance. Chemicals sales volumes were 2422 tonnes a day, down six per cent from 1988.

Oil Products results declined to $79 million from 1988 earnings of $104 million, primarily as a result of unplanned and scheduled refinery shutdowns earlier in the year. Margins were higher in 1989 but were affected by higher cost of product associated with the refinery shutdowns.

Improvements in earnings resulting from increased sales volumes and unit margins were more than offset by increased refining expenses and higher selling and general costs for retail operations, which included an underground storage tank replacement program. Petroleum product sales were 35,900 cubic metres a day, a two-percent increase compared with 1988.

#90024p0465 01/24/1990 ~PR Newswire

EAST HARTFORD, CT (JAN. 24) PR NEWSWIRE - Condor Flugdienst, an affiliate of Lufthansa German Airlines, has selected Pratt & Whitney PW4000 engines to power Condor's new fleet of Boeing 767-300ER twinjets.

Pratt & Whitney will supply six PW4000 engines, plus spares, for three 767s that Condor will begin receiving in the summer of 1991.

Condor also selected the PW4000 to power up to 20 additional 767s to be purchased from Boeing. The total value of the engines for all 20 of these aircraft would have a value of about $375 million to Pratt & Whitney.

Condor will use the 767s on its medium- and long-range international flights from Europe to the United States, Southeast Asia, and other destinations.

The transaction further strengthens the ties between Pratt & Whitney and Lufthansa, which in October accepted delivery of its first PW2000 engines for Condor's new Boeing 757 fleet. Condor will begin receiving those aircraft this spring.

Selwyn Berson, president, Pratt & Whitney Commercial Engine Business, said "We are pleased to able to continue building on the relationship we have established with Condor, and the entire Lufthansa organization.

"Condor's worldwide operations demand the highest level of performance and reliability, and that's what our engines provide," Berson said.

In September, Lufthansa Technical Services announced it had reached an

agreement with Pratt & Whitney to overhaul PW4000 engines at the Lufthansa Technical Base in Hamburg.

The PW4000, in addition to its high reliabilty, offers the best fuel efficiency of any engine in its class. Since entering service in 1987, the PW4000 has won two-thirds of the competitions to power wide-body aircraft.

Pratt & Whitney is a unit of United Technologies Corporation (NYSE: UTX) of Hartford, Conn. UTC provides a broad range of high technology products and support services to the aerospace, building systems and automotive industries.

VERNON HILLS, IL (JAN. 24) PR NEWSWIRE - Wickes Lumber Company, one of the nation's largest suppliers of building materials to contractors, repair and remodelers, and retail consumers, today announced the appointment of William A. Hensler as chairman of the board and chief executive officer and Philip M. Chrusz as president and chief operating officer. The appointments are effective immediately.

Hensler, 60, joined Wickes Lumber in 1960 as a long-range planner in the corporate treasury department. He served in positions of increasing responsibility at Wickes Lumber, including senior executive vice president; senior vice president and Merchandise Manager; senior vice president of Operations; vice president of Finance, Administration and Acquisition; and area vice president.

Chrusz, 47, comes to Wickes Lumber from Ames Department Stores, Inc., one of the nation's largest discount store chains, where he served as senior vice president, Specialty Retailing. He has also served as senior vice president Finance and AdministratRe9 and chief financial officer of the Ames-owned Zayre Department Stores. Chrusz previously spent nine years with Grossman Building Materials Company, becoming its senior vice president, Contractor Sales, Manufacturing and Operations.

Hensler received his bachelor of arts degree in Business Administration from Ferris State College in Big Rapids, Mich. He and his wife Shirley reside in Lake Barrington, Ill.

Chrusz graduated from Northeastern University, Boston, with a bachelor of science degree in Business Administration. He and his wife Dianne have three children and will be relocating to the Chicago area from South Glastonbury, Conn.

Wickes Lumber Company, with more than 6,000 employees and annual sales exceeding $1 billion, has centers in 30 states.

#90024p0489 01/24/1990 ~PR Newswire

CALGARY, ALBERTA (JAN. 25) PR NEWSWIRE - Encor Inc. (ECR) announced today its financial and operating results for the period May 2 to Dec. 31, 1989. Cash flow, before exploration expenses and proceeds from property dispositions, totalled $59.1 million or $0.39 per share for the eight month period, and $24.4 million or $0.16 per share for the quarter ended December 31. The company reported a net loss of $38.5 million or $0.25 per share for the eight month period, and $7.2 million or $0.04 per share for the quarter. Capital expenditures and exploration expenses for the eight and three month periods totalled $42.1 million and $21.9 million respectively.

For the 12 month pro forma period, net revenues of $317.5 million represented a 5 per cent increase over the same period last year. Increased liquids prices offset normal production declines and decreases in production associated with asset dispositions in western Canada. Expenses for the 1989 period of $323.1 million were down 12 percent from the corresponding period in 1988 due to a reduction in exploration, production, general and administrative expenses and non-cash expenses. Cash flow, before exploration expenses and proceeds from property dispositions, of $87.8 million or $0.58 per share represents a 12 percent increase from 1988 levels. The net loss to common shareholders amounted to $48.8 million or $0.32 per share, a 61 percent improvement over the 1988 pro forma loss of $123.6 million. The 1989 results include a $44.6 million after tax gain on property dispositions.

At year end, long term debt totalled $581.5 million, down $138.6 million from the May 2 balance of $720.1 million, due primarily to the application of proceeds from asset dispositions. In addition, the application of proceeds has resulted in a reduction and deferral of future scheduled debt repayments. The earliest contractual repayment date is Dec. 31, 1992. However, based on year end debt balances, Encore will not have any principal repayments due until Dec. 31, 1993.

As a result of a plan of arrangement effective May 2, 1989, the operations of Encor Energy Corp. Inc. and TCPL Resources Ltd. were consolidated under the new public company, Encor Inc. The financial and operating results are reported for the period May 2 to Dec. 31, 1989 and, for comparative purposes, on a pro forma basis for the 12 months ended Dec. 31, 1989 and

1988. The company's financial statements have been prepared using the successful efforts method of accounting.

#90024u0045 01/24/1990 ~United Press International

WASHINGTON (JAN. 24) UPI - Jesse Jackson told neighborhood political leaders Tuesday night he has no plans ''at this time'' to succeed Mayor Marion Barry, but stopped short of ruling out a run for the job.

''I want to preserve the city, along with a vast body of leaders who have that commitment,'' Jackson said, in his first major public address in his adopted home since Barry's arrest last Thursday on a drug charge. ''At this time I have no role to play in day-to-day government.''

Jackson, speaking at a city church to promote making the District of Columbia the nation's 51st state, likened Barry's absence from the city as he seeks treatment for alcohol abuse to a football team with a star player injured.

''A key player gets hurt. You stop, give special attention to that player, if that player seeks relief or rehabilitation, take that player off to the sidelines so that player can recover,'' said Jackson. ''But you don't forfeit the game.''

Barry has appointed Carol Thompson, the unelected city administrator, to run the city temporarily.

Jackson was later asked by reporters if he is the ''player'' to eventually be a permanent substitute for Barry.

''At this stage, the ballplayer is Ms. Thompson,'' answered Jackson.

Jackson has said that he would not seek the Democratic nomination for mayor as long as Barry is running. In addition he called ''inapproriate at this time'' any speculation that he will run if Barry does not seek a fourth term.

Jackson has been rumored as a potential candidate since moving from Chicago to Washington this summer. He has maintained he would not oppose Barry - a fellow civil rights activist in the 1960s - in a head-to-head race for the Democratic nomination.

A local television poll conducted this week showed Jackson would overwhelm the four declared Democratic candidates if he were running and the Democratic primary were held now.

The city will elect a new mayor in November, and the Democratic primary is slated for September.

Jackson sent his ''prayers for the wellbeing of the mayor and his family.''

Barry is undergoing treatment in Florida.

#90024u0114 01/24/1990 ~United Press International

AUSTIN, Texas (JAN. 24) UPI - Both crewmembers aboard an RF-4C tactical reconnaissance jet ejected seconds before it crashed in flames Tuesday next to a highway near Bergstrom Air Force Base, an Air Force spokesman said.

The pilot, Capt. Hal Goldsmith, 32, and weapons system officer, First Lt. Mike Brumley, 25, were treated Tuesday night at the base hospital but not seriously injured, said Captain Mike Young, an Air Force public affairs officer at Bergstrom.

''They were on routine training mission and were coming into Bergstorm when the accident occured,'' at 5:51 p.m. CDT, Young said.

Both were assigned to the 91st Tactical Reconniassance Squadron at Bergstrom, southeast of Austin, Young said.

Only the two crewmembers were injured, officials said.

''It's a miracle no one was injured,'' besides the crew, said Austin Police Lt. Keith Leach. ''These two guys (the crew) were lucky to get out of it.''

A police officer at the scene said pieces of the wreckage ''aren't very big,'' Leach said.

The jet crashed on a stretch of highway (U.S. 183 and Texas 71) just north of Bergstrom, Leach said.

No structures on the ground burned, but several grassfires triggered by the crash were doused by Austin firefighters, Leach said.

Young could not confirm reports from witnesses that the jet was on fire before it crashed.

Police and Air Force personnel remain at the scene, and traffic is being rerouted around the crash site.

Young said the cause of the crash is under investigation by a board of Air Force officers.

(JAN. 24) UPI - F-B-I agents questioned Robert O'Ferrell at the Enterprise, Alabama, police station for seven hours Tuesday. It was the junk store operator's second day of questioning, but authorities are NOT saying whether he's a suspect in the mail bombings that killed a federal judge and a civil rights lawyer. Agents also dug up the septic tanks at O'Ferrell's home and business. They're looking for a typewriter, once used by O'Ferrell, that could be the same machine used to write a letter claiming responsibility for the December bombings.

Jesse Jackson says he has NO plans ''at this time'' to succeed Marion Barry as mayor of Washington, D-C. But he stopped short of ruling out a run for the job in a speech to neighborhood political leaders in the nation's capital Tuesday night. The civil rights leader has said he won't seek the Democratic nomination for mayor as long as Barry is running. Barry... who faces a federal drug charge and is undergoing substance abuse treatment in Florida... has NOT said yet whether he'll seek a fourth term.

As expected, Japan's Prime Minister Kaifu dissolved the powerful lower house of parliament Wednesday... paving the way for general elections in a do-or-die test for his ruling party. Government and political sources say Kaifu would hold a special Cabinet session later Wednesday to set the election date for February 18th. Newspaper polls have shown poor popularity ratings for Kaifu and the Liberal Democratic Party.

Congressman Barney Frank says he's working on a plan that'd give the energy secretary standby authority to impose price controls on the oil industry. The Massachusetts Democrat says there was NO good reason- other than greed- for the recent sharp increases in the price of home heating

oil.

(JAN. 24) UPI - Official sources in Kashmir, India, say at least six people were killed Tuesday when the bodyguard of a U-N military observer fired on a crowd attacking a U-N vehicle. At least 50 people have died since the weekend, when Moslems in the northern states of Jammu and Kashmir began a drive to secede from mostly Hindu India.

The artist who helped design the Ewok characters for ''Return of the Jedi'' told a Canadian federal court in Calgary, Alberta, Tuesday how George Lucas once scrapped a spaceship design because it resembled one on a t-v show. The creator of the ''Star Wars'' trilogy is the target of a 128-Million-dollar lawsuit filed by Dean Preston. The Calgary writer-producer alleges the Ewoks were stolen from the script he sent to Lucas in 1978.

(JAN. 24) UPI - In a rare show of bipartisen unity, the House is poised Wednesday to override President Bush's unpopular veto of a bill shielding Chinese students from possible persecution in their homeland. Senate Democratic leader George Mitchell of Maine is pledging to move the issue before the Senate soon after the House vote. Senator Alan Simpson of Wyoming, the deputy G-O-P leader, is already predicting the outcome. In his words- ''It's just going to be a dazzler.''

President Bush will meet with reporters Wednesday morning to discuss what the White House calls ''the congressional agenda.'' The news conference apparently is timed to coincide with an expected congressional override of his veto of legislation giving Chinese students sanctuary in the United States. Earlier in the day, Bush will hold a breakfast strategy meeting with Vice President Quayle and Republican senators.

New Zealand police investigating an alleged terrorist plot to disrupt the Commonwealth Games Wednesday found two rifles in a sweep of homes at dawn in the Auckland area... just hours before the opening of the games. One man was taken into custody and will appear in court on firearm charges.

Miami Police Officer William Lozano faces up to 45 years in prison when he is sentenced Wednesday for the deaths of two black men last January. The deaths triggered three days of race riots. The sentence will be passed by the same judge who presided over Lozano's six-week trial. Wednesday's hearing also will include a request by Lozano's attorneys for a new trial.

(JAN. 24) UPI - California corrections officials say the man who spent more than six years in prison for nearly burning his son to death will be paroled sometime Wednesday. They say once 49-year-old Charles Rothenberg is out of jail, he'll be kept under 24-hour surveillence and far away from Orange County... where his ex-wife and son live. Rothenberg was convicted of setting his six-year-old son, David, afire in a Buena Park motel room in 1983. The youth, now 13, will hold a news conference Wednesday afternoon to discuss his father's parole.

A new study by the federal government says alcohol is the drug of choice among Americans. In releasing the report, Health and Human Services Secretary Sullivan said researchers have made notable advances at- quote- ''determining the factors that make individuals vulnerable to the disease of alcoholism.'' Among the study's statistics is an estimate that drinking costs the country more than 136-BILLION dollars each year.

#90024u0353 01/24/1990 ~United Press International
(JAN. 24) UPI - The Los Angeles Lakers boiled their defense down to a simple theory Tuesday night - stop Patrick Ewing and you stop the Knicks. The game plan was effective enough to hand the Knicks their worst loss of the season.

Byron Scott scored 19 points and James Worthy added 18, helping the Lakers hand New York its fourth loss in a row with a 118-97 victory over the Knicks.

Magic Johnson added 11 points, 7 rebounds and 13 assists for the Lakers, while A.C. Green contributed 13 points and 13 rebounds. But more important for Los Angeles was its defense.

The Lakers held Ewing to 12 points, only his seventh game under 20 points this season. The rest of the Knicks weren't able to pick up the slack, shooting just under 50 percent on the night.

Los Angeles ran past the Knicks 30-16 in the first quarter as Scott scored eight points. The Lakers outscored New York 22-6 in the final seven minutes of the quarter to take control.

Ewing said he ''felt like there was a swarm around me all night. It seemed like there were five guys around me at all times. I felt like I was in college again with the zone defense.''

Rod Strickland scored 16 points to lead the Knicks. Charles Oakley added

15 points and Johnny Newman 14. Mark Jackson failed to score.

New York's 16-point first quarter matched the Knicks' worst one-quarter output of the season. Their 21-point loss was worse than a 15-point setback to Boston last month.

''I'm very proud to coach these guys individually, but as a team we aren't very good,'' Stu Jackson said. ''There are a lot of reasons why. To go into them is not what I'm here for. We need to straighten these things out internally and go on from here. Fortunately, it's still midway through the year and we have time to correct some of our problems.''

The Knicks lost for only the second time in 18 home games. New York's other loss at Madison Square Garden this season came against Phoenix.

--- AROUND THE NBA ---

Elsewhere Tuesday night in the NBA, Atlanta topped Charlotte 106-101, Philadelphia routed Cleveland 103-88, Phoenix burned Miami 118-99, Detroit beat Chicago 107-95, Dallas ran past Washington 129-105, Utah pounded Houston 102-94, Golden State defeated Minnesota 109-102 and Portland crushed Milwaukee 119-90.

Hawks 106, Hornets 101

At Charlotte, N.C., Moses Malone scored 29 points and pulled down 13 rebounds to help Atlanta break a six-game losing streak. Four other Atlanta players scored in double figures, winning without leading scorer Dominque Wilkins and starting guard Doc Rivers. The Hornets were led by Armon Gilliam's 29 points.

76ers 103, Cavaliers 88

At Richfield, Ohio, Charles Barkley scored 32 points and grabbed 15 rebounds to lead Philadelphia to its fifth straight victory. Barkley also recorded 3 blocked shots, 5 steals and 7 assists. Cleveland, which lost its fourth straight game, was led by 16 points, 11 rebounds and 5 blocks by Hot Rod Williams.

Suns 118, Heat 99

At Miami, Tom Chambers scored 32 points to lead the Suns to their 10th straight victory, the longest active streak in the NBA. Phoenix has won 14 of its last 16 games and is 11-1 in January. The Suns, leading 54-52 at halftime, hit 11 of their first 14 shots of the second half to pull away.

Pistons 107, Bulls 95

At Chicago, Isiah Thomas scored 26 points to help Detroit snap the Bulls' club-record 15-game home winning streak. Joe Dumars added 16 points and Bill Laimbeer 15 for Detroit, which moved past Chicago into first place in the Central Division. Michael Jordan led the Bulls with 32 points.

Mavericks 129, Bullets 105

At Dallas, Adrian Dantley scored 24 points and the Mavericks outscored Washington 45-22 in the first quarter. Dallas forward Roy Tarpley, suspended Nov. 16 for violating his drug aftercare program, entered the game in the fourth quarter and finished with 11 points.

Jazz 102, Rockets 94

At Salt Lake City, Karl Malone scored 37 points and grabbed 18 rebounds to lead the Jazz to their seventh consecutive victory. Utah's Mark Eaton set season highs with 14 points, 15 rebounds and 5 blocked shots. Akeem Olajuwon led Houston with 20 points and 11 rebounds.

Warriors 109, Timberwolves 102

At Oakland, Calif., Mitch Richmond scored 27 points and grabbed 11 rebounds as Golden State held off a late Minnesota rally. The Timberwolves trailed by 14 points before rallying within 97-96. But the Warriors went on a 10-3 run to seal their 11th straight home victory.

Trail Blazers 119, Bucks 90

At Portland, Ore., Terry Porter and Jerome Kersey scored 19 points each to lead the Trail Blazers to their fourth straight win. Clyde Drexler added 18 points for Portland, which has won 10 of its last 11 games. Ricky Pierce scored 23 points to pace the Bucks, whose four-game winning streak was broken.

#90024u0360 01/24/1990 ~United Press International

(JAN. 24) UPI - Greg Paslawski says he's scored some bizarre goals in his NHL career, but few were as timely as his game-winner in the final seconds against Washington.

Paslawski scored with three seconds left Tuesday night to give the Winnipeg Jets a dramatic 4-3 victory over the Capitals.

The winger fired a shot from the left corner that found goaltender Don Beaupre out of position for his 10th goal of the season and a sweep of the three-game season series.

''I can't really remember how the whole thing started,'' Paslawski said. ''All I remember is that Laurie Boschman went in and poked the puck out. I turned around and saw that Beaupre was out of the net, so I just shot it.''

The victory began a four-game road trip for the Jets and snapped a two-game winning streak for Wasington, which lost for the first time in three contests under new Coach Terry Murray.

Winnipeg goaltender Stephane Beauregard, called up Monday from the minors, stopped 24 shots in his NHL debut.

Goals by Kevin Hatcher and John Tucker had enabled the Capitals to rally from a 3-1 third-period deficit.

Hatcher scored on a feed from Tucker at 5:09 of the third period to bring Washington to within 3-2. Tucker then scored on a slap shot to make it 3-3 with 13:31 left.

Winnipeg took a 3-1 advantage with consecutive power-play goals late in the second period.

With Washington's Kelly Miller and Geoff Courtnall both serving five-minute penalties, the Jets capitalized on their two-man advantage to score twice within 1:03 late in the second period.

Dale Hawerchuk scored twice for the Jets, giving him 11 goals and 10 assists in his last 15 games.

--- AROUND THE NHL ---

Elsewhere Tuesday night in the NHL, Hartford toppled the New York Islanders 4-2, New Jersey doubled up Pittsburgh 4-2, St. Louis beat Detroit 6-3, Buffalo edged Philadelphia 3-2, Boston mauled Quebec 9-2, the New York Rangers nipped Edmonton 4-3 and Vancouver and Los Angeles tied 3-3.

Whalers 4, Islanders 2

At Hartford, Conn., Dean Evason scored two goals in the first period to help the Whalers snap New York's nine-game winning streak. Scott Young and Dave Babych also scored for the Whalers. Doug Crossman and Dave Chyzowski scored for the Islanders, who had not lost a game since Dec. 30.

Devils 4, Penguins 2

At Pittsburgh, John MacLean scored two of New Jersey's three first-period goals to lead the Devils. The victory moved New Jersey into a first-place tie with the Islanders in the Patrick Division. Pittsburgh's Mario Lemieux

collected an assist to keep his point-scoring streak alive at 36 games.

Blues 6, Red Wings 3

At Detroit, Brett Hull scored his 43rd and 44th goals of the season, both on power plays, to help the Blues snap a three-game losing streak. Hull now has a league-best 17 power-play goals. The Red Wings had a six-game home winning streak broken.

Sabres 3, Flyers 2

At Philadelphia, Rick Vaive scored to break a second-period tie and helped Buffalo extend the Flyers' winless streak to 10 games. Vaive gave Buffalo a 3-2 lead with 15 seconds left in the second period when his shot from the left circle went off goaltender Ken Wregget's pads and into the net.

Bruins 9, Nordiques 2

At Quebec, Glen Wesley scored a goal and added an assist and the Bruins scored seven unanswered goals for the victory. Boston has the best record in the NHL, holding a four-point advantage over the Edmonton Oilers. Quebec has the worst record in the league at 9-32-6.

Rangers 4, Oilers 3

At Edmonton, Alberta, Normand Rochefort scored his first goal of the season to lift the Rangers. Rochefort scored at 16:36 of the third period, coming on a hard slap shot through traffic. Ulf Dahlen gained the assist on Rochefort's winner and scored two other goals for the Rangers.

Kings 3, Canucks 3

At Vancouver, British Columbia, Jay Miller and Larry Robinson each scored in the second period to rally Los Angeles into a tie. Petri Skriko, Ronnie Stern and Vladimir Krutov scored for the Canucks, who are 0-3-2 in their last five home games.

MANILA, Philippines (JAN. 24) UPI - A U.S. Air Force fighter jet based in Japan crashed in the South China Sea Wednesday while participating in a war exercise and pilot was missing, an Air Force spokeswoman said.

The F-15 eagle jet with only the pilot aboard crashed at 8:10 a.m. off the coast of Zambales province, about 50 miles northwest of Clark Air Base, spokeswoman Lt. Kim Urie said by telephone from the base.

The name of the pilot, whose fate was unknown, was being withheld pending notification of relatives, Urie said.

The cause of the crash in the South China Sea was not immediately known and the incident was being investigated, Urie said.

The F-15 from the 18th Tactical Fighter Wing based in Okinawa, Japan, had been participating in the ''Cope Thunder'' war exercise at Clark, 50 miles north of Manila, Urie said.

Aircraft from Clark and the nearby naval complex at Subic Bay were conducting rescue operations, she said.

#90024u0432 01/24/1990 ~United Press International

CHANDIGARH, India (JAN. 24) UPI - Gunmen of a rival group Wednesday shot dead a senior leader of the main faction of the militant Sikh student organization that has been a driving force behind the Sikh separatist movement in northern Punjab state, police said.

Harminder Singh Sandhu, secretary-general of the All-India Sikh Student Federation, was attacked in his home in the Sikh holy city of Amritsar, 110 miles to the northwest, said police in the state capital of Chandigarh.

Four young Sikhs arrived at the house on motorscooters about 7:20 a.m., knocked on the door and asked to speak with Sandhu, police said. Two of the men were taken to see him and while talking, pulled out revolvers and fired at close range.

Sandhu was shot in the head, face and chest, police said. The attackers fled and their victim died en route to the hospital.

Sandhu was one of the two top leaders of the most prominent faction of the student federation and police said his assassins were working on behalf of a rival group within the organization.

He was killed only nine days after the slaying in the Punjab town of Bhatinda of another prominent member of his faction, Sukwant Singh Akkanwali. Police believe Akkanwali also was slain by rivals.

Sandhu, who was preparing to leave for Bhatinda to attend a commemoration service for Akkanwali when he was shot, charged that Akkanwali was killed by members of one of a number of vigilante squads sanctioned by former

Prime Minister Rajiv Gandhi's government.

The student federation has played a leading role in the movement for the establishment in predominantly Sikh Punjab of the independent theocratic nation of ''Khalistan,'' or ''Land of the Pure.'' More than 7,000 people have died in extremist-related violence since 1983.

The student organization, at one time banned, has served as a major recruiting ground for armed extremist groups and acted as a leading proponent of charges that India's 16 million Sikhs are discriminated against by the Hindu-dominated central government.

(JAN. 24) EDITORIAL SAMPLER:

THE ORLANDO (FLA.) SENTINEL

It's always unfortunate when small children have to testify in court. It is equally unfortunate that justice is so seldom served by their pained testimony.

The latest example of this is the preposterously lengthy McMartin Preschool child molestation case in California. After 2 1/2 years of deliberations, the jury acquitted the defendants.

... Children will keep appearing on the witness stand as long as adults are accused of crimes against them. ... But the McMartin case strongly indicates that the way they and their testimony are handled badly needs re-examination. ... Little kids are too subject to suggestion when parents and psychologists question them. They're eager to say what they think the questioners want to hear. ... Indeed, one expert in the McMartin trial complained that psychologists ... planted suggestions in the preschoolers' minds from the very first interviews. ...

Parents, lawyers and psychologists all should approach the problem with more intelligence and caution - more consideration for defenseless youngsters and eventual justice.

THE NEW YORK POST

Czechoslovakia has announced that it will enforce a ban on the export of Semtex, a plastic explosive widely used by international terrorists.

This is welcome news. Semtex is a particularly valuable weapon for terrorists because it is extremely difficult to detect by conventional methods.

Semtex - manufactured by a Czech state-owned factory - is odorless, stable and malleable. Bomb makers can roll it thin enough to slip under a suitcase lining or shape it to resemble innocent objects, such as candy bars.

... It's difficult to say whether or not the ousted Czech communist regime provide Smetex directly to terrorist groups. But it freely supplied the explosive to sponsors of terrorism, such as Libya's Col. (Moammar) Gadhafi knowing that it would be passed on to terrorists.

... The most significant aspect of this decision is that it symbolizes Prague's welcome return to the civilized world - as an ally in the Western struggle against international terrorism.

The Czechs, needless to say, with their history of democratic institutions belong on this side of that battle. The nightmare years are coming to an end.

THE WILMINGTON (DEL.) NEWS JOURNAL

Debate continues about whether travelers should be told whenever a general threat, one against a specific aircraft, against a particular airline or against a designated geographic area is received.

The latest report is that the Bush administration still opposes warnings as a general rule. ''We do opposed the notification by the airlines of the public,'' a White House official was quoted as saying last week, ''but it is at the airlines' discretion.''

Putting the decision into the lap of the carrier by no means relieves government of all responsibility. The official as well as the private interest, however, carries a heavy burden in this decision-making.

Making the existence of such threats public could, as the administration argues, interfere with investigations, disrupt air traffic and encourage both hoaxes and real threats by terrorists.

On the other hand, a wrong decision might sometime result in heavy losses of life among travelers who boarded unaware that they faced more than the usual travel risk.

Whether any threat is to be considered credible, however, will be a decision all parties will have to do a lot of soul-searching and desperate worrying about no matter what federal law may prescribe.

OMAHA (NEB.) WORLD-HERALD

The U.S. Supreme Court's decision to allow states to collect sales taxes on religious books, tapes and similar items sold by television evangelists was right on the mark. The tax was not being applied to religion, as a number of religious organizations contended, but to merchandise.

In upholding the right of the state of California to tax religious goods sold to California residents by the Louisiana-based Jimmy Swaggart Ministries, the court opened the door for other states to collect similar taxes. A number of states exempt religious books and pamphlets from their taxes on counter sales ad catalog merchandising.

The revenues can be significant. In California, the state claimed that Swaggart's organization owed $183,000 in back taxes and interest for sales for $1.7 million in merchandise between 1974 and 1981.

Swaggart, backed by a number of religious organizations argued that California's position represented ''an intrusion of government into the ministry'' in violation of the First Amendment freedom of religion.

But the Supreme Court drew a careful line between curbing religious ideas, which it said would be unacceptable, and taxing religious merchandise.

The decision came down on the right side of the line.

THE MILWAUKEE SENTINEL

Not since the wheat germ craze of several decades ago, has a ''health food'' taken the country by storm the way oat bran has.

Now, alas, a study published in the New England Journal of Health and Medicine says oat bran does not lower blood cholesterol. The study says that oat bran is merely being substituted for food that is high in cholesterol.

Another study scheduled for publication in the Journal of the American Dietetic Association suggests that people on a low-fat, low-cholesterol diet don't get any added benefit from oat bran.

Diehard oat bran supporters, however, are standing by their oats.

A Northwestern University dietitian, who authored the study that triggered the switch to oat bran, says the soluble fiber in the cereal does lower cholesterol. So does Quaker Oats Co., which has an obvious financial stake

in supporting the claims for oat bran.

But oat bran is in good company in being discredited as a lifesaver. Even the famous artificial heart invented by Robert Jarvik has been recalled by the Food and Drug Administration. ...

Fortunately, anyone addicted to oat bran doesn't have to swear off and, to the extent that it reduces the desire to consume other food, it does reduce fat.

The real downer of the negative studies, of course, is the loss of the self-satisfied feeling one gets from knowing he is eating fiber.

It sort of sounds healthy and is just the kind of food grandma - who was even smarter about such things than Wilford Brimley - would have recommended for a lot of ailments.

WICHITA (KANS.) EAGLE

Kansas members of Congress shouldn't hesitate to join what's shaping up to be an overwhelming vote to override President Bush's veto of legislation to allow Chinese students to stay in this country temporarily. The veto override attempt is likely to be the first order of business before Congress when it reconvenes this week. Members should take the opportunity then to declare themselves squarely on the side of democracy in the world's most populous nation.

Bush's veto of this eminently sensible legislation is one of the more senseless actions he has taken to date. He did it in an apparent attempt to appease the aging Chinese leadership, many of whose members he had come to know during his days as U.S. envoy in Beijing. In the process, he double-crossed the valiant Chinese students who had led the democracy movement in their besieged country last spring.

#90024u0446 01/24/1990 ~United Press International

(JAN. 24) EDITORIAL SAMPLER:

THE IDAHO STATESMAN, BOISE

President Bush promised no new taxes, but he didn't say anything about increases in old taxes. And sure enough, one of our old standbys, the Social Security payroll tax, took a two-part jump Jan. 1.

That's not the worst of it, though. The worst of it is that the tax went up not to meet a direct, above-board obligation, but rather to serve as a indirect, subterranean means of hiding our horrendous federal deficit.

This is dishonorable and deceptive.

(New York) Democratic Sen. Patrick Moynihan, who enjoys support in both parties, particularly their conservative wings, is pushing for an immediate rollback.

He says it's time to stop ''leakage of reality from American life.'' To that, we might add stopping pointless leakage of money from wage-earner pockets.

But we'd prefer to see an alternate resolution: retention of the first part of the increase for the legitimate purpose to which it was originally intended and repeal of the second part. The main champion of this approach based on separation of Social Security from the general budget, is Republican Sen. John Heinz (R.-Pa). ....

THE SAN DIEGO UNION

A plea from the Medellin drug merchants for a negotiated settlement with the Colombian government suggests that progress is at last being made in the international war against cocaine traffickers. Accordingly, the United States and the Andean countries should keep the pressure on. This is no time for compromise with the narcotraficantes.

Last week the powerful Medellin cartel issued an 11-point communique announcing its intentions to lay down its arms, halt shipments of drugs and suspend its terror campaign of bombings, kidnappings and killings, in exchange for leniency from the government. In particular, the cocaine barons want assurances they won't be extradited to the United States to stand trial.

... There is even less reason now for the Colombian government to negotiate with the cocaine kingpins. It is premature to announce the end of Colombia's drug war, but the reality is that the vigorous campaign against narcotics dealing is making progress. this is not the time to slacken off or make deals.

THE TEMPE (ARIZ.) DAILY NEWS

A long-held tenet of American justice is that those accused of crimes have the right to confront witnesses against them. They have the right to cross-examine their accusers, to have the accuser and the accused lock gazes, and one points out the other as the culprit.

Up until now, that tenet has meant that the defendant and witness shall be in the same room.

Now we are being asked this question: Does it also mean that adults

accused of sexually abusing children must be able to sit across the courtroom and fix steely gray eyes on a 6-year-old kid who is being asked if Daddy touched him in a bad place?

The Supreme Court will decide if children would be allowed to testify behind a screen, possibly in a nearby room with the discussion televised by short-circuit monitors.

This is not by any stretch a simple or easy conflict of rights or logic. But more truth probably would come out if young children are not scared out of their wits on a witness stand.

THE DENVER POST

If ever there was a case that proves the incredible addictive power of crack cocaine, it's Mayor Marion Barry of Washington.

Barry, who was arrested last week after being videotaped while smoking crack in an FBI sting operation, most likely has destroyed his political career.

It's not as though Barry didn't have any warning. For several years, stories about his purported illegal drug use have appeared in magazines, newspapers and on television. Barry has denied the allegations all along, even after a friend testified in federal court that he had provided cocaine for the mayor.

But despite the obvious danger, Barry couldn't ''just say no,'' as the leaders of the drug war would have liked him to.

If someone with as much at stake as the mayor of Washington, D.C., can't say no, how can we expect anyone else to resist the drug's temptation after they've been hooked?

That is the challenge for President Bush and his drug war lieutenants. They cannot and should not rely on anyone's will power. ...

The only way to win the drug war is to attack it as the medical and smuggling problem it is. Perhaps Barry's arrest will convince the leaders of the drug war of that obvious necessity.

(JAN. 24) UPI - TV HIGHLIGHTS:

THURSDAY, JANUARY 25

6:30 p.m.
PBS, ''Nightly Business Report.''

7 p.m.
(Note: In some regions, news is broadcast at 6 or 6:30 p.m. Check with local affiliates for details.)
ABC, ''ABC World News Tonight with Peter Jennings.''
CBS, ''CBS Evening News with Dan Rather.''
NBC, ''NBC Nightly News with Tom Brokaw.''

8 p.m.
ABC, ''Father Dowling Mysteries.''
CBS, ''48 Hours'' - A fascinating backstage, off-stage and on-stage look at music legend Paul McCartney, featuring candid interviews with McCartney and exclusive concert footage. Special 90-minute presentation.
NBC, ''The Cosby Show.''
PBS, ''Mystery!: 'Poirot: Murder in the Mews''' - Poirot is asked to assist in the investigation of the apparent suicide of a young woman found shot in her London home.

8:30 p.m.
NBC, ''A Different World.''

9 p.m.
ABC, ''The Young Riders.''
NBC, ''Cheers.''

9:30 p.m.
CBS, ''The Dave Thomas Show'' - Dave Thomas, comedian and writer of ''SCTV Network'' and one-half of the legendary McKenzie Brothers act, hosts this special, with guests Martin Short and Chevy Chase.
NBC, ''Grand.''

10 p.m.
ABC, ''Primetime Live.''
CBS, ''Knots Landing.''
NBC, ''L.A. Law.''

11:30 p.m.
ABC, ''ABC News Nightline.''
CBS, ''The Pat Sajak Show.''
NBC, ''The Tonight Show Starring Johnny Carson.''

12:30 a.m.
CBS, ''Night Heat'' - The seemingly motiveless killing of a resident of a senior citizens' home leads O'Brien and Giambone to a drug smuggling ring that uses the elderly as couriers.
NBC, ''Late Night with David Letterman.''

1:30 a.m.
CBS, ''Nightwatch.''
NBC, ''Later with Bob Costas.''
PBS, ''Today's Japan.''

FRANKFURT, West Germany (JAN. 24) UPI - The pilot of a Libyan airliner refused to fly out of Frankfurt airport Wednesday without three crew members who were arrested for allegedly carrying unlicensed weapons, West German officials said.

Frankfurt airport officials said the Libyan Arab Airlines Boeing 727 would be cleared for takeoff later Wednesday, but there was no indication the pilot would depart.

On arrival from Tripoli Tuesday, the plane was surrounded by police and searched, a West German interior ministry spokesman said.

Three crew members, believed to be Libyan security officials, were carrying unlicensed weapons but the spokesman did not say what type of arms were found and confiscated.

The three crew members were taken into police custody, prompting the pilot to declare he would not take off without them, said a state prosecutor's office spokesman in Frankfurt.

Meanwhile, the interior ministry denied a report by the Libyan news agency JANA that claimed West German security officials had mistreated several passengers while searching the plane. The ministry said the search had been carried out without incident.

(JAN. 24) UPI - Heavy fog already responsible for a series of fatal highway pileups kept driving treacherous in California's San Joaquin Valley Wednesday while thunderstorms moved into the Southwest and rain hit the East Coast.

The pea soup fog reappeared after triggering several chain-reaction collisions among at least 20 vehicles Tuesday in which five people were burned to death in a fire fed by propane gas tanks that burst open.

The fog settled in the southern end of the valley Wednesday morning and the California Highway Patrol urged drivers to move with extreme caution.

Most other parts of California enjoyed generally fair weather.

Thunderstorms soaked southern Louisiana Wednesday as a cool front stalled over north Texas, producing light rain along the frontal boundary, the National Weather Service said.

Temperatures rose above average in Texas, Arkansas, Louisiana, Oklahoma, and New Mexico, and fog formed along the Texas-Louisiana Gulf Coast, dropping the visibility to a quarter-mile or less.

The weather service said Oklahoma and parts of Arkansas and north Texas would be the first to feel the effects of a new cold front that would send temperatures dropping rapidly.

Snow tapered off in the Midwest Wednesday after parts of Wisconsin recorded up to 6 inches accumulation. Temperatures were warmer in Illinois and in Michigan, which got a dose of rain. Across Missouri, skies were clear and temperatures were above normal in the 30s and 40s.

A low-pressure system pushed clouds into much of the South and caused some light rain in Alabama and Mississippi. Temperatures were on the mild side, ranging from early morning readings of 46 in Jacksonville, Fla., 54 in Atlanta and 71 in Miami.

Rain mixed with sleet in Pennsylvania, where temperatures ranged in the upper 20s and 30s. Most of West Virginia was cloudy with showers in some areas. The lows were from about 35 to 45. Maryland, Delaware and southern New Jersey saw cloudy skies and some sprinkles.

A high-pressure system along the eastern seaboard moved offshore early Wednesday as clouds moved into New England. Light snow fell on Boston, where the temperature hovered around freezing.

Skies were overcast throughout the rest of New England, with temperatures ranging from the mid 30s in parts of Vermont to about 10 degrees in northern Maine.

Snow moved into southern New Hampshire during the early morning and spread through most of the state. Heavy wet snow fell over much of Vermont, dumping between 1 and 4 inches of snow on roadways and making travel hazardous.

#90024u0483 01/24/1990 ~United Press International

MANILA, Philippines (JAN. 24) UPI - North Korea agreed to provide arms to communist guerrillas in exchange for information on U.S. military facilities in the Philippines, according to rebel documents released

Wednesday by the Philippine military.

The documents were captured during the raid Oct. 4 in suburban San Juan town that led to the capture of Wilma Tiamzon, a member of the politburo of the outlawed Communist Party of the Philippines, a military statement said.

Tiamzon escaped from a military camp during a Christmas mass.

The military statement did not say if the Koreans had actually shipped arms to the Philippine communists' armed wing, the 19,000-strong New People's Army, which has been battling the Manila government for two decades.

Senior Communist Party officials, led by chairman Jose Maria Sison, went to North Korea in September 1986 and May 1987 for talks with leaders in the Korean Workers Party, the statement said.

Following the second meeting, the Korean party agreed to the Filipinos' request for weapons, the statement said.

In return, the Philippine rebels said they would ''provide information about the Americans and their bases in the country,'' the military statement said.

The Philippines hosts six U.S. military facilities, including the sprawling Clark Air Base and Subic Bay Naval complex.

It was the first time the military revealed the guerrillas were seeking weapons from a communist country, although officials have been reporting exiled rebel leaders were raising funds for the movement in Europe and elsewhere.

#90024u0513 01/24/1990 ~United Press International

MOSCOW (JAN. 24) UPI - The Soviet army, ignoring an Azerbaijani ultimatum to leave or face secession steps, won control of most of the volatile border with Iran Wednesday, choking off a weapons conduit for Azerbaijani fighters, the Soviet media said.

But militant Azerbaijanis, vowing to drive the Soviet army back into Russia, blockaded Soviet naval vessels in Baku harbor on the Caspian Sea as well as all naval facilities along the the coast of the inland sea.

The Soviet troops stormed into Baku Saturday to quash the worst ethnic violence in a two-year dispute between Moslem Azerbaijanis and Christian Armenians over the enclave of Nagorno-Karabakh. The conflict has claimed

more than 300 lives.

With local newspapers not publishing, in part because of a general strike, information was so scanty that even the correspondent of Radio Moscow complained of the dearth of reliable facts coming from the area.

But the radio said the Soviet army, which swung south Tuesday toward the secessionist province of Nakichevan on the Iranian border, had taken control of most of the 500-mile frontier with Iran ''in the last 24 hours.''

Azerbaijanis, using wireclippers and sledgehammers, overran and destroyed the border over New Year's, and since then used it to bring weapons across including armored personnel carriers, according to one source.

The well-connected source in Moscow, who asked his name not be used, said: ''The Azerbaijanis have every type of armored personnel carrier possible - all from the Iran-Iraq war.''

The official Tass news agency also indicated Soviet troops had regained control of the frontier.

''Militants issue threats to border guards that have taken parts of the border under control to prevent new violence,'' Tass said.

Tass reported a mounting casualty toll in the battle for Baku. It said 93 people have died and 715 were wounded since the Red Army stormed the Azerbaijani capital Saturday in an attempt to end pogroms against Christian Armenians and stop insurrection against Soviet power.

Tass said the dead included 75 civilians. The rest were soldiers or members of their families, it said, adding 639 civilians were among the wounded. Tass also reported three people were killed in an ambush on an army convoy late Monday, but no other breakdown of the casualties was reported.

In an atmosphere where passions seethed, it was difficult to distinguish rhetoric from truth. Western reporters have not been permitted into the area.

In the last two days, Tass bannered two dispatches with the headline: ''Rumors are rife in Baku.''

Soviet television has called the crisis - the most violent, most serious and protracted that Gorbachev has faced in his nearly five years in office - the country's ''most trying days since World War II.''

The 2-year-old dispute between Moslem Azerbaijanis and Christian Armenians

over Nagorno-Karabakh, the predominantly Armenian enclave in Azerbaijan, has claimed more than 300 lives, including at least 150 since Azerbaijani nationalists called for renewed pogroms 10 days ago.

Members of the Azerbaijani Popular Front threatened Monday to go underground, implying a guerrilla war or illegal struggle, while the Azerbaijani legislature issued an ultimatum for the army to pull out Wednesday or it would begin to consider secession.

No Soviet republic has ever seceded despite its constitutional right to do so. One deterrent always has been fear of a Red Army invasion to undo any political separation.

Heavy fighting erupted Tuesday around the key Salyansky barracks, Soviet television said. Telephone calls to Baku confirmed the battle but differed on who was fighting whom in the confused situation in the Caspian Sea capital of 1.8 million.

Soviet television said Azerbaijani militants armed with automatic weapons were firing on Soviet defenders of the barracks, a scene of recurrent gunfire since the invasion.

But Leila Unusova, a member of the Popular Front, told United Press International by telephone that Soviet soldiers were battling their comrades who had refused to fire on Azerbaijanis.

A general strike immobilized Baku Tuesday, and the Azerbaijani Popular Front vowed to continue the work stoppage and a civil disobedience campaign until the Soviet force of 24,000 regular army and Interior Ministry troops and sailors leave.

''All enterprises are not working today,'' Tass said. ''Except for the metro, city transport is not moving. All print shop workers and editorial staffers are on strike.''

There were no detailed reports from secessionist territory of Nakhichevan on the Iranian border, but Radio Moscow said Soviet soldiers were bringing the situation on the Iranian border near the province under control.

The army oversaw talks Tuesday between Armenian and Azerbaijani state and Communist Party leaders in Yersakh on the border between Armenia and Nakhichevan province.

Gen. Mikhail Surkov, head of the political department of the Yerevan garrison in Armenia, said it was too early to expect major achievements in the talks, which began Monday.

Other army commanders have brought together Armenian and Azerbaijani

military commanders in a mediation role in other areas of what has become for all purposes a war zone.

#90024u0532 01/24/1990 ~United Press International

TAMPA, FL (JAN. 24) UPI - A woman who feared she would lose her two children in a divorce strangled the toddlers in their beds, then tried to kill herself by slashing her wrists, authorities said Wednesday.

Dorothy Dianne Rose called her husband's parents early Tuesday and told them Jessica, 1, and Michael, 2, were dead and that she was going to kill herself, Hillsborough County sheriff's deputies said.

The in-laws went to the house and found their grandchildren dead and Rose bleeding from knife wounds, said sheriff's spokesman Jack Espinosa.

Deputies charged Rose, 31, with two counts of first-degree murder Tuesday night as she lay in bed at St. Joseph's Hospital. She was in guarded condition with slashed wrists and a deep stab wound to her chest.

Dianne and Michael Rose, 32, had been embroiled in a bitter fight since he left her for another woman in July, court records show.

Michael Rose, a mail sorter at the Tampa Airport post office, left his family because his wife was causing him ''depression,'' he said in court documents.

His girlfriend complained to sheriff's deputies that Dianne Rose made

harassing telephone calls and even confronted her at work. The wife in turn said Bonnie McNabb, 44, shoved her against a fence during an argument.

Dianne Rose filed for divorce in November 1989, citing her husband's relationship with McNabb and his threats to take the children away.

He responded by calling her an unfit parent.

''The wife is a habitual liar with wild mood swings to the point of violence and suffers from psychopathy,'' divorce documents he filed said. ''The husband is concerned with the physical and mental well-being of the children if left with the wife.''

Monday night, Michael Rose visited with a legal document that would give him custody of the children and give her the house, said Nancy Litwa a victim's assistance caseworker at the Hillsborough County State Attorney's Office.

Dianne Rose apparently signed the document under duress, Litwa said.

Neighbor Eula Stevenson said that Dianne Rose stopped by to see her afterward. Rose had bitten her fingernails to the quick and starved herself down to less than 80 pounds in the past few months.

Rose's suicide attempt didn't shock her, Stevenson said, but the children's deaths did.

''She worshiped her kids,'' Stevenson said.

#90024u0635 01/24/1990 ~United Press International

BANGKOK, Thailand (JAN. 24) UPI - The Khmer Rouge, defying U.N. and Thai authorities, moved more than 4,000 Cambodian refugees, including the sick, elderly and handicapped, to a secret jungle camp without adequate food, a senior U.N. official said Wednesday.

Patrick van de Velde, the deputy director of U.N. Border Relief Operation, said the Khmer Rouge camp leadership has forced all but about 200 of the 4,400 residents of the U.N.-assisted refugee camp at Borai to move.

''Those moving included a large number of children, pregnant women, sick, elderly and handicapped,'' van de Velde said in a statement issued by the UNBRO office in Bangkok.

Meanwhile, Prince Norodom Sihanouk said in Beijing Wednesday he has resigned as a resistance leader because of attacks by ''certain governments of the free world'' and the foreign press labeling him as an

''accomplice'' of the Khmer Rouge and holding him responsible for the stalemate in peace negotiations.

''As it is useless for me to fight against this hostility, I hereby resign as leader of the Cambodian national resistance,'' a statement from Sihanouk said.

''As of today, I will no longer meet with the press, diplomats, or political figures, with the exception of my friends from the People's Republic of China and (North) Korea,'' Sihanouk said.

Sihanouk said he has not resigned what he called his position as legitimate president of Cambodia and that he will retain the title ''until Cambodia is liberated from Vietnam clutches and colonialists, and the Cambodian people can organize their own elections.''

The volatile resistance leader has resigned on several previous occasions. In November, Sihanouk publicly accepted a proposal that the United Nations assume interim administration of Cambodia until the country holds elections.

In Bangkok, refugee sources said they feared the forced exodus of the refugees, reminiscent of the Khmer Rouge evacuation of Cambodian cities in 1975, is only the beginning of such movements as the Khmer Rouge send more people from camps in Thailand into newly captured areas of Cambodia.

Nearly 100,000 Cambodians along the border are believed to be vulnerable to such evacuations, most of them in ''hidden camps'' cut off from international assistance.

Van de Velde, who visited the Borai camp - about 140 miles southeast of Bangkok - Wednesday, said U.N. and Thai authorities at the camp asked the Khmer leader to give people the choice of moving to a nearby U.N.-assisted camp called Site K.

However, ''the camp was moved in a hurried fashion by the Khmer leadership'' to the secret location, van de Velde said. He said a camp leader earlier admitted that food was scarce at the secret camp and that health conditions were poor.

Other relief agency sources said the new Khmer Rouge camp was inside Cambodia where Khmer Rouge guerrillas have recently scored battlefield successes against troops of the Vietnamese-backed government.

''We regret that despite our efforts and the support of the (Thai) Displaced Persons Protection Unit whose assistance has been much appreciated, the concerned Khmer leadership has decided to ignore the wishes of some of the people under their control and have apparently

denied them access to basic humanitarian assistance,'' Van de Velde said.

UNBRO assists nearly 300,000 Cambodians in camps inside Thailand.

Most of the refugees fled into Thailand following the 1978 Vietnamese invasion that toppled the Khmer Rouge government.

That government is blamed for the deaths of an estimated 1 million people from execution, illness and starvation during its radical rule from 1975 to 1979.

#90024u0671 01/24/1990 ~United Press International

LONDON (JAN. 24) UPI - Nicolae and Elena Ceausescu scoffed when a military tribunal sentenced them to death and even as they faced their executioners believed state security police would rescue them at the last minute, their lawyer said in a published report Wednesday.

Nicu Teodorescu, in an interview printed in The Times newspaper, said he tried to prevent the Christmas Day execution of the former Romanian leader and his wife by advising them to plead mental instability to charges of corruption, embezzlement and the murder of 65,000 people.

''When I suggested it, Elena in particular said it was an outrageous set-up,'' said Teodorescu, who was hastily summoned to a military barracks to conduct the Ceausescus' defense. ''They felt deeply insulted, unable or unwilling to grasp their only lifeline. They rejected my help after that.''

Teodorescu, one of Bucharest's most prominent lawyers, told The Times that Ceausescu showed ''absolutely nothing but contempt'' when the tribunal delivered its verdict of death, telling the prosecutor, '''When this is all over, I'll have you put on trial.' We all laughed.''

About 15 minutes after sentencing, soldiers frog-marched the couple out of the barracks and into a yard, he said. The Ceausescus believed they were being taken to a cell but instead were hastily gunned down by a rabble of soldiers, and not an organized firing squad, he said.

''The first they knew they were about to die was when the bullets hit them '' stated Teodorescu, who said he was about 90 feet from the site. ''Elena and Nicolae fell head to head. As they fell their bodies spun slightly around and they fell close to each other, about 30 centimeters apart.''

His account differed from that of film shown on state-run television, which showed the blood-splattered couple propped up against a wall. The newspaper said it was possible the bodies were moved for the benefit of the camera.

''Ceausescu was convinced all along his Securitate (secret police) would rescue him,'' Teodorescu was quoted as saying. ''I always thought that Elena was the dominant force in the partnership, but I soon came to realize Nicolae was in command. They complemented each other perfectly, like a monster with two heads.''

The lawyer said he agreed to defend the Ceausescus because ''it seemed an interesting challenge.'' The tribunal comprised three civilians, five judges and assessors, two prosecutors, two defense lawyers and a cameraman

reported Teodorescu, the only member to give a public account.

''When I saw (the Ceausescus) dead, as a lawyer I didn't feel anything at all,'' he said. ''But as a citizen, I, like everybody, rejoiced. It was the most beautiful Christmas in my whole life.''

Teoderescu sustained a bullet wound in a firefight between soldiers and Securitate members as he returned to Bucharest, some 80 miles from the execution site. His 19-year-old son died during the revolt.

#90024u0699 01/24/1990 ~United Press International

DETROIT (JAN. 24) UPI - A 74-year-old widow who uses a walker was evicted Tuesday from the home where she has lived for 25 years for defaulting on her government loan.

Mable Roper said she had no idea she was about to be evicted and claimed she was not behind on her mortgage payments.

''All my stuff is scattered everywhere,'' she said as her belongings were carted out of the brick bungalow and dumped on the curb.

While several neighbors consoled her, Roper rummaged unsuccessfully for papers she said proved she has been meeting her mortgage payments of $171 a month.

''This is the most ridiculous thing I've ever seen or heard,'' she said. ''I paid on the house yesterday, and I have only two more payments to be made.''

But Robert Chatham of Security Bank and Trust in Southgate, the servicing agency for the U.S. Department of Housing and Urban Development loan on Roper's home, said the payments hadn't been made since February 1987.

Chatham said bank officials had visited Roper and made several unsuccessful attempts to renegotiate the loan. Roper's one-year statutory period to renegotiate her loan expired in October 1988 and she was warned at that time that foreclosure proceedings were under way and she would be evicted, he said.

''Basically, eviction was our last option. We tried everything,'' Chatham said.

Roper disagrees.

''I know that's a lie and I've got papers to prove that,'' she told the Detroit News. ''I had paid and I know I had paid. They're full of baloney.

Do you think they'd let me live there for three years and not pay?''

Roper, who said she lives on about $400 a month in Social Security payments and a monthly pension of $84.70, conceded she had fallen behind in her payments because she had accumulated a lot of medical bills.

''Who would do this to a 74-year-old woman?'' asked one neighbor, Grace Burns. ''This is the worst thing.''

Another neighbor, Ellis Johnson, took Roper's belongings into his home for safekeeping.

#90024u0700 01/24/1990 ~United Press International

SIDON, Lebanon (JAN. 24) UPI - New fighting broke out Wednesday between rival Shiite militias seeking control of the Tufah region in southern Lebanon, security sources said.

One person was killed as the Syrian-backed Amal movement and the pro-Iranian Hezbollah exchanged rocket and heavy artillery fire in the region east of the port city of Sidon, 24 miles south of Beirut.

It was the worst confrontation since a cease-fire mediated by Syria and Iran took effect early this month. Iran's Deputy Foreign Minister Mohammed Ali Besharati has shuttled between Damascus and Beirut but been unable to stop the combat.

Witnesses said a number of families fled the village of Jebaa and arrived in Sidon early Wednesday. ''We spent a terrible night,'' said one of the escapees. He said many houses in Jebaa were set afire.

Sources said both Amal and Hezbollah, or Party of God, were bringing reinforcements to the area. Some 170 gunmen from Moslem and Christian militias supporting Amal were deployed in strategic positions, the sources said.

At least 89 people have been killed and 308 others wounded since the fighting began Dec. 23.

The deployment of about 700 Palestinian guerrillas in certain parts of the strategic district has checked the advance there of Hezbollah, which gained the upper hand in the month-old fighting.

Hezbollah is fighting for its return to southern Lebanon under an accord worked out in Syria early last year. The accord stipulated the establishment of a joint ''operations room'' to coordinate guerrilla attacks against Israel.

But the provisions of the accord have never been materialized. Hezbollah accused Amal of obstructing its open-ended guerrilla warfare against Israel.

#90024u0703 01/24/1990 ~United Press International

(JAN. 24) UPI - Stock prices plummeted in thin trading on the Tokyo Stock Exchange Wednesday in reaction to uncertainties at home and abroad.

The Nikkei Average of 225 selected issues ended a three-day gaining streak with a loss of 599.04 points to 36,778.98, falling below the 37,000-level again.

The broader-based Tokyo Stock Exchange index of all listed major sharestumbled 34.72 points to 2,705.46.

An estimated 550 million shares changed hands, compared with 533 million shares Tuesday.

Declines pounded advances 741 to 230, while 154 issues remained unchanged.

On the trading floor, Dowa Mining paced the actives followed by Sharp Electronics, Sumitomo Mining, Minebea and Hitachi.

Elsewhere in Asia, stocks closed slightly lower in lackluster trading on the Hong Kong Stock Exchange.

The Hang Seng Index, which lost 9.20 points on Tuesday, slipped 6.06 points to 2,756.39. Utilities rose 10.37 points, financials lost 14.15, industrials edged up 3.35 and properties dropped 39.28 points.

Volume amounted to around 442 million shares compared with 432 million shares changing hands Tuesday.

Stocks closed lower across the board in moderately active trading on the Singapore Stock Exchange as profit-taking set in throughout the day.

The Straits Times Industrial Index, which lost 14.68 points on Tuesday, fell25.48 points to 1495.25. The narrower All Singapore Index dropped 6.53 points to 413.64.

Volume amounted to around 111 million shares compared with 102 million shares changing hands Tuesday.

In Australia, the sudden drop in Tokyo sent stocks slightly lower in active trading on the Sydney Sharemarket.

The All Ordinaries Index, which lost 7.5 points on Tuesday, eased 3.6 points to 1661.2. The All Resources Index fell 5.4 points to 928.9 and the All Industrials Index dipped 1.2 points to 2624.4.

A firmer gold price had only a marginal impact on gold shares, as the Gold Index added 5.1 points to 1775.5.

Turnover amounted to around 123.7 million shares.

-30- 2202

#90024u0708 01/24/1990 ~United Press International

(JAN. 24) UPI - The 101st Congress has opened its election-year session... poised to hand President Bush a resounding defeat today on his administration's China policy.

The House is scheduled to vote today whether to override Bush's veto of the bill to extend the visas of more than 33-thousand Chinese students. The students fear they will suffer persecution if they return home in the wake of last year's brutal crackdown on students in Beijing.

Bill supporters are confident they can muster the bipartisan support for the two-thirds vote necessary to pass the bill over the president's objections.

Congress also is at odds with Bush over the clear air bill. Senate Democratic leader George Mitchell of Maine yesterday called for passage of the measure, which the White House considers too costly for American business.

The lawmakers have been away from the Capitol since November, when the first session of the 101st Congress ended. The new session is expected to end in October, in time for the members to go home for their re-election campaigns.

Many observers feel the 1990 session has potential for major accomplishments as well as bitter political battles over Social Security and other issues.

President Bush is preparing to steal the thunder from the House vote to override his veto of a bill offering sanctuary to Chinese students.

The White House says Bush will hold a session with reporters to discuss ''the congressional agenda.'' The news conference follows a breakfast strategy meeting with Vice President Quayle and Republican senators.

Bush's remarks also clearly are timed to coincide with an expected

congressional override of his veto of legislation giving Chinese students sanctuary after China's brutal crackdown on the student-led reform movement.

Yesterday in Kansas City, Missouri, Bush said he's eager to discuss the election-year session. His opening statement is expected to center on his recent campaign to press his ''unfinished agenda'' on a reluctant Congress.

Bush also sought to defuse any animosity with Capitol Hill. Said Bush... ''Just because somebody says something unpleasant about the president doesn't mean he's NOT going to continue to reach out in a spirit of good will.''

Plenty has happened in the world since Congress ended its 1989 session in November. A flurry of democratic change swept Eastern Europe, prompting calls for a reduced Pentagon budget... the United States invaded Panama... and Bush's popularity soared.

#90024u0718 01/24/1990 ~United Press International

(JAN. 24) UPI - California prison authorities are releasing a man today who set his six-year-old son on fire seven years ago.

The prospect of his father's parole is giving nightmares to David Rothenberg... who's now 13 years old and living with his mother and step-father in Orange County.

Charles Rothenberg was convicted of pouring kerosene over his sleeping son and lighting him on fire... then going accross the street to watch as other people rescued the boy from the burning motel room.

The boy has undergone more than 100 painful skin grafts and had other reconstructive surgery to repair the damage from burns over 90 percent of his body.

Prison officials stress that Charles Rothenberg will be under the strictest parole guidelines possible and will NOT be allowed near his son's home. David Rothenberg has scheduled a news conference to discuss his fears.

Members of Japan's lower house of parliament cheered ''Banzai'' today as the speaker formally dissolved the house to prepare for next month's election.

Prime Minister Toshiki Kaifu... under pressure because of low popularity ratings... presided over the the dissolution and set new elections for February 18th.

For the first time in Japan's parliamentary history... Kaifu was forced to abandon plans to deliver a policy speech before dissolving the chamber under pressure from party leaders.

Leaders of the ruling Liberal Democratic Party chose Kaifu as a compromise candidate in August after his two predecessors stepped down in less than three months to take the blame for bribery and sex scandals.

Despite the low poll ratings... major business organizations are vowing to provide financial support for the pro-Western party's victory.

NEW YORK (JAN. 24) UPI - Bristol-Myers Squibb Co., the recently merged pharmaceutical company, said Wednesday it lost $353 million in the fourth quarter, compared with earnings of $293 million, or 56 cents a share, in the same period a year earlier.

Sales in the quarter ended Dec. 31 amounted to $2.36 billion, or 10 percent above the $2.14 billion in the final period of 1988.

Earlier this month, the company announced a $740 million pre-tax fourth-qaurter charge in connection with plans to integrate the operations of Bristol-Myers and Squibb on a global basis. The charge included the costs of layoffs and certain production facility closures.

An additional $115 million charge was taken in the quarter for costs related to the $12.5 billion merger of the two companies.

For all of 1989, Bristol-Myers Squibb said it earned $747 million, or $1.43 a share, down 40 percent from $1.25 billion, or $2.39 a share, in 1988.

Sales for the year increased 7 percent to $9.2 billion, compared with $8.6 billion a year earlier.

#90024u0865 01/24/1990 ~United Press International

MIAMI (JAN. 24) UPI - Federal prosecutors asked a judge to adopt strict secrecy rules for classified documents in the Manuel Noriega drug trafficking case, including fingerprinting and security checks of all the attorneys.

The request came Tuesday, two weeks after government lawyers tangled in court with a Noriega co-defendant's attorney who sought classified information about a U.S. electronic eavesdropping facility in Panama City.

That incident, coupled with the proposed security guidelines, triggered defense criticism that Noriega may end up being tried behind closed doors.

''This is the price you pay when you indict a man who, as a head of state, was working with the CIA,'' said assistant federal public defender Kenneth Swartz, who represents Luis del Cid, one of the co-defendants in the case.

''You have to expect these secrets will come out. It's just a part of the fair trial system and the government doesn't want that to happen.''

Diane Cossin, spokeswoman for U.S. Attorney Dexter Lehtinen, said the government's request was made ''in compliance with federal law.'' Asked if the procedure might impinge upon a public trial, she declined comment.

Attorneys for both sides will be given the chance to debate the proposed guidelines before U.S. District Judge William Hoeveler. No hearing date has been set.

The proposed secrecy order was filed under the Classified Information Procedures Act. It would apply ''to all pretrial, trial, post-trial and appellate matters concerning this case,'' the government motion said.

If approved, defense attorneys would have to follow the guidelines in order to inspect secret documents that could help their clients.

Last November, the government's refusal to produce secret documents resulted in the dismissal of charges against Iran-Contra defendant Joseph Fernandez, a former CIA official.

Last Friday, Noriega's attorney won a court order directing the government to preserve any of Noriega's papers found in Panama. Late Monday, they submitted a list of locations where they believe crucial documents might be found. They included Noriega's homes in Panama City and Rio Hato, as well as Fort Amador, a military base used by U.S. and Panamanian forces.

It was unknown if the government intends to classify those papers as well.

''They can file a motion for a protective order stopping us from

disclosing it to you guys (the news media),'' said David Lewis, a New York attorney and documents specialist hired by Noriega lawyers Steven Kollin and Frank Rubino. ''But it is the government's obligation to turn those materials over.''

The protective order demands that all prosecution and defense lawyers handling sensitive documents undergo a security clearance. Attorneys are also being asked to sign two separate agreements saying they would not disclose secret information.

Documents labeled Confidential, Secret, Top Secret or Sensitive Compartmented Information would fall under the guidelines, as well as materials ranging from graphs and drafts to tapes, word-processor discs and typewriter ribbons.

Also Tuesday, attorney Samuel Burstyn asked Hoeveler to transfer del Cid to the courthouse basement complex that holds Noriega.

Burstyn said del Cid's present quarters, a 3-by-9-foot cell in the Metropolitan Correction Center, constituted abusive and inhumane treatment. He said del Cid had been denied telephone contact with his lawyers, as well as legal facilities that are available to other inmates.

Burstyn said del Cid's treatment resulted from false claims that del Cid headed Noriega's intelligence service and was prepared to battle invading U.S. military forces. Burstyn said neither was true.

#90024u0874 01/24/1990 ~United Press International
TAIPEI, TAIWAN (JAN. 24) UPI - Premier Lee Huan Wednesday ruled out opening direct trade or investment with China, following reports that plastics tycoon Wang Yung-ching is considering building a naphtha cracker there.

''Direct trade with China is not possible under the government's policy and the current situation,'' Lee said. ''But the government has put top priority on improving the investment climate in Taiwan.''

The premier acknowledged earlier that Wang Yung-ching, chairman of the Formosa Plastics Group, one of Taiwan's largest conglomerates, had met with him to ask the government to consider opening up direct trade with China.

Due to growing environmental protection sentiment, Taiwan's largest plastics manufacturer is facing strong resistance at home to its plan to build Taiwan's sixth cracker in northern Taoyuan County.

This, combined with rising labor costs and a growing labor shortage, has already forced the group to begin construction on a $1.7 billion petrochemical plant in Texas.

Wang, who reportedly has made several factfinding trips to China last year Tuesday left for Japan and the United States, raising speculation that he would stop over in China.

But group spokesman Ru Chen-feng denied the report and said Formosa Plastics would not consider building a cracker in China unless the government lifts a ban on direct trade and investment there.

Taiwan allows its businessmen to engage only in indirect trade with such communist countries as China, the Soviet Union, Albania, North Korea.

But Taiwan's Nationalist government, defeated by the Communist Chinese in a civil war on the mainland in 1949, is considering lifting trade

restrictions on the Soviet Union and Albania, Premier Lee said Tuesday.

Indirect trade across the Taiwan Strait in the first 10 months of 1989 totaled $2.9 billion, according to the Board of Foreign Trade.

#90024u0898 01/24/1990 ~United Press International

OGDEN, Utah (JAN. 24) UPI - Rocket manufacturer Thiokol Corp. is apparently the latest target of a Salt Lake City businessman whose company has a reputation for buyouts and takeovers, according to stock analysts.

Leucadia National Corp., chaired by Ian Cumming, has filed documents with the Federal Trade Commission stating its intention to seek more than 15 percent of Thiokol's outstanding stock, company spokesmen said Tuesday.

Thiokol's board of directors responded last week by amending the company's share purchase rights plan to reduce the triggering threshold from 30 percent to 15 percent.

The amended plan provides, upon an acquisition of 15 percent or more of Thiokol's common stock, the holders of outstanding shares would be entitled to purchase $120 of Thiokol's stock for just $60.

A stock analysts claims Thiokol's stock - at about $13 per share - appears undervalued, making it an attractive takeover target.

''It is not at all clear exactly what Cumming is after in this case,'' said Steven Binder, an aerospace stock analyst with Bear Sterns. ''He may just be dabbling, or he may really want to take it over.''

Leucadia is a diversified company based in New York City, and is engaged in a variety of businesses including financial services, insurance, banking, real estate and manufacturing. Cummings, a member of the Utah Board of Regents, declined comment on his company's intentions.

Leucadia has a reputation for acquiring stock in undervalued or troubled companies and then managing them aggressively, said Todd Berko, an analyst for Drexel Burnham Lambert.

''They are not passive investors,'' Berko said. ''Their goal is to improve operations and to profit from having done so.''

Last summer, shareholders in Morton Thiokol Inc. approved a plan dividing the company between Morton International, Chicago, and Thiokol Corp., based in Ogden. Morton retained the chemical operations and automobile airbag division, while Thiokol kept the solid-fuel rocket motor operations.

#90024u0905 01/24/1990 ~United Press International
NEW YORK (JAN. 24) UPI - A portrait by Vincent Van Gogh of his physician will be sold at Christie's May 15 and is expected to bring between $40 million and $50 million, the auction house announced Wednesday.

Pierre-Auguste Renoir's ''La Moulin de la Galette,'' a key Impressionist painting, also is expected to bring as much as $50 million when Sotheby's auctions it on May 16.

Whether or not the current bull art market can support the sale of two paintings in the price range of the 1987 record sale of $53.9 million for Van Gogh's ''Irises'' remains to be seen. However, ''Portrait of Dr. Gachet'' has exhibition at the Metropolitan Museum of Art since 1984 in its favor.

The painting has been on loan to the museum by the estate of Siegfried Kramarsky, a German-born New York banker who died in 1961, whose trustees have decided to put it on the market for the benefit of Kramarsky's heirs.

The estate sold another Van Gogh, ''Bridge at Trinquetaille,'' at auction in London in 1987 for $20.24 million.

Van Gogh painted Gachet six weeks before the artist committed suicide in 1890 at the age of 37. It is first of two portraits he painted of the doctor and is slightly smaller than the second less colorful portrait which hangs in the Musee d'Orsay in Paris.

Van Gogh was put in Gachet's care in Auvers, France, after the artist was released from a mental asylum six weeks before his death. The subject, wearing a cap, displays an anguished expression as he rests his head on one hand, the other resting on a table near a bouquet of flowers and two novels.

#90024u0922 01/24/1990 ~United Press International

WASHINGTON (JAN. 24) UPI - President Bush defended Wednesday his decision to invade Panama despite the loss of more than 200 Panamanian civilians, saying ''92 percent of the people in Panama strongly supported the action.''

The Defense Department said 202 Panamanian civilians were killed after the Dec. 20 invasion, as well as 314 Panamanian soldiers, 23 U.S. troops and three U.S. civilians.

''Look, you lost some Panamanian lives. Innocent life was lost. And yet 92 percent of the people in Panama strongly supported the action of the United States. Isn't that significant?'' Bush said at a morning White House news conference.

''I mourn the loss of innocent civilians in Panama or anywhere else and I certainly mourn the loss of the lives of Americans,'' he said.

''But you have to look at the broad picture and I'm very pleased at the strong support of the Panamanian people and then you have to do what's right. You have to try to help - repair the wounds, repair the damage,'' Bush said.

Bush sent 14,000 troops to Panama Dec. 20 to join nearly 13,000 U.S. troops already stationed there.

Bush said he decided to invade Panama to restore democracy to the nation; protect the Panama Canal; capture Gen. Manuel Noriega, who surrendered

Christmas Eve and is now in a Miami jail facing drug charges; and protect Americans living in the Central American country.

He has dubbed the action a success because of the Noriega capture and the installation of President Guillerma Endara and his two vice presidents.

#90024u0928 01/24/1990 ~United Press International

BY HELEN THOMAS

WASHINGTON (JAN. 24) UPI - President Bush is embarking on his second year in office with high popularity polls and a predictable agenda.

From his first anniversary year statements it appears there will be more of the same. He has put a cut in capital gains taxes at the top of the agenda and the Democratic leaders who control both houses say there is a good chance he will get some reduction, but maybe not the 15 percent he is seeking.

Otherwise, he is looking for completion of the Clean Air Act and the anti-drug and anti-crime bills. A government program to subsidize some child care is also a goal to fulfill a campaign promise.

On the foreign policy side, he is faced with more demands on American aid at a time of dwindling resources, and some resistance. Still, in order to help preserve the momentum of the pro-democracy forces in Eastern Europe, the United States is going to have to dig in its pockets.

A $2 billion aid package to put Panama back on its feet after it was brought to its knees by the economic sanctions imposed two years ago and the U.S. invasion to topple dictator Manuel Noriega.

Bush has promised reconstruction funds for Panama and the government of newly installed President Guillermo Endara has already put in his request.

Meanwhile, Senate Republican leader Robert Dole shook up the traditional recipients of the biggest share of U.S. foreign aid, including Israel, Egypt, Pakistan and Turkey, by announcing that the pie should be cut smaller for them to bolster America's ability to help Eastern Europe.

Naturally, such a suggestion did not sit well with the countries who have been on the receiving end. Bush said he was delighted with the proposal on grounds that the funds would not be earmarked by Congress and he would have the power to dole them out, according to his own foreign policy priorities.

The president was not as receptive to a proposal by Sen. Daniel Moynihan,

D-N.Y., to cut back on Social Security payroll taxes because of the surplus in the future fund. Moynihan says use of the surplus as revenue disguises the true size of the deficit.

Bush says the Moynihan plan is a ''charade'' to raise taxes and cut benefits.

So it promises to be an interesting congressional session. The deficit continues to loom and the demands for the U.S. dollar are immense.

None of Bush's speeches in recent days indicate any switch of signals. If anything, he intends to stay the course. Administration pet bills that did not get passed in the last session are being warmed over.

White House press secretary Marlin Fitzwater told reporters that there will be new proposals in the president's State of the Union address, to be delivered on Jan. 31 before a joint session of Congress. But so far there have been no leaks on their contents.

Otherwise, last year's theme of ''status quo-plus'' seems to be the way the president will go on the domestic side. And with his approval rating running 76 percent to 79 percent, it is no wonder that he sees no reason to correct his course.

#90024u0933 01/24/1990 ~United Press International

WASHINGTON (JAN. 24) UPI - President Bush warned Congress Wednesday it will damage long-term relations with China if it overturns his veto of a bill to shield Chinese students against possible persecution in their homeland and it will ''have only itself to blame.''

Hours before the House was set to strike down the veto, - the Senate is expected to do so on Thursday - Bush defended his veto of the unanimously approved bill that allows Chinese scholars to seek permanent resident status in the United States. Many of the sudents fear retaliation by the aging Beijing leadership that engaged in a bloody crackdown on the pro-democracy movement.

Bush, speaking at a nationally broadcast White House news conference, said the bill sponsored chiefly by Rep. Nancy Pelosi, D-Calif., is unnecessary because he has put the protections in place by executive order.

''Not one (student) was sent back. They were safe then. And they are safe now,'' Bush said. ''And they will be safe in the future.''

Bush has sought to maintain a dialogue with the leaders of the nuclear superpower and the world's most populous nation despite the tragedy of

hundreds of students massacred at the Tiananmen Square demonstrations last June. He said Congress is now endangering that strategic goal.

''If I sign the bill, the students would still be safe, but China would retaliate and cut off future student exchanges,'' Bush said. ''I think the exchanges have brought forward the reforms that have taken place in China.

''Regrettably, Tiananmen was a giant step back. I want to keep contact. I do not want isolation.

''The price of the Pelosi bill is lost opportunity for Chinese scholars. People should understand that very, very clearly. The bill is totally unnecessary.

''The long-term consequences are potentially great. And Congress, in my view will have only itself to blame.''

Bush has been stung by criticism of Democratic leaders that, by sending his national security affairs adviser to Beijing on two missions to seek moderation in Chinese policy, he was ''kowtowing'' to China.

Republicans have rushed to join Democrats in pressing for the veto override, but Bush said more than Chinese students' rights is involved.

''I think there is some crass politics involved,'' Bush told reporters. ''When you hear people say, 'kowtow,' that is not the kindest word,'' instead of saying '''we have a honest policy difference with this president.'

''And so there is some politics involved in this as well.''

Bush, a former envoy to China, said the estimated 36,000 Chinese students will not be forced to return home, where many of their colleagues have been jailed or are under intense political repression.

''I will not break faith with the Chinese students here,'' the president said. ''I've made that very clear from the very beginning.

''I can understand their emotion,'' Bush said. ''But we've got to look at policy, and we've got to be fair in what has already been accomplished by the executive order.''

It would take 34 votes - one third of the Senate - to sustain Bush's veto and there are 45 Republican senators. The Republican leadership says prospects for a Bush victory are grim.

Senate Democratic leader George Mitchell of Maine dismissed Bush's claim that the students would be safe on the basis of his administrative order.

''This is subject to legal challenge, it leaves the students in limbo and it is revocable,'' Mitchell, a former federal judge, told reporters.

''I cannot calculate the number of Republican senators (voting to override) at this time,'' Mitchell said. ''I know of no Democrats who will vote to sustain the veto although I have not contacted every one. It is unlikely there will be any Democrats.''

Bush last year sent national security adviser Brent Scowcroft on two secret missions to Beijing, where he toasted the leadership in support of a superpower dialogue - and prompted widespread criticism in Congress.

With political conditions in China still harsh, Congress seized the chance to overturn the veto of the student protection bill to assert its opposition to the crushing of democracy in Beijing.

''Our government was more interested in dialogue than in Chinese democracy '' Sen. Lloyd Bentsen, D-Texas, said. ''So far, our China policy has been a one-way street of American concessions to Chinese obduracy.''

Michel asked the House to delay acting in response to the lifting of martial law by Beijing this month. The idea was brushed aside by a core of conservative Republicans who said a police state still rules in China.

''A veto sends the wrong message to the old dinosaurs still ruling China at a time when communist dictators are becoming extinct everywhere,'' said Rep. Gerald Solomon, R-N.Y.

Senate Republican leader Robert Dole of Kansas saw other motives because Bush has already guaranteed the estimated 36,000 students in the United States will not be forced to return home.

''There is really no good reason to override the president's veto unless it's straight-out politics,'' Dole said, such as an attempt ''to bash the president before he delivers the State of the Union address.''

#90024u0946 01/24/1990 ~United Press International

WASHINGTON (JAN. 24) UPI - Richard Secord was sentenced to two years probation Wednesday for lying to Congress about the Iran-Contra scandal by a federal judge who said the retired Air Force general had already suffered enough.

Secord, a West Point graduate with a checkered Pentagon intelligence career, stood before U.S. District Judge Aubrey Robinson Jr. and said, ''I regret not having been more candid'' with congressional investigators

looking into the Iran-Contra affair.

''I will regret it for the rest of my life,'' said Secord, wearing a dark blue suit and a red tie.

''It is my judgment that there has been punishment in this case,'' the judge said, and no need to send Secord to jail.

So far, no Iran-Contra defendant has been sentenced to jail as a result of the scandal, involving the U.S. sale of arms to Iran and the diversion of some of the profits to assist the rebel Nicaraguan Contras.

Robinson ordered Secord to spend two years on probation and pay a standard $50 court assessment required in all felony convictions.

A group of Secord's relatives and friends, sitting in the front row of the courtroom, hugged each other and burst into tears as the judge imposed the light sentence.

Secord was sentenced under a plea bargain deal with special Iran-Contra prosecutor Lawrence Walsh. The retired general pleaded guilty to one felony count of lying to congressional investigators - under oath on June 10, 1987 - when he claimed he was not aware of any money from the Iran arms sales being used to benefit former National Security Council aide Oliver North.

In return for the guilty plea, Secord, 56, obtained dismissal of the other 11 counts in the indictment.

#90024u0964 01/24/1990 ~United Press International

RIVERHEAD, NY (JAN. 24) UPI - Convicted killer Richard Angelo, a nurse who tried to become a hero by reviving patients he injected with lethal doses of drugs, Wednesday was sentenced to 61 and a third years to life in prison.

''During my many years on the bench, I've heard many stories of horror, but this is at the top of the list,'' said Suffolk County Court Judge Alfred Tisch.

The judge pointed out, however, that under state law the maximum time Angelo could serve is 50 years to life.

''The course of conduct taken by this defendant gives new meaning to the concept of depraved indifference,'' Tisch said as Angelo, 27 stood before him without expression, occasionally biting his lip.

Angelo, 27, described by the prosecution as ''a monster in nurse's whites '' was convicted Dec. 14 of two counts of second-degree murder and one count each of manslaughter and criminally negligent homicide in the deaths of four patients from fatal injections of Pavolon, a muscle relaxant drug.

A jury that deliberated for 7 1/2 days also convicted the pudgy, pasty-faced Angelo of one count of assault of a fifth patient who was injected at Good Samaritan Hospital in West Islip.

Angelo's attorney, Eric Naiburg, said he would appeal the sentence.

As the judge imposed the sentence, Angelo's parents, Joseph and Alice Angelo, sat behind him in the front row and showed no emotion.

As he spoke, Tisch glanced at the two retired schoolteachers and remarked to them, ''It is likely that during the remainder of your natural life your son will be incarcerated.''

-30- 1776

#90024u0974 01/24/1990 ~United Press International

WASHINGTON (JAN. 24) UPI - President Bush Wednesday described as ''unadulterated malarkey'' a report that a first family poll was taken on the subject of abortion with his four sons supporting his opposition and all the women taking a pro-choice stand.

Bush made the comment at a nationally broadcast news conference when he was asked whether he could confirm a Newsweek report that such a poll had been taken in the White House family and Barbara Bush was a pro-choice supporter.

''No, I can't confirm that,'' he told reporters. ''And the meeting I read about in one of the most respected publications was pure, unadulterated malarkey.''

Pressed further on what appeared to be a softening of his position and a toleration for diverse points of view on abortion in the Republican Party, Bush said, ''I've always said that people have a personal choice. Republicans have diverse views.''

Asked how he can reconcile a constitutional amendment to ban abortion, Bush said:

''I was elected to try to fulfill the (GOP) platform and the programs that I believe in. So that's my personal choice, but that doesn't mean I have a lack of respect for others, and that I'm going to go out and not campaign for people who disagree with me on this issue, on foreign policy or whatever it is. So that's how I explain it.''

The first lady in several interviews last week adamantly refused to express her personal view on abortion.

Since the Republicans lost some key elections over the abortion issue in November, GOP National Committee Chairman Lee Atwater and other Republicans have emphasized that there is room for diverse opinions in the party.

In a brief speech over a special telephone hook-up Monday, Bush told 35,000 anti-abortion protesters gathered behind the White House that he supported their cause and that ''human life in all forms must be respected.''

''The continuing strong presence of the March for Life reminds those of us in decision-making capacities in the White House and in the Congress and in the court that millions of Americans care fundamentally about this issue and are committed to preserving the sanctity of life,'' Bush said.

WARSAW, POLAND (JAN. 24) UPI - Solidarity leader Lech Walesa Wednesday urged the Communist Party to dissociate itself from the past and overhaul its structure if it wants the support of his labor movement.

''I am waiting for such a move by the party,'' Walesa said in an interview with the Communist Party weekly, Polityka, before the 11th Communist Party Congress was scheduled to begin on Saturday.

The three-day Congress will official declare defunct the communist Polish United Workers Party, known as the PZPR, which has ruled the country since 1948, and debate how to form a left-wing party.

''If they (the new party) refer to the PZPR past, then it will be hard to cooperate with them,'' Walesa said. ''If they dissociate themselves from the past, they can win a recognition and build their prestige.''

Tadeusz Fiszbach, the liberal Communist Party official who supported the formation of Solidarity in 1980, said at a news conference Wednesday he would agree to be the leader of the new party if he was elected at the congress.

Walesa said Fiszbach would be the right candidate for the leadership because ''he wanted cooperation'' with Solidarity.

Solidarity was outlawed by the 1981 martial law and regained its legal status last year. Fiszbach was dismissed from his job in 1981 as the

Communist Party leader in the port city of Gdansk for his cooperation with Solidarity.

Communist Party sources predicted a split at the party congress because many hard-liners will not agree to condemn the former communist system and will try to form their own communist party. On the other hand, other members want to set up a left-wing party avoiding the word ''communism'' in its name.

Walesa said a strong left-wing party would be needed to keep the balance of the political forces in the country where many new political parties have emerged following the formation of the non-communist government last year led by Solidarity activist Tadeusz Mazowiecki.

''If the left-wing party fails to do something, then Solidarity's left wing must do it,'' he said, stressing that Solidarity wants to remain a labor union.

Union sources said Solidarity as a labor movement and union also may split at its congress in April. The sources said some activists will want to operate as unionists, while others with the political ambitions will push for the formation of a Solidarity political party.

Turning to the economic austerity measures introduced by the Solidarity-ledgovernment to battle inflation, Walesa said he was aware of the deteriorating living standards of the people due to drastically hiked price hikes.

He warned, however, that he may lead the workers again, this time against the new government if its economic policy is a failure.

''We must stand the measures for several months,'' he said. ''But I have told the government-if it is a failure, then you should get ready a (new) prime minister, and ministers.''

The economic austerity measures introduced on Jan. 1 included price hikes by 80 percent in first three months of the year and then a gradual increase of prices by another 60 percent over the period of another eight months.

#90024u1021 01/24/1990 ~United Press International

BOGOTA, COLOMBIA (JAN. 24) UPI - Colombia's foreign minister said Wednesday his government knows nothing about a plot by a drug cartel to assassinate President Bush when he comes to Colombia next month.

Asked about reports broadcast in the United States that members of a drug

cartel planned to try to shoot down Air Force One when Bush flies to Cartagena for a drug summit, Foreign Minister Julio Londono Paredes said. ''The Colombian government doesn't have the any information about supposed plans of sabotage or terrorism.

''The American authorities have said ... that the city of Cartagena fulfills all the requisites, all the requirements to ensure the absolute tranquility of the heads of state that will be present in Cartagena,'' Londono Paredes said.

Earlier this week CBS reported the Secret Service was investigating intelligence reports that drug lords were smuggling SA-7 shoulder-fired missiles into Colombia to gun down Bush's plane. Bush is to attend a meeting in the historic resort city Feb. 15 with the presidents of Colombia, Peru and Bolivia.

A U.S. Embassy spokeman called the reports of a plot pure speculation and said he doubted the drug lords, who are trying to negotiate a cease-fire with the government, would have an interest in killing Bush.

The foreign minister said U.S. security experts who visited Cartagana to coordinate preventive measures expressed no serious reservations about the site.

Londono Paredes, who was critical of the Dec. 21 U.S. invasion of Panama, also said Colombia would re-establish normal diplomatic relations with Panama after U.S. troops are pulled out and President Guillermo Endara's government has ''total control'' over the country.

''As long as there are foreign troops occupying the territory of a country it's very difficult for that country to have total control of the situation,'' Londono Paredes said in an interview on RCN radio.

Colombia, represented by a charge d'affairs in Panama, has refused to formally recognize the Endara government, installed shortly after U.S. troops invaded Dec. 20 to overthrow Panamanian strongman Manuel Noriega. Endara was elected president by an overwhelming majority last May in elections annulled by Noriega.

Londono Paredes said American soldiers were exercising control ''in the territory, in the city streets, everywhere.''

''So we presume that ... when the government has total control ... the troops will naturally have returned to their place of origin,'' he said.

The Colombian government also will not suggest that Panama hold a plebiscite to confirm Endara as president, Londono Paredes said, referring to earlier reports Colombia would only recognize Endara after a new vote.

Meanwhile, Cali cocaine cartel chief Gilberto Rodriguez Orejuela, who is wanted in Louisiana and New York on drug trafficking charges, has offered to surrender to authorities.

Orejuela, in a letter to El Tiempo, said he hoped ''Colombian laws will be applied and not the will of the United States ambassador.''

''I will hand myself over to the process of extradition and I will use all the legal means available to prevent an act (extradition) that may be more vengeance than justice,'' Orejuela said in the letter to the newspaper.

The government has not replied to the offer but in a letter last week to El Tiempo, President Virgilio Barco said he was willing to be ''flexible'' in dealing with the drug lords, who recently offered to surrender in return for ''constitutional guarantees.''

''I will ask for the supervision of the attorney general. And it is time that the democratic journalists demand it as well, not to benefit a Colombian that may be extradited but for the benefit of Colombia itself,'' wrote Orejuela, who is on the Justice Department's list of 12 most wanted Colombian drug traffickers.

Also Tuesday, Medellin drug king Pablo Escobar sent a letter to El Tiempo saying he was still in charge of his cartel and accusing the rival Cali cartel of helping police trap and kill Jose Gonzalo Rodriguez Gacha, No. 2 figure in the Medellin cartel who was cut down last month when he tried to shoot his way out of a police ambush.

NEW YORK (JAN. 24) UPI - Latest metal market prices as quoted Wednesday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 68.50-71.00 c-lb.

Antimony, domestic, refined in alloy, $2.00 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 112.10 c-lb.

Lead, common, U.S. primary producers 40.00 c-lb.; U.S. non-primary (secondary) producers 42.00-47.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $285.00-$300.00 76-lb. flask.

Nickel, bettes delivered to customers, merchant, N.Y., $3.39-$3.55 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $135.00-138.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $498.00; dealer-approx., $495.00-$505.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $100.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $103.33 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 310.50 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $8.87-12.96 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.35-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 68.00-68.75 c-lb.

#90024u1035 01/24/1990 ~United Press International

PORT MORESBY, PAPUA NEW GUINEA (JAN. 24) UPI - Militant secessionists killed a British businessman on Bougainville Wednesday and the Australian government advised its citizens to leave the troubled island as soon as possible.

Police said Mike Wardley, 40, local manager for the Bridgestone Tire Co., was shot to death at the Bougainville Copper Ltd. open-cut copper mine at Panguna, near the provincial capital of Arawa.

Bougainville, which lies about 400 miles northeast of the Papua New Guinea mainland, has one of the world's richest copper deposits and provided about 40 percent of PNG's export earnings before rebel attacks forced the mine's closure in May.

Prime Minister Rabbie Namaliu declared a state of emergency on June 26, which was extended for the fourth time last week after about 20 rebels attacked the Panguna police station. Also last week, about 100 rebels attacked the Kuveria jail north of Arawa, leaving seven people dead and 11 others wounded.

An Australian BCL executive was wounded on Jan. 18, and an Australian journalist was shot in the shoulder a day later when the helicopter he was travelling in was fired upon by rebels.

The Australian government late Wednesday advised all Australians on Bougainville to leave as soon as possible. Last Friday Foreign Minister Sen. Gareth Evans said contingency plans are in place to send troops to Bougainville to evacuate the estimated 1,000 Australians on the island if the troubles worsen.

Militant landowners began attacking mine installations in November 1988, demanding $11.5 billion in compensation for environmental and social damage, withdrawal of security forces, a referendum on secession from PNG

and the return of 50 percent of the mine's income to the province.

Police could not say what he was doing at the mine or why he might have been targeted by the rebels. They said he is believed to be the first European to be killed since the troubles began.

#90024u1074 01/24/1990 ~United Press International

LONDON (JAN. 24) UPI - Ferranti International PLC has announced plans to sell its defense interests and part of its Italian operations to British electronics giant General Electric Company PLC for $508 million.

Analysts said Wednesday the sale would strengthen GEC's role as one of Britain's largest radar and defense contractors in Britain and considered the move necessary.

''It is a necessary restructuring of the U.K. industry ... there can only be room for one (major defense and electronics firm) in the future,'' said James Dodd, an analyst for Kleinwort Benson in London.

The troubled British defense contractor announced late Tuesday it had reached an agreement with rival GEC to sell all the business and assets of Ferranti Defense Systems Group based in Edinburgh, which produces a wide range of inertial navigation systems, displays, radars and electro-optical systems for the armed forces.

Under the agreement, GEC would also acquire certain operations of the Ferranti Italia Group, which manufactures civil and military communications equipment and electronic systems for defense, space and civil markets.

Ferranti is Britain's second-largest defense and electronics group. With the sale agreement, GEC, which was not related to General Electric Co. in the United States, would become Britain's largest electronics company and a stronger force among military radar suppliers in Europe.

The agreement came amidst rumors that Ferranti was about to clinch a $2.64 billion order to supply the radar for the European Fighter Aircraft, one of Europe's biggest defense and electronics orders.

Although negotiations were not completed on the EFA contract award, GEC was expected to inherit the deal with Ferranti's radar division.

For Ferranti, the proposed sale offered a reprieve from recent struggles to overcome widespread financial troubles in the wake of an alleged $346 million fraud connected with its Pennsylvania-based subsidiary, International Signal and Control Group PLC.

''The agreement ... will greatly strengthen the financial position of the group,'' said Ferranti Chairman Sir Derek Alun-Jones. ''Ferranti International will be one of the U.K.'s largest systems software houses as well as having attractive businesses in electronic products and weapons systems.''

Dodd said the sale will solve the company's short-term financing problems but still leaves them with the question of what to do with ISC and how to handle some of their other U.S. holdings.

Ferranti has been struggling to find buyers after discovering the alleged ISC fraud in September. Ferranti has filed lawsuits in London against four former ISC employees including James Guerin, who sold his Lancaster, Pa.-based company to Ferranti in 1987. The alleged fraud involved missile contracts with dubious customers and Ferranti was forced to write off

about $300 million because of it.

Guerin is currently under investigation by authorities in U.S. and Britain on allegations he smuggled navigational technology for fighter planes to South Africa, according to a story published in Wednesday's Wall Street Journal. A Ferranti spokesman declined to comment on the report.

#90024u1077 01/24/1990 ~United Press International

TOKYO (JAN. 24) UPI - Japan launched a rocket Wednesday carrying a lunar satellite in one of the most ambitious projects for the country's fledgling aerospace industry - making it the world's third nation to bid to reach the moon.

The M3S-2 rocket with two satellites aboard vaulted away from Japan's Kagoshima Space Center on the southern island of Kyushu at 8:46 p.m., said Tadashige Takiya, a spokesman for the Institute of Space and Astronautical Science.

''This project is one of the most important missions for the advance of our space program,'' Takiya said.

If the high-stakes mission succeeds, the smaller of the two satellites will be placed into orbit around the moon and the larger one will make an oblong orbit around Earth and several lunar swing-by flights.

The purpose of the expedition is to master technology needed to send probes to Venus and Mars. Both satellites should come within 10,000 miles of the moon but neither will land on it.

In Washington, foreign space expert Marcia Smith of the Library of Congress said the lunar launch ''indicates Japan wants to be part of the club of nations that sends probes away from Earth, and ultimately will establish bases on the moon.

''But I don't think it indicates Japan will do any of this by itself,'' Smith added.

From the earliest days of the space race, the United States and Soviet Union have hurled rockets to the moon. Most memorable of the early shots perhaps is the Soviet robot probe Luna 3, which sent back the first pictures of the dark side of the moon in October 1959.

Later flights of unmanned spacecraft, including America's successful Surveyor automatic lander program in the mid-1960s, led to the six manned Apollo landings between 1969 and 1972.

Japan's first attempt to launch the lunar satellites was scrubbed 18 seconds before a scheduled liftoff Tuesday when the electronic system in a booster rocket developed trouble.

In 1970 Japan sent its first satellite into orbit and has since launched a total of 43 spacecraft.

The likelihood of Japan someday challenging the United States in commercial satellite technology is no longer farfetched.

In May, President Bush named satellites as one of three sectors in which Japan conducts unfair trade practices. Wood products and supercomputers were the other two sectors listed by Bush under the Super 301 provision in the 1988 Omnibus Trade Act.

A report by the U.S. trade representative's office said Japan's policy favors buying Japanese-made satellites despite the availability of high-quality U.S. satellites and the policy is an attempt to enhance the Japanese satellite industry at the expense of the U.S. industry.

Japan's moon-orbiting satellites were built by the NEC Corp., a major Japanese computer company, and the rocket used to launch them was built by Nissan Motor. Co. with funding for both provided by the government.

#90024u1087 01/24/1990 ~United Press International

JERUSALEM (JAN. 24) UPI - The Israeli army said Wednesday that shots were fired overnight at a patrol moving along the Jordanian border in the latest cross-border shooting incident.

An investigation revealed the shots were fired from an area in which a Jordanian patrol was moving near the town of Hazeva in southern Israel, the army spokesman said.

The Israei soldiers returned fire toward the source of the shooting. No infiltators entered Israeli territory and no Israeli soldiers were wounded the spokesman said.

The incident was second in last 10 days in the Hazeva area. In the last two months there have been at least five shooting incidents along the Jordanian border, although it was not clear in most who was doing the firing.

NEW YORK (JAN. 24) UPI - Restaurant Associates Industries Inc., the

operator of several landmark New York eateries including Mama Leone's, said Wednesday it has agreed to sell a majority stake to a Japanese food service company for a total of $105 million.

Jim Beltrame, executive vice president of The Restaurant Associates, said Kyotaru Co. Ltd. has agreed to pay $16 million for an 85 percent equity position in the company and will take over Restaurant Associates' debt of $89 million.

Restaurant Associates currently operates 120 restaurants, including New York's SeaGrill at Rockefeller Plaza and The Brasserie. The company also provides food service for United Nations headquarters in New York, said Beltrame.

Restaurant Associates also operates the Acapulco Mexican restaurant chain in California and 26 Charlie Brown's restaurants in New Jersey.

Six top executives of Restaurant Associates, which underwent a management buyout in 1988, are to retain a 15 percent position in the company, Beltrame said.

Kyotaru has 780 restaurants in Japan. In California, Kyotaru has 10 El Paso Cantina Restaurants, 50 Arby's fast-food outlets and several Japanese and seafood restaurants.

#90024u1144 01/24/1990 ~United Press International

WASHINGTON (JAN. 24) UPI - President Bush, speaking out on troubles in the world's two communist giants, said Wednesday he hopes Soviet leader Mikhail Gorbachev ''stays strong'' in the face of domestic strife and defended his overtures to China's rulers.

At a news conference that touched on an array of other topics, Bush also said his fiscal 1991 budget, to be presented next week, will begin a restructuring of the U.S. military and announced he has decided to support elevation of the Environmental Protection Agency to Cabinet status.

Asked first if he was concerned about Gorbachev's future because of the ethnic and nationalist unrest in the Soviet republic of Azerbaijan, Bush said, ''I think the answer to your question unfolds every day. We don't really know.''

''I can't make predictions about that, but I know that I hope that he not only survives but stays strong, because I think it is in our interest that perestroika succeed and go forward,'' the president said.

The comments marked the first direct word from Bush since Gorbachev ordered Soviet troops into the troubled republic to quell the worst violence in a two-year dispute between Moslem Azerbaijanis and Christian Armenians. The conflict, prompting the harshest measures of Gorbachev's leadership, has claimed more than 300 lives.

Bush also noted he had discussed the situation in the Baltics - where nationalist movements are pressing for independence - with Gorbachev at their Malta summit in December. Bush said it appeared the Soviet leader

was doing his best to handle the situation peacefully.

The Baltics - Latvia, Estonia and Lithuania - were incorporated into the Soviet Union following the 1939 Nazi-Soviet non-aggression pact. The United States never recognized that action, and Bush reiterated the official U.S. policy.

The president continued, ''What I say that we want to do is encourage Mr. Gorbachev's stand that peaceful change is the order of the day.''

''They know our position,'' Bush said if the Kremlin leadership, and added ''And the thing I think is, in looking at the Soviet scene there, that he is still adhering as best he can to the concept of peaceful change in the Baltics. And that's got to dominate.''

At the same time, however, Bush echoed the stepped-up warnings of his administration over the weekend that Gorbachev's efforts to restore order must not go too far.

''Any time you have a use of force and a loss of life, we are concerned,'' he told reporters. ''But I don't believe I can judge that question right now. ... He's faced with an ethnic problem here and an internal problem of enormous dimensions.''

At the same time, Bush defended his efforts to mend relations with China's government while admitting that Congress appeared poised to override of his recent veto of a bill to protect Chinese students in this country.

Insisting that relations with Beijing must be maintained despite the government's bloody repression last spring of pro-democracy demonstrators, Bush repeated that the bill would anger Chinese leaders.

If lawmakers override his veto, Bush said, ''The long-term consequences are potentially great. And Congress, in my view, will have only itself to blame.''

Departing from his usual routine of dropping into the briefing room on short notice, Bush's aides gave a day's advance notice of the session and the president's remarks clearly were timed to coincide with the scheduled House vote to override.

The bill would allow more than 33,000 Chinese students to seek extensions of their visas if the fear they will suffer persecution if they return home. Bush maintains he provided similar protections by executive order and legislation is not needed.

''Regrettably, Tiananmen was a giant step back,'' Bush said, referring to the June massacre in Beijing. ''(But) I want to keep contact.''

Also noting that he will propose his budget to Congress Jan. 29, the president said the blueprint will begin ''the transition to a restructured military'' in light of the developments of the past year in Europe.

''I'm proposing a defense budget that begins the transition to a restructured military, a new strategy that is more flexible and more geared to contingencies outside of Europe,'' he said.

On Panama, Bush expressed concern about the loss of civilian lives during the December U.S. military action to oust Manuel Noriega, but said, ''You have to look at the big picture.''

Bush, who will present a revised national drug strategy this week and his State of the Union address Jan. 31, said he is abandoning his earlier opposition to raise the EPA to Cabinet status because, ''I've decided that the environmental challenges that face the world ... are so important that they must be adressed from the highest levels of government.''

Finally, on one of the hottest isses to emerge at the start of the 1990 congressional session, Bush reaffirmed his opposition to a cut in Social Security payroll taxes, saying it would serve as ''a disguise for increased taxes around the corner.''

Sen. Daniel Moynihan, D-N.Y., proposed the tax cut to prevent huge surpluses from the Social Security tax from being used to mask the true size of the federal budget deficit.

JOHANNESBURG, SOUTH AFRICA (JAN. 24) UPI - Police opened fire on black demonstrators stoning a police vehicle during an anti-government protest in the conservative gold mining town of Carletonville Wednesday, killing two blacks and wounding three others, police said. Thirteeen blacks were arrested.

In a rare midday statement on political unrest, police acknowledged two blacks died in police gunfire near Carletonville, 50 miles west of Johannesburg after some 5,000 people gathered to protest the death of a youth in police custody.

Organizers said police opened fire without provocation, killing a man and a woman and wounding as many as 20 people. But the police announcement said lawmen used live ammunition only after demonstrators stoned a police vehicle, smashing its back window.

Police identified the two victims as men. They said three men also were injured in shooting incidents in the area.

Demonstrators first held a rally in the Khutsong township stadium

Wednesday morning, then marched through township streets where police confronted them and fired tear gas and birdshot when orders to disperse were ignored.

National Union of Mineworkers spokesman Sazi Jones said the rally was called to protest the Jan. 16 death in police custody of 16-year-old Mbuyiselo Nicholas Phiri and the disappearance of a number of township youths believed detained by the police.

Members of the the union work in the gold mines nearby and live in the township.

The deaths raised to at least five the number of blacks killed in unrest across the country in the past 48 hours, according to police reports.

In one incident Tuesday, police exchanged gunfire with black demonstrators near a courthouse in the black township of Ntuzuma in the Zulu homeland of KwaZulu on the outskirts of the Indian Ocean port city of Durban, killing one woman, police said.

A statement said police fired tear gas to disperse the demonstrators but the marchers regrouped and ''shots were fired at the KwaZulu police.'' The fire was returned and the woman was killed, it said.

#90024u1183 01/24/1990 ~United Press International

ENTERPRISE, AL (JAN. 24) UPI - A junk store operator whose home and business were combed for clues to a series of deadly mail bombings in the South said he was cooperating with investigators Wednesday but was unhappy to be the focus of the hunt.

''I'm not guilty,'' Robert Wayne O'Ferrell said as investigators searched septic tanks outside his two-story clapboard house looking for evidence in the explosions that killed a federal judge and a civil rights lawyer.

''I said I'd keep on talking to them just as much as they wanted me to,'' O'Ferrell said Wednesday. ''They ain't found nothing, and you can't keep looking if you don't find nothing.''

FBI agent Chuck Archer said O'Ferrell had not been arrested. Asked if O'Ferrell was a suspect, he said, ''I wouldn't comment that he is a suspect, only that he is one of many people being interviewed.''

Archer said FBI agents had seven search warrants to serve: one for O'Ferrell's Old and New Surplus Salvage Warehouse, one for the downtown storefront where he used to operate the business, one for his home in nearby New Brockton, and two others for the septic tanks.

Agents provided no details on the remaining two warrants, such as where or when they would be executed.

Tuesday afternoon, federal agents pumped out O'Ferrell's two septic tanks hoping to find ''evidence of a bombing,'' Archer said.

Authorities took O'Ferrell into Enterprise police headquarters Tuesday afternoon after searching his salvage warehouse a second day, but released him about 8:30 p.m.

O'Ferrell, 46, said he did not know the whereabouts of the key item in the federal agents' search: a typewriter with a unique typing pattern that sources said was linked to the bombings. O'Ferrell said he ''supposedly'' sold the typewriter.

''We don't have any idea who it was sold to, when it was sold,'' he said. ''We don't keep a record of that stuff. That's all they want to know about is the typewriter - what we know about it.''

Federal investigators believe the typewriter used to prepare a lawsuit for O'Ferrell is the same machine used to write a letter claiming responsibility for the December bombings.

Agents were looking for an old manual typewriter with a distinctive typing pattern that appeared in letters sent to an Atlanta television station, to the bombing victims and to federal appeals judges and some NAACP officials sources said.

The FBI found similarities between the type in the letters and in documents O'Ferrell submitted in his lawsuit against Gulf Life Insurance Co., which fired O'Ferrell several years ago for representing other insurance companies.

U.S. District Judge Myrom Thompson of Montgomery, Ala., ruled against O'Ferrell, and the decision was upheld by the 11th U.S. Circuit Court of Appeals in Atlanta in an April decision written by Judge Robert Vance, who was killed in the first mail bombing Dec. 16.

The bombs that killed Vance at his home in suburban Birmingham, Ala., and lawyer Robert Robinson at his office in Georgia two days later triggered a massive federal probe that escalated last weekend with 50 more FBI agents assigned to the case.

Bombs also were mailed to the 11th Circuit courthouse in Atlanta and the NAACP headquarters in Jacksonville. Those devices did not explode.

FBI agents speculated the bombings were racially motivated, and on Dec. 27 a group calling itself Americans for a Competent Federal Judicial System mailed a letter to Atlanta television station WAGA claiming responsibility for the bombings and threatening more.

#90024u1187 01/24/1990 ~United Press International
SRINAGAR, INDIA (JAN. 24) UPI - Hundreds of Kashmir police Wednesday staged wildcat strikes to demand the withdrawal of federal paramilitary units and Moslem radicals sniped at security forces, sparking a gun battle that claimed at least one life.

Militants engineering an escalating campaign for secession of the predominantly northern Moslem Kashmir region pressed on with a sabotage drive, detonating a bomb that damaged a government office in a blast heard across Srinagar and torching several state buildings, one of which sent a towering plume of smoke into the air.

Gov. Jagmohan, who took control of Jammu and Kashmir state on behalf of the central government last week, announced a package of job programs he said are aimed at soothing feelings of neglect that are helping to fuel the pro-secession movement.

He also told a news conference that 28 people have died since weekend rioting by pro-secession crowds erupted in Srinagar, prompting the deployment of troops in support of police enforcing a curfew under orders to shoot troublemakers on sight.

At least nine towns, including Srinagar, the state's summer capital, 450 miles north of New Delhi, remained under curfew Wednesday.

Official sources, however, have put the death toll since Saturday at more than 50, most of them demonstrators shot by security forces.

Sources said that in violence Wednesday, militant snipers fired on security forces in three locations in downtown Srinagar. There were no casualties in two incidents, but the shooting in the Kawadaa area sparked a gunfight in which a bystander was killed.

In a potentially serious development, about 200 rifle-toting members of the Jammu and Kashmir Armored Police staged a wildcat strike in Srinagar, marching to their headquarters to demand the removal of Jagmohan and the withdrawal of the Central Reserve Police Force and the Border Security Force.

Thousands of officers of the two central government paramilitary contingents have been deployed in Kashmir, the northern half of Jammu and Kashmir state.

The strikers charged that 10 of their colleagues had died in recent days in clashes with the federal units, although official sources put the number at two. The strikers also demanded the legalization of their union, which was outlawed in 1977, and redressing of grievances over working conditions.

Official sources said about 200 state police staged a similar strike in the pro-secession hotbed of Baramullah.

The strike attested to the growing tensions between the state police, who are mostly Kashmiri Moslems, and the federal personnel, who are predominantly Hindus from other parts of the country.

Residents claim that the Hindu-dominated central government has neglected Kashmir for years and that they were never allowed after the 1947 partition of the subcontinent to decide whether to join India or Islamic Pakistan or become independent.

India and Pakistan both claim sovereignty over Kashmir and have contested for the region in all three wars they have fought since 1948. India currently controls two-thirds which comprise the northern half of Jammu and Kashmir.

New Delhi charges Pakistan has been training and arming the militant groups in the state, which Islamabad denies.

#90024u1196 01/24/1990 ~United Press International

NEW YORK (JAN. 24) UPI - Two of the nation's leading commodity exchanges under investigation for illegal trading practices announced Wednesday they will hold talks to merge into a single more efficient market.

The talks would merge the New York Mercantile Exchange, the world's largest energy market, and the Commodity Exchange, Inc., a leading exchange for precious metals.

The boards of the two exchanges authorized their respective executive committees ''to pursue further negotiations with the intent of devising a means by which the administration and operations of the two exchanges could be consolidated most efficiently,'' the joint statement said.

Many of the terms for the condolidation including the extent the liquid capital reserves of each exchange would be made available to the new entity ''remain to be determined,'' it said.

Any agreement would be subject to approval by members and the government's Commodity Futures Trading Commissiondd.

The CFTC last year launched a criminal investigation into ''front-running'' - the practice of profiting from information obtained from customers by traders buying first for their own accounts.

Last May, federal agents with search warrants invaded the trading floors of the two exchanges to issue subpoenas to scores of traders for information.

Front running had been banned by the two exchanges. The two, however, strongly endorse so-called dual-trading, in which traders buy both for customers' and their own accounts.

The CFTC earlier this month proposed a rule that would nevertheless ban dual trading. Industry and public comments are due in the commission April 11, a spokesman said.

The boards of the two exchanges also endorsed a proposal Tuesday of their two committees to form a joint governing board made up of a chairman from NYMEX and a vice chairman for the COMEX, the statement said.

#90024u1202 01/24/1990 ~United Press International

CLEWISTON, Fla. (JAN. 24) UPI - A van packed with migrant farm workers ran off a curving road in a dense fog early Wednesday, plunging into a 12-foot-deep canal and killing 10 people, authorities said.

Only the driver of the van and one passenger were able to escape the van, said Hendry County Sheriff's Office spokesman Bill Chamness.

The van was headed south on county road 832 about 6 miles south of Clewiston when the driver failed to negotiate a right-hand curve, Chamness said.

''The vehicle didn't even attempt to stop. There are no skid marks,'' Chamness said. ''He just drove straight out into the canal. We are just assuming that he didn't know he was that close to the canal.''

The van traveled for about 50 yards after leaving the road before plunging into about 12 feet of water, Chamness said.

Chamness said all 12 people were migrant workers but he declined to release their identities, pending notification of their next of kin. He said nine men and one woman died in the crash, which happened about 7:30 a.m.

The survivors managed to climb out the van's windows. The accident was reported about 7:45 a.m. by a passerby.

The van was pulled from the canal this morning and the bodies were removed Chamness said.

The driver was later admitted to Hendry General Hospital. The other survivor was treated and released, Chamness said.

Chamness said the accident happened in dense fog, which he said is common in the area during this time of year.

Chamness said authorities were not sure where the farm workers were headed.

''They were all migrant workers,'' he said. ''I am not sure what farm. We have so many groves and so many farms around here.''

Clewiston is a farming community on the southern shore of Lake Okeechobee, about 50 miles west of Palm Beach.

#90024u1217 01/24/1990 ~United Press International

WASHINGTON (JAN. 24) UPI - The Pentagon notified Congress Wednesday of

two proposed arms sales - 29 Harpoon anti-ship missiles to Egypt for $69 million and 310 Sidewinder air-to-air missiles to Turkey for $30 million.

In its announcement, the Pentagon said Egypt plans to equip four of its Chinese-built ''Romeo-class'' submarines with the 29 Harpoons. The contractor will be the McDonnell-Douglas Missile Systems Co., St. Charles, Mo.

''The sale of this equipment and support will not affect the basic military balance in the region,'' the Pentagon said.

On the sale to Turkey, the Defense Department said the Turkish government intends to use the 310 AIM-9S Sidewinder air-to-air missiles on its co-produced F-16 fighter.

It said the sale will improve the military capabilities of Turkey ''in fulfillment of its NATO obligations'' and will not adversely affect ''U.S. efforts to encourage a negotiated settlement of the Cyprus question'' - the Mediterranean island claimed by Greece and Turkey.

#90024u1234 01/24/1990 ~United Press International

EAGLE PASS, TX (JAN. 24) UPI - Three radar-equipped blimps, law enforcement's main tool in combating drug smugglers along the Texas-Mexico border, have been secretly grounded by the U.S. Customs Service, it was reported Wednesday.

The Austin American-Statesman said in a copyright story that the Texas fleet was taken out of service after one of the unmanned blimps tethered 6,000 feet above Eagle Pass and mysteriously fell to earth on Dec. 29.

The Customs Service confirmed that four aerostats built by General Electric - three in Texas and one in Puerto Rico - have been grounded until the company and federal investigators determined what caused the Eagle Pass balloon to crash.

But Ernie Wims, a Customs official in Washington, D.C., declined to say what effect the groundings will have on the agency's drug interdiction program.

''We are still working,'' he said. ''There are other ways that we can (intercept airborne smugglers).''

Each blimp, or aerostat, costs $11.5 million to $12.5 million. Additionally, it costs $1.5 million a year to operate and maintain each blimp.

The American-Statesman said the Customs Service quietly ordered GE, the manufacturer of the Texas blimps, to stop deploying the aerostats but did not inform Congress.

Plans originally called for 16 aerostats tethered 10,000 to 15,000 feet in the air from the Pacific Coast to the Grand Bahamas. The program's promoters envisioned an airborne system providing constant radar coverage.

Balloons at Eagle Pass, Marfa and Rio Grande City were to provide an electronic picket fence along Texas' border with Mexico. The blimps have radar that covers up to 200 miles into Mexico to pinpoint aircraft with a smuggler's profile.

The American-Statesman said two other blimps built by Westinghouse and anchored at Fort Huachuca, Ariz., and Cujoe Key, Fla., have also been knocked out of service. The Arizona blimp was felled by a wind burst, while the Florida blimp was taken out of service without explanation, the newspaper said.

#90024u1242 01/24/1990 ~United Press International

NASHVILLE, TN (JAN. 24) UPI - Civil libertarians were outraged Wednesday by a proposed law setting a maximum fine of $1 for beating anyone who burns an American flag in Tennessee.

The legislation sailed through the state House Judiciary Committee Tuesday as a reaction to last year's Supreme Court ruling that burning the U.S. flag as a political protest is constitutionally protected free speech.

''For many widows or parents whose loved ones were killed in wars, all they have left is the flag,'' said the bill's sponsor, Rep. Shelby Rhinehart. ''If they beat the heck out of someone who burns the flag, so be it.''

''That's crazy,'' said Barry Friedman, the head of Tennessee's American Civil Liberties Union chapter. ''It's an invitation to violence. It's like saying you can assault anyone who disagrees with the governor as long as you pay a dollar first.''

The committee passed the legislation unanimously but one member questioned the bill before voting for it.

''The reason we had wars was to make sure that free speech existed,'' Rep. Tommy Burnett said. ''Aren't we going to permit a constitutional act to now be assaultable?''

''It depends on your reading of the Supreme Court decision,'' replied

Rhinehart, who is known jokingly in the Legislature as ''the chief justice'' for his unorthodox pronouncements on the law.

The committee made one change in Rhinehart's bill, dropping language that would have made the maximum fine only one dollar even for assaulting a flag burner with a deadly weapon.

#90024u1245 01/24/1990 ~United Press International

ROCHESTER, NY (JAN. 24) UPI - An accused serial killer pleaded innocent Wednesday to the strangulations of 10 women, nine of them prostitutes, during a period starting in March 1988.

Monroe County Judge Donald Wisner accepted the plea entered by Arthur Shawcross's lawyer and set March 26 as the start of pretrial hearings. He encouraged lawyers for both sides to do what they can to help keep the complex case moving at reasonable speed.

''I know this is going to be a complicated and drawn-out affair,'' Wisner said. ''I would like to try and get a handle on it.''

Wisner also gave defense attorney David Murante preliminary approval for the appointment of a second defense attorney to assist him with his case.

Murante said he would not request bail for his client.

Shawcross, 45, a paroled child killer, remains in custody in Monroe County Jail. He also faces charges he murdered an 11th woman last November in neighboring Wayne County.

Of the pretrial proceedings, Wisner said he expects ''there's going to be a fairly lengthy hearing'' on the admissibility of voluntary, incriminating statements Shawcross allegedly made to police after his arrest.

Still to be decided is whether Shawcross faces one trial covering all of the second-degree murder counts or 10 separate trials. Assistant county prosecutor Charles Siragusa noted a grand jury handed up a single multiple-count indictment, and said he would prefer to conduct one trial.

A 23-member grand jury Tuesday indicted Shawcross in the murders. County District Attorney Howard Relin said he does not expect Shawcross to be charged with any other crimes.

Rochester police are still trying to solve the murders of five other area women that had been part of the Shawcross inquiry. Police in suburban Brighton want to talk to Shawcross about the August 1989 death of a woman

in a Brighton motel.

#90024u1276 01/24/1990 ~United Press International
SALT LAKE CITY (JAN. 24) UPI - A small earthquake measuring 3.7 on the Richter scale rumbled north of the Great Salt Lake Wednesday but there were no reports of damage, University of Utah Seismograph Stations officials said.

The epicenter of the 2:03 a.m. temblor was 10 miles northwest of the Golden Spike National Historic Monument, or about 70 miles northwest of Salt Lake City, said seismic anaylist Linda Hall.

''We don't have any reports of damage or having been felt,'' Hall said. ''We don't expect damage at this magnitude.''

''This earthquake occurred in the same general area as the 1934 magnitude 6.6 Hansel Valley earthquake, one of the largest that has occurred in Utah since its settlement,'' she said.

The most significant recent quake in the area was one of a magnitude 4.8 on July 3 in the Blue Spring Hills, about 13 miles southeast of Wednesday's temblor, Hall said.

#90024u1310 01/24/1990 ~United Press International
(JAN. 24) UPI - Stations: Insert upcoming Bush-sub here.

Republican leaders in the House are predicting an over-ride of a presidential veto of a bill protecting Chinese students from government reprisal. Conservative Republicans joined a wave of Democrats in indirectly criticizing President Bush's diplomatic overtures to China's leadership after it had ordered troops to fire on pro-reform demonstrators in Beijing last June.

Soviet reports say the Red Army has sealed off most of the Iranian-Soviet border in order to stem the flow of arms from sympathetic Iranians to nationalists in the republic of Azerbaijan . But militant Moslems in Azerbaijan are vowing to drive the Soviet army back into Russia. The Red Army intervened during the weekend to save Christian Armenians from the Moslem Azerbaijanis.

The lawyer who defended Nicolae and Elena Ceausescu at their trial before a military tribunal says in a London newspaper that the Romanian leaders scoffed at their death sentence. The lawyer says the pair was executed about 15 minutes after sentencing... shot by surprise as they marched

across a prison yard. He says there was NO organized firing squad.

Romania's provisional government says it will ask the United Nations to monitor the nation's first democratic elections in more than four decades. The elections are scheduled for May 20th. Romania's official news agency also says the ruling National Salvation Front will form a political party and compete with more than a dozen other parties that recently have formed.

(JAN. 24) UPI - Police in New York are crediting a bulletproof vest with saving the life of a detective who was shot squarely in the chest yesterday in Brooklyn. Officials say Michael Reiter and another officer chased a suspect who turned and fired as he entered a residential building. Reiter was struck... but he and his partner returned fire... killing the suspect.

Police in New Zealand are investigating an alleged terrorist plot to disrupt the Commonwealth Games. The games' operation commander says authorities conducted dawn raids on homes in the Auckland area after receiving reports of illegal weapons. The search found two rifles... but police are continuing the search for a rocket launcher.

Authorities in South Africa say one woman was killed when police exchanged gunfire with black demonstrators near a courthouse on the outskirts of the port city of Durban. A police statement says yesterday's shooting occurred in a black township near Durban after a large group of blacks marched on a court and demanded to see the magistrate.

Officials in Florida say Lynyrd Skynyrd guitarist Allen Collins died in a Jacksonville hospital yesterday after a lengthy illness. He was 37. Collins had been in the hospital for more than four months with what friends described as a combination of pneumonia and other respiratory problems. He was paralyzed from the waist down in a 1986 traffic accident that killed his girlfriend.

TRUMBULL, CT (JAN. 24) UPI - The president of Little League Inc., concerned about exploitation of youngsters, has told the world champion Trumbull Little League baseball team to halt its public appearances or risk losing its charter.

Creighton Hale, president of the Little League Inc. in Williamsport, Pa., said he wants to see the appearances stopped, John DelVecchio, president of the Trumbull Little League, said Tuesday.

Hale was concerned about exploitation, said DelVecchio, who has canceled the team's appearance at the Connecticut Sports Writers' Alliance Gold Key dinner on Feb. 4.

Hale said in a statement, ''We need to protect them from what adults sometimes do, which is overglorify them from the things they sometimes accomplish.''

Manager Tom Galla, whose squad became the first American team to win the Little League World Series since 1983, said he welcomed the directive from Williamsport.

Galla, whose youngsters defeated Taiwan 5-2 in August to win the crown, said as much fun as the events have been, ''they became tiring.''

Since they won, the team's 14 members have met President Bush, been featured in sports magazines, appeared on national television shows, and attended professional baseball's World Series in Oakland, Calif.

#90024u1324 01/24/1990 ~United Press International
NEW YORK (JAN. 24) UPI - The defense Wednesday tried to cast doubt on the reliability of tapes of conversations in the headquarters of reputed Mafia boss John Gotti.

FBI agent Bruce Koenig, an expert in analyzing tape recordings, took the stand before the state Supreme Court jury in Gotti's assault trial was allowed to hear some of the 1,001 hours of tapes.

One of the tapes reportedly has Gotti saying ''bust him up,'' in reference to the shooting and wounding of John O'Connor, a carpenters union official apparently in retalation for ordering the vandalizing of a Gambino-linked restaurant that used non-union labor.

Gotti, 49, the reputed head of the Gambino organized crime family, is charged with assault and conspiracy for ordering the May 1986 shooting.

His lawyers maintain the clandestine bugging of the Bergin Hunt and Fish Club in Queens, Gotti's headquarters, produced tapes that were not only

muffled and at times inaudible but may have been tampered with.

''In all your years have you ever found any prosecutor's offices - state, federal or local - that tampered with a tape?'' defense attorney Gerald Sharget asked Koenig.

''I have found a number of tapes that were just not what they were supposed to be,'' Koenig replied.

However, he testified later under questioning by prosecutor Barbara Ditatta that many of the questionable tapes were never admitted as evidence.

''In a number of those cases the tapes were thrown out of court,'' he said.

Judge Edward McLaughlin has already said he would allow the tapes to be played to the jury.

In testimony Tuesday, a state official described how he persuaded the government not to return to the club to replace the bugs when they proved to be faulty because of a close call while agents were installing them in the first place.

As a result, they were left intact, resulting in the failure of one bug and inaudible spots on some of the tapes.

Gotti's co-defendant, Anthony ''Tony Lee'' Guerrieri, 60, a reputed Gambino soldier, is accused of helping plan the attack police say was carried out by the Westies, a murderous Irish gang from Hell's Kitchen anxious to gain favor with the Gambinos.

The revenge shooting came four months after a carpenters union goon squad vandalized a Gambino-linked restaurant to protest the use of non-union labor.

#90024u1339 01/24/1990 ~United Press International

WASHINGTON (JAN. 24) UPI - President-elect Fernando Collor de Mello of Brazil arrives in Washington Friday for what a Brazilian diplomat said will be an ''essentially political'' visit.

Collor de Mello will meet with President Bush and other U.S. officials before leaving Saturday for Japan and a swing through several European countries, including the Soviet Union.

While in Washington he also will meet with representatives of the multinational lending agencies such as the World Bank, International

Monetary Fund and Inter-American Development Banks.

''The visit will be essentially political,'' said Jose Carlos Fonseca, a secretary at the Brazilian Embassy. ''Since it is not an official visit, there will be no accords or negotiations.''

Nonetheless, Brazil's $115 billion foreign debt - largest in the Third World - protective tariffs, the environment, permitting foreign technology to enter Brazilian markets, and bilateral trade matters undoubtedly will be on the agenda in Collor's talks with U.S. officials.

Fonseca said the purpose of the visit is to discuss Brazil's transition to full democracy and Collor's ideas on how he will run the government after he takes office March 15.

''He is coming to show his leadership of the new Brazil,'' Fonseca said.

Collor will be in New York Thursday where he will attend a luncheon of the Council of the Americas and the Brazilian-American Chamber of Commerce. He also will call on U.N. Secretary-General Javier Perez de Cuellar.

In Washington, after meeting separately Friday with Bush and Vice President Dan Quayle, he will have lunch with Secretary of State James Baker. He also will give a talk at th National Press Club and will be received at the Organization of American States.

After a breakfast meeting Saturday with U.S. Trade Representative Carla Hills, Collor will fly to Tokyo. His itinerary also includes Madrid, Bonn, Paris and Moscow.

Collor was the leading vote-getter in a field of 21 candidates in Brazil's Nov. 15 presidential election. In a runoff vote Dec. 17, he defeated leftist labor leader Luis Inacio da Silva.

His election in the first national presidential election in Brazil since 1960 marked the full return of democracy in Latin America's largest country after more than two decades of military rule.

Collor, at 40 the youngest president in Brazil's history, campaigned on a platform that advocated restoring a free market economy to Brazil, eliminating corruption in government, increasing tax collections and privatizing many of the country's 171 state-owned businesses and industries.

#90024u1376 01/24/1990 ~United Press International

(JAN. 24) UPI - TODAY'S PEOPLE:

TRUMP SPEAKS HIS MIND: Donald Trump insists that he isn't going to run for president but that doesn't stop him from espousing a few bold opinions on commerce and international affairs. ''I predict (Mikhail Gorbachev) will be overthrown because he has shown extraordinary weakness,'' Trump says in an interview in the March Playboy. ''Suddenly, for the first time ever, there are coal miner strikes and brush fires everywhere, which will all ultimately lead to a violent revolution.'' As for the United States, Trump says, ''Some of our presidents have been incredible jerk-offs. We need to be tough. I'd do the job as well as or better than anyone else. I like George Bush very much but I disagree with him when he talks of a kinder, gentler America. I think if this country gets any kinder or gentler, it's literally going to cease to exist. (The United States) is being ripped off so badly by our so-called allies - i.e., Japan, West Germany, Saudi Arabia South Korea.''

BIG MAN WITH THE BOSS: Now that Bruce Springsteen's E Street Band is in abeyance, saxophonist Clarence Clemons is hitting the road with his own band, the Red Bank Rockers. Clemons, who recently released his third solo album, has 12 dates set, starting Jan. 31 in Ontario, and then will tour Europe. ''I'm just really glad to be out there playing saxophone,'' Clemons said. ''I didn't get to play as much as I wanted on the last few E Street tours and I knew the only way to make it happen was to do it on my own.'' Clemon's tour includes two nights, Feb. 9-10, at the Stone Pony, the Asbury Park, N.J., bar where Springsteen and the E Streeters built their reputation.

ASK DR. ROX: Roxanne Pulitzer, the Palm Beach, Fla., socialite who made headlines with her steamy 1982 divorce from publishing magnate Herbert Pulitzer, has a new part-time gig. She hosted her first radio call-in show for Florida station WJNO-AM during the weekend, dispensing advice on custody battles, writing and sex. ''I feel like I know you personally,'' gushed a fan who had read her highly detailed autobiography, ''The Prize Pulitzer.'' Pulitzer replied, ''You do, and so does the world. You know where my birthmarks are.'' Pulitzer, who also posed nude for Playboy, joked with her listeners that she had started drinking 15 cups of coffee a day after reading about a study linking caffeine to sex drive. Assistant program director Doug Young said he would love to hire Roxanne on a regular basis but thought it was unlikely she would agree to that. ''She doesn't need the aggravation,'' he said.

CHEERS FOR THE ENVIRONMENT: The cast of ''Cheers'' did some lobbying Tuesday in Los Angeles. Ted Danson, who has long been involved in environmental causes, Kirstie Alley, Rhea Perlman, George Wendt, Woody Harrelson and John Ratzenberger joined people at a federal building to protest the use of the spray malathion in fighting the Mediterranean fruit fly. ''Every time you use a pesticide, it ends up getting washed off the street, it gets into the water system and eventually into the ocean,''

Danson said. Alley echoed Danson by saying, ''I am concerned for the well-being of unborn children. Stop (malathion spraying) until proper testing is done and then take a vote. I don't want somebody telling me that I have to be sprayed.''

FLO JO'S FASHION: Florence Griffith Joyner, whose flair for fashion is exceeded only by her speed, proudly unveiled her latest creation Wednesday - new uniforms for the Indiana Pacers basketball team. Joyner, the Olympic sprint champion, dazzled the track world with her one-legged running outfits and wildly painted extra-long fingernails but had to keep the basketball uniforms comparatively sedate. ''I was going to put a little lace somewhere and make a one-legger but they (NBA officials) wouldn't let me,'' she said. ''I'm very pleased with the way it turned out. I was really concerned with how it would feel for the players. Designing for men 6-feet tall is very different from what I'm used to. I didn't want it to look too flashy.'' Joyner's creations are dark blue with gold trim and have colored triangles going down one side.

#90024u1379 01/24/1990 ~United Press International

VATICAN CITY (JAN. 24) UPI - Pope John Paul II asked Catholics Wednesday to pray for his success in visiting five famine-ridden nations in West and Central Africa on a trip called one of his ''most difficult'' because most residents are Moslems or Animists.

''I ask you to pray for my imminent pastoral visit in order that the African brothers I shall have the joy to meet become ever more aware of the saving truth of the gospel,'' the pope told some 5,000 tourists and pilgrims attending his weekly general audience in the Vatican.

The 69-year-old pope leaves Rome at 11 a.m. Thursday for the eight-day visit to the Cape Verde islands and the republics of Guinea-Bissau, Mali, Burkina Faso and Chad, all countries in the drought-ridden Sahel region south of the Sahara desert.

Reports of severe fogs and dust storms in the tiny Atlantic islands off the west coast of Africa raised fears the pope may have to amend the island-hopping schedule at the outset of his visit.

It is John Paul's 45th trip outside Italy and his sixth to Africa since he was elected head of the Roman Catholic Church in October 1978. It will last eight days, from Jan. 25 through Feb. 1.

John Paul has repeatedly expressed his particular love for the peoples of Africa, a continent where the Catholic Church is enjoying a steady expansion.

But the countries he is visiting are among the poorest in the world, ravaged by hunger largely because of drought and in several cases plagued by military coups since they became independent from their former Portuguese and French colonial rulers.

Except for the Cape Verde islands, where the Church says the 318,000 inhabitants are 91 percent Catholic, the countries the pope will visit are dominated by the Moslem and traditional Animist - spirit-worshipping - religions.

Catholics in Guinea-Bissau, Mali, Burkina Faso and Chad account for only 1-8 percent of the population.

''This will be one of the most difficult trips the pope has made,'' Czechoslovak Cardinal Jozef Tomko, Prefect of the Congregation for the Evangelization of Peoples, told reporters. Tomko is accompanying John Paul on the trip.

A major aim of the pope's trip is undoubtedly to draw world attention to the plight of the peoples in the five countries he is visiting, where a 20 percent population growth adds to the problems of economic development.

In Ouagadougou, capital of Burkina Faso - formerly known as Upper Volta - the pope on Monday will celebrate the 10th anniversary of an appeal he made during a previous visit there May 10, 1980, for international aid to the drought-stricken Sahel region.

At that time the pope set up the ''John Paul II Foundation'' to administer funds sent to the Holy See by rich countries, particularly West Germany, in response to his Sahel appeal.

John Paul also will visit a modern leper colony in Guinea-Bissau on Sunday International Lepers' Day. The pope will publish a letter of support for victims of leprosy throughout the world.

In his 35 speeches and homilies, the pope is expected to urge Africans to live in peace and harmony and to maintain their traditional values in face of the incursions of the materialistic modern world.

#90024u1391 01/24/1990 ~United Press International

KING OF PRUSSIA, PA (JAN. 24) UPI - General Electric Aerospace plans to cut its work force by 5,600 jobs in the next two years because of slackening defense contracts and increased competition, a published report said Wednesday.

GE Aerospace spokesman Don Norton said the payroll cuts would be acheived

through a combination of layoffs and attrition but he refused to say how many workers would be cut from which plants, the Philadelphia Inquirer reported.

Company officials were at ''an off-site meeting'' Wednesday and were not available for comment, secretaries at the Montgomery County based firm said.

About 4,000 jobs will be eliminated this year and the remaining 1,600 will be cut next year, Norton said.

In 1989, GE Aerospace, the nation's third-largest defense contractor, cut its payrolls by 4,775 workers.

Applied uniformly, the announced cuts, some 14 percent of the company's work force, mean a loss of 2,550 jobs in plants in the Philadelphia-South Jersey area, the Inquirer reported.

But, if last year's cutbacks are any indication, GE Aerospace's Camden, N.J., plant and its re-entry systems operations in Philadelphia would be hit the hardest.

The Camden plant lost 621 workers, or 19 percent of its work force, last year while in Philadelphia the company cut payrolls by 300 jobs, 26 percent of the work force.

In the first quarter of this year alone, some 300 jobs are slated to be cut at the Camden plant where 20,000 persons once worked, an unnamed source told the Inquirer.

The payroll cuts come as General Electric Co., GE Aerospace's parent company, reported a 9 percent increase in revenues in 1989 to $54.6 billion.

General Electric Co. said the performance of its aerospace subsidiary remained almost unchanged from 1988, when it reported revenues of $5.3 billion.

Defense contractors have been faced in recent years with declining defense budgets in real terms, appropriations and pricing scandals, increased public concern over the federal deficit and fiercer competition in the international arms market.

In addition, Defense Department officials are studying ways to trim the defense budget, including elimination of entire programs, and improved relations with the Soviet Union will heighten Congressional calls for deeper cuts.

GE Aerospace makes military communications systems, ballistic missile nose cones, satellites and aircraft and aerospace electronics equipment.

The company also has plants in East Windsor and Moorestown, N.J.; Utica, Binghampton and Syracuse, N.Y.; Pittsfield and Burlington, Mass.; Daytona Beach and Largo, Fla.; Huntsville, Ala. and Burlington, Vt.

#90024u1392 01/24/1990 ~United Press International

BUENA PARK, CA (JAN. 24) UPI - Charles Rothenberg, who set fire to his 6-year-old son in 1983 and severely disfigured the boy, was freed from prison Wednesday to a secret location where he will be the most closely watched parolee in state history.

Escorted by two parole agents, Rothenberg was released shortly past midnight after 6 1/2 years in state prison and was driven to his parole destination, which authorities said they must keep secret because of intense public reaction to his crime.

Rothenberg was clandestinely moved out of the California Men's Colony on Tuesday to avoid a ''media circus,'' authorities said.

His son, David Rothenberg, now 13, was asleep in a Buena Park motel room in the spring of 1983 when his father poured kerosene around his bed and set it on fire, burning him beyond recognition.

The youth called a news conference later Wednesday to discuss his father's parole. He has said he is terrified of his father and never wants to see him again.

Tipton Kindel, a spokesman for the state Department of Corrections, said Rothenberg's three-year parole will be the most restrictive of any state parolee, costing taxpayers more than $200,000 a year.

Much of the costs will pay the salaries of three full-time parole agents who will watch Rothenberg 24 hours a day to ensure he does not contact his son. He must also wear a cigarette box-sized electronic surveillance transmitter and anklet that will signal authorities if he leaves his assigned area.

Kindel said while the state is prepared to continue the 24-hour surveillance for the full three years of Rothenberg's parole, authorities ''may re-evaluate'' over time whether such extensive monitoring is necessary.

Rothenberg, 49, has expressed remorse for what he did but has also said he would like to see his son again.

That appeared unlikely because his parole destination is ''not anywhere close'' to Orange County, where David lives with his mother, who has since married a police lieutenant who worked on the investigation, Kindel said.

''Our parole division has been in close contact with the family and they are aware of all of the developments, except the specific detailed location,'' Kindel said. ''They have a general idea.''

When prison authorities said several weeks ago they wanted to parole Rothenberg to a town in the California desert, outraged residents vetoed the plan.

Fueling community fears are statistics on violent crime and recidivism. According to a Justice Department report last March, 62.5 percent of all inmates released from state prisons in 1983 committed a felony or serious misdemeanor within three years.

Rothenberg was convicted of attempted murder, arson and other crimes in the March 3, 1983, fire in the Buena Park Travelodge. He received a 13-year sentence, the maximum penalty under state laws that have since been toughened. If Rothenberg had been sentenced today, he could have been sent to prison for life.

His sentence was cut in half after serving as a model prisoner at Soledad State Prison and the Men's Colony.

Rothenberg, who has spent much of his life in prison, was divorced from David's mother, then living in New York, when he asked to take his son on a weeklong vacation to the Catskills in 1983. Instead, he spirited David to Southern California for visits to Disneyland and Knott's Berry Farm.

After a week of rain, he called his ex-wife asking for more time with the boy and accidentally revealed that they were not in New York state. Marie Rothenberg became angry and told her ex-husband he would never see his son again once they returned to New York.

The same day, Rothenberg checked into the Buena Park motel with his son, kissed the boy goodbye and set his bed on fire as he slept. Leaving David for dead, Rothenberg went to a phone booth across the street and watched as flames billowed from the motel. Other motel guests dragged David to safety.

The boy has undergone more than 100 painful skin grafts and had other reconstructive surgery to repair the damage from burns over 90 percent of his body. He now seems to be living as a normal teenager, hanging out in video arcades, skateboarding and looking forward to an upcoming school dance. Friends say he is among the most popular kids in school.

In recent interviews he said he has nightmares about his father coming back to hurt him and his mother, whom Rothenberg has said was the indirect target of his act.

#90024u1403 01/24/1990 ~United Press International

WASHINGTON (JAN. 24) UPI - Twenty-five activists protesting U.S. aid to El Salvador were arrested Wednesday inside a House office building, more than half of them removed by police from a congressional hearing.

The demonstration marked the second such act of civil disobedience on Capitol Hill this week organized as part of a series of demonstrations nationwide by the activist group Pledge of Resistance.

Thirty-seven people, including actor Martin Sheen, were arrested in a related protest in the Capitol Rotunda Tuesday.

The protest Wednesday came during the testimony of Assistant Secretary of State Bernard Aronson, the administration's pointman on Latin American policy, before the House Foreign Affairs subcommittee on Western Hemisphere Affairs.

As Aronson began speaking, demonstrators began standing two or three at a time in the audience to voice condemnations of ''murders'' and ''atrocities'' they said were being carried out by the Salvadoran army with U.S. backing.

Several women in the group donned white masks.

Most of the demonstrators spoke in controlled, conversational tones before U.S. Capitol Police officers escorted them peacefully out of the committee room in the Rayburn House Office Building.

One man shouted, ''My money is being used to finance terrorists,'' as he was wrestled out of the chamber and into the hallway.

In all, 15 were removed from the hearing room and were charged with disrupting an orderly session of congress and demonstrating within a capitol building, both misdemeanors, police spokesman Dan Nichols said.

Ten more activists were arrested on the same charges when they staged a demonstration in the hallway outside the hearing room, Nichols said.

Subcommittee chairman Rep. Gus Yatron, D-Pa., admonished the demonstrators in the hearing room to take their seats and refrain from disruptions.

''You are achieving the opposite of what you intend,'' he told them.

Aronson departed from his prepared remarks to acknowledge the demonstrators' strong feelings, but said they ''should not be depriving others of the right to speak.''

The Pledge of Resistance is calling for an end to U.S. support for the government of El Salvador, now at about $500 million a year.

Ken Butigan, a spokesman for the group, said an aid cutoff would ''give an incentive for a negotiated political settlement'' between the government of Salvadoran President Alfredo Cristiani and leftist rebels.

The decade-long conflict between the government and rebels of the Farabundo Marti National Liberation Front, or FMLN, has cost more than 72,000 lives.

Butigan said some 2,300 activists opposed to U.S. aid to El Salvador have been arrested in about 500 demonstrations across the country since November.

In New Haven, Conn., Yale University students opposed to U.S. aid to El Salvador sent out fake draft notices telling about 1,400 classmates to report for active duty in Central America, officials said Wednesday.

The phony marching orders were put in dormitory mailboxes early Tuesday and told the Ivy League students to report to the New Haven Armed Forces recruiting office at 8 a.m. Saturday.

The bogus orders listed a toll-free telephone number the students could call for more information that turned out to be the number for the Wethersfield office of Sen. Christopher Dodd, D-Conn.

On Tuesday, about 250 demonstrators cheered as buckets of blood were splattered on the doors of the old Federal Building in Minneapolis, Minn., to protest continued U.S. aid to El Salvador.

Protesters urged people to write their congressmen and to boycott El Salvadoran coffee as ways to show their opposition to the Salvadoran government.

LONDON (JAN. 24) UPI - Stock prices closed lower in moderate trading Wednesday on the London International stock exchange as the sharp drops in Tokyo and New York rattled investor confidence.

The Financial Times 100-stock index, which slipped 0.3 points Tuesday, closed down 12.5 points at 2,278.6. The narrower top 30 industrial average fell 11.0 points to 1,828.6.

Volume amounted to around 495 million shares, compared with 481 million shares traded Tuesday.

Analysts said prices fell across a broad front from the opening bell in the wake of the precipitous 599.04 point fall on the Tokyo Stock Exchange, fueled in part by concern over the outcome of next month's national election in Japan.

But there was also concern about political instability in Eastern Europe and the Soviet Union and about poor fourth-quarter earnings at some major U.S. companies.

A late rally surfaced following news that British workers of Ford Motor Co. voted to accept the company's contract offer, analysts said.

International issues took a beating as the market reacted to Tokyo's severe drop.

Ferranti added 3 cents to 56 cents a share on news the company would sell its radar manufacturing business for $508 million to rival General Electric Company. GEC added 2 cents to 3.68 on the news.

B.A.T. Industries dropped 22 cents to $12.64 on continued doubts about the Hoylake takeover bid.

The insurance sector received a boost late in the session on rumors that the French Union Assurances de Paris was looking to invest the proceeds of a rights issue in a British company.

General Accident climbed 30 cents to $18.05, Royal Insurance gained 21 cents to $8.38 and Sun Alliance gained 11 cents to $5.15.

#90024u1451 01/24/1990 ~United Press International

WASHINGTON (JAN. 24) UPI - The Federal Reserve said Wednesday the U.S. economy is expanding slowly in most of the nation with conditions in the West stronger than in the East.

The Fed said its outlook for 1990 calls for slow growth in each of its 12 districts, with some improvement expected in certain areas later in the year.

Retail sales during the holiday season were mixed, ranging from

''disappointing'' in Boston to ''relatively strong'' in Chicago, Minneapolis and Atlanta, the Fed said.

Widespread discounting, however, generally reduced overall store profits. Retailers expect flat sales or modest increase through the first six months of this year.

Manufacturing activity was sluggish in general with production declines noted in the automobile industry. This decline offset gains in other manufacturing sectors, such as, commercial aircraft and oil field equipment, the Fed said.

Several of the Fed's 12 districts reported a ''bottoming out'' in the steel and computer industries.

The unseasonably cold weather weakened construction activity in some areas but the Fed said real estate markets reamined steady. Citrus, vegetable and winter wheat crops were adversely affected by the cold spell.

The Fed's report offered the following snapshots of economic activity in each of its 12 districts:

-Boston: The region experienced mixed economic conditions. Although retailers reported disappointing sales, manufacturers and real estate sales agents posted modest gains. Expectations are for a continued economic softening for the first half of the year.

-New York: Regional economy has continued to show little change from previously mixed pattern. Department stores reported uneven sales and homebuilding was seasonally slow.

-Philadelphia: The new year began with mixed economic conditions, although manufacturing continued to slacken. Retailers posted modest gains and overall loan volume at major banks grew steadily. Economic outlook calls for very modest expansion.

-Cleveland: Retailers expect sluggish first-half sales and softening expected in high-technology industries. Slow growth is expected in output, although manufacturers believe the worst is over. Auto production predicted to rise above annual rate of 6 million units in February and March, if sales respond to incentive programs. Steel production cut to 80 percent of capacity.

-Richmond: Economic activity mixed after sluggish November. Retail sales solid but the slowdown in manufacturing became more pronounced.

-Atlanta: Economic activity continued to expand sluggishly. Weakness reported in industries producing goods for residential and commercial

construction and automobiles. Retailers posted modest sales gains, but profit margins reduced by price-slashing and heavy advertising.

-Chicago: Manufacturing showing signs of slowing in auto-related industries while slight improvements were shown in other areas. Retailers reported high volume of sales. Regional economy expected to show steady improvement.

-St. Louis: Slow economic growth continues. Job growth has been sluggish. Retailers report average to better-than-expected sales. Energy consumption up in December because of cold weather. Analysts expect slow growth to continue.

-Minneapolis: Economic conditions termed ''moderately good.'' Employment has been mixed. Tourist spending has been moderately strong.

-Kansas City: Regional economy growing modestly. Retailers posted anticipated sales, but sluggishness noted in auto sales. Most manufacturing plants operating below capacity. Oil and gas drilling activity increasing and agriculture showed a strong financial performance.

-Dallas: Economic growth accelerated since the most recent report. Demand for manufactured products is increasing. Retail sales growing faster than national average. Auto sales weak. Energy activity is picking up and service industries continue to expand. Construction industry making modest recovery. Agriculture hit hard by cold weather.

-San Francisco: Economic conditions remain healthy. Retail sales generally strong, but discounting held down profits. Wages rising in Washington. Manufacturing steady with strong commercial aircraft orders offsetting weak electronics orders. High prices boosting agricultural earnings and oil drilling. Construction and real estate remain strong, except in Arizona.

#90024u1475 01/24/1990 ~United Press International

MANCHESTER, NH (JAN. 24) UPI - A fathers' rights advocate who staged a 34-day hunger strike while he was in prison for failing to pay child support was ordered Wednesday to get a job and start making payments to his ex-wife.

Maurice Small, 48, of Nashua, was jailed Dec. 20 for contempt of court after refusing to pay part of the $13,000 he owes in back child support.

He said he refused to make the court-ordered child support payments because he had lost custody of their two children to his ex-wife.

Small, a decertified psychologist, is the unpaid head of Fathers United for Equal Justice, a fathers' rights group that claims fathers are unfairly treated in divorce cases in New Hampshire courts. He said he began the hunger strike to protest the child support order.

Small was released from the Hillsborough County Jail Monday night because authorities feared his health was in jeopardy after losing 51 pounds during the hunger strike.

At a 40-minute hearing Wednesday, Superior Court Judge William Groff gave Small a week to recover from the strike. He ordered Small to find a part- or full-time job by Feb. 18 and have his employer deduct $100 per week to pay the child support.

Despite his weakened condition, Small said he would continue to refuse to give his ex-wife, Sandra Small, money ''to babysit my children.'' He said he is willing to pay support, but only directly to the children.

''I am not a slave (to my wife),'' he said.

Groff scheduled another hearing on March 21 to determine if Small is complying with his order.

His ex-wife was present during the hearing but refused comment.

The couple were divorced in 1984. They have two children, Daniel, 17; and Lise, 15.

#90024u1478 01/24/1990 ~United Press International

MOSCOW (JAN. 24) UPI - The Red Army, ignoring an Azerbaijani secession ultimatum, took control of the volatile border with Iran Wednesday, and a Foreign Ministry spokesman vowed Mikhail Gorbachev would not allow dissident republics to break away from the Soviet Union.

''Who is going to preside over the dissolution of the Soviet Union? Not Gorbachev,'' the spokesman, Gennady Gerasimov, said when asked if the Kremlin would allow the dissident republics of Azerbaijan and Lithuania to break away.

Azerbaijan's parliament had threatened to consider secession if the Red Army did not pull out by 6 a.m. Wednesday, and militant Azerbaijanis, vowing to drive the Soviet army back into Russia, blockaded Soviet naval vessels in Baku harbor and at other naval facilities on the Caspian Sea.

Soviet troops shot their way into Baku Saturday to quash the worst ethnic violence in a two-year dispute between Moslem Azerbaijanis and Christian

Armenians over the enclave of Nagorno-Karabakh.

Gerasimov conceded the Soviet president may have been hurt politically by ordering in the Red Army to halt the fratricidal killing but said no one else could now rule.

''There is no real threat to (our leadership),'' Gerasimov said. ''Why should there be. Because there is no alternative leader and no alternative policy.''

But he said, ''If you ask the question, who benefits from this trouble, then certainly conservative forces do benefit, because it's an additional argument for them against perestroika.''

The official Tass agency reported a mounting casualty toll in the battle of Baku now in its fifth day. It said 93 people had died, 75 of them civilians, and 715 people were injured. There were 639 civilians among the wounded, it said.

Although the Azerbaijani capital of 1.8 million people, fifth largest city in the Soviet Union, was still not pacified, Soviet forces slicing south completely sealed the 500-mile border with Iran.

A general strike immobilized the capital for the second straight day. Leaders of the Azerbaijani Popular Front vowed to maintain it until the 24,000 regular Soviet army and interior forces and sailors leave.

''(In Baku) it's dead silence, disrupted by sporadic shooting,'' said Zaur Rustam-Zadeh, deputy chief representative of the Azerbaijani Mission in Moscow.

Roving hit squads on motorcycles dash through the capital at night, throwing explosives at patrols and opening fire, the Izvestia government newspaper said.

Tass reported that power supplies had been reduced due to a lack of oil. The news agency said power was off at the Zangezur Copper and Molybdenum works, one of the largest Soviet suppliers of rare non-ferrous metals. Power also was cut at the Kanakeer Aluminum plant.

Neon signs and some street lights were cut off in the city, Tass said, and domestic electricity was reduced.

Izvestia said the battle for Salyansky Barracks still raged with Azerbaijani snipers on roofs firing at soldiers pinned down inside. The sharpshooters use huge spotlights to fire at night, the media has reported.

Gorbachev ordered the Baku incursion to quash the worst ethnic violence in

a two-year dispute between Azerbaijan and Armenia over the enclave of Nagorno-Karabakh. The conflict has claimed more than 300 lives, and more than 150 have died since Azerbaijani militants called for renewed pogroms Jan. 13.

Gerasimov told a news conference, ''The situation on the Soviet-Iran border is completely under control. Three-hundred-twenty-two people crossed this border from Azerbaijan to Iran completely legally and 1,600 crossed the border in the opposite direction. And 366 were stopped for trying to cross illegaly. So these stastistics show the border is under control.

''But that cannot be said of the situation in general. It's tense. In Baku itself, we have civil disobedience and the city's public transportation is not working.''

The frontier was breached by Azerbaijanis over the New Year holiday and they had used it as a gateway to bring across heavy weapons including armored personnel carriers left over from the Iran-Iraq war, one well-connected source in Moscow said.

In an atmosphere where passions seethed, it was difficult to distinguish rhetoric from truth. Western reporters have not been permitted into the area.

In the last two days, Tass bannered two dispatches with the headline: ''Rumors are rife in Baku.''

Soviet television has called the crisis - the most violent, most serious and protracted that Gorbachev has faced in his nearly five years in office - the country's ''most trying days since World War II.''

No Soviet republic has ever seceded despite its constitutional right to do so. One deterrent always has been fear of a Red Army invasion to undo any political separation.

#90024u1480 01/24/1990 ~United Press International

WASHINGTON (JAN. 24) UPI - The founder and former publisher of the Washington Journalism Review Wednesday announced plans to start a third daily newspaper in Washington, which he says will cover the ''industry of politics'' in the nation's capital.

Roger Kranz said The Washington Reporter will publish Monday through Friday and provide news on federal government, politics, lobbying, law and the media for policy makers and opinion leaders in Washington, D.C.

Kranz said he hopes to begin publication Oct. 1, but still must raise some of an estimated $15 million needed to keep the paper operational its first year.

The newspaper, the first attempt to launch a daily in the city since The Washington Times began publishing in 1981, will be a ''trade newspaper for Washington, for industry in Washington,'' written ''for and about people who work here, inside the (Capital) Beltway,'' Kranz said.

Kranz, 39, a long-time Washington resident who helped launch the Washington Journalism Review while he was still in his 20s, said the newspaper will not attempt to compete head-to-head with Washington's two daily papers: The Washington Post and the Times.

''This is a one-section read, a second read,'' he said. ''The concept of the newspaper is not to try to cover those areas that I think are very well covered (such as sports and local news). But to cover what is not being covered well in Washington - that's the industry of government and politics.

''So, as a second read our aim is to provide news and information to this audience that they're not getting elsewhere,'' Kranz said.

''I have enough seed money to keep this going for quit a while,'' Kranz said, but would not say how much money.

The Washington Post is the only newspaper in Washington that has managed to make money in the past decade. The Washington Star folded in 1981. The Times, which is bankrolled by affiliates of the Unification Church, has yet to make a profit.

Kranz expects to send a 20-page prototype of the newspaper to some 5,000 potential clients in the Washington area in February.

Ultimately, circulation is expected to reach 30,000 with limited same-day distribution to Wall Street and mid-town New York and shuttle terminals in New York, Boston and Washington, Kranz said.

The paper will have a staff of about 100, including 50 reporters and editors, he said.

Kranz's experience in starting publications also includes the National Journal Convention Daily newspapers published during the 1984 and 1988 presidential nominating conventions and The Capital Source, a twice-a-year directory of the most influential people in Washington D.C.

Also involved in the venture are John Prescott, Jr., a 40-year veteran of newspaper publishing; Barry Sussman, a 30 year-veteran of journalism with

25 years of Washington experience and over 20 years with The Post; and Eric Seidman, who began his career in newspaper design in 1967 with The New York Times.

#90024u1492 01/24/1990 ~United Press International

WASHINGTON (JAN. 24) UPI - The head of the Resolution Trust Corp., the government agency created to settle the nation's thrift crisis, said Wednesday the agency needs at least an additional $50 billion to pay depositors of failed thrifts.

William Seidman, chairman of the RTC and the Federal Deposit Insurance Corp., told the House Banking Committee that the agency needs at least $50 billion in working capital to continue its efforts to dispose of the assets of 293 thrifts now under conservatorship.

The agency, which was created as part of the $164 billion thrift bailout bill signed by President Bush in August, has been criticized by several members of Congress who say it is unorganized and moving too slowly to heal the ailing savings industry.

''The RTC has proceeded on the basis that doing it right is better than just doing it fast,'' Seidman said. ''The facts are that much has been accomplished in five months even though we would have liked to have done more.''

Rep. Henry Gonzalez, D-Texas, the committee's chairman, reminded Seidman that Congress had been ''prodded every day by the constant reminder that the bloodletting'' of the savings industry was costing millions of dollars daily.

Seidman said the ''bloodletting'' has continued and will continue ''until the last (thrift) asset is sold by the RTC.''

To accomplish that goal, the agency needs more money. In August Congress approved spending $50 billion for the agency, based on estimates of the cost of the thrift cleanup.

Those estimates, Seidman said, have proven too low. The original $50 billion should last until the middle of next year.

''Our current estimate is that we will need between $45 billion and $55 billion during 1990 and additional amounts during 1991,'' he said.

Seidman said the money is needed to finance troubled thrifts prior to their sale by the RTC. The additional money is needed ''very soon,'' he said, to ensure the resolution of thrifts continues without interruption.

Where the money should come has been the subject of a heated debate between the agency and Congress.

''I don't think we can get any more money from the Congress of the United States,'' said Rep. Frank Annunzio, D-Ill. ''We've already approved $50 billion.''

On Tuesday, Deputy Treasury Secretary John Robson suggested borrowing the money from the Treasury and repaying it with money raised from the sale of reposesed real estate held by the failed thrifts.

#90024u1502 01/24/1990 ~United Press International

WASHINGTON (JAN. 24) UPI - President Bush announced a flurry of judicial nominations Wednesday he plans to send to the Senate, including his choices for federal judgeships in Colorado, Pennsylvania, Kentucky, New York, Alaska, Texas and New Hampshire.

The nominations by Bush, who has been criticized for being slow to fill empty judicial posts and most recently was dogged by Republican senators whose suggestions he chose to ignore, must be confirmed by the Senate.

In a spate of announcements issued at the White House, Bush said he intended to nominate candidates in the following jurisdictions:

-In Pennsylvania, James McClure Jr. to be U.S. District Court judge for the middle district of the state, succeeding William Nealon.

-In Kentucky, Joseph Hood as judge for the eastern district, succeeding Scott Reed.

-In New York, John Martin Jr. for the southern district, succeeding Edward Weinfeld, and Lawrence McKenna, also for the southern district, succeeding William Conner.

-In Colorado, Daniel Sparr to be the U.S. District judge, succeeding John Moore.

-In New Hampshire, Norman Stahl for the state's district judgeship, succeeding Martin Loughlin.

-For Alaska, James Singleton Jr. to be the U.S. Distrct judge for the state, succeeding James Fitzgerald.

-In Texas, John Rainey to be a federal judge for the southern district, succeeding Gabrielle McDonald.

Additionally, Bush said he intended to nominate Alan Lourie of Pennsylvania to be a U.S. circuit judge for the Federal Circuit, succeeding Daniel Friedman; Robert Hodges Jr. of South Carolina to be a judge of the U.S. Claims Court for a term of 15 years, and Raymond Clevenger III of the District of Columbia to a circuit judgeship for the Federal Circuit.

Also announcing two nominations for U.S. Marshal positions, Bush said he intended to forward the names of Donald Tucker for the district of Arizona succeeding John Roberts, and Jack Engor for the district of Colorado, succeeding Charles Dunahue.

#90024u1504 01/24/1990 ~United Press International

GENEVA (JAN. 24) UPI - Talks on delaying British plans to forcibly repatriate thousands of Vietnamese boat people from Hong Kong collapsed Wednesday night because of disagreement between Britain and the United States.

Britain said it was prepared to accept a six-month moratorium until July 1 - starting from Jan. 1 - but the United States insisted on one year with none of the refugees sent back before Jan. 1 next year.

''We were very close to an agreement and we had a prepared text,'' British delegation leader Robin McLaren told reporters after the two-day meeting concluded in failure.

Mclaren said Britain argued that there was ''no objective justification'' for delaying mandatory repatriation of boat people deemed to be economic refugees looking for a better life rather than genuine political refugees.

''However we were prepared in the interests of a consensus to agree to a moratorium and that mandatory repatriation should start on July 1,'' he said.

''Unfortunately, the United States insisted on Jan. 1 next year while Vietnam said Oct. 1 this year,'' McLaren said. ''All the other participants were agreed to the first of July.''

McLaren, assistant undersecretary of state at the British Foreign Office, said U.N. High Commissioner for Refugees Thorwald Stoltenberg of Norway would now consult with Washington and Hanoi to try to get them to change their positions.

The British diplomat ducked the question of whether Prime Minister Margaret Thatcher would now carry out Britain's declared repatriation

policy or wait until July 1.

''I don't know,'' he said. ''A decision is up to the government.''

McLaren argued that the two-day meeting was not a complete failure because ''we have made mandatory repatriation under safeguards including monitoring'' a part of the Comprehensive Plan of Action for Indochinese refugees.

That plan was adopted at a Geneva conference last year by nations most involved - countries of origin, counrties of first asylum like Hong Kong, and the main Western countries of final resettlement led by the United States.

''Agreement eluded us this time but it was not the last time,'' McLaren said. ''People will now go away and think again. We hope the high commissioner for refugees will ... get agreement as soon as possible.

''We believe repatriation is the answer whether or not people agree to return voluntarily (and) the only thing to decide now is when it should begin.''

There are some 41,000 boat people in Hong Kong held by Britain to be mostly economic refugees who should be forced back to Vietnam if they refuse to return voluntarily.

Tens of thousands of other Vietnamese boat people are crowding other first asylum countries in Southeast Asia such as Thailand and the Philippines.

Those countries especially supported the British at the latest Geneva talks.

U.S. officials said before the meeting that Washington opposes forced repatriation because conditions in Vietnam remain unchanged and preclude guarantees of fair treatment and no punishment for returning nationals.

American delegation leader Robert Funseth, senior deputy assistant secretary of state for refugee affairs, did not make a statement after the collapse of the talks, however, and aides said he was leaving comment to Washington.

#90024u1512 01/24/1990 ~United Press International

HONOLULU (UPI) - Poor weather hampered an air and sea search Wednesday for a serviceman missing after a Marine Corps helicopter with four men aboard crashed between Oahu and Molokai Monday night, Marine officials said.

The Boeing Vertol CH-46 ''Sea Knight'' helicopter was reported down at 7:10 p.m. HST (12:10 a.m. EST) 20 miles southeast of Oahu and 10 miles southwest of Molokai, Kaneohe Marine Corps spokesman Kerry Gershaneck said.

The craft had been practicing night deck landings on the USS Alamo, a landing ship dock that was about 35 miles southeast of Oahu, and was on final approach when the accident occurred, Gershaneck said.

Marine Corps officials Wednesday identified the missing man as Corporal Kenneth W. Brown, 29, of Birmingham, Ala.

Three of the injured crew members were pulled from the water by a Marine search and rescue helicopter and flown to Tripler Army Medical Center, Gershaneck said.

All were listed in satisfactory condition, one with a wrist and ankle fracture, another with a broken left shoulder, and the third with bruises and abrasions, hospital spokesman George Vidis said.

The men were identified as pilot Captain Bryce K. Cameron, 32, of St. Louis, co-pilot First Lieutenant Michael D. Busansky, 25, of Lancaster, Pa., and Corporal Denver R. Lambuth, 26, of Deer Park, Texas.

A Coast Guard helicopter and three Marine Corps helicopters joined the Alamo, the destroyer Ingersoll, and the Coast Guard cutter Cape Corwin in searching the area Tuesday but found no sign of the missing man.

The search resumed Wednesday involving the four helicopters and the Alamo and Cape Corwin but was hampered by poor weather due to a storm system hanging over the islands.

The Coast Guard helicopter reported near zero visibility in the search area with seas of more than eight feet and winds of 15 to 30 knots, a spokesman said. Weather forecasters predicted no break in the weather, he said.

#90024u1553 01/24/1990 ~United Press International
(JAN. 24) UPI - President Bush made his first direct comment on the unrest in Soviet Azerbaijan today since Mikhail Gorbachev sent Red Army troops into the republic to quell ethnic fighting. Bush told a news conference Gorbachev faces ''an internal problem of enormous dimensions'' and would NOT predict whether the unrest threatens the Soviet leader's hold on power. Bush also endorsed elevating the Environmental Protection Agency to Cabinet status and said he plans to begin re-structuring the U-S military with this year's budget.

Bush warned that Congress would damage long term relations with China if lawmakers override his veto of a bill to shield Chinese students against

persecution in their homeland. The House is set to overturn the veto today and a Senate vote is expected tomorrow. Bush defended his veto of the unanimously approved bill, saying further protections for visiting Chinese scholars are NOT necessary because of his executive order allowing them to seek permanent residence in the United States.

The Soviet media reports soldiers in Azerbaijan have taken control of the border with Iran, choking off a weapons conduit for militants bent on secession from the Soviet Union. Radio Moscow says the Soviet army won control of the 500-mile frontier with Iran during the ''last 24 hours.'' But militants managed to blockade Soviet navy ships in Baku harbor on the Caspian Sea and all naval facilities along the coast of the inland sea.

Lebanese security sources report new fighting between rival Shiite militias in south Lebanon. Fighters of the Syrian-backed Amal movement and the pro-Iranian Hezbollah exchanged rocket and artillery fire east of the port of Sidon today in the worst fighting since a truce took effect early this month. Reports say one person was killed. At least 89 people have died since the fighting began in late December.

WASHINGTON (JAN. 24) UPI - The head of the Resolution Trust Corp., the government agency created to clean up the nation's thrift mess, said Wednesday the agency needs at least an additional $50 billion to pay depositors of failed thrifts.

William Seidman, chairman of the RTC and the Federal Deposit Insurance Corp., told the House Banking Committee that the agency needs at least $50 billion in working capital to continue its efforts to dispose of the assets of 293 thrifts now under conservatorship.

The agency, which was created as part of the $164 billion thrift bailout bill signed by President Bush last August, has been criticized by several

members of Congress who say it is unorganized and moving to slowly to heal the ailing savings industry.

''The RTC has proceeded on the basis that doing it right is better than just doing it fast,'' Seidman said. ''The facts are that much has been accomplished in five months even though we would have liked to have done more.''

Rep. Henry Gonzalez, the committee's chairman, reminded Seidman that Congress had been ''prodded every day by the constant reminder that the bloodletting'' of the savings industry was costing millions of dollars daily.

Seidman said the money is needed to finance troubled thrifts prior to their sale by the RTC. The addition money is needed ''very soon,'' he said to ensure the resolution of thrifts continues without interruption.

Where the money should come has been the subject of a heated debate between the agency and Congress.

On Tuesday, Deputy Treasury Secretary John Robson suggested borrowing the money from the Treasury and repaying it with money raised from the sale of reposesed real estate held by the failed thrifts.

(JAN. 24) UPI - A Japanese satellite is heading for the moon in one of the most ambitious projects yet undertaken by Japan's fledgling aerospace industry. The MS-2 rocket with two satellites aboard lifted off last night. If the mission succeeds, the smaller of the two satellites will be placed into orbit around the moon, while the larger one will orbit the Earth. Japan is trying to master the technology needed to send probes to Venus and Mars.

A 74-year-old widow is being evicted from the Detroit home where she's lived for 25 years because bankers say she has defaulted on a government loan. But as her belongings were carted out of the brick bungalow and dumped on a curb, Mable Roper told a reporter she was NOT behind on her mortgage payments. While several neighbors tried to console her, Roper rummaged UNsuccessfully for papers to prove she has been meeting the payments of 171-dollars a month.

#90024u1578 01/24/1990 ~United Press International

CHICAGO (JAN. 24) UPI - Aggressive selling late in the day sent grain and soybean prices tumbling Wednesday on the Chicago Board of Trade.

Soybeans were lower across the board and grain futures were mixed at the close.

The market made session highs early and held the gains until the buying activity faded. Commercials and professionals dominated the selling as prices retreated from their highs.

Sharp losses in the stock market contributed to the weakness in the agricultural sector.

Soybeans had been higher much of the day on short-covering and ideas the demand for soybean meal would pick up. There were indications a number of countries were interested in meal.

Soybean oil had underlying support from the sale of 26,000 tons to Pakistan, but was pressured by the soybean crush figure which was higher than expected.

The grains were mostly lower and were at or near session lows at the final bell. The volume was relatively light.

Both corn and wheat had underlying support from near-term export business and hopes of additional sales before the end of the week.

Country movement was light.

At the close, corn was off 1/4 to 1, soybeans unchanged to down 2 1/2, wheat off 1 1/4 to up 1/4 and oats unchanged to up 1.

#90024u1592 01/24/1990 ~United Press International

PANAMA CITY, PANAMA (JAN. 24) UPI - Two men talked their way into the home of a senior American official of the Panama Canal Commission and fatally shot him during an apparent robbery Tuesday night, a commission spokeswoman said Wednesday.

William J. Joyce, 56, the chief financial officer for the commission, was shot after the two men persuaded Joyce's wife, Mildred, to open the door of their home in the La Boca neighborhood, said commission spokeswoman Willie Friar.

''They mentioned his (Joyce's) son's name and so hearing the name, the mother opened the door,'' Friar said.

A statement from the canal commission said one of the men, who was masked, ''opened fire immediately on the unarmed Joyce. He was taken to Gorgas

Army hospital where he died at 4 a.m. (Wednesday) after surgery.''

The attackers took jewelry from Mrs. Joyce and four rifles from the couple's gun collection before fleeing. Joyce was president of the Balboa Gun Club.

Friar said the case was under investigation. Asked if it might have been more than a robbery in light of the Dec. 20 U.S. invasion of Panama that toppled Panamanian strongman Manuel Antonio Noriega, Friar said, ''We don't know. This happened so quickly we really don't.

''There have been a lot of robberies in the canal area and in Panama (City) because the police force is just being created,'' she said, referring to the new Public Forces being formed, mostly with members of Noriega's old Panama Defense Forces.

Noriega is in custody in Florida awaiting trial on drug trafficking charges. He surrendered to U.S. authorities in Panama City on Jan. 3 after taking refuge in the Vatican Embassy on Christmas Eve.

Joyce was the second canal official assaulted at his home in the canal area in the past three days, according to the commission. Monday, environmental control officer David Baerg was assaulted and robbed of money and jewelry by an intruder who entered his home just after dawn.

Col. James Swank of the U.S. Southern Command said the investigation of the shooting ''will be under Panamanian jurisdiction.''

Swank said the U.S. government had turned over control of the area where the shooting took place to Panama's new police forces, the Public Forces of Panama, or FPP, prior to the shooting.

''Probably a lot of security things in that area are being relooked at,'' Swank said.

Joyce, who was an American citizen born in the Panama Canal Zone, had been with the Panama Canal Commission since 1957.

''As head of the office of financial management, Joyce was one of the highest ranking officials in the canal organization, having been named acting chief financial officer just last month,'' the commission statement said.

Aside from his wife, Joyce is survived by three sons: Steven Joyce, a student at the Panama Canal College, and William Jr. and Kevin, residents of Jacksonville, Fla.

#90024u1621 01/24/1990 ~United Press International
WASHINGTON (JAN. 24) UPI - The administration's top official for Latin America, frequently interrupted by human rights protesters, told Congress Wednesday that a cutoff of U.S. aid to El Salvador could cause even more ''savage violence.''

Democrats on a House Foreign Affairs subcommittee questioned if U.S. military aid to El Salvador, now running at $85 million a year, and the training of its military to uphold human rights has had any real benefit after a civil war of more than 10 years and thousands of deaths.

Bernard Aronson, assistant secretary of state for inter-American affairs, said there are widespread human rights abuses by all sides in the conflict although the Salvadoran military is suspected of a particularly heinous event, the murders of six Jesuit priests during a leftist urban offensive last year.

Aronson said the government of President Alfredo Cristiani has acted decisively in investigating the slayings. He called for negotiations to end the conflict, and said a cutoff of American aid could prompt both sides to press for a decisive and bloody victory.

Aronson said most Salvadorans want Washington to use the aid ''to advance human rights and the rule of law and negotiations.

''If you cut aid, it has consequences,'' he said. ''If we suspended it, I think there would be renewed violence very quickly, and it would be even more savage violence.''

Aronson said Cistiani welcomes a role for the Catholic Church and the United Nations in negotiating an end to the war, which the administration says is backed by Cuban and Nicaraguan arms and subversion.

''Let both sides commit to come to the bargaining table and let neither side walk away no matter what the provocation or excuse,'' Aronson said.

Police said they arrested 25 activists who protested during the hearing against U.S. aid to El Salvador.

They stood two or three at a time to condemn ''murders'' and ''atrocities'' they said are being carried out by the Salvadoran army.

#90024u1630 01/24/1990 ~United Press International
BELGRADE, YUGOSLAVIA (JAN. 24) UPI - Riot police firing water cannons and tear gas broke up a demonstration by about 40,000 ethnic Albanians who

jammed the streets of Kosovo Province's capital of Pristina Wednesday demanding more self-rule and a multiparty system.

''We need more than one party,'' the demonstrators shouted. ''We want democracy.''

Belgrade Radio said police arrested a number of protesters as the crowd dispersed toward evening after the first major protest in Pristina since tens of thousands of ethnic Albanians demonstrated to demand more autonomy from Serbia in October and November.

There were no reports of injuries.

The demonstration erupted merely two days after a Communist Party congress ended in disarray, posing the worst threat to the unity of this fractious Balkan country since the death in 1980 of Yugoslavia's post-World War II leader, Josip Broz Tito.

Kosovo, adjacent to Albania, is a province within Serbia, the biggest of Yugoslavia's six republics. Serbia secured greater control over Kosovo last year.

The protest began in Pristina, about 190 miles south of Belgrade, when about 500 ethnic Albanian students gathered in front of the Kosovo provincial Communist Party headquarters on the city's main street.

The crowd grew to a shouting throng of about 40,000 in the afternoon, Belgrade Studio B Radio said.

Ibrahim Izimi, who said he represented a group of independent ethnic Albanian students, demanded the abolition of emergency measures which were imposed in February to control the restive province and the resignation of all of Kosovo's leaders.

They demanded that pro-Serbian Kosovo authorities stop discriminating against Albanians and replacing the Albanian names of streets and schools with Serbian names.

The students accused authorities of expelling ethnic Albanians from work because of their national views and called for an end to political trials they said were currently under way in Kosovo.

Izimi said the students want a referendum on free elections in Kosovo. It appeared they were seizing on the pro-democracy movements under way in the Soviet bloc. Tito broke from the Soviets in 1948 and launched his own brand of communism.

Kosovo provincial Communist Party chief Rahman Morina told the

demonstrators he was ready to have a ''dialogue'' with them.

But Kosovo authorities had no plans to change their policies, the radio quoted him as saying. Morina acknowledged that the economic and political situation in Kosovo has worsened, but he offered no plan to improve it, the radio said.

Kosovo's 1.7 million ethnic Albanians outnumber the province's 200,000 Serbs, but nationally the country's 23 million Serbs are the majority group in multi-national Yugoslavia. The province has been the site of tense ethnic conflicts for more than a decade.

Serbs claim that ethnic Albanians persecute them, forcing them to leave their homes in Kosovo and move to Serbia. The ethnic Albanians accuse the Serbian administration of a policy of suppression and discrimination.

In February, the Serb and Yugoslav leaderships sent troops and paramilitary police units to Kosovo to prevent possible ethnic conflicts.

In March, the Serb and Kosovo parliaments passed constitutional amendments under which Serbia regained full control over Kosovo province. The constitutional changes led to violent anti-Serbian demonstrations in Kosovo in March, when about 25 people were killed.

#90024u1650 01/24/1990 ~United Press International

PHILADELPHIA (JAN. 24) UPI - Rohm and Haas Co. said Wednesday earnings for the fourth quarter of 1989 declined 50 percent to $21.4 million, or 32 cents a share, from $42.3 million, or 64 cents a share, in the same period of 1988.

The decline came as sales increased to $623.2 million from $594.6 million.

Executives of the chemical company said the poor showing in the quarter stemmed from a lack of plant capacity, the limited availability of acrylic acid derivatives, increased start-up and depreciation costs, cold weather and a slowing economy.

The extremely cold weather, said Chairman J. Lawrence Wilson, cost 10 days of output at its plant in Houston, Texas, and reduced output at other plants.

The company estimates the cold weather cost them seven cents a share, and reserves made for the sale of assets cost another two cents a share.

Earnings for the year fell to $176.4 million, or $2.65 a share, from $230.1 million, or $3.46 a share, while sales rose to $2.7 billion from $2.5 billion in 1988.

#90024u1667 01/24/1990 ~United Press International

EAST BERLIN (JAN. 24) UPI - East German opposition groups Wednesday indicated they were willing to work in the troubled transitional Communist-led government of Prime Minister Hans Modrow.

Markus Meckel, a senior member of the opposition Social Democratic Party, said the government was currently so unstable that an ''emergency'' measure had become necessary.

After a five-hour meeting of opposition movements held to discuss Modrow's request for the groups to name officials who would participate in his government, Meckel said most members appeared ready to cooperate.

The opposition is expected to formally respond to the offer Friday before discussing details of the so-called ''great coalition'' government with Modrow next week.

Modrow had appealed to the opposition to join his Communist-dominated government and save it from collapse until elections scheduled for May 6.

The call came amid claims the Communist Party was abusing its dominant position in the government for electoral gains in the ballot.

The transitional government, which has come under increasing pressure amid calls for a faster pace of change, now includes four groups that have traditionally been allied to the Communists.

Also Wednesday, workers from 200 state-run companies in Dresden held a one-hour ''warning strike'' to protest government policies, the official East German news agency ADN said, without specifying how many people took part in the action.

In Leipzig, about 800 police took part in a rally, holding banners that said they were ''not against but with the people.''

Similar strikes and protests were held in several other East German cities Wednesday.

A senior aide to West German Chancellor Helmut Kohl was scheduled to meet Modrow in East Berlin Wednesday to prepare a meeting between the two German leaders likely to be held next month in Bonn.

A leading East German economic expert, meanwhile, said his country will need Western investments in excess of $300 billion to prevent a total collapse of its economy.

Siegfried Schiller, deputy director of the official Manfred von Ardenne Economic Research Institute, said an additional $60 to $120 billion were needed to clean-up the country's highly polluted environment.

Official figures published recently show the East German economy grew by 2 percent last year, the lowest rate in decades. The poor performance was largely attributed to a massive exodus of almost 344,000 East Germans to the West last year, 300,000 more than the previous year.

Visiting British Foreign Secretary Douglas Hurd expressed support for the beleaguered transitional East German government, but when asked whether East Germany should be granted full membership in the European Community, he said East Germany first had to join countries such as Spain, Portugal and Greece in abolishing all forms of authoritarian government.

Hurd also said that East Germany also had to accept the concept of free trade and needed to abolish state subsidies in order to become eligible for membership in the 12-nation trading bloc.

''So the question of full membership of the GDR (East Germany) does not arise at present,'' he said.

#90024u1671 01/24/1990 ~United Press International
PITTSBURGH (JAN. 24) UPI - National Steel Corp., the nation's sixth-largest steel company, Wednesday said fourth-quarter earnings were $28.4 million, down 14 percent from $33.2 million for the period one year ago.

Revenue for the period fell to $638.9 million from $674.6 million in 1988.

''Early in the fourth quarter, we were still feeling the effects of the orders lost as the result of the United Steelworkers' rejection of our attempt at an early labor contract settlement,'' said Chairman and Chief Executive Officer Howard M. Love. ''The impact of those lost orders, combined with lower fourth-quarter sales volume in the automotive market, and the slowdown of operations and shipping caused by the extremely cold weather conditions in December, hurt both shipments and profits.

''On the positive side, our tin-mill product shipments reached record levels in the fourth quarter. Several production records were set during the quarter, including BOF production records at both integrated steelmaking divisions.''

Earnings for the year were $83.2 million, down 6 percent from $88.2 million in 1988.

Revenues for 1989 were down slightly to $2.577 billion from $2.599 billion in 1988.

Love said he was cautiously optimistic about the economy in 1990.

''While automotive build schedules have dropped to their lowest level in seven years, we anticipate improvement in the market as the year progresses,'' he said. ''We look for an economic pattern in 1990 that will be the reverse of last year, a slower start followed by gradual improvement in the second half of the year. We are still projecting industry shipments of near 81 million tons for 1990, down only about 4 percent from 1989 levels.''

National Steel is a joint venture owned equally by National Intergroup Inc. of Pittsburgh and NKK Corp. of Japan, and no earnings per share are reported.

DETROIT (JAN. 24) UPI - Ford Motor Co. posted Wednesday additional temporary layoffs at three assembly plants in New Jersey, Kentucky and Missouri, idling about 5,600 workers because of slow sales.

Ford will idle about 1,600 workers at its subcompact Escort car plant in Edison, N.J., the week of Jan. 29. About 4,000 workers at its Kansas City, Mo., Tempo/Topaz compact car plant and its Louisville truck plant in Kentucky will be idled the following week of Feb. 5.

All temporary layoffs are due to a shortage of dealer orders because of the slow place of vehicle sales felt throughout the industry since October.

Several other carmakers, including General Motors Corp. and Chrysler Corp. have scheduled temporary and indefinite layoffs at assembly and parts plants throughout the nation during the first quarter to trim stocks of unsold cars and trucks.

Ford's Edison plant, now the No. 2 carmaker's only source of Escorts while its Wayne, Mich., plant is changed over to a new version of that model due this spring, was idled the week of Jan. 15. Its Kansas City car plant was closed the weeks of Jan. 2 and 8.

Ford's Louisville plant, which makes medium- and heavy-duty trucks, was last idled the week of Nov. 13, a company spokesman said.

#90024u1712 01/24/1990 ~United Press International
NEW YORK (JAN. 24) UPI - Black urban teenagers who have abortions fare better economically, suffer less stress and are more apt to stay in school than peers who become young mothers, according to a study released Wednesday.

The study, published by the non-profit Alan Guttmacher Institute in Manhattan, researched 334 unmarried black teens aged 17 or younger from similar economic backgrounds who visited two Baltimore, Md., health clinics for pregnancy tests in 1985 and 1986.

Researchers found that 82 percent of the women who had abortions graduated from high school or remained in school two years after the procedure without having fallen behind, while only 63 percent of the women who gave birth completed high school or were still in school two years later.

The study also found that women who had abortions were more economically secure after two years than the childbearing group. They were also less

likely than the young mothers to experience greater levels of stress and anguish.

Young mothers experienced greater stress because of the economic strain on their family and their own limited ability to work and attend school, the study reported.

Teens who had an abortion also were found to be less likely to have a subsequent pregnancy within the next two years and more likely to practice contraception consistently, the study said.

''Although it has been demonstrated that abortion is a safe procedure for adolescents, presenting less medical risk than childbirth, some have proposed that the procedure may have adverse psychological effects,'' the report said.

''The few negative consequences we have observed are almost certainly consequences of motherhood, not the sequelae of abortion,'' it reported.

The study also concluded that 58 percent of teens whose initial pregnancy tests were negative were most likely to become pregnant within two years, while 37 percent of those who had an abortion became pregnant again in the next 24 months.

The high percentage of repeat pregnancies ''underline the need for better contraceptive counseling,'' the report said.

The Guttmacher Institute is a non-profit group involved in research and education on reproductive health.

#90024u1728 01/24/1990 ~United Press International

NEW YORK (JAN. 24) UPI - Jurors wearing earphones Wednesday listened to a tape of John Gotti boasting that he is ''boss'' of the nation's most powerful Mafia family and that an admiring gangster called him ''God's gift to the underworld.''

Gotti's description of his rise to power in the Gambino crime family is contained on some of the 1,001 hours of secretly taped conversations at his alleged Queens headquarters, the Bergin Hunt and Fish Club.

Wearing large black earphones, the jury of seven men and five women in the assault case against Gotti, 49, and Anthony Guerreri, 60, an alleged Gambino soldier, heard the tapes Wednesday afternoon in state Supreme Court in Manhattan. The jurors also were provided with transcripts prepared by the government.

Gotti, wearing a red floral tie, matching pocket square and black on black striped double-breasted suit, was given a pair of earphones but he declined to wear them.

Gotti is accused of ordering the May 7, 1986, shooting and wounding of a carpenters union leader, John O'Connor. The shooting was meant as a warning to the union, which had trashed a Gambino-linked restaurant in a dispute over the use of non-union labor.

The tapes begin in 1985, when reputed Boss of Bosses Paul Castellano was gunned down outside a Manhattan steakhouse on Dec. 16 and Gotti allegedly assumed his throne.

In a Jan. 11, 1986, conversation with an unknown man, Gotti said his recent rise to power left him feeling obligated to socialize with a higher class of people.

''Me and you may socialize but I can't socialize with these guys, I can't bring myself down, I'm a boss you know what I mean ... I gotta isolate myself a little bit,'' Gotti said, according to the transcript.

On Jan. 18, 1986, Gotti boasted to another man about the compliments lavished on him by an admiring gangster.

''He says, 'When they say God's gift to the underworld you are it,''' Gotti bragged.

''He speaks with his heart, he means it, I tell ya somethin', I love the guy,'' Gotti continued.

But apparently not everyone in organized crime revered Gotti and the reputed mob boss decided to demand some respect.

In a Jan. 17, 1986, conversation, Gotti said his underlings had questioned his judgments.

''And they come at me, and they say we're telling you now, what about this and what about that. Move this guy, are you gonna move us all? I said, 'Let me tell you fellers something. I'm right in what I just done. I could break every one of you captains right now, and not overstep bounds.' A new boss does that,'' Gotti said, according to the transcript.

Most of the tapes played Wednesday were meant to prove that he is the boss of the crime family and had the power to call all the shots for the Gambinos.

Later in the trial, the jury is expected to hear a tape in which Gotti allegedly orders O'Connor shot, saying ''Bust him up,'' according to prosecutors.

#90024u1777 01/24/1990 ~United Press International

WASHINGTON (JAN. 24) UPI - A key convicted operative in the Iran-Contra scandal accused Ronald Reagan of cowardice and ''hiding out'' Wednesday, trying at all costs to escape the affair's political implications.

Richard Secord, a retired Air Force general convicted earlier in the day of lying to Congress, was given a light sentence of two years probation. He held a news conference three hours after leaving federal court.

''I think former President Reagan has been hiding out,'' Secord told reporters. ''I think it's cowardly.''

Reagan, Secord said, was ''well aware'' of the general outline of the Iran-Contra scandal.

Reagan has shown cowardice, Secord said, ''because he didn't stand up and take the heat.''

But the retired general said he does not know if Reagan knew about the diversion of profits from secret arms sales to Iran to aid the Nicaraguan Contras. The diversion, Secord said, was a ''minuscule'' part of a much broader, complicated intelligence operation.

Speaking about Reagan, Secord said: ''I have no firsthand knowledge that he knew of the diversion.''

Secord said he assumed Reagan knew about the entire operation because ''the president had been briefed on many, many details.''

After the scandal became public, Secord said, ''They built a wall around the president. None of us could penetrate it.''

Appearing with his wife, son and two daughters, Secord complained that he had been financially destroyed by three years of investigations into the scandal.

''This has been financially ruinous for me,'' said Secord.

Asked if he now felt his actions were wrong, Secord at times sounded defiant and then contrite.

''I don't think there was anything illegal going on,'' Secord said. ''I thought I was doing the president's bidding.'' In retrospect, however, Secord said he would have ''done some things differently.''

Secord said his operation was supported by two presidential national security advisers and William Casey, then director of the CIA.

Secord announced what he said was a nationwide fund-raising effort to challenge the broad powers of special Iran-Contra prosecutor Lawrence Walsh and a television talk show to address Americans on the ''great issues of our time.''

The special prosecutor's office, Secord said, is a ''monster at large'' in the American judicial system. It is engaged in a ''witchhunt,'' Secord said, adding: ''These last three years have been pure hell, let me tell you.''

Secord estimated he had previously raised between $700,000 and $800,000 to assist his legal defense.

He also estimated there is some $8 million left in overseas bank accounts containing profits generated by ''the enterprise,'' the term used for the secret arms operation.

That money has a number of claimants, Secord said, emphasizing: ''I make no personal claim to that money at all.''

Asked if he would undertake covert operations in the future, Secord said, ''I'm too old.'' He added: ''I just don't have the guts for it anymore.''

#90024u1778 01/24/1990 ~United Press International

DETROIT (JAN. 24) UPI - The nation's automakers reported Wednesday stronger than anticipated U.S. vehicle sales for mid-January, with an overall 3.7 percent gain from the year-ago period.

Sales of domestically built cars alone rose a scant 0.2 percent from last year despite lower U.S. sales posted by General Motors Corp., Ford Motor Co., and Chrysler Corp.

Light truck sales, bolstered by significant gains from Chrysler, rose 9.4 percent from last year.

The annual rate for domestic car sales - the most common measure of industry performance - was 6.8 million cars during the period, up slightly from 6.7 million units last year.

''I would expect sales to remain near the 7 million annual rate level into the rest of the month because of all the buyer incentive programs out there,'' said industry analyst Michael Luckey, of The Luckey Consulting Group in Tappan, N.J. ''But it's the same old story. The market will be totally determined by the type of incentives.''

Luckey predicted that most buyer incentives, which expire in the coming weeks, will be renewed by carmakers next month to maintain the current sales pace.

''Without them, I would expect the annual rate to be more like 6 or 6.5 million,'' he said.

The industry's latest performance follows a 27 percent gain in U.S. vehicle sales during the first 10 days of January from year-ago levels - results that some observers say were artificially inflated by carmakers overreporting sales.

''Let's face it,'' Luckey said. ''Most dealers did not make their 1989 sales quotas so they saved those sales to make a big bang for the first 10 days of 1990.''

During the latest period, the eight companies, which also include American Honda Motor Co., Nissan Motor Manufacturing U.S.A., Toyota Motor Sales U.S.A., Mazda Motor Manufacturing (USA) Corp. and Mitsubishi Motor Sales of America Inc., reported combined sales of 156,333 cars and 110,762 trucks in the United States.

This compares with 156,284 cars and 101,286 trucks sold in the year-ago period, automakers said.

The daily selling rate of 29,677 vehicles compares with 28,619 cars and trucks per day for the same period last year. There were nine selling days in both the latest and year-ago periods.

Sales of GM's domestically made cars during the latest Jan. 11-20 period

declined 1.5 percent, while its truck sales rose 5.9 percent.

Second-ranked Ford posted a 10.4 percent drop in car sales and a 0.2 percent gain in truck sales.

Chrysler's U.S. car sales declined 8.9 percent, while its light truck sales including Jeep soared 35.6 percent when compared with the combined total a year ago.

Among the smaller companies reporting sales of U.S.-built cars, Honda posted a 15 percent gain. Toyota reported a 370.3 percent rise in sales from a year ago, when it was just beginning output of the Camry sedan at its Kentucky plant.

Nissan reported a 12.5 percent drop in sales of its U.S.-built cars, while its domestically made compact truck sales fell 41.9 percent from year-ago levels.

Mazda sold 1,049 of its new MX6 coupes produced at its Flat Rock, Mich. assembly plant, vs. 675 a year ago. Mitsubishi reported sales of 1,918 Eclipse cars built at its joint venture plant with Chrysler in Illinois, vs. 311 units.

#90024u1786 01/24/1990 ~United Press International

WASHINGTON (JAN. 24) UPI - The yield for 2-year Treasury bills rose at Wednesday's auction, the Treasury Department said.

The Treasury Department auctioned $10 billion worth of 2-year bills at an average discount of 8.21 percent, up from 7.71 percent at the last auction held Dec. 29. It was the highest rate since Sept. 26, when the auction yielded a rate of 8.39 percent.

The discount rate understates the actual yield to investors. The investment, or coupon-equivalent, rate was 8.21 percent on the 2-year bills at an average price of $9,984.60 per $10,000 face value.

-30- 752

#90024u1804 01/24/1990 ~United Press International

(JAN. 24) UPI - President Bush has a warning for Congress. Bush says lawmakers will have only themselves to blame if they overturn his veto of a bill to protect Chinese students from possible persecution at home. Bush... speaking hours before the House is expected to strike down the veto... says the move could damage long-term relations with Beijing .

Bush also says he wants to give the ''highest level'' of attention to the

environment by elevating the Environmental Protection Agency to Cabinet-level status. Bush made his comment at a morning news conference-reacting to a bi-partisan bill that would have the E-P-A chief attending Cabinet meetings.

A federal judge in Washington, D-C, says Richard Secord has suffered enough. U-S District Judge Aubre Robinson today sentenced the retired Air Force general to two years probation for lying to Congress about the Iran-Contra scandal. Secord says he regrets ''NOT having been more candid'' with congressional investigators.

A nurse convicting of injecting patients with lethal drugs in order to revive them and appear to be a hero was sentenced to 61 and one-third years to life in prison today in Riverhead, New York. The judge says Richard Angelo's story tops the list of horror tales he's heard from the bench.

A Panama Canal Commission spokeswoman says a senior American official of the commission was shot and fatally wounded at his home last night. The spokeswoman says William Joyce was shot by two intruders who persuaded Joyce's wife to let them in. The gunmen then took jewelry and guns from Joyce's home.

#90024u1832 01/24/1990 ~United Press International

MIAMI (JAN. 24) UPI - Hispanic police officer William Lozano was sentenced Wednesday to seven years in prison for the deaths of two black men that

triggered three days of race riots last January.

Lozano, 31, was convicted last month of two counts of manslaughter. The seven year sentence covered both counts.

Dade County Circuit Judge Joseph P. Farina The judge also allowed Lozano to remain free on bond while appealing the sentence. Lozano has been suspended without pay from the Miami Police Department, and is expected to be fired soon.

''The court cannot do perfect justice in this case,'' Farina said before handing down the sentence. ''Perfect justice would be to restore the lives of Clement Lloyd and Allan Blanchard and to restore William Lozano to his previous public service.''

The prosecution had recommended Lozano receive 12 years in prison.

''It is our recommendation that a sentence of 12 years in prison is a fair sentence for this defendant's act,'' Assistant State Attorney Don Horn said.

Defense attorneys, who sought probation, had handed the court petitions signed by between 14,000 and 15,000 people, asking that Lozano receive no jail time.

Before the sentencing, Farina denied a defense motion for a new trial without explaining his decision.

Defense attorney Roy Black, who has said he would appeal such a decision, told the judge Lozano deserved a new trial, even though such a decision could cause more violence.

''It's not the job of our courts to do social engineering to try to prevent riots and violence in this community,'' Black said. ''That's the job of the police. We are here to see that justice is dispensed fairly and evenhandedly.''

A racially-mixed jury deliberated more than eight hours over two days before convicting Lozano Dec. 7 of two counts of manslaughter in the deaths of motorcyclist Clement Anthony Lloyd, 23, and his passenger, Allan Blanchard, 24. The trial included nearly three weeks of jury selection, 13 days of testimony and more than 80 pieces of evidence.

Lloyd and Blanchard were riding a motorcycle through the predominantly black Overtown neighborhood about 6 p.m. Jan. 16, 1989, after a parade celebrating the birthday of Martin Luther King Jr. when Lozano shot Lloyd.

The shot hit him above the left eye, piercing his helmet and killing him

instantly. Blanchard, Lloyd's passenger, died the next day of injuries sustained in the ensuing crash.

Lozano claimed he shot Lloyd in self-defense because the motorcyclist was going to run him down. Prosecutors said Lozano's life was never in danger and he shot his gun out of negligence.

The shooting sparked three days of riots in Miami's predominantly black communities and further aggravated racial tensions in a city that saw three other race riots in the '80s caused by police killing black men.

The Lozano case further divided the city along racial lines, with some blacks saying Lozano was quick to shoot Lloyd because he was black and some Hispanics arguing the officer was being used as a scapegoat to appease blacks.

Lozano, who was in the area to investigate a domestic disturbance, was behind his partol car talking with an Overtown resident about an unrelated matter when Lloyd, who was being chased by another officer in a patrol car for a traffic violation, came down the street.

Lozano testified during the trial that he thought Lloyd's high-performance Kawasaki Ninja 600R was going to run him over, so he shot in self-defense. He said he barely had time to pull his weapon before firing.

Prosecutors said Lozano had about 14 seconds to set himself, aim and fire, and state witnesses said he had time to move into the street toward the motorcycle and extend his arms before fatally shooting Lloyd.

In the riots that followed, another person was killed, six others were shot and nearly 400 were arrested. Property damage was estimated at more than $1 million.

#90024u1842 01/24/1990 ~United Press International

CHICAGO (JAN. 24) UPI - Leaders of United Airlines pilots' union and non-union workers held separate meetings Wednesday to consider a new employee-led buyout proposal for United's parent UAL Corp.

The proposal under consideration was drafted by UAL financial and legal advisers in a last-ditch effort to avert a recapitilization plan sought by a New York investment group.

The UAL board is slated to meet Thursday and is expected to implement the recapitalization plan if no buyout offer is on the table. A board source said no offers had been received by midday Wednesday.

The United Master Executive Council of the Airline Pilots Association - the 27-member governing body of the United chapter of the union - began its regular quarterly meetings Wednesday and scheduled a special closed session Thursday afternoon to review the buyout plan.

An ALPA spokesman said there would be a statement on the session only if developments warranted.

An organization representing non-union, non-management UAL employees held a separate meeting Thursday at UAL headquarters to decide whether to take part in the plan. There was no immediate word on the outcome.

A source close to the buyout negotiations between UAL and employee unions said the United chapter of the Airline Flight Attendants union already had endorsed the proposal but that the company's biggest union, the 25,000-member International Association of Machinists, expressed no interest.

IAM officials in Washington were not available for comment Wednesday afternoon.

The source said that the proposal was drafted to make IAM participation unnecessary. The cooperation of the pilots, however, was essential.

The source declined to provide details of the buyout proposal, but analysts said it was expected to be worth between $200 and $240 a share - $4.5 billion to $5.5 billion - and give employees a 60 percent stake in UAL through an Employee Stock Ownership Plan.

CAIRO, EGYPT (JAN. 24) UPI - Israeli Deputy Prime Minister Shimon Peres met Egyptian President Hosni Mubarak Wednesday and said he was confident the remaining obstacles to Israeli-Palestinian talks could be overcome ''in a very short while.''

Peres, the Labor Party chief who is also finance minister in Israel's coalition government, said he was returning to Jerusalem Wednesday night with ''some messages of importance'' from the Egyptian side, but he did not elaborate.

''We have had an exceedingly friendly, constructive and detailed talk with the President of Egypt Mr. Mubarak concerning the immediate future and concerning some vision for the future,'' Peres said after his 90-minute meeting with the Egyptian president.

''On the immediate issue, my impression was strengthened that the remaining problems between us and the Palestinians can be solved rather swiftly and in a very short while,'' Peres said. ''The remaining obstacles can be overcome.

''There are some new ideas to do so and before too long, there is a real chance that Palestinian and Israel delegations will meet in Cairo to

discuss the issue of elections and the beginning of meaningful negotiations between the two parties.''

Israeli Prime Minister Yitzhak Shamir has proposed elections in the Israeli-occupied West Bank and Gaza Strip to elect Palestinian representatives to negotiations on a final peace plan for the territories. The preliminary Cairo talks would discuss the issue of the elections.

Peres said he was confident the remaining obstacles to the preliminary talks - including the makeup of the Palestinian delegation and the agenda for the meeting - could be overcome soon.

''I think the composition of the Palestinian delegation can be done so to serve the Palestinian cause without embarrassing anybody else. There are some ideas how to overcome the remaining differences on it,'' he said.

He added the Palestinian delegation would be ''free and can be free to consult with whoever they want in the Arab world, (for) it is not our business.''

Israel has insisted the Palestinian delegation be made up of only representatives from the occupied territores and that it should not include the Palestine Liberation Organization. Peres has proposed, however that Palestinians deported by Israel might be included.

''The second problem is the agenda. Once we have agreed that the heart of the agenda will be the arrangement of elections in the territories, the opening speech or opening speeches are becoming of secondary consideration.''

Peres urged King Hussein of Jordan in particular and also Syrian President Hafez Assad to make peace with Israel, and said the Palestinian-Israeli dialogue would serve as a beginning toward comprehensive peace in the Middle East.

''We should not lose time,'' Peres said. ''Again we have an opportunity that should not be missed and (there is) a growing feeling in the Middle East, as the President (Mubarak) has expressed it, that peace is needed to all of us.''

Peres said the proposed elections in the Israeli-occupied territories would be free and fair, and he added there was no need for international supervision.

''We are not going to elect their representatives,'' he said. ''We are not going to intervene in the elections.

''... I am for free elections, open elections. If you have free elections,

you do not think about supervision.''

Egyptian Foreign Minister Esmat Abdel Meguid, who also met with Peres, said there was ''determination'' to overcome the remaining obstacles to talks. He did not elaborate.

Abdel Meguid has said his country is ready to attend a proposed trilateral meeting of the foreign ministers of Egypt, Israel and the United States in Washington if it would lead to ''positive results'' toward convening the Palestinian-Israeli dialogue. The meeting was part of Secretary of State James Baker's five-point plan to advance the peace process.

#90024u1888 01/24/1990 ~United Press International

WASHINGTON (JAN. 24) UPI - President Bush, citing a desire for world leadership on an emerging set of global problems, gave his full endorsement Wednesday to a move to elevate the Environmental Protection Agency to Cabinet status.

Embracing an election-year cause that claimed strong bipartisan support, Bush set aside earlier concerns about the size of the federal bureaucracy to back the creation of a 15th Cabinet department to give the EPA stronger clout.

''The environmental challenges that face America and the world are so important they must be addressed at the highest level of our government,'' he said in announcing his decision at a White House news conference.

Congressional sponsors of the EPA legislation welcomed the pledge of administration support and after meeting with Bush at the White House were hopeful the bill could be passed by April 22, the 20th anniversary of Earth Day.

''Today, I think, is kind of a dream for a lot of us who believe that the United States has the capacity to be an international leader in (the) environment,'' said Sen. David Durenberger, R-Minn.

Sen. John Glenn, D-Ohio, who introduced the EPA bill Tuesday with Sen. William Roth, R-Del., called the proposal a response to the global reach of environmental problems and the widening international scope of EPA activities.

Glenn recalled first discussing the pros and cons of the idea with Bush last June. Though initially hesitant to add another department to the Cabinet, Bush agreed Wednesday that ''Cabinet status will help (EPA) influence the world's environmental policies.''

Senate Democratic leader George Mitchell of Maine said Bush had undergone a change of heart, but said: ''The important thing is he now supports it. It is one that we can now swiftly act on.''

Republicans hailed the announcement by Bush as evidence of Republican commitment to environmental protection. Glenn said the bill appears to have little overt opposition, but expressed concern that some members of Congress might complicate its passage by trying to tack ''a lot of policy stuff'' on the legislation.

The EPA was established by President Nixon 20 years ago. The last agency to receive elevated status from Congress was the Veterans Administration, which became part of the Cabinet in 1988.

BY JOAN HANAUER

NEW YORK (JAN. 24) UPI - Anthony Perkins plays a loving father in

''Daughter of Darkness'' but he's no Cliff Huxtable - the dad Perkins plays is a vampire.

''Daughter'' also stars Mia Sara in a story of the occult set in Romania, which any vampire knows is the parent country of Transylvania, whose most famous native son was Count Dracula. The show airs on CBS Friday, Jan. 26, 9-11 p.m. Eastern time.

Sara, an American girl troubled by bad dreams, travels to Bucharest after the death of her mother, searching for the father she never knew. She encounters a U.S. embassy chap who thinks she's pretty but weird, a darkly handsome Romanian who romances her, and Perkins, who turns out to be her father - and a whole lot more.

One nice touch - instead of having fangs that might make the vampires noticeable in a happy hour crowd, this group of blood drinkers has a special, toothed device in their tongues.

''We filmed it in Budapest, Hungary,'' Perkins said in an interview. ''We wanted to do it in Bucharest, where the story takes place.

''But at that time you virtually could not walk around the streets of Bucharest. If you looked like you were conducting business, scouting locations or just had something on your mind, you were immediately questioned, maybe taken away for more questioning. The local people were quick to say they couldn't guarantee our security there.

''Instead we filmed in Budapest. The Hungarians have an incurable, everlasting optimism, they always get it together, they always have a smile.''

Perkins manages a smile, too, although all these horror roles must be frustrating for an actor who won rave reviews early in his career for serious performances in films and as the lead on Broadway in ''Look Homeward, Angel,'' in which he played the Thomas Wolfe character (that's Tom Wolfe as in ''You Can't Go Home Again,'' not Tom Wolfe as in ''Bonfire of the Vanities'').

What changed his career was playing Norman Bates in ''Psycho.''

''I guess if I were a single man without family, without a support system, without teenage children and a beautiful young wife, I'd be more unhappy '' Perkins said. ''But there is so much more to a person than his career. I'm not that devoted to my public image to have it make that much difference.

''I love not taking myself so seriously, and that's got to be part of my not fretting. I am constantly trying to be out there, presenting myself in

a contrasting way to illustrate I'm not like the parts I so often play.''

Perkins said that for about 10 years after ''Psycho'' it bothered him that with all the films he had made, people could only focus on Norman Bates.

''It made me kind of dour,'' he said. ''My wife said, 'By having this negative point of view on all this, when you encounter people who identify you this way, they come away from the experience confirmed in their beliefs. Why don't you just drop it?' Rarely does one thing a person says make all the difference, but this time it did. From that day, I dropped it.''

What would he like to do?

''I want to get back into comedy, which is how I started in show business '' Perkins said. ''Last year I had a lot of fun doing a pilot for Fox, which didn't sell. But I'd like to try again.''

Americans like to eavesdrop on other people's conversation - and ''A World Of Ideas with Bill Moyers'' gives them the chance to tune in some prime talk.

The show makes its new season debut with ''Inventing the Future with Robert Lucky,'' a two-parter to air on PBS Sundays, Jan. 28 and Feb. 4, at 6 p.m. Eastern time (check local listings).

Included in the 52-week series are such varied guests as filmmaker Steven Spielberg, Joanne Ciulla, teacher of business ethics and management at the Wharton Business School, University of Pennsylvania, and Steven Rockefeller, dean of religion at Middlebury College, a son of Nelson Rockefeller who abandoned the family's Baptist faith to become a Buddhist.

The conversations with Lucky, electrical engineer, executive director of the Communications Sciences Research Division at Bell Laboratories, prove just how enjoyable it can be to eavesdrop on conversations with a witty, wise man. It also proves, as Moyers said in an interview, that all engineers are not nerds.

''As Lucky says in the second show,'' Moyers said, ''talking is still the best way we share information. I've found that true over the years. I've done many documentaries, very graphically and imaginatively laying out information. I find my audience essentially still prefers an interview with someone with a lively mind.''

CBS will piggyback a new series on top of Super Bowl XXIV - the way ABC introduced ''The Wonder Years'' after the 1988 Super Bowl.

The new series is ''Grand Slam,'' which will have a 90-minute preview on

Sunday, Jan. 28, then go into its regular time slot on Wednesday, Jan. 31, 8-9 p.m. Eastern time.

It stars John Schneider and Paul Rodriguez as competing modern-day bounty hunters who sometimes reluctantly work together. It's the kind of show in which a couple of macho types reinforce their male bonding by throwing punches at each other.

#90024u1954 01/24/1990 ~United Press International

SAN FRANCISCO (JAN. 24) UPI - A.W. Clausen, the two-time chairman of BankAmerica Corp. who engineered its financial turnaround, plans to retire this year, it was reported Wednesday.

Clausen, 66, was expected to announce his retirement as chairman and chief executive officer and name his successor before the bank's annual meeting May 24, the San Francisco Examiner said, citing unnamed sources.

A bank spokesman refused comment and said Clausen would make no statement on the report.

Asked about his future last February, Clausen said he wanted to see the bank firmly back on its feet before leaving. By all accounts, the bank is well on its way. Last week it reported record profits of $1.1 billion for 1989.

''He came back at a time when the back was poor financial health, with a poor image, and now things couldn't be better,'' said George Salem, senior banking analyst for Prudential Bache Securities in New York. ''I think (his resignation) is a good bet.''

Vice Chairman Richard Rosenberg, head of California banking operations, and Vice Chairman Frank Newman, chief financial officer, are considered the front-runners to succeed Clausen.

#90024u1955 01/24/1990 ~United Press International

WASHINGTON (JAN. 24) UPI - President Bush approved federal disaster aid for the state of Oregon Wednesday because of damage from severe storms and flooding on the coast earlier this month, the White House announced.

The president's major disaster declaration makes federal money available through the Federal Emergency Management Agency for those affected by the stormy weather beginning on Jan. 6.

According to FEMA, the federal government will pay 75 percent of the eligible costs for the repair or replacement of public facilities damaged by the storms and flooding. The remaining 25 percent will be provided by the state and local governments.

Richard Buck of FEMA's regional office in Bothell, Wash., will coordinate federal recovery activities in the stricken area.

#90024u1971 01/24/1990 ~United Press International

NEW YORK (JAN. 24) UPI - Average yields for money market mutual funds fell in the latest reporting week, while rates at competing savings and loan institutions were mixed, two organizations that track the funds said

Wednesday.

The Donoghue Organization of Holliston, Mass., said average seven-day simple yields on money market funds fell to 7.70 percent from 7.74, while 30-day simple yields fell to 7.83 percent from 7.88.

The average maturity of fund portfolios rose to 41 days.

The Bank Rate Monitor of North Palm Beach, Fla., reported that rates at competing banks and savings and loan institutions were mixed in the latest week.

The Monitor's index of average rates: money market deposit accounts 6.13 percent, down from 6.14; Super-Now accounts 5.01 percent, unchanged; six month certificates of deposit, 7.66 percent, unchanged; one-year CDs 7.69 percent, up from 7.68; 2 1/2-year CDs 7.67 percent, up from 7.65; and five-year CDs 7.68 percent, up from 7.66.

The average rate for a one-year adjustable rate mortgage rose to 8.45 percent from 8.40 percent last week.

The average rate on a 15-year fixed-rate mortgage rose to 9.59 percent from 9.45 percent and the average rate on a 30-year fixed-rate mortgage was up to 9.84 percent from 9.69 percent.

The average rate for a four-year automobile loan rose to 12.11 percent from 12.09 percent.

#90024u1991 01/24/1990 ~United Press International

SAN SALVADOR, EL SALVADOR (JAN. 24) UPI - Gunmen fired on the residence of a ranking official Wednesday, and leftist rebels joined those calling for

more arrests in connection with the November slaying of six Jesuit priests and two women.

Police said unidentified assailants wielding AK-47 assault rifles fired at the house of Deputy Interior Minister Carlos Humberto Figueroa at 6:40 a.m.

''A passing car fired two bursts and sped off, said a police spokesman. ''The colonel (Figueroa) was unhurt and no one in the house was injured,'' a police spokesman said.

There were no other details of the incident.

Rebels of the leftist Farabundo Marti National Liberation Front, or FMLN, called for more arrests in connection with Nov. 16 slaying of six Jesuit priests, their housekeeper and her teenage daughter.

Col. Guillermo Alfredo Benavides and eight lower-ranking military men have been charged with murder. Judge Ricardo Zamora decided last week there was enough evidence to hold Benavides as the ''immediate author'' of the crime based on the colonel's status as commander of the area where the murders occurred and the troops that committed it.

But the FMLN said in a broadcast on it clandestine Radio Venceremos, ''The murder of the six Jesuits and their workers could not have been a private initiative of Col. Benavides.''

Leaders of the Salvadoran Catholic church, opposition political parties and the Central American University where the priests taught, lived and died, have already said they believe other top military officers must have been consulted before the decision was made to kill the Jesuits.

The rebel radio broadcast said the killings were carried out by members of an elite battalion that had temporarily been assigned to Benavides, who was the director of the Armed Forces military academy.

The Radio Venceremos also asked why Benavides would have chosen ''soldiers he did not know'' rather than ''trusted men assigned to the military school'' to carry out the murderous, secret mission.

Testimony provided in the indictments verifies that the troops that carried out the killings were from the special commando unit of the elite, U.S.-trained Atlacatl battalion, accompanied by one lieutenant from the military academy.

Judge Zamora said in the indictment that his decision to charge Benavides was based largely on testimony from Col. Rene Emilio Ponce, head of the Joint Chiefs of Staff.

Ponce testified that he ordered members of the Atlacatl battalion be attached to Benavides command to provide extra protection to a strategic area of several square miles.

The area incorporated headquarters of the military high command, a residential area where many military officers live, the military academy and the Central American University.

In Washington, meanwhile, the Bush administration's top official for Latin America told Congress that a cutoff of U.S. aid to El Salvador could cause even more ''savage violence.''

Democrats on a House Foreign Affairs subcommittee questioned if U.S. military aid to El Salvador, now running at $85 million a year, and the training of its military to uphold human rights has had any real benefit after a civil war of more than 10 years and thousands of deaths.

Bernard Aronson, assistant secretary of state for inter-American affairs, said there are widespread human rights abuses by all sides in the conflict but that most Salvadorans want Washington to use the aid ''to advance human rights and the rule of law and negotiations.

''If you cut aid, it has consequences,'' he said. ''If we suspended it, I think there would be renewed violence very quickly, and it would be even more savage violence.''

#90024u1996 01/24/1990 ~United Press International

(JAN. 24) UPI - President Bush says Congress is jeopardizing his efforts to maintain a dialogue with the world's most populous nation, China. Bush describes as unnecessary a bill he vetoed last year that would protect Chinese students from possible persecution in their homeland. Bush says he's already moved to protect the students... and says the measure may cause Beijing to cut off future student exchanges. Bush spoke this morning- hours before the House was expected to strike down the veto and one day before the Senate is expected to do the same.

Bush also addressed an issue closer to home. The president dismisses as- in his words- ''pure, UNadulterated malarkey'' a report that a first family poll was taken on the subject of abortion. Bush told reporters he could NOT confirm the story that described first lady Barbara Bush as a supporter of legalized abortion.

Colombia's foreign minister says his government is NOT aware of any plot to kill President Bush when he attends a drug summit next month in Cartagena. And, the U-S Embassy in Bogota describes as speculation reports of an assassination plot by Colombian drug cartels. An embassy spokesman

also says he doubts the nation's drug lords would have an interest in killing Bush.

A federal judge- saying Richard Secord has suffered enough- sentenced the retired Air Force General to two years probation for lying to Congress about the Iran-Contra affair. Secord refused to comment on the sentencing, but his lawyer termed it as ''extremely fair.'' So far, NO Iran-Contra figure has gone to jail in the scheme to sell U-S arms to Iran and funnel the profits to Nicaragua's Contra rebels.

(JAN. 24) UPI - A Miami, Florida, judge is refusing to grant a new trial to a Hispanic police officer convicted of manslaughter in the deaths of two black men that set off three days of race riots last January. Defense lawyers argued William Lozano deserves another trial because of pre-trial publicity. Lozano vows to appeal.

A nurse convicted in the 1987 deaths of four of his patients was sentenced today to more than 61 years in prison in a Riverhead, New York, courtroom. Prosecutors describe Richard Angelo as a ''monster in nurse's whites,'' plotting to become a hero by reviving patients he first injected with lethal doses of drugs. At the sentencing, Judge Alfred Tisch called the 27-year-old nurse ''depraved'' and characterized the case as ''a horror story.''

A senior Panama Canal Commission official was gunned down in his home last

night during an apparent robbery. A commission spokeswoman says chief financial officer William Joyce was killed when two men persuaded his wife to open the door of their Panama City home. Officials say the gunmen opened fire, killing Joyce, before fleeing with jewelry and four rifles from the couple's gun collection. Officials refuse to speculate on whether the slaying was connected to the U-S invasion of Panama last month.

#90024u2060 01/24/1990 ~United Press International

WASHINGTON (JAN. 24) UPI - The House, in a slap at President Bush's overtures to China, voted overwhelmingly Wednesday to overturn his veto of legislation that guards against sending Chinese scholars home to face possible political persecution.

Bush warned that enactment of the bill could cause ''long-term consequences'' to U.S. relations with China, but his argument had no

discernable effect on Capitol Hill, where the measure has broad bipartisan support.

Rep. Stephen Solarz, D-N.Y., said the president had ''lost his credibility'' on the issue by both condemning the Beijing government's human rights practices and easing economic and political sanctions against the communist giant.

The Senate will take up the issue Thursday and GOP leaders there saw no real chance Bush's position would be sustained. The bill intially was approved 403-0 in the House and by unanimous voice vote in the Senate last November.

The bill would allow some 36,000 Chinese students now in the United States to seek permanent resident status in the United States without first returning home.

Rep. Richard Gephardt of Missouri, the Democratic majority leader, said there was no joy in the House in voting against Bush, but added, ''I believe in my heart, and I think most members do, that in this case the president is wrong.''

''This decision sends a loud and clear message to the leaders of China that we believe - and people all over the world believe - in human rights '' Gephardt said.

Rep. Harold Volkmer, D-Mo., had a blunter assessment of the Chinese leaders who ordered the bloody attack on pro-democracy demonstrations last spring: ''You can't reason with mad dogs.''

Rep. Robert Michel of Illinois, the House Republican leader, said Bush cares about human rights in China, but also about American security interests.

''Our relationship with China have a bearing during the next 50 years of world history,'' Michel said. ''We have to keep the lines of communication open.''

''Under our system, an American president has to keep in touch with friends and foe alike, and some may be downright bloody dictators,'' Michel said.

Speaking at a press conference before the House vote, Bush said an executive order he issued provided sufficient protections for the students and said the override effort was motivated in part by ''some crass politics.''

Having lost in the House, Bush's slim hopes of prevailing rested in the

Senate, but leaders of the 45 Republicans said they doubted he could get the 34 votes - one third of the Senate - necessary on Thursday.

The students fear political retaliation by the aging Beijing leadership that has jailed thousands of dissidents and which ordered tanks to smash pro-democracy demonstrators in Tiananmen Square last June.

Rep. William Broomfield, R-Mich., the ranking Republican on the Foreign Affairs Committee, called the vote ''a referendum on human rights .... To tyrants, it will send a message that Americans will not countenance butchery.''

Bush, a former U.S. envoy to China, condemned the deaths and political repression, but said the United States cannot isolate the nuclear superpower because of mutual strategic interests in Asia and the Middle East.

''Regrettably, Tiananmen was a giant step back,'' he said. ''I want to keep contact. I do not want isolation.''

He said the bill, chiefly sponsored by Rep. Nancy Pelosi, D-Calif., could provoke a backlash in Beijing, such as prompting the government to ''cut off future student exchanges.''

''The long-term consequences are potentially great,'' he said. ''And Congress, in my view, will have only itself to blame.''

Bush, who enjoys broad political support in the country, particularly after the invasion of Panama, was standing virtually alone on the China issue, which was inflamed when it was revealed Bush sent his national security adviser, Brent Scowcroft, to Beijing on two secret missions last year.

Scowcroft's toasting of the leadership - condemned by Democrats as ''kowtowing'' - and the largely cosmetic concessions China has made to ease political repression fueled the drive in Congress to slap back at Beijing.

#90024u2102 01/24/1990 ~United Press International

WASHINGTON (JAN. 24) UPI - The ''cocaine-like'' substance found in a house frequented by Manuel Noriega was really a ''food concoction'' for witchcraft with the names of President Bush, Ronald Reagn and others written on them, defense officials said Wednesday.

The Army at first thought it was 50 pounds of cocaine - possible proof that Noriega was involved in drug trafficking before the Dec. 20 U.S. invasion of Panama that led to the general's arrest by American officials.

On Tuesday, the Pentagon reported that tests conducted by the Army's Central Investigation Division concluded the substance was not cocaine. But defense officials were at a loss to identify the material and the CID was not talking.

The Washington Post said CID officials reported they were tamales. The Pentagon denied they were tamales.

A Pentagon statement late Wednesday said that Army officials on Dec. 21 found 10 ''oblong packages of a white, granular substance, each wrapped in green banana leaves with a string tied around them'' in a refrigerator in

a house frequented by Noriega.

''The substance looked like a white powder while in the refrigerator. However, once it was taken out of the refrigerator, it melted. It was discovered to be a combination of lard, corn meal and farina - a food concoction,'' the statement said.

Pentagon officials said it was believed to be a paste-like ''binding material'' that is used in voodoo rites.

It ''is a witchcraft term related to spells,'' a defense official said. ''Allegedly, in witchcraft rites of this type, people are named and bound to a spell and the food offering. All is frozen allegedly to freeze the actions of the people as a form of protection against the offeree. The food concoction serves as payments to the gods for the spell.

''Inside several of the wrapped items, not all, were pieces of paper with names written on them. The names found on pieces of paper inside the wrappings were Ronald Reagan, George Bush, (Sen.) Jesse Helms, Congress of the United States, (former Secretary of State) George Shultz, Senator D'Amato, Clifford Alexander, Baena Slares,'' the official said.

On Dec. 22, Army Col. Mike Snell, the commander of a U.S. infantry task force, told reporters that his troops had found 50 pounds of cocaine in a house frequented by Noriega at Fort Amador, a military base used jointly by U.S. and Panamanian forces before the U.S. invasion.

The two-story building was inhabited by a Brazilian woman believed to be Noriega's ''sorceress'' and became known among U.S. soldiers as the ''witch house.''

Snell said some of the substance was found wrapped in banana leaves inside a refrigerator. ''We're sure it's cocaine,'' he was quoted as saying.

Gen. Maxwell Thurman, commander of the U.S. Southern Command based in Panama, later repeated the allegation, saying that 50 kilos - not pounds - of cocaine belonging to Noriega had been found. A kilo equals 2.2 pounds.

The Pentagon, however, said Thurman was wrong and the amount found was 50 pounds.

Noriega, who surrendered to U.S. forces on Jan. 3, is in jail in Miami awaiting trial on federal drug trafficking and racketeering charges.

#90024u2169 01/24/1990 ~United Press International

NEW YORK (JAN. 24) UPI - The stock market closed lower Wednesday in very heavy trading, after an opening plunge in the Dow industrials was almost erased by bargain hunting and computerized program buying.

The Dow Jones industrial average, which rose 14.87 Tuesday, lost 10.81 to close at 2604.50 after rebounding to unchanged levels after an early drop of more than 60 points.

Among broader market gauges, the New York Stock Exchange composite index lost 0.96 to 182.64 and Standard & Poor's 500-stock index fell 1.35 to 330.26. The price of an average share dropped 18 cents.

Declines pounded advances 1,212-382 among the 1,987 issues crossing the NYSE tape, but the margin was down from almost 13 to 1 on the opening.

Big Board volume totaled 207,830,000 shares, compared with 179,300,000 shares traded Tuesday, the first time turnover has topped 200 million shares since the ''triple-witching hour'' trading Dec. 15, when December stock-index futures and options expired.

Analysts said the market was the victim of a rise in interest rates and selloffs in overseas markets, but that bargain hunting in the blue chips and computerized program buying throughout the afternoon sent the Dow industrials briefly higher on the day before they eased to close with a modest loss.

Alan Ackerman, senior vice president at Gruntal and Co., said that while he was heartened by the late bounce back, ''it still hasn't gotten us out of the woods. The market turned into plus column but then went negative again.

''There'll be concerns about what'll happen in Japan overnight. The risk takers are not yet there, just the bargain hunters,'' he said.

As for the early 60-point selloff, Ackerman said analysts had expected a freefall of perhaps 50 or 100 points as the market was badly shaken by a disappointing response to the government's auction Tuesday of 40-year bonds to finance the savings and loan bailout.

Demand for the $5 billion bond offering by the Resolution Funding Corp., a government agency created to finance the thrift bailout, was very weak,

making the rates on the bonds much higher than expected and providing yet another indication that interest rates seem to be headed one way right now - up.

As of Wednesday afternoon, Treasury issues had rebounded slightly. The 30-year bond was down 1/8 at 96 7/8 but it yielded 8.41 percent, still sharply above where it was when the year began.

The opening dive also was fueled by computerized program selling, used to profit on price discrepancies between stocks and stock index futures traded in Chicago. At the opening, the futures fell the maximum amount they are allowed in the first few minutes of trading, hitting levels far below stock prices and triggering the computerized selling.

Analysts also said sharp declines in Tokyo and London helped push prices down on the opening.

On the trading floor, Citicorp, the most active NYSE issue, was down 3/4 to 24.

Philip Morris followed, up 1/4 to 38. General Electric was third, up 3/8 to 63 1/8.

Among the blue chips, AT&T rose 1/2 to 41 1/4 after announcing it would phase out a Virginia plant over the next year or so, affecting 1,000 employees. IBM gained 3/4 to 97 1/2, Du Pont tumbled 1 1/8 to 39 3/8 after reporting a slight rise in earnings that fell short of forecasts, while Alcoa rose 1/4 to 63 1/2, Coca-Cola lost 3/8 to 70 5/8 and Allied Signal lost 3/4 to 34.

Precious metals turned mixed as the market rebounded and investors began to leave the sector known as a safe haven in times of economic uncertainty. Hecla Mining fell 1/4 to 14 1/2, Homestake Mining was up 1/4 to 22 5/8, Battle Mountain Gold was down 1/4 to 17 3/4 and Newmont Gold gained 1/8 to 53 1/4.

Among takeover-related issues, UAL jumped 6 to 161 1/2 after talk that United Airlines' unions have worked out a bid for the company and will present it at Thursday's board meeting. Hilton Hotels tumbled 3 3/8 to 62 1/8 amid speculation that the company might not be sold. And Birmingham Steel plunged 5 7/8 to 18 3/8. Harbert Corp. withdrew its bid for the company after a bank backed out of the deal.

On the earnings front, Warner-Lambert surged 5 to 113 3/4 after estimating 1989 earnings of $6.10 a share, in line with estimates. Cray Research soared 3 1/2 to 42 3/4 after a well-received earnings report.

Volume of NYSE-listed issues, including trades in stocks on regional

exchanges and in the over-the-counter market, totaled 244,431,940 shares, compared with 216,726,390 shares traded in the previous session.

Prices closed sharply lower in heavy trading on the American Stock Exchange.

The Amex Market Value index sank 5.06 to close at 354.67. The price of an average share lost 19 cents. Declines pounded advances 484-141 among the 821 issues traded. Composite volume totaled 25,535,900 shares, compared with 18,548,800 traded Tuesday.

Texas Air led the Amex issues, tumbling 1 3/8 to 7 3/8. The company said it knew of no reason for the plunge, which came on heavy institutional selling.

The National Association of Securities Dealers composite index slumped 4.76 to 425.66.

WASHINGTON (JAN. 24) UPI - The Food and Drug Administration lashed out Wednesday at the American Heart Association's plan to place its seal of approval on foods meeting its nutritional guidelines.

In a letter sent to the heart association, acting FDA Commissioner James Benson said companies taking part in the ''Heartguide'' food labeling plan may face ''regulatory action'' if they push ahead and start the effort Feb. 1.

''Although we agree with the laudable objectives of your program, I regret to say that we have serious reservations about the means you have chosen to meet those ends,'' Benson wrote.

Under the program, the heart association plans to grant seals of approval to processed foods that meet its fat, cholesterol and salt guidelines. Participation in the program is voluntary, and manufacturers must pay fees ranging from $15,000 to $640,000 per brand for food testing and consumer education.

In October, the Agriculture Department barred the heart group from including meat and poultry products in the Heartguide program.

The FDA's main objection to the effort is that it ''could very easily result in the endorsement of products - such as some varieties of margarine, spreads and salad dressings - that quite simply do not represent the kinds of foods that ought to be promoted to achieve health hearts,'' Benson said.

Another concern raised by the FDA was the heart group's refusal to include in label statements that the seal of approval was made possible only by payment of a fee.

Dr. Myron Weisfeldt, president of the American Heart Association, said his group was ''deeply disappointed'' by the FDA's decision.

''This late action by FDA will result in inconvenience and expense to the companies, and temporary confusion on the part of American consumers,'' he said.

The start of the Heartguide plan will be delayed pending the outcome of further negotiations with the FDA, said Weisfeldt, emphasizing his group does not plan to abandon the effort.

More than 100 food products involving nine companies were scheduled to be part of the first wave of the Heartguide program, Weisfeldt said.

The Heartguide program will grant marks of approval only to those foods that would easily fit into a daily diet that derives no more than 30 percent of its calories from fat. In addition, daily limits for saturated fat would be 10 percent of calories; cholesterol, 300 milligrams; and sodium, 3000 milligrams.

Although the Agriculture Department can forbid the heart association from placing its mark on meat and poultry, the FDA does not have power to take action until the seals actually appear on food products. Also, under FDA rules, manufacturers - not the heart association - would be subject to any penalties for improper labeling.

CAPE CANAVERAL, FL. (JAN. 24) UPI - A Delta 2 rocket streaked toward space Wednesday carrying the sixth in a network of 21 military navigation satellites that will allow troops around the world to pinpoint their positions to within about 50 feet.

The $30 million Delta 2, equipped with nine strap-on solid-fuel boosters, thundered to life at 5:55 p.m. EST and vaulted away from launch complex 17 at the Cape Canaveral Air Force Station, arcing east over the Atlantis Ocean and putting on a spectacular afternoon skywhow for tourists and area residents.

Perched atop the blue-and-white, 126-foot rocket was a $65 million Global Positioning System - GPS - ''Navstar'' satellite, the sixth of a planned network of 21 such spacecraft designed to provide military units around

the world with ultra accurate timing, velocity and location information.

Once the entire constellation is in place, ground units, ships and aircraft will be able to pinpoint their locations to within 53 feet anywhere in the world.

The flight plan called for the solar-powered satellite to be ejected into a preliminary egg-shaped orbit about 25 minutes after liftoff. An on-board solid-fuel rocket is scheduled to fire later to boost the satellite into a circular 12,500-mile-high orbit.

It was the sixth launch of an Air Force Delta 2 rocket, an upgraded version of the workhorse Delta rockets launched for years by NASA and built by McDonnell Douglas Space Systems Co. of Huntington Beach, Calif.

Twenty-one such rockets were ordered in the wake of the 1986 Challenger disaster to carry GPS satellites into orbit that originally were to have been launched from space shuttles.

The GPS satellites, built by Rockwell International's Satellite Systems Division in Seal Beach, Calif., are equipped with atomic clocks accurate to one second in 300,000 years. They work by continuously broadcasting radio signals coded with timing information.

Computers in receivers small enough to carry by hand can determine how long it takes a signal to arrive and thus how far the receiver is from the satellite, whose position and velocity are known.

Combined with data from three other GPS satellites, the user can pinpoint his or her location and altitude to within 53 feet anywhere in the world.

The first such satellite was launched Feb. 14, 1989, in the maiden flight of a Delta 2 rocket, a picture-perfect debut for the new rocket system. The second satellite was successfully launch June 10, the third Aug. 18, the fourth Oct. 21 and the fifth Dec. 12.

Prior to the Challenger disaster, unmanned rockets were being phased out in favor of NASA's manned spaceplane.

But after the accident, and the subsequent grounding of dozens of high-priority military satellites, the Pentagon ordered whole fleets of unmanned rockets to guarantee access to orbit.

#90024u2222 01/24/1990 ~United Press International

NEW YORK (JAN. 24) UPI - The dollar plunged with the U.S. bond and stock markets in heavy New York trading Wednesday, but fought its way back up to erase most of its losses as the Dow Jones industrial average recovered.

The dollar declined for the same reason as stocks did: the very disappointing results of an auction Tuesday of $5 billion in 40-year bonds issued by the Resolution Funding Corp. Lack of interest in the thrift bailout issue sent bond prices down and set off a stock market decline.

Mitsui Bank senior dealer Eric Lehtis said the market's instinct was to ''kick a dog when its down,'' aggressively selling the dollar in the morning on the heavy declines in the bond and stock markets.

But players had second thoughts as stocks rallied and some concluded that the high bond yields produced by the selloff could spur dollar-buying. The unit's recovery forced some hasty covering of selling positions. ''The dollar's weak but they just oversold it,'' Lehtis said.

In late New York trading the dollar was quoted at 1.6910 German marks, down from 1.6978 late Tuesday but well off its day low of 1.6760 marks. The dollar was changing hands at 145.65 Japanese yen, off from 145.90.

Despite the recovery, the dollar remains soft given the weakness of the

American economy, said Earl Johnson, vice president and currency analyst at Harris Trust & Savings Bank in Chicago.

Even high bond yields won't help very much, he said, because they are up ''for the wrong reasons.''

The market is looking to the end-of-week release of fourth-quarter Gross National Product data by the U.S. government. Johnson said most players are looking for flat economic growth of just 0.5 percent, which will further weaken the dollar against other currencies.

In New York trading the British pound rose to $1.6535 from $1.6502.

Other dollar rates: 1.4945 Swiss francs, off from 1.5108; 5.7415 French francs, off from 5.7730; and 1,258 Italian lire, down from 1,264.

In Europe the dollar declined. It closed in Frankfurt at 1.6835 marks against 1.7005 Tuesday and also fell in Zurich, to 1.4925 Swiss francs against 1.5135.

In Paris it moved down to 5.7330 French francs against 5.8020, in Brussels to 35.20 Belgian francs, off from 35.75, and in Milan to 1,256.10 Italian lire against the previous day's 1,269.50.

In London, the pound closed higher at $1.6565 against $1.6495.

Republic National Bank in New York closed cash gold at $417.50 an ounce, up from $413.50 Tuesday. The New York Commodity Exchange settled gold at $417.20 an ounce, up from $413. Gold climbed sharply in Zurich to $420 an ounce from $408.50, and rose in London to $420.25 an ounce from $409.75.

Republic closed cash silver at $5.23 an ounce, down from $5.305. Comex spot silver fell to $5.215 from $5.294. Silver was up in Zurich to $5.30 an ounce from $5.25, and it rose in London to $5.34 an ounce from $5.29.

European dealers said metal prices surged higher on heavy demand, especially from the Middle East. Some investors apparently viewed gold as a safe haven amid financial market jitters in London, New York and Tokyo.

(JAN. 24) UPI - President Bush spoke out today on troubles in the world's two communist giants. During a news conference in Washington, Bush expressed hope that Soviet President Gorbachev ''stays strong'' in the face of domestic unrest. Bush also defended his much criticized overtures to China's rulers, saying he wants to maintain contact with Beijing.

The Kremlin says Mikhail Gorbachev is NOT going to preside over the dissolution of the Soviet Union. The foreign ministry in Moscow says the Soviet leader is NOT considering allowing the dissident republics of Azerbaijan and Lithuania to break away. The ministry spoke today as Soviet troops ignored an Azerbaijani secession ultimatum and took control of the volatile border with Iran.

Reports from Yugoslavia say riot police used tear gas and water cannon in breaking up a demonstration today by about 40-thousand ethnic Albanians in a southeastern province. Belgrade Radio says police arrested a number of the demonstrators, who took to the streets to demand more autonomy and a multi-party system. There were NO reports of injuries.

Florida police say 10 migrant farm workers were killed today when the van they were riding in plunged into a canal. Clewiston deputies say 12 people were inside the van when it plunged into the water, but the driver and another person survived. Witnesses say the van left the roadway when the driver lost control on a curve during heavy fog.

WASHINGTON (JAN. 24) UPI - A 2 percent decline in beef production was a prime reason that commercial red meat production, which includes beef, pork, lamb and veal, dipped slightly in 1989, the government said Wednesday.

The Agriculture Department said red meat production totaled 39.4 billion pounds, a drop of 350 million pounds, or 1 percent, from the 1988 total.

Beef and veal showed declines while pork production was up 1 percent, to 15.76 billion pounds. Lamb production was up 4 percent for a total of 341 million pounds.

Veal output was down 11 percent, to 344 million pounds.

For the year, beef production totaled 22.97 billion pounds, a drop of 450 million pounds from the preceding year.

Commercial red meat production includes slaughter in federally inspected plants and other slaughterhouses but excludes animals butchered on farms.

The department has forecast beef production will rise 1 percent this year to 23.3 billion pounds, pork to drop 1 percent to 15.5 billion pounds, lamb to drop 3 percent and veal to drop 1 percent.

#90024u2400 01/24/1990 ~United Press International
BUENA PARK, CA. (JAN. 24) UPI - Charles Rothenberg, the man who set fire

to his 6-year-old son in 1983 and severely disfigured the boy, was freed from prison Wednesday to a secret location where he will be the most closely watched parolee in state history.

''I don't want to know where he is,'' said Rothenberg's son, David, now 13. ''Charles doesn't understand very well. He still thinks I want to see him.''

Escorted by two parole agents, Charles Rothenberg was released shortly past midnight after serving 6 1/2 years in state prison and was driven to his parole destination, which authorities said they were forced to keep secret because of intense public reaction to his crime.

Rothenberg was clandestinely moved out of the California Men's Colony in San Luis Obispo on Tuesday to avoid a ''media circus,'' authorities said.

David Rothenberg was asleep in a Buena Park motel room in the spring of 1983 when his father poured kerosene around his bed and set it on fire, burning him beyond recognition.

At a news conference to discuss the case, David, who has said he is terrified of his father and never wants to see him again, said he is comforted by assurances from the state that his father will be kept away from him.

''I'm not afraid (now). I think he's in good hands,'' said the teenager, who sleeps with a BB gun near his bed.

David said he called the news conference to ''make it clear'' to his father that he never wants to see him again. ''I think he still wants to be my father, but that can never be done again,'' he said. ''If he was my real dad, he wouldn't act like he did.''

Tipton Kindel, a spokesman for the state Department of Corrections, said Rothenberg's three-year parole will be the most restrictive of any state parolee, costing taxpayers more than $200,000 a year.

Much of the costs will go to pay the salaries of three full-time parole agents who will watch Rothenberg 24 hours a day to ensure he does not contact his son. He must also wear a cigarette box-sized electronic surveillance transmitter and anklet that will signal authorities if he leaves his assigned area.

Kindel said while the state is prepared to continue the 24-hour surveillance for the full three years of Rothenberg's parole, he said authorities ''may re-evaluate'' over time whether such extensive monitoring is necessary.

Rothenberg, 49, has expressed remorse for what he did, but also has said he would like to see his son again.

That appeared unlikely since his parole destination is ''not anywhere close'' to Orange County, where David lives with his mother, who has since married a police lieutenant who worked on the investigation, Kindel said.

''Our parole division has been in close contact with the family and they are aware of all of the developments, except the specific detailed location,'' Kindel said. ''They have a general idea.''

However, David's stepfather, police Lt. Richard Hafdahl, said the family has only been told that Rothenberg would not be paroled anywhere in Southern California.

''They assured us that he would not be in Southern California,'' Hafdahl said. ''But that leaves a lot of the rest of the country.''

When prison authorities said several weeks ago that they wanted to parole Rothenberg to a town in the California desert, outraged residents vetoed the plan.

Fueling community fears are statistics on violent crime and recidivism. According to a U.S. Justice Department report published last March, 62.5 percent of all inmates released from state prisons in 1983 committed a felony or serious misdemeanor within three years of their release.

Rothenberg was convicted of attempted murder, arson and other crimes connected to the March 3, 1983, fire in the Buena Park Travelodge. He received a 13-year sentence, the maximum penalty under state laws that have since been toughened. If Rothenberg had been sentenced today, he could have been sent to prison for life.

His sentence was cut in half after serving as a model prisoner at Soledad State Prison and the Men's Colony.

Rothenberg, who has spent much of his life in prison, was divorced from David's mother, then living in New York, when he asked to take his son on a weeklong vacation to the Catskills in 1983. Instead, he spirited David to Southern California for visits to Disneyland and Knott's Berry Farm.

After a week of rain, he called his ex-wife asking for more time with the boy and accidentally revealed that they were not in New York state. Marie Rothenberg became angry and told her ex-husband he would never see his son again once they returned to New York.

The same day, Rothenberg checked into the Buena Park motel with his son, kissed the boy goodbye and set his bed on fire as he slept. Leaving David

for dead, Rothenberg went to a phone booth across the street, where he watched as flames billowed from the motel. Other motel guests dragged David to safety.

The boy has undergone more than 100 painful skin grafts and had other reconstructive surgery to repair the horrendous damage from burns over 90 percent of his body. He now seems to be living as a normal teenager, hanging out in video arcades, skateboarding and looking forward to an upcoming school dance. Friends say he is among the most popular kids in school.

In recent interviews he said he has nightmares about his father coming back to hurt him and his mother, whom Rothenberg has said was the indirect target of his act.

DES MOINES, IA (JAN. 24) UPI - Mounting costs of the savings and loan crisis have forced the Iowa Legislature to consider suspending banking laws in an effort to ease the failing institutions' burden on taxpayers.

House and Senate committees passed joint resolutions Wednesday that would allow any Iowa bank to purchase a floundering savings and loans institution. Current law restricts the number of branch offices an Iowa bank may own, thereby limiting bidders to small banks, other savings and loans, and out-of-state institutions.

Fewer bidders means lower prices paid to the federal government for the savings and loans, said State Superintendent of Banking Robert Rigler. The taxpayer would have to make up the difference, he said. "Time is of the essence here," he said. "If (legislators) don't do anything, most banks in Iowa are not going to be able to bid."

Only thrifts designated as "in need of assistance" would be eligible for purchase under the suspended rules, Rigler said. There are currently between six and eight such institutions in Iowa.

The suspension of banking rules would only be effective until Aug. 9, 1992. By passing a resolution rather than a law, the Legislature would be able to repeal the measure at any time before that date, said Rigler. "I can honestly say there is no better alternative," he said. "It's really a pretty efficient way to face a situation like this."

#90024u2581 01/24/1990 ~United Press International

WASHINGTON (JAN. 25) UPI - There were 9.94 million head of cattle on feed for slaughter in the 13 major states at the start of this month, three percent more than one year ago, the Agriculture Department said Wednesday.

The department said producers put 7.32 million head on feed during last October, November and December, a ten percent increase from the same period in 1988. Lack of rain and poor range conditions in the Great Plains during the fall prompted some producers to move stock into feed yards to be fattened for sale.

Producers shipped 5.36 million head to market during October, November and December. That was two percent more than the total for the same period in 1988.

Cattle feeders expect to market 5.69 million head during this month, February and March. That would be slightly lower than first-quarter marketings in 1989.

Kansas showed the largest increase in feedlot numbers with 1.59 million head on feed, a nine percent increase. Oklahoma and Iowa each were up seven percent.

Only four states - Arizona, Idaho, Illinois and Washington state - showed declines in cattle on feed. Idaho had the largest drop, 16 percent, for a total of 200,000 head.

WASHINGTON (JAN. 25) UPI - The Postal Service said Wednesday that self-service, credit card-operated facsimile terminals will soon be available to postal customers in 263 locations nationwide.

A contract signed Wednesday with Miami-based Hotelecopy Inc. provides for installation of facsimile terminals in 209 locations nationwide, said Gordon C. Morison, Assistant Postmaster General.

Morison noted that 54 postal locations in the Northeast already feature FaxMail terminals, the result of a pilot program begun last November.

Terms of the new contract call for 66 FaxMail terminals in the Postal Service's Southern Region, 49 in the Western Region, 44 in the Central Region, and 50 in the Eastern Region.

#90024u2674 01/24/1990 ~United Press International

NEW YORK (JAN. 24) UPI - Jurors wearing earphones Wednesday listened to a tape of John Gotti boasting that he is ''boss'' of the nation's most powerful Mafia family and that an admiring gangster called him ''God's gift to the underworld.''

Gotti's description of his rise to power in the Gambino crime family is contained on some of the 1,001 hours of secretly taped conversations at his alleged Queens headquarters, the Bergin Hunt and Fish Club.

Wearing large black earphones, the jury of seven men and five women in the assault case against Gotti, 49, and Anthony Guerreri, 60, an alleged Gambino soldier, heard the tapes Wednesday afternoon in state Supreme Court in Manhattan. The jurors also were provided with transcripts prepared by the government.

Gotti, wearing a red floral tie, matching pocket square and black on black striped double-breasted suit, was given a pair of earphones but he

declined to wear them.

Gotti is accused of ordering the May 7, 1986, shooting and wounding of a carpenters union leader, John O'Connor. The shooting was meant as a warning to the union, which had trashed a Gambino-linked restaurant in a dispute over the use of non-union labor.

Many of the tapes are muffled and Gotti's lawyers claim the government transcripts are inaccurate because they reflect only what authorities wanted to hear, not what was actually said.

Under cross examination by defense lawyer Gerald Shargel late Wednesday, an investigator for the state Organized Crime Task Force, Edward Wright, conceded that he made a transcript of one of the Gotti tapes and then changed the transcript three years later when suddenly ''inaudibles became discernible.''

The trial was adjourned for the day at 7:30 p.m. and will resume at 9:45 a.m. Friday after a one-day break.

The tapes begin in 1985, when reputed Boss of Bosses Paul Castellano was gunned down outside a Manhattan steakhouse on Dec. 16 and Gotti allegedly assumed his throne.

In a Jan. 11, 1986, conversation with an unknown man, Gotti said his recent rise to power left him feeling obligated to socialize with a higher class of people.

''Me and you may socialize but I can't socialize with these guys, I can't bring myself down, I'm a boss you know what I mean ... I gotta isolate myself a little bit,'' Gotti said, according to the transcript.

On Jan. 18, 1986, Gotti boasted to another man about the compliments lavished on him by an admiring gangster.

''He says, 'When they say God's gift to the underworld you are it,''' Gotti bragged.

''He speaks with his heart, he means it, I tell ya somethin', I love the guy,'' Gotti continued.

But apparently not everyone in organized crime revered Gotti and the reputed mob boss decided to demand some respect.

In a Jan. 17, 1986, conversation, Gotti said his underlings had questioned his judgments.

''And they come at me, and they say we're telling you now, what about this

and what about that. Move this guy, are you gonna move us all? I said, 'Let me tell you fellers something. I'm right in what I just done. I could break every one of you captains right now, and not overstep bounds.' A new boss does that,'' Gotti said, according to the transcript.

Most of the tapes played Wednesday were meant to prove that he is the boss of the crime family and had the power to call all the shots for the Gambinos.

Later in the trial, the jury is expected to hear a tape in which Gotti allegedly orders O'Connor shot, saying ''Bust him up,'' according to prosecutors.

(JAN. 25)

Baseball

The Pittsburgh Pirates signed first baseman Sid Bream to a one-year contract. Bream, who was eligible for arbitration, missed much of 1989 with problems with his right knee. He appeared in only 19 games, batting .222 with no home runs and four RBI. ... The Minnesota Twins signed third baseman Terry Jorgensen to a one-year contract. Jorgensen hit .263 in 135 games with Double-A Orlando last season, with 13 home runs and 101 RBI.

Basketball

The United States, Soviet Union, Yugoslavia and Brazil will hold the top spots in the four groupings for the 1990 world basketball championship. The U.S. will head Pool C in Buenos Aires, joining Greece, Spain and South Korea. The U.S. opens Aug. 8 against Greece.

Bobsled

Switzerland's Gustav Weder and Curdin Morell set a course record on their first run and went on to win the European Two-Man Championships at Igls, Austria. The team opened the championships with a stunning first run of 52.94 seconds, setting a record at the Igls Olympic Bobsled Course, near Innsbruck.

Boxing

Michael Olajide filed suit in New York State Supreme Court seeking to have a split-decision loss overturned. Olajide was declared the loser by decision in a Dec. 1 bout against Dennis Milton. Referee Ken Zimmer apparently had stopped the fight in the final round with Milton reeling,

but then ruled he thought he had heard the bell ending the match. Judges awarded the fight to Milton.

College

UCLA will retire four basketball jerseys - Kareem Abdul-Jabbar's No. 33, Bill Walton's No. 32, Ann Meyers' No. 14 and Denise Curry's No. 12. All four players were All-Americas at least three times. A ceremony will be held during halftime of the Feb. 3 game against DePaul. ... Harold Merritt was named interim basketball coach at Northern Arizona. Merritt replaces Pat Rafferty, who resigned after six players said they would not play for him. ... Cornell named Chuck Driesbach defensive coordinator, switched Peter Noyes from defensive coordinator to offensive line coach, and reappointed Glenn Deadmond defensive line coach and Jim Knowles running backs coach. ... Delta State of Mississippi has retained its ranking as top women's college basketball team in the NCAA Division II poll. Virginia Union leads the men's clubs in Division II, with the men of Wittenburg of Ohio atop Division III.

Football

Washington scout Bill Devaney has joined former boss Bobby Beathard as the new head of player personnel for the Chargers. The Redskins released Devaney from his contract after seven years as a college scout. He will replace the fired Chet Franklin as the overseer of San Diego's scouting corps. ... Running back Barry Sanders of the Detroit Lions has been named the Pro Set NFL Rookie of the Year by a panel consisting of former NFL top rookies. Sanders will be presented a trophy Thursday at the Super Bowl XXIV Card Show at the Superdome in New Orleans.

Golf

LPGA golfer Jan Stephenson suffered a broken finger when an assailant grabbed her purse as she was putting it into the trunk of her car on her way to a Miami Heat basketball game. Ron Culp, trainer for the NBA team, said X-rays showed the ring finger on Stephenson's left hand was broken and would probably require surgery.

Gymnastics

Triple Olympic gold medalist Dimitri Belozertchev leads a team of Soviet and Bulgarian gymnasts who open a five-week, 25-city tour in the United States Feb. 22.

Skiing

International Ski Federation officials announced two men's downhills will be run Feb. 3-4 at Cortina, Italy, to replace the downhill and super giant

slalom scheduled for Chamonix, France. The ruling body also moved two women's races scheduled that same week for Brigels, Switzerland. A downhill and a giant slalom now will be held at Veysonnaz.

Tennis

Arthur Ashe, a U.S. Open and Wimbledon winner, has received an honorary doctor of humanities at a University of Hartford Convocation. The citation noted Ashe's off-court achievements, including the earning of an Emmy award for his adaptation of his ''A Hard Road to Glory,'' which chronicles the history of black athletes in America.

Track and Field

The fastest active woman in the world, Dawn Sowell, will compete in the 55-meter dash Feb. 2 at the Millrose Games. Sowell, 23, recorded the fastest times in the world last year for the 100 and 200 meters and was ranked first in the world at both distances.

Yachting

Organizers of the round-the-world BOC Challenge yacht race have announced that 47 sailors have signed up for the solo race that leaves Sept. 15 from Newport, R.I. The competitors will include 13 Americans, 10 Britons, seven Australians and six French sailors. The field will include three women, Isabelle Autissier of France, Noelle Corbett of Canada and Jean Weber of Canada.

#90024u2881 01/24/1990 ~United Press International

(JAN. 24) UPI - The Kremlin is dealing with the political consequences of sending in troops to quell ethnic unrest in Azerbaijan... The House prepares to override apresidential veto... and a father who set his son on fire is paroled in California. These stories, and more, up next from U-P-I

The Soviet Foreign Ministry says Mikhail Gorbachev will NOT preside over the dissolution of the Soviet Union. A spokesman says Gorbachev will NOT allow dissident republics to break away.

The Red Army, meanwhile, reportedly advanced further in rebellious Azerbaijan, taking control of the volatile border with Iran. The troops started their push to the border yesterday, ignoring an Azerbaijani ultimatum to end the Soviet invasion.

Gorbachev ordered the troops into Azerbaijan last week to put down violence that exploded between Moslem militants and the Christian Armenian minority in the republic. The soldiers had to shoot their way into Baku, the Azerbaijani capital.

Azerbaijan's parliament had threatened to consider secession if the Russians did NOT pull out by 6 a-m.

Foreign Ministry spokesman Gennadi Gerasimov told reporters that President Gorbachev has NO intention of presiding over the break-up of the Soviet Union.

Gerasimov conceded that the decision to send troops hurt Gorbachev politically, but he added that there is NO one else to rule the nation today.

The Red Army sent units to the 500-mile-long Iranian border in Azerbaijan when Moslem militants in the region vowed to secede to join their Azerbaijani relatives in the Iranian border area.

The capital of Baku is immobilized for a second consecutive day by a general strike called to protest the Soviet intervention.

#90024u2901 01/24/1990 ~United Press International

MEXICO CITY (JAN. 24) UPI - World Bank President Barber Conable said Wednesday the international agency will provide Mexico with loans totaling $3.2 billion in fiscal year 1990, of which $2 billion will be used to support the reduction of Mexico's public foreign debt with commercial banks.

The Mexican government and a 15-member Bank Advisory Committee, which represents about 500 commercial banks and has been negotiating a reduction of the Latin American nation's commercial debt, are expected to sign a landmark debt reduction accord Feb. 4 in Mexico City.

"And now that the 1989-1992 financing and debt-reduction package is being concluded, the World Bank will provide $2 billion to support the reduction of Mexico's public debt with commercial banks," Conable announced in a speech at El Colegio de Mexico, a leading center monitoring economic and political issues in the region.

Conable said after delivering his speech that the World Bank will provide Mexico with loans totaling $3.2 billion in fiscal year 1990, of which $2 billion will be earmarked toward reducing the nation's commercial foreign debt. About $2 billion more in loans will be provided the following year, he said, without specifying the uses of the 1991 loans.

The debt reduction agreement, assembled under the so-called Brady Plan drawn up by U.S. Treasury Secretary Nicholas Brady, is expected to cut Mexico's annual debt payments by nearly $4 billion.

Although it has fallen short of initial expectations, the pact will trim about $6.4 billion off Mexico's $53 billion commercial debt. Mexico's total foreign debt is about $100 billion, the second-largest in the developing world after Brazil's estimated $115 billion.

Under the 1989-1992 debt reduction deal with commercial banks, Mexico hopes to lower the net transfer of resources on servicing its foreign debt from about six percent of its gross national product during the past five years to 2.9 percent this year and 2.3 percent in 1991, according to Mexican officials.

On Tuesday, Conable signed two loan agreements with Mexico totaling $450 million in a show of renewed support by the World Bank for the developing country's economy. He also held meetings with President Carlos Salinas de Gortari and Finance Minister Pedro Aspe and leaders of the private sector.

Conable said Wednesday that Mexico has begun one of the "most ambitious, courageous and determined programs of economic reform and institutional change recently undertaken in any country, developed or developing."

"And we are convinced that with the reduction of debt and debt service ... and with the opening of the economy, increased efficiency, reduction of regulations and an emphasis on investments, the stage is set for a resumption of growth and the resultant alleviation of hardship," Conable said.

Over the past decade, Mexicans lost about 50 percent of their purchasing power, and nearly all Latin American countries experienced foreign debt crises that triggered poverty and economic misery.

"The debt burden of Latin American countries is heavy. We in the World Bank support the reduction of debts where governments implement coherent policies to adjust domestic economies and improve their efficiency and self-reliance," Conable said.

He said that in a case like Peru, which does not service its debt, "unilateral debt and debt-service reductions do not by themselves solve economic problems."

Conable said channels for the flow of commercial capital to developing countries have been damaged by the debt crisis. The developing world's foreign debt is estimated at about $1.2 trillion. Of this, Latin America alone owes about $420 billion.

He warned that external capital will no longer be as available as it was in the 1970s, and even if it were, "developing countries should not borrow as they did in the 1970s."

Conable said he hoped that "direct foreign private investment, at least partially, will replace public borrowings so that debt does not increase inordinately and capital is accompanied by technology and management."

#90024u2907 01/24/1990 ~United Press International

(JAN. 24) UPI - President Bush today repeated his opposition to a proposed rollback of the latest Social Security tax increase.

He denounced the proposal by Democratic Senator Daniel Moynihan as ''sleight of hand,'' saying it's a ''disguise for increased taxes around the corner.''

Moynihan says the Social Security surplus, which now is about 65-BILLION

dollars, is being used to mask the true size of the federal budget deficit. Rolling back the latest Social Security tax hike would be a means to help block such use of the surplus.

Moynihan today expressed ''disappointment at the remarks of the president '' and said- ''there is NO sleight of hand involved.''

Bush also commented at a news conference today on the troubles facing Soviet President Gorbachev. Bush said he hopes Gorbachev ''stays strong'' in the face of conflict in Azerbaijan and Armenia.

Bush said he doesN'T really know what the future holds for the beleaguered Soviet leader, but said it's in the U-S interest that Gorbachev's policy of perestroika ''succeed and go forward.''

The comments mark the first direct word from Bush since Gorbachev ordered Soviet troops into Azerbaijan to try to halt a dispute between Moslem Azerbaijanis and Christian Armenians.

-30- 1415

#90024u2932 01/24/1990 ~United Press International

(JAN. 24) UPI - The House is poised to override President Bush's veto of a bill that would protect Chinese students in this country, but Bush today firmly defended that veto.

The bill, approved unanimously by Congress last year, would allow Chinese students to seek extensions of their visas if they fear persecution in their homeland.

Bush told a news conference this morning that he has already provided such protection by executive order, and says the bill will only anger Chinese leaders.

Bush condemned the repression that resulted in the bloody massacre of pro-democracy demonstrators last June in Beijing, but said the United States should NOT isolate China.

He says if he signs the bill, ''the students would still be safe, but China would retaliate and cut off future student exchanges.''

A Republican backer of the bill says in order for the Chinese students to be truly secure, the protections should be made law.

There was more protest today against U-S aid to El Salvador.

25 activists were arrested in a House office building in Washington, D-C. More than half of them had been removed earlier by police from a

congressional hearing.

Several of the activists had disrupted a hearing before the House Foreign Affairs subcommittee on Western Hemisphere Affairs. The disruption came during testimony by Bernard Aronson, the Bush administration's pointman on Latin American policy.

Several of the demonstrators stood up in the hearing and voiced condemnations of ''murders'' and ''atrocities'' they say are being carried out by the Salvadoran army, with U-S backing.

One demonstrator shouted that his money was being used- quote- ''to finance terrorists.''

It was the second such demonstration on Capitol Hill this week, and was part of a series of demonstrations nationwide organized by the activist group Pledge of Resistance. 37 people were arrested in the Capitol Rotunda yesterday.

-30- 2111

#90024u2974 01/24/1990 ~United Press International

(JAN. 24) UPI - Authorities say Charles Rothenberg will be the most closely watched parolee in California history. Rothenberg was freed on parole early this morning after serving one-half of a 13-year prison term for setting fire to his six-year-old son in 1983.

Officials say Rothenberg's destination is being kept secret because of intense public reaction to the case, in which young David Rothenberg, now 13, was severely disfigured. The boy has undergone more than 100 painful skin grafts and other reconstructive surgery.

The boy says he has nightmares about his father returning to kill him and his mother. He says he NEVER wants to see his father again.

Officials say it will cost California about 200-thousand dollars a year to maintain Rothenberg's parole, during which he will be assigned three full-time parole agents, who are to monitor him 24 hours a day. He also will wear an electronic device that will automatically notify authorities if he leaves a prescribed area.

Rothenberg has said he is sorry for what happened and would like to see his son again. Authorities say he will be kept far away from Orange County where his ex-wife and son now live. The boy's mother has since re-married... to a police detective who had worked on the investigation of the case.

The Federal Reserve says the nation's economy is expanding slowly in each

of its 12 districts, and the head of the Congressional Budget Office predicts the economy will grow a modest two percent this year.

C-B-O Director Robert Reischauer also told the Senate Budget Committee that without lower spending or higher taxes, the federal deficit will stay at or near its fiscal 1990 level of 138-BILLION dollars. He said that deficit level will hold until 1993, with NO significant reduction possible.

Reischauer also said he believes Federal Reserve Board policies will avoid a recession while holding inflation steady.

The Fed, meanwhile, said conditions in the West are stronger than in the East, and that it expects slow growth throughout 1990.

Reischauer predicted that the Gross National Product will grow one-point-eight percent from the fourth quarter of 1989 to the same period this year... slightly less than the two percent growth rate for 1989.

Reischauer was giving the Senate Budget Committee a preview of the NON-partisan agency's economic and budget outlook for the fiscal years 1991-1995, which is to be released on January 31st... the day President Bush will deliver his ''State of the Union'' address.

-30- 2712

#90024u3174 01/24/1990 ~United Press International

(JAN. 24) UPI - Senate Republican leaders say the chances are slim that President Bush will sustain his veto of a bill aimed at allowing Chinese students to stay longer in the United States. Bush says an override of the veto will anger Chinese leaders.

But, House Speaker Thomas Foley today rejected the president's concerns that an override might harm strategic relations with China. Foley says Congress is mainly concerned about the rights of China's citizens, NOT the ''sensitivities'' of its leaders.

The Soviet Army took control of Azerbaijan's border with Iran today, despite threats of secession. The Azerbaijani parliament had threatened to consider secession if the Red Army did NOT pull out of the republic by this morning.

About 40-thousand ethnic Albanians jammed the streets in the capital of a Yugoslavian province today, demanding more self-rule and a multi-party system. Riot police responded with water cannon and tear gas and arrested a number of the demonstrators.

A Panama Canal Commission spokeswoman reports that two men apparently were staging a robbery when they talked themselves into the home of an American

member of the commission last night. The American was shot and killed.

A federal judge today sentenced Richard Secord to two years probation for lying to Congress about the Iran-Contra scandal. Judge Aubrey Robinson says the retired Air Force general has already suffered enough, and there's NO need for a jail term.

An earthquake estimated at three-point-eight on the Richter scale shook southern Indiana today. The U-S Geological Survey says the quake was centered about 30 miles northwest of Louisville, Kentucky. There were NO reports of damage or injuries.

Defense Secretary Cheney today ordered a three-month moratorium on the awarding of new military construction contracts. But officials have NO estimate of how much money the delay will save. Earlier this month, Cheney announced a civilian hiring freeze on the military.

A fathers' rights advocate who staged a 34-day hunger strike while he was imprisoned for failing to pay child support has been ordered to get a job and begin paying his ex-wife. Maurice Small of Nashua, New Hampshire, was jailed for refusing to pay part of the 13-thousand-dollars he owes.

The Minnesota Medical Association says it will ask the state Legislature to ban the sale of cigarettes in vending machines, and will ask for a total ban on sales of cigarettes to people under 21. The group says peer pressure to smoke is very strong for teen-agers.

The Schenectady City School District Board of Education in New York says getting an ''F'' on a report card is bad enough. It has decided to abolish the grade of ''F-Minus,'' which has been termed degrading.

-30- 2950

#90024u3403 01/24/1990 ~United Press International

(JAN. 24) UPI - A circuit court judge in Miami today sentenced Hispanic police officer William Lozano to seven years in prison in the deaths of two black men that set off race riots in the Florida city last January. Judge Joseph Farina earlier had rejected a defense motion for a new trial in the case, in which Lozano was convicted of two counts of manslaughter. He allowed Lozano to remain free on bond pending his appeals.

Richard Secord says Ronald Reagan was ''well aware'' of the general outline of the Iran-Contra scandal. The retired Air Force general today accused Reagan of ''hiding out'' and of being ''cowardly'' in trying to avoid the political implications of the affair. Secord was sentenced to two years probation earlier today for his role in the scandal.

President Bush issued an unusual appeal today for financial support for

Violeta Chamorro, the opposition presidential candidate in Nicaragua. Bush sent a letter to the chairmen of the Democratic and Republican parties asking for a joint contribution to the Chamorro campaign, which he says runs a risk of ''being crippled for lack of money.'' Chamorro faces President Daniel Ortega in elections set for February 25th.

The president of Yemen opened the first state visit ever to Washington, D-C, by a Yemeni leader by calling on President Bush to pressure Israel for concessions in the Mideast peace process. The Yemeni leader pleaded the case with Bush and other U-S officials today. He said U-S principles of equality, justice and freedom should help it push Israel to grant Palestinian self-determination and recognize the leadership of the Palestine Liberation Organization.

A new study indicates black urban teen-agers who have abortions are more apt to stay in school than are their peers who become young mothers. The study by the Alan Guttmacher Institute in New York also found that black teen-agers who had abortions were more economically secure than the childbearing group.

-30- 2152

#90024u3737 01/24/1990 ~United Press International

(JAN. 24) UPI - The House ignored a warning from President Bush and voted overwhelmingly, 390-25, to overturn his veto of legislation guarding against sending Chinese students home against their will. Bush said the bill could cause ''long-term consequences'' to U-S relations with China. Many of the students fear political persecution from Beijing , which last year violently crushed a student-led pro-democracy movement.

Prosecutors in Miami say Circuit Judge Joseph Farina ''acted fairly'' today in sentencing police officer William Lozano to seven years in prison for the deaths of two black men. During sentencing, Farina said the court could NOT ''do perfect justice in this case.'' He could have sentenced Lozano to up to 45 years on each count. Lozano was convicted last month in the deaths of the two victims, whose killings a year ago sparked three days of race riots.

A ''cocaine-like'' substance found in a house in Panama frequented by Manuel Noriega wasn't cocaine at all. That's the conclusion of defense officials, who say tests prove the substance is a ''food concoction'' used in voodoo rites. The officials also said the names of President Bush, former President Ronald Reagan and others were written inside the food items. Those items were found on December 21st, one day after the U-S invasion of Panama. The Army at first thought they were cocaine.

The Soviet Army ignored threats of secession today and sealed Azerbaijan's 500-mile border with Iran. The Azerbaijani parliament had threatened to

consider secession if Soviet troops did NOT pull out of the republic by this morning. The Red Army shot their way into the capital of Baku on Saturday to quell fighting between Azerbaijanis and Armenians. A source in Moscow says Azerbaijanis crossed over the border during the New Year holiday and brought back weapons from Iran.

-30- 2029

#90024u3764 01/24/1990 ~United Press International

(JAN. 24) UPI - A top Democratic candidate for mayor in Washington, D-C, says he doesn't think Jesse Jackson could win a bid for the office. City Council Chairman David Clarke says voters prefer one of the city's own politicians, and he predicted Jackson will NOT run. There was renewed speculation of a Jackson candidacy following last week's arrest of Mayor Marion Barry on federal drug charges.

President Bush says he favors elevating the Environmental Protection Agency to Cabinet status. Bush cites a desire for the E-P-A to be part of the world leadership working on an emerging set of global problems. If the E-P-A is made into the 15th Cabinet department the agency will have increased clout... and Bush says it will- quote- ''help influence the world's environmental policies.''

Some British scientists think they've uncovered a link between the sun and flu outbreaks. The scientists presented evidence which they say supports speculation that sunspots and the flu may have a causal link. They say both occurences seem to peak in 11-year cycles. But U-S health experts say they doubt that extra-terrestrial forces cause flu epidemics.

Beer bellies may do a lot more than make a person look bad. That's according to researchers who say people with beer bellies have lower levels of an important type of ''good cholesterol'' believed to protect against heart disease. The researchers say they were surprised by findings that suggest where a person carries fat may be a more important influence on the levels of the ''good cholesterol'' than the total amount of body fat.

-30- 1758

#90024u4002 01/24/1990 ~United Press International

(JAN. 24) UPI - The House voted 390-25 today to overturn President Bush's veto of a bill that would protect Chinese students in this country from being sent home to face possible persecution. Bush had warned that enactment of the bill could damage U-S relations with China, but the argument did NOT carry much weight on Capitol Hill. The Senate is to take up the issue tomorrow, with an override expected in that chamber as well.

A Hispanic Miami police officer was sentenced today to seven years in

prison for the deaths of two black men which triggered three days of race riots last year. Officer William Lozano is free on 10-thousand dollars bond, pending a decision on an appeal to his sentence. Defense attorney Roy Black filed an appeal immediately after the sentencing and says a decision could take as long as 18 months.

A junk store operator in Enterprise, Alabama, says he's co-operating with a federal probe of his home and business, but he doesn't like being the focus of the investigation. Federal agents are searching Robert O'Ferrell's home and business for links to a series of mail bombings that killed a federal judge in Birmingham, Alabama, and a civil rights lawyer in Savannah, Georgia. O'Ferrell says he's ''NOT guilty,'' and says agents have ''found nothing.''

The sixth of 21 satellites that'll make up a global military positioning system is in orbit this evening. An Air Force Delta-2 rocket boosted the ''Navstar'' satellite into space after lifting off from Cape Canaveral, Florida. Once the network of 21 satellites is completed, it'll allow troops worldwide to pinpoint their locations within about 50 feet.

#90024u4051 01/24/1990 ~United Press International

(JAN. 24) UPI - Israel's deputy prime minister says he's confident the remaining obstacles to preliminary talks between Israelis and Palestinians can be overcome ''in a very short while.'' Shimon Peres made the optimistic assessment after meeting today with the Egyptian president. But in Washington, Secretary of State Baker says he's NOT as optimistic as Peres. Baker says there's still a long way to go before reaching agreement on a preliminary Israeli-Palestinian meeting.

Talks in Geneva collapsed tonight with NO agreement on delaying Britain's plans for a forced repatriation of Vietnamese refugees from Hong Kong to their homeland. The impasse was sparked by a disagreement between Britain and the United States... with Britain offering a six-month moratorium on the repatriations, and Washington insisting on a one-year delay. In Washington, a State Department spokeswoman says the United States remains opposed to the forced repatriation of refugees.

A Virginia man sued by a woman who claims he's the father of her baby has agreed to donate some of his bone marrow, if necessary, to help save the boy. Sue Argabright had sued Sanford Moore in an effort to force him to undergo tests to determine whether his marrow matches that of her four-month-old son, who suffers from a degenerative bone disease. The suit was dropped immediately once Moore agreed to the tests. His lawyer says Moore was unaware of the suit until hearing about it on the radio... and that he never intended to refuse to be tested.

President Bush's January 31st State of the Union address is NOT big news to an executive at a C-B-S television affliate in Cincinnati. W-C-P-O program director Rick Reeves says the president's address will be a ''canned speech... NOT a real newsmaker.'' Reeves says his station will NOT carry the speech live, but instead will air a basketball game between two college crosstown rivals.

-30- 2082

#90024u4247 01/24/1990 ~United Press International

(JAN. 24) UPI - The latest news details and developments... from the world-wide wires of United Press International.

President Bush suffered a defeat on Capitol Hill today when the House voted 390-25 to overturn his veto of a bill aimed at protecting Chinese students in this country.

The bill, which initially won unanimous approval in Congress, would allow Chinese students in the United States to seek permanent resident status. The students fear persecution from China's leaders, who ordered the bloody attack on pro-democracy demonstrators in Beijing last June.

At a news conference earlier today, Bush said an executive order already has provided sufficient protections for the Chinese students. He also warned that enactment of the bill could damage U-S relations with China.

But Democratic majority leader Richard Gephardt says he and most other House members feel ''that in this case, the president is wrong.''

He said the override- quote- ''sends a loud and clear message to the leaders of China that we believe'' in human rights.

The Senate is to take up the matter tomorrow, and an override is expected there as well.

The Hispanic Miami police officer convicted of two counts of manslaughter in the deaths of two black men a year ago was sentenced today to seven years in prison.

Hispanic supporters cheered today's sentencing... but many blacks at the courthouse expressed outrage, with one calling it a disgrace to the black community.

Officer William Lozano had faced a maximum of 45 years in prison for the slayings which touched off three days of race riots in Miami's predominantly black Overtown area.

Prosecutors had recommended Lozano receive 12 years in prison, but called

today's sentencing fair.

Dade County Circuit Judge Joseph Farina said the court could NOT- in his words- ''do perfect justice in this case.'' Farina allowed Lozano to remain free on 10-thousand dollars bond and gave him 30 days to file an appeal.

Defense lawyer Roy Black filed an appeal immediately after the sentencing and says a decision may take as long as 18 months.

Lozano said at a news conference that he'll- quote- ''continue to fight for the truth and what is right.''

#90024u4274 01/24/1990 ~United Press International
(JAN. 24) UPI - C O R R E C T I O N:

In please read 1st sentence xxx used for witchcraft.

Please read 2nd sentence xxx banana leaves were originally believed to contain cocaine and were later described etc.

Defense officials say the ''cocaine-like'' substance found in a house frequented by ousted Panamanian leader Manuel Noriega was really a ''food concoction'' used for witchcraft.

The 10 oblong packages wrapped in banana leaves were originally believed to contain cocaine and were later described by the Army's Central Intelligence Division as tamales.

The substance found in the refrigerator at the house melted once it was taken out. Tests determined that it was a mixture of lard, corn meal and farina.

Pentagon officials say the concoction is believed to be a paste-like ''binding material'' that's used in voodoo rites. They say several of the packages contained pieces of papers with names written on them.

The names... apparently targets of witchcraft spells... included Ronald Reagan, George Bush and the Congress of the United States.

The United States scored a success from the launch pad today, and so did Japan.

At Cape Canaveral, Florida, an Air Force Delta-2 rocket blasted off and successfully boosted a ''Navstar'' satellite into orbit. The satellite is the sixth of 21 navigation beacons that eventually will allow U-S troops

around the world to pinpoint their locations to within about 50 feet.

The Global Positioning System satellites work by continuously broadcasting radio signals, and receivers that pick up the signals can tell how far the receiver is from the satellite.

In Japan, the country's fledgling aerospace industry launched a rocket today that's carrying two satellites. If the mission succeeds, the smaller of the satellites will be put in orbit around the moon, and the larger one will orbit the Earth.

The purpose of the expedition is to master technology needed to send probes to Venus and Mars.

#90024u4316 01/24/1990 ~United Press International

(JAN. 24) UPI - A New York Suffolk County judge today sentenced a former male nurse to 61-and-a-third years to life in prison for his conviction in the deaths of four nursing home patients he injected with lethal doses of drugs.

Richard Angelo had NO expression as he stood before Judge Alfred Tisch during the sentencing. Tisch said Angelo's story topped the list of horrors he has heard during his many years on the bench.

Angelo had confessed that he injected several patients with the drugs to make himself appear as a hero when he revived them.

He was arrested when one elderly man survived the injection and told a nurse that he awoke to see Angelo putting something in his intravenous tube just before he developed a severe breathing problem.

The son of one of the victims shouted angrily at the one-time nurse as the handcuffed Angelo was led from the courtroom. He said he thought Angelo should have gotten the death penalty.

Angelo's attorney says he'll appeal the sentence.

A California teen-ager says he never wants to see his father again, and he has good reason.

13-year-old David Rothenberg made the statement at a news conference today the same day his father was released from prison in San Luis Obispo, California. 49-year-old Charles Rothenberg was released on parole after serving half of a 13-year sentence for setting fire to his then-six-year-old son in 1983.

The boy was severely disfigured and has had more than 100 skin grafts and other surgery to repair damage from burns on 90 percent of his body.

David said he called the news conference today to make it clear to his father that he doesn't want to see him. David said he's terrified of his father but is comforted by assurances that his father will be kept away from him.

Prison officials say Rothenberg was taken to an undisclosed location that is NOT near David's home. Officials say Rothenberg will be the most closely watched parolee in California history and will be constantly monitored to make sure he does NOT try to visit his son.

#90024u4324 01/24/1990 ~United Press International

(JAN. 24) UPI - A coalition of more than three dozen education and civil rights groups is calling for officials to phase out multiple-choice exams for students ''as quickly as possible.''

The coalition warned President Bush and the nation's governors today against relying on multiple-choice tests to measure students' abilities.

The groups say such exams encourage memorization of ''laundry lists'' of facts and are flawed by racial and cultural biases.

One coalition member says while children are learning to fill in the blank and circle the correct choice, the current teaching methods aren't giving them the thinking and social skills needed to become effective members of society.

They say students should be judged instead by portfolios of their work... teacher observations... and tests that ask them to write essays and solve problems.

Bush and the governors are expected to release performance goals for U-S students next month in hopes of spurring school reform.

More bad news for people with beer bellies.

Researchers in St. Louis say people with beer bellies have lower levels of an important type of ''good cholesterol'' that's believed to be an aid in protecting against heart disease.

Scientists at the Washington University School of Medicine studied the levels of H-D-L-2 cholesterol in 77 men and 69 women... and found that those with the greatest ''waist-to-hip ratio''- with more fat on the waist than the hips- had significantly lower H-D-L-2 levels.

The researchers say abdominal fat may reduce H-D-L cholesterol because such fat is close to the liver, which is the body's cholesterol manufacturer.

The results of the study might help explain why women, who tend to carry their weight on their hips instead of their waists, have lower rates of heart disease than men.

Says Dr. Richard Ostlund, the head of the study- ''A beer belly is bad for you regardless of how you got it.''

#90024u4431 01/24/1990 ~United Press International

(JAN. 24) UPI - Senate Republican leaders see NO real chance President Bush's veto of a bill protecting Chinese students in the United States being upheld by the Senate tomorrow. The House overwhelmingly overturned the veto today.

Hispanic supporters cheered the sentencing today of a Colombian-American Miami police officer to seven years in prison for the deaths last January of two black men. But black observers expressed anger. One man shouted that William Lozano- quote- ''should have been given the electric chair.''

Richard Secord... sentenced to two years' probation today for his part in the Iran-Contra scandal... is criticizing ex-President Reagan for ''hiding out'' as the scandal unfolded. But the retired general says he doesn't know if Reagan knew of the diversion of Iranian arms sales profits to the Nicaraguan Contras.

The father of an Alabama junk store operator whose home, business and septic tanks were searched for links to a deadly series of mail bombs last month says his son has ''never been in any trouble.'' J-C O'Ferrell says his kids ''were raised right.''

The Soviet news agency Tass says military leaders report all quiet in the Azerbaijan capital of Baku tonight. Tass also reports militant Azerbaijanis have lifted a blockade that was set up around Soviet naval vessels in Baku Bay in an effort to drive the Soviets out of the republic.

Belgrade Radio in Yugoslavia reports a number of arrests as riot police used water cannons and tear gas to break up a demonstration by about 40-thousand ethnic Albanians in a provincial capital today. The protesters were demanding more self-rule and a multiparty system.

South African authorities say two people were killed and three others

wounded today when police opened fire on black demonstrators stoning a police vehicle during an anti-government protest in the gold mining town of Carletonville.

#90024u4618 01/24/1990 ~United Press International

(JAN. 24) UPI - Only 25 lawakers- all of them Republicans- supported President Bush's veto of legislation that guards against sending Chinese students home where they could possibly face political persecution. The House today voted overwhelmingly, 390-25, to override the veto... despite warnings from Bush that the measure could harm U-S-Chinese relations. A similar result is expected tomorrow when the Senate takes up the issue.

Defense lawyers in Miami appealed today's sentencing of Hispanic police

officer William Lozano, who was given seven years in prison for the deaths of two black men. Lozano was convicted last month in the deaths of Clement Lloyd and Alan Blanchard, who were riding a motorcycle on January 16th, 1989, when Lozano shot and killed Lloyd. Blanchard, who was a passenger, died the next day. Lozano has said Lloyd was trying to run him down, but prosecutors say Lozano fired the gun negligently.. The incident touched off three days of race riots.

Colombia's foreign minister says his government knows nothing of a reported drug cartel plot to kill President Bush when he visits the country next month for an anti-drug summit. A news report earlier this week said the Secret Service was investigating intelligence reports that drug lords were smuggling shoulder-fired missiles into Colombia to shoot down Air Force One as it lands.

The Haitian government gave its first detailed explanation today of the arrests and deportations of opposition political leaders that began last weekend. The interior minister appeared on state-run t-v and said the measures were taken to punish terrorists and prevent the disruption of government processes and elections. He says exiled opposition leaders will be allowed back in the country before October's presidential elections, but NOT until the government has organized local elections.

#90024u4634 01/24/1990 ~United Press International

(JAN. 24) UPI - Outspoken Soviet politician Boris Yeltsin says he's promised supporters that he'll seek the presidency of the Russian Federation, the largest of the Soviet Union's 15 republics. Several cities have named Yeltsin as a candidate for the republic's parliament... an election he must win before seeking the Federation's presidency. Yeltsin is considered a shoo-in for election.

The situation at the Lebanese embassy in Washington is a standoff between the former ambassador and Lebanon's new prime minister. The former ambassador resigned last week when his appointment was NOT renewed by the new Lebanese government headed by Prime Minister Elias Hrawi. But Lebanese officials say he changed all the locks and won't give up the keys. He's a supporter of General Michel Aoun, who refuses to recognize Hrawi's election. The United States recognizes the Hrawi government and says the embassy situation is ''something for the Lebanese to work out.''

For the second year in a row Britain's Prime Minister Thatcher has been voted the second most feared and hated figure at Madame Tussaud's wax museum in London... with Adolf Hitler ranking first. But she was also voted the most popular politician in the poll of 500 visitors to the museum during the last two weeks of 1989. After Thatcher, the second most popular politician was Soviet President Gorbachev.

A Montreal-based cable company is introducing a system that'll allow viewers of a hockey game tonight to select which camera shots they want to focus on. Company officials say the new interactive sports service is believed to be the first of its kind in the world... offering interaction with a live program. Viewers will be able to use a converter to dial up different camera angles and instant replays from an available menu.

#90025b0015 01/25/1990 ~Business Wire

LAS VEGAS (JAN. 25) BUSINESS WIRE - American Bancorp of Nevada, parent company of American Bank of Commerce, has reported record earnings for 1989, President James V. Bradham announced Thursday.

Earnings for the calender year 1989 were $1,418,880, or $1.31 per share of common stock, an increase from 1988 year-end earnings of $1,200,657, or $1.17 per share of common stock, restated to reflect a 15 percent stock dividend.

''Our conservative approach to lending along with a solid Nevada economy were instrumental in achieving record earnings in 1989,'' Bradham said.

The bank's ongoing commitment to aggressive cost control contributed to the earnings picture as well, he said.

Total assets for 1989 were $106,543,384 compared to $117,034,387 for year-end 1988. According to Bradham, the decline in assets was primarily attributed to one extraordinary deposit at year-end 1988.

Shareholder equity for 1989 was $10,246,049, an increase from $8,660,910 for 1988.

American Bank of Commerce is an independent full-service bank serving the small to mid-size business community in Southern Nevada since 1979. The bank, with four branches throughout Las Vegas, concentrates on construction and business lending.

#90025b0018 01/25/1990 ~Business Wire

CARLSBAD, CA (JAN. 25) BUSINESS WIRE - Klaus R. Ottman has been appointed senior executive vice president and managing director of La Costa Hotel & Spa and the La Costa Country Club.

The announcement was made Thursday by Howard ''Bud'' James, chairman of Global Hospitality Corp.

Ottman most recently served as executive vice president and managing director of the Grenelefe Resort and Conference Center at Grenelefe, Fla., another luxury resort owned by the Sports Shinko Co., owner of La Costa Hotel & Spa.

An international hotelier, European-trained Ottman has over 25 years' experience in hotel management as senior vice president of operations for five major Sheraton hotels in New York City (Sheraton Center and Towers, Sheraton City Squire, the New York Sheraton, St. Regis-Sheraton and Sheraton Russell Hotel) and held top-ranking positions with other prestigious hotel properties.

Among the numerous honors and awards received by Ottman from the hospitality and restaurant industry are Sheraton Corp.'s Chairman's Award, the Gold Key Award of the American Hotel & Motel Association, and the Grand Award for Advertising Excellence presented by the Hotel Sales Management Association. A Fellow of the Academy of Chefs of America, he was also presented with a Certificate of Honor by the Academy.

Additionally, Ottman is an Officer Maitre Rotisseur of the Chaine de Rotisseurs, past president of Les Amis d'Escoffier Society, honorary member of the Chef de Cuisine Association of America and a Gold Medal award winner of the Chevalier Gastronomique of the French government.

A native of West Germany, Ottman is a graduate of the Hotel and Restaurant School in Frankfurt, West Germany. Ottman is married and is a golf and ski enthusiast.

Paul James, formerly senior executive vice president and managing director of La Costa Hotel & Spa, has resigned his position for personal reasons.

#90025b0024 01/25/1990 ~Business Wire

SANTA ANA, CA (JAN. 25) BUSINESS WIRE - Effective Jan. 1, 1990, McDonnell Douglas Field Service Co. announced a new, multifaceted DEC (R) VMS (R) software support program offered to provide customers with a more complete service program.

Three new services are provided to VMS users including Telephone Software Support, Remote System Management and System Organization and Setup. Each service has been specifically designed to optimize delivery via electronic

means from a central location.

''We are very pleased to announce these new service programs at this time '' said Field Service Co. technical operations vice president Bill Kersten. ''Our customers have repeatedly asked that we expand our level of VMS software support on the DEC products in order that they can increase efficiencies in doing business.''

Initially the phone support will be available from 8 a.m. to 5 p.m., Monday through Friday. Additional support hours and off-hours support are also available on a per-call basis where desired.

Segmented into three distinct services, the first service, Telephone Software Support, identifies operational errors and a corrective action, or identifies specifically in which program the problem orginated. Recommendations are then made to resolve the error.

The second service, Remote System Management, performs routine system ''manager'' functions such as adding or removing authorized users to the system, routine monitoring of system performance to detect system status changes, error trends and advising customers of upgrade requirements when necessary. Writing custom command procedures to enhance system operations is yet another feature included.

System Organization and Setup, the third service in this program, is designed to offer a one-time remote service which organizes system software by verifying and organizing directory structure, verifying and establishing user account profiles, implementing a full accounting and security program, as well as offering a complete set of site-specific operating guidelines to enhance system performance.

Since 1967, McDonnell Douglas Field Service Co. has grown into one of the largest field service companies in the nation, with almost 1,000 field service professionals in 150 service locations in the United States.

#90025b0035 01/25/1990 ~Business Wire

BELLEVUE, WA (JAN. 25) BUSINESS WIRE - Renaissance GRX Inc. (NASDAQ:RENX) a leader in the design, development and marketing of microcomputer graphics systems, has appointed Thomas E. Krueger to the position of vice president of sales.

In his new position, Krueger will spearhead the company's efforts to develop relationships with key OEMs and systems integrators -- a

demonstrated area of focus for the distribution and marketing of Renaissance's graphics boards and controllers.

Renaissance President Bob Butchko stated that Krueger's extensive experience in the OEM market complements the company's marketing strategy: ''Krueger's broad experience and knowledge of sales and marketing in the OEM markets will bolster our efforts to develop new technical and marketing relationships with this important sector of the graphics market.''

Krueger brings to his new position 25 years of sales and marketing experience in both the OEM and retail markets of the high technology arena.

Prior to joining Renaissance, Krueger was vice president of sales for Andrew Network Products of Torrance, Calif., a manufacturer of IBM protocol converters and Token Ring LAN products. Before that, he held a variety of senior management positions with a number of leading electronics firms including Ward/Davis Associates Inc., Torrance, Hanzon Data Inc., Bothell, Wash., and Pacific Northwest Electronics Inc., Bellevue.

Krueger holds a BSEE from the California Institute of Technology, and has participated in advanced graduate work in electrical engineering at the University of Southern California.

Renaissance GRX Inc., is a microcomputer graphics systems company that designs, develops and markets both high-performance hardware and software for IBM-compatible PCs. The Renaissance product line includes a broad line of video adapters and controllers, graphics system software and custom-designed integrated circuits.

Headquartered in Bellevue, the company markets its products through retail distribution channels and directly to the OEM market.

#90025b0043 01/25/1990 ~Business Wire

LAFAYETTE, CO. (JAN. 25) BUSINESS WIRE - Aspen Ribbons Inc. (NASDAQ:ARIB) announced Thursday revenues for its second quarter ended Dec. 31, 1989 of $4,709,520, an increase of 4.8 percent compared with revenues of $4,493,157 for the same quarter last year.

Earnings were $146,482, or 4 cents per share, compared with earnings of $296,096, or 8 cents per share, for the same period last year.

Lower earnings were primarily due to more than $150,000 in increased expenditures for research and development of its new facsimile (fax) paper production and related expenses for the company's new distribution operation in Longmont, Colo.

''We believe this investment in the future of Aspen Ribbons will substantially increase revenues and earnings,'' said Florine N. Nath, chief financial officer.

For the six months just ended, earnings were $486,357, or 13 cents per share, on revenues of $9,668,477 compared with earnings of $590,867, or 16 cents per share, on revenues of $8,828,549 for the same period in 1988. This is an increase in revenues of 9.5 percent year to date and a decrease in earnings of 18 percent.

''We began shipping fax paper under our AspenFax(tm) label in January 1990 and in the second quarter engaged in research and development to design and establish production, in addition to leasing equipment and purchasing inventory,'' Nath said.

''Additionally, we opened our new 54,000-square-foot distribution center, which also houses the fax operation. This expansion will allow us to better service our customers through faster ship times and increased private labeling capabilities. We believe it will support our growth to annual revenue levels of $30 - $35 million, which we expect to attain by 1991.''

''The second half of fiscal 1990 will be a high-growth period for Aspen Ribbons,'' Nath added. ''We expect revenues for the year ended June 30, 1990 to be over $22 million with earnings per share of 40 cents - 45 cents. We further expect this growth trend to continue through the 1990's as we establish a market share in fax paper and bring to market other product lines.''

Aspen Ribbons is a leading designer manufacturer and marketer of supplies for the computer printer industry.

#90025b0049 01/25/1990 ~Business Wire

CHICAGO (JAN. 25) BUSINESS WIRE - R.R. Donnelley and Sons Co., the nation's largest printer, reported net sales for 1989 increased 8.5

percent to $3.122 billion.

For the full year, net income was $221.9 million or $2.85 per share, an increase of 8 percent over 1988. Normalizing 1989 and 1988

for the onetime, positive effects of unique tax-related and land-sale transactions, earnings per share increased 9.3 percent year to year.

In the fourth quarter, net sales were $897.9 million, an increase of 2 percent over the corresponding prior-year period. Net income grew faster than sales in the fourth quarter, increasing 5.5 percent to $68.1 million or 87 cents per share.

''The sales gains resulted primarily from a higher volume of services provided to customers. As expected, our sales growth rate was smaller in the fourth quarter for several reasons,'' said John R. Walter, Donnelley chairman, president and chief executive officer.

''Delayed product introductions from computer documentation customers, first noted in the third quarter, continued and affected the fourth quarter's sales growth rate.

''Unfavorable exchange rate variations, flat-to-lower paper pricing, and a change in the sales mix also affected the quarter's rate, along with somewhat slower trade book activity levels and some work shifts into the first quarter of 1990,'' he said.

Capital spending for 1989 was $238 million. ''Capital programs included expansion and replacement capacity across the entire business. We started up several new manufacturing facilities in 1989 and started construction late in the year on our new book manufacturing plant in Reynosa, Mexico. That plant will start up during the first quarter of 1991.

''We are continuing to invest to meet the growing needs of our customers by increasing capacity, improving schedules and strengthening our industry leadership position,'' Walter said.

The company reported that 1990 capital spending is estimated at $250 million, an amount somewhat less than previously expected, reflecting the elimination of certain previously planned capital spending as a result of the agreement to acquire the Meredith/Burda companies for approximately $570 million.

The acquisition is expected to close during the first quarter. Meredith/Burda is a high-quality printer of catalogs, newspaper inserts and magazines, and has an excellent customer base.

Meredith/Burda reported sales of $456 million for its fiscal year ending

June 30, 1989, and operates four printing plants and three pre-press facilities in the United States.

The Donnelley board of directors Thursday declared a quarterly dividend of 24 cents per share, an increase of 2 cents over the previous quarterly rate of 22 cents. The dividend is payable on March 1 to shareholders of record on Feb. 5.

R.R. Donnelley

#90025b0051 01/25/1990 ~Business Wire

DALLAS/FORT WORTH AIRPORT, TX (JAN. 25) BUSINESS WIRE - American Airlines the U.S. carrier, was judged to have the best food and wine of any international airline earlier this month in a competition among the world's top 10 airlines, the airline announced Thursday.

Business Traveller, a British publication, sponsors an annual airline food and wine competition. Traditional winners are European national carriers

such as Swissair or Asian airlines such as Singapore, last year's winner.

American won with an overall score of 456.5 points, far ahead of second place Singapore Airlines' score of 421.5. In the individual categories, American placed first in Best Business Class Food and Wine, first in Best Economy Class Food and Wine and first in the Wine Only class.

Gillian Upton, editor of Business Traveller magazine, explained what the competition was all about. ''We are not discussing best and worst airlines, but are looking at degrees of excellence,'' Upton said. ''These are 10 of the world's top international airlines as voted by our readers in the magazine's annual Reader Poll.''

#90025b0057 01/25/1990 ~Business Wire

NEW YORK (JAN. 25) BUSINESS WIRE - General Manager Craig Branigan has been given the additional title of president of Young & Rubicam San Francisco, the center of the company's operations in the Western United States.

The announcement was made by Roby Harrington, executive vice president of Young & Rubicam Inc.

''Craig has provided superb leadership during our rapid expansion in the San Francisco market,'' said Harrington. ''The Bay Area has become a strategic business center in Y&R's worldwide network. Craig's new position as president underscores the significance of his role in building our presence there.''

Branigan, 38, joined Y&R San Francisco in 1983, becoming general manager three years later. He was previously vice president, management supervisor, at Ketchum Advertising in San Francisco.

Branigan started his career at Leo Burnett in Chicago after earning a bachelor's degree at Lawrence University in Wisconsin and an MBA with honors at the University of Michigan.

With more than a 20 percent increase in billings in 1989, San Francisco is one of the fastest-growing offices in Y&R's global network of 270 offices. During the past year, the San Francisco office brought in several new accounts, including 1st Nationwide Bank, and significantly increased business with existing clients.

In addition to the advertising firm, Young & Rubicam communications companies in San Francisco include Landor Associates, identity management

and design; Burson-Marsteller, public relations; and Wunderman Worldwide, direct marketing.

Young & Rubicam Inc., headquartered in New York, is the largest U.S.-based commercial communications firm. Founded in 1923, the company now has worldwide billings of more than $6 billion.

SAN FRANCISCO (JAN. 25) BUSINESS WIRE - Williams-Sonoma is pleased to announce that Richard R. Dykes has joined the company as vice president of corporate information systems.

Dykes is 42 years old and attended Bradley University in Peoria, Ill.

He was most recently vice president of management information and corporate services for Pay-n-Save Stores in Seattle.

Williams-Sonoma Inc. is a nationwide specialty retailer of high quality kitchenware and other products for the home and garden. These products are marketed through retail stores and five mail order catalogs representing five distinct merchandise strategies; Williams-Sonoma, Pottery Barn, Hold Everything, Chambers and Gardner's Eden.

#90025b0059 01/25/1990 ~Business Wire

SAN FRANCISCO (JAN. 25) BUSINESS WIRE - Insurance Commissioner Roxani Gillespie Thursday announced that she is proceeding with an Agreement of Reorganization, Rehabilitation and Restructuring for the Mission Insurance Cos.

A hearing on this agreement is set for March 30 in Department 87 of the Los Angeles Superior Court.

The agreement provides for creation of trust to which all policyholder claims, other claims, and all assets - including reinsurance recoverables and pending lawsuits - will be transferred.

The trusts will also receive other assets including $14 million in cash and 5,899,267 shares of common stock of Mission Insurance Group Inc. (MIG)

the corporate parent of the Mission Cos. This represents about 24 percent ownership of MIG, which will be increased to 29 percent ownership pursuant to related transactions.

If approved by the court and carried out according to terms, the agreement will produce about $27 million in additional funds, including the $14 million in cash, for policyholders.

Certain claims against MIG will be released in return for the cash and stock. MIG will be recapitalized pursuant to a reorganization plan being processed in the Federal Bankruptcy Court. The insurance commissioner retains the right to later sell the stock or hold it for benefit of the trusts.

Also, although certain claims against MIG and some its former MIG outside directors will be released, the commissioner is retaining certain indemnity claims against these individuals. No officer or director who was active in the management of the Mission Cos. is being released.

''This is a deal that policyholders should have a chance to get. But if legitimate objections are raised, or if the other parties are unable to comply with certain requirements, then the transactions will not be closed and the court will have the ultimate say,'' Gillespie added.

While she does not expect any serious opposition to the agreements, Gillespie said only ''time will tell.''

''My main pre-closing requirements are that we are satisfied that the transactions comply with tax laws and that policyholders are assured they will receive at least as much through the transactions as they would if the companies were simply liquidated.''

SAN FRANCISCO (JAN. 25) BUSINESS WIRE - California Energy Company Inc. (ASE/PSE:CE) Thursday announced that its board of directors has set Feb. 20, 1990 as the record date for its April 6, 1990 annual meeting of shareholders.

Charles T. Condy, chairman and chief executive officer, stated: ''I am pleased to announce that our 1990 annual meeting will be held at the Marin Civic Center in San Rafael, Calif. in the Showcase Theatre. The nationally acclaimed exhibition 'Frank Lloyd Wright: In the Realm of Ideas' will be on display and will provide the ideal setting for management to report on its most successful year ever and on our plans to improve operations and

results for 1990.

''We look forward to greeting our shareholders and friends.''

California Energy Company Inc. is a leading independent producer of electric power and developer of geothermal resources. The comapny is an owner and operator of the 240 megawatt Coso Geothermal Project located in Inyo County. The company also controls nine geothermal prospects in Northern California, Oregon and Washington.

COSTA MESA, CA. (JAN. 25) BUSINESS WIRE - Emulex Corp. (OTC:EMLX), a leading supplier of system enhancement products for the computer industry, Thursday announced that effective January 1 its business for microchip devices assumed the status of a standalone operation designated as the Emulex Micro Devices (EMD) division.

The company also named Kenneth Davis, former assistant vice president, worldwide marketing and sales, for NCR Corp.'s microelectronics division, as president and general manager of the new division.

In announcing the appointment, Fred B. Cox, Emulex's president and chairman, said: ''We are setting up our microchip business as a separate operating division to provide the highest possible degree of concentration and specialization in what we expect top be one of the best growth opportunities over the next several years.

''Our chip business comprises highly integrated circuits that address specific markets -- particularly the embedded storage and SCSI (small computer systems interface standard) markets. We have been very successful in the SCSI chip market, with revenues having grown from $7 million in fiscal 1988 to over $16 million in fiscal 1989.

''Ken Davis has established a record of dynamic leadership and growth in the semiconductor business and is, I believe, an ideal choice to lead our EMD division.''

Prior to joining NCR's microelectronics division in 1985, Davis had been vice president, marketing and sales, with Integrated Logic Systems Inc., a publicly owned gate-array start-up firm. He previously held a number of management positions in engineering and marketing with Computer Automation ITT Semiconductors, Mostek Corp., Intermed Corp. and Texas Instruments.

He earned a bachelor of science degree in electrical engineering at the University of Florida and a master of business administration degree in finance and management from North Texas State University.

Emulex Micro Devices designs and supplies highly integrated, high-performance chip sets which create advanced system-level solutions to targeted high-growth market segments.

Emulex Corp. designs, manufactures and markets high-performance computer enhancement products in the areas of system/user connectivity and storage control. Emulex addresses the DEC, IBM PC and Sun marketplaces, as well as markets for industry-standard VME and SCSI-based computer systems. The company sells worldwide to end-users, OEMs and systems integrators through direct sales and indirect distribution channels.

#90025b0088 01/25/1990 ~Business Wire

JOPLIN, MO (JAN. 25) BUSINESS WIRE - The Empire District Electric Co. Thursday reported earnings for the year ended Dec. 31, 1989, of $2.94 per share of common stock.

Revenues for the year were $133,361,000 and net income was $17,347,000. This compares with earnings during 1988 of $3.05 per share on revenues of $153,805,000 and net income of $17,656,000.

The board of directors Thursday declared a quarterly dividend of 58 cents per share of common stock payable March 15, 1990, to holders of record as of March 1, 1990.

The board also declared regular quarterly dividends payable March 1, 1990, on each of the three issues of preferred stock to holders of record as of Feb. 15, 1990.

March 1, 1990, was declared the record date for the annual meeting of stockholders to be held on April 26, 1990.

Earnings for the fourth quarter were 64 cents per common share on revenues of $31,316,000 and net income of $3,842,000. During the like period last year, earnings were 51 cents per common share on revenues of $35,864,000 and net income of $3,009,000.

Empire supplies electric service to a 10,000 square-mile area in southwest Missouri, southeast Kansas, northeast Oklahoma and northwest Arkansas. The company also provides water service in three incorporated communities in Missouri.

#90025b0103 01/25/1990 ~Business Wire

DENVER (JAN. 25) BUSINESS WIRE - Public Service Co. of Colorado Thursday reported revenues and earnings for the fourth quarter and year ended Dec. 31, 1989.

For the fourth quarter 1989, the company reported net income of $42.2 million, or 74 cents per share, on revenues of $423.4 million. Net income for the fourth quarter of 1988 was $50.4, or 90 cents per share, on revenues of $413.9 million.

For the year ended Dec. 31, 1989, the company reported net income of $148.8 million, or $2.59 a share, on revenues of $1.74 billion. That compares to 1988 year-end net income of $125 million, or $2.14 a share, on revenues of $1.69 billion.

Richard C. Kelly, senior vice president of finance and chief financial officer, said the primary reason for the improved earnings in 1989 is that 1988 was negatively affected by a provision for additional defueling and decommissioning expenses associated with the company's Fort St. Vrain Nuclear Generating Station. The estimated expenses totaled $63.8 million, or 75 cents a share, and were recorded in the 1988 third quarter.

''The 1989 fourth quarter earnings declined in comparison to the same period in 1988 because of tax adjustments and a one-time change in deprecition rates, both in fourth-quarter 1988, that positively affected

earnings for that period,'' Kelly said.

#90025b0116 01/25/1990 ~Business Wire
ROCHESTER, NY (JAN. 25) BUSINESS WIRE - Gleason Corp. (NYSE:GLE) said Thursday that it expects to report income from continuing operations for the fourth quarter ended Dec. 31, 1989, of approximately $4.5 million, or 79 cents per share, compared with $2.1 million, or 36 cents per share, (exclusive of an after-tax gain of $2.0 million, or 35 cents per share, on the sale of certain land and buildings) for the fourth quarter of 1988.

Sales from continuing operations increased 28 percent in the fourth quarter 1989 vs. 1988 to $51.0 million from $39.7 million. Preliminary net income for the 1989 fourth quarter was $5.0 million, or 87 cents per share vs. $3.8 million, or 65 cents per share, for the comparable 1988 quarter.

For the full year ended Dec. 31, 1989, income from continuing operations is expected to be approximately $9.7 million, or $1.70 per share, vs. $1.6 million, or 28 cents per share, for the 1988 year.

Sales for the year from continuing operations increased 39 percent to $162 million, vs. $116.2 million for 1988. Net income for 1989 will

approximate $15.5 million, or $2.70 per share, vs. a net loss of $4.2 million, or 74 cents per share, for 1988.

1989 net income includes an after-tax gain of $7.7 million, or $1.35 per share, on the sale of the company's Power Systems division. The company's gear production equipment and technology business ended 1989 with a record high year-end backlog of $135 million. The comparable 1988 year-end backlog was $110 million.

The company expects to announce its 1989 operating results in late February.

Gleason is a world leader in gear production equipment.

REDWOOD CITY, CA (JAN. 25) BUSINESS WIRE - Ampex Corp., a leading producer of professional television equipment and tape, Thursday announced it has donated an Ampex studio recorder and other equipment to Rumania's state television operation, which was heavily damaged during the December revolution that overthrew former dictator Nicolae Ceausescu.

The Rumanian network is now called Free Rumanian Television (FRT).

''Your help is very much appreciated here,'' wrote Dr. Nicolae Stanciu, FRT deputy general manager, when he received word of Ampex's generosity.

Following a request from Bruce S. Gelb, director of the U.S. Information Agency (USIA), Ampex President and Chief Executive Officer Ron Ritchie in January dispatched staff from the company's East European headquarters in Fribourg, Switzerland, to assess the FRT's damage and recommend a plan of action.

''We have had a relationship with Dr. Stanciu since 1971 and realized we had equipment that could help FRT resume normal operations,'' Ritchie said.

USIA Director Gelb, who this week was the first high-level U.S. official to visit Rumania since the democratic revolution there, wrote to congratulate Ampex for its quick response. ''Your efforts to help your country make an immediate contribution to the 'televised revolution' will be long remembered and appreciated in Bucharest as well as in Washington '' the letter said.

During his visit to Bucharest, Director Gelb will be meeting with Free

Rumanian Television officials to discuss this donation and other ways the American private sector might be helpful to the network. USIA is responsible for U.S. educational and cultural programs and has been charged with implementing President Bush's Eastern European Initiative, which encourages the growth of democratic institutions.

Ampex, based in Redwood City, has been a substantial supplier of television equipment and tape to the Soviet Union and Eastern Europe, a spokesman said.

FREMONT, CA (JAN. 25) BUSINESS WIRE - TCI International Inc. (NASDAQ:TCII) announced revenues of $14,147,000 for the company's first quarter ended Dec. 31, 1989.

This is a decrease of 2.4 percent compared to the prior year's first quarter revenues of $14,488,000. Net income was $350,000, or 10 cents per share, compared to $875,000, or 25 cents per share, during the like period a year ago.

The company's total backlog as of Dec. 31, 1989 was $129 million, of which $46 million is funded. The $83 million of unfunded backlog includes approximately $70 million of fixed-price options which the U.S. government has indicated is likely to be exercised. The prior year's comparable backlog was $149 million, of which $67 million was funded; and the prior quarter's comparable backlog was $130 million, of which $46 million was funded.

The first quarter results were adversely affected by the continuation of efforts on programs previously identified as having cost overruns and by delays in the anticipated awards of several important programs.

TCI International Inc. is a holding company whose two subsidiaries, Technology for Communications International and BR Communications, design and supply signal collection systems, high frequency antennas, and specialized communications systems.

SEATTLE (JAN. 25) BUSINESS WIRE - Evans/Kraft and Mogelgaard & Associates two leading Northwest advertising agencies, will merge effective Feb. 1.

The announcement was made jointly by Donald B. Kraft, chairman and chief executive officer of Evans/Kraft, and Michael Mogelgaard, president of Mogelgaard.

''This opportunity fits our goals for the '90s beautifully,'' said Kraft. ''We are strong strategically and have the full range of communication services clients need today. Adding Mogelgaard's dynamic team to ours, allows us to challenge anyone for creative leadership in the Northwest,'' Kraft added.

Mogelgaard will join Evans/Kraft as co-chairman/creative director. Dick Paetzke, former Evans/Kraft creative director, will continue as executive vice president, member of the executive committee and senior member of the agency's expanded creative department.

HealthComm is a marketer of health programs and nutritional products.

The announcement came at the same time as Evans/Kraft announced the addition of three new clients: Genetic Systems, division of Bristol-Meyers Squibb; Van Waters & Rogers, division of Univar; and the Westin Hotel, Seattle.

Evans/Kraft is the second largest agency in the Northwest, with combined billings of $70 million. It is a division of Evans Communications, with $170 million in billings and offices in nine Western markets.

Evans/Kraft has offices in Seattle, Portland, Ore., and Anchorage, Alaska, and several specialized divisions, including Evans Food Group, Evans/Kraft Bean Public Relations and Evans/Spangler Design. Evans/Kraft is the official advertising and public relations agency for the Seattle

Organizing Committee of the 1990 Goodwill Games.

SANTA CLARA, CA (JAN. 25) BUSINESS WIRE - Tri-Data announces the shipment of Ethernet and Token Ring LAN Interface options for its Netway 2000 Systems Network Architecture (SNA) 3270 gateways for Apple Macintoshes to begin on Feb. 9, 1990.

These new options allow Macintoshes directly attached to Ethernet or Token Ring LANs to gain access to remote IBM mainframes through the Netway 2000 gateways.

The Netway 2000 has been shipping since June 1989. Prior to the Ethernet and Token Ring release, all Macintoshes needed to be connnected on LocalTalk LANs or connected on AppleTalk routers to gain access to the Netway 2000. These new LAN interfaces will substantially improve the mainframe response time and file transfer throughputs available to LAN-attached Macintoshes when compared to LocalTalk-connected or 3270 coax-connected Macintoshes.

The Netway 2000 is a high-performance gateway product employing two key high-performance architectures: the 10 Million Instructions per Second (MIPS) SPARC RISC CPU and the VME expansion bus.

The Netway 2000 supports either RS-232 or V.35 connections to multiple IBM mainframes and supports up to 64 simultaneous 3270 host sessions. The Netway 2000 comes standardly equipped with LocalTalk LAN support, and the VME expansion bus provides two slots for higher speed LANs. The new LAN interfaces are VME boards designed to be inserted into the Netway 2000's two-slot VME bus.

The new Ethernet LAN interface is a double-high VME board equipped with a Motorola 68020 processor and 512K of RAM. It is capable of supporting either the standard off-board transceiver (Thicknet) version of IEEE 802.3 or the on-board (Thinnet) transceiver version.

The Token Ring expansion is a double-high VME board equipped with the Texas Instruments 4Mbps Token Ring (IEEE 802.5) set.

AppleTalk protocol support is provided with the new LAN interfaces. AppleTalk Ethernet support is known as EtherTalk, and AppleTalk Token Ring support is known as TokenTalk.

Tri-Data Systems Inc., of Santa Clara, is the leader in SNA LAN-based gateways that provide mainframe access for both Macintosh and IBM PC-compatible computers. Tri-Data's major products include the Netway 1000 and Netway 2000 LAN-based SNA gateways.

IRVINE, CA (JAN. 25) BUSINESS WIRE - Toshiba America's Computer Systems Division has reduced the suggested retail prices of its two battery-powered T1600 portable personal computers effective Jan. 2.

The price of the T1600 20MB hard drive model drops from $4,999 to $4,499, while the 40MB model price changes from $5,199 to $4,999.

In addition, in a special promotion, every T1600 PC shipped after Jan. 2 will have an extra battery included, at no additional cost.

''Since its introduction, the T1600 has been a super seller,'' noted Tom Sherrard, director of PC marketing. ''Increased production has shaved our manufacturing costs and we're passing the savings on to our customers.''

The powerful T1600 offers an 80C286 microprocessor, a socket for an 80C287 coprocessor, EGA display and memory expansion up to 5MB.

#90025b0157 01/25/1990 ~Business Wire
DENVER (JAN. 25) BUSINESS WIRE - Tele-Communications Inc. announced Thursday that it plans to launch a new $400 million revolving credit facility for TCI West Inc., its largest wholly owned subsidiary.

TCI West, based in Bellevue, Wash., owns and operates cable TV systems serving approximately 1.2 million subscribers in eight western states.

The new facility will be led by Societe Generale, as Agent Bank, and up to three Co-Agents, inicluding Credit Lyonnais (New York branch). It is expected that approximately 20 leading international banks will participate in the eight-year, reducing revolving credit.

According to Robert Bennett, vice president and director of finance at TCI ''We have dedicated much of our time in recent years to developing important lending relationships with major international financial institutions. This new credit is another important step in that process.

''It represents a significant expansion of TCI West's existing $125 million Eurodollar facility that has been in place for nearly two years. We are especially gratified by the support demonstrated by Societe

Generale and the Co-Agents and we look forward to the successful syndication of this credit.''

Tele-Communications Inc. is traded over-the-counter with Class A common stock and Class B common stock trading separately under symbols of TCOMA and TCOMB, respectively. Also, certain rights are traded in over-the-counter markets under the symbol of TCOMR.

The company's 11-1/8 percent senior subordinated debentures and 7 percent convertible subordinated debentures are traded in the over-the-counter markets, the latter under the symbol of TCOMH.

#90025b0163 01/25/1990 ~Business Wire

SEATTLE (JAN. 25) BUSINESS WIRE - Warmer than normal weather conditions contributed to a 1 percent drop in net income during the first quarter for Washington Energy Co., Chairman and Chief Executive Officer James A. Thorpe announced Thursday.

Net income was $10.3 million for the quarter ended Dec. 31, 1989, compared with $10.4 million during the same period last year. Earnings per share for the quarter were 69 cents, compared to 72 cents a year ago.

Operating revenues improved 6 percent for the quarter ended December 1989, rising to $111 million, compared with $106 million a year ago.

Thorpe noted that gas sales volumes were up 6 percent, due primarily to the addition of new firm customers by Washngton Natural Gas, the company's principal subsidiary.

The gas company is serving 21,800 more customers this year than last, a 7 percent increase.

The warmer than normal weather experienced in the Puget Sound region served by the gas company, and the increased operating and maintenance expenses incurred to accommodate the customer growth prevented an improvement in net income during the first quarter.

Net income increased 45 percent to $23.5 million for the 12-month period ended Dec. 31, 1989.

Twelve-month earnings per share rose 51 percent to $1.51. Thorpe noted that 12-month results benefited from an overall 10 percent increase in gas sales volumes through Washington Natural Gas.

Washington Energy is a diversified holding company with interests in natural gas distribution, marketing of energy and conservation products and services, coal holdings, and oil and gas exploration and development.

ANAHEIM, CA (JAN. 25) BUSINESS WIRE - Pacific Inland Bancorp (NASDAQ:PIBC) Thursday announced it has named Ronald L. Askew chairman, president and chief executive officer of Pacific Inland Bank, a business and professional bank based in Anaheim.

Askew, who reports to the Bancorp's board of directors, also becomes an executive vice president of the bank holding company. He succeeds Melvin E. Miller, interim chief executive officer. Miller, who assumes the post of chairman emeritus and remains a director of both the bank and the Bancorp's board of directors, will continue to take an active role in the bank's affairs.

Askew, 46, most recently served for five years as regional vice president of Imperial Bank, a Los Angeles-based lender with over $3 billion in assets. While there, he oversaw lending, business development and operations for the Orange County region, and was director of the Imperial Bank Mortgage Co., a bank subsidiary.

He also was president and chief executive officer of Orange County's Coast Bank for more than three years. Prior to that, he served in senior management positions with Union Bank and Wells Fargo.

Askew, commenting on the future prospects for Pacific Inland Bank, noted that in this era of financial services deregulation and the trend toward consolidation, ''relationship banking'' has, to a large degree, gone by the wayside.

Askew earned an undergraduate degree in finance from the University of Arizona, and was awarded an MBA from Golden Gate University. He also is a graduate of the University of Washington Pacific Coast School of Banking.

Long active in local community affairs, Askew is a member of the board of directors of the Orange County YMCA and the Orange County Council of the Boy Scouts of America.

He resides with his wife, Bonnie, and their four children in North Tustin Hills.

Pacific Inland Bancorp is a financial services holding company with headquarters in Anaheim. It is comprised of Pacific Inland Bank; Trident Investment Management, a registered investment advisor, also based in Anaheim; and PIB Mortgage Co., a wholesale mortgage banking operation with branch offices in San Jose and Anaheim.

SEATTLE (JAN. 25) BUSINESS WIRE - University Savings Bank Thursday reported net income of $1,612,000 for the quarter ended Dec. 31, 1989.

This compared to $838,000 for the second quarter of fiscal 1989. Through the first six months of the current fiscal year, net earnings were $2,944,000 compared to net earnings of $2,914,000 in the first six months a year ago.

The bank's yield on earning assets during the quarter was 10.46 percent and its cost of funds was 7.82 percent, resulting in a positive interest rate spread of 2.64 percent, compared to an interest rate spread of 2.18 percent in the previous quarter.

The bank generated $64 million in loan volume during the second quarter, compared to loan volume of $43 million in the second quarter a year ago. Loan volume for the first half of the fiscal year was $124 million compared to $113 million in the first six months of last fiscal year.

Customer deposits were $732 million on Dec. 31, 1989, which represented a 9.4 percent increase during the past year.

University Savings Bank had assets of $847 million on Dec. 31, 1989. The bank's net worth was $83 million, resulting in a ratio of net worth to total assets of 9.8 percent. At year end, the bank exceeded each of the capital requirements recently mandated by the Financial Institutions Reform, Recovery and Enforcement Act (FIRREA).

University Savings Bank was acquired by GLENFED Inc. on March 31, 1989. GLENFED Inc. is the parent company of Glendale Federal Bank, the nation's fifth largest savings institution. GLENFED Inc. reported earnings of $47 million, or $1.53 per share, for the quarter ended Dec. 31, 1989.

University Savings Bank serves the Puget Sound market through a network of 22 offices in King, Pierce and Snohomish counties. The bank ranks fifth among Washington savings institutions in customer deposits and 7th in the

state in asset size.

DALLAS (JAN. 25) BUSINESS WIRE - Mike Manor, president and chief executive officer of Chief Auto Parts Inc., provided expert testimony on the subject of used motor oil recycling as a panel speaker before a United States Congressional session of the Committee on Energy and Commerce in the nation's Capitol on Jan. 24.

The Energy and Commerce Committee's Subcommittee on Transportation and Hazadous Materials is currently conducting hearings to compile background information for pending legislation on the hazards of dumping used motor oil into the environment. The testimony from corporate executives like Mike Manor will help to better assess the need for legislation on this environmental issues.

Chief Auto Parts recently launched an unprecedented used motor oil recycling program in 10 of its California stores and is expanding the program to an additional 38 outlets in Nevada, Arizona and Texas. People wanting to dispose of their used motor oil, free of charge, can deposit it in a state- and federally approved receptacle at any participating Chief store, from which it is picked up and recycled at a processing plant.

''Our reclamation program is proof that oil recycling efforts can work and will make a difference, even without any monetary incentive to the consumer,'' said Manor.

''We began recycling last Nov. 21 in 10 California stores and within 45 days we had received over 3,000 gallons of used oil. We estimate our recapture rate exceeded 16 percent.''

Manor's testimony outlined the need for federal legislation that will assist even the smallest retailer, while providing a good, environmentally sound alternative for consumers.

''Each year, Americans dump 400 million gallons of used motor oil into our environment. That's 35 times the amount of oil that was spilled in the Alaskan oil disaster,'' continued Manor. ''As a major provider of motor oil and motor oil products to the public, we believe that Chief should take a leadership role in the prevention of such needless dumping of used motor oil in an effective system that turns an environmental problem into a valuable resource.''

Chief Auto Parts is based in Dallas, with 500 stores across the country, including California, Texas, Nevada, Arizona, Oklahoma, Tennessee, Kentucky, Alabama and Arkansas. The company employs approximately 5,600 people and operates distribution facilities in Seagoville, Texas, and Cerritos, Calif.

PORTLAND, OR (JAN. 25) BUSINESS WIRE - Pope & Talbot Inc. Thursday announced a 20 percent increase in its quarterly dividend payment.

The new quarterly rate will be 18 cents per share, payable Feb. 15, 1990, to shareholders of record Feb. 5, 1990. This is the fourth consecutive January that the dividend has been increased. The cumulative increase since 1986 is 80 percent.

Peter T. Pope, chairman and chief executive officer, stated, ''We are happy that the company's growth in earnings and strong financial condition make this dividend increase possible.'' He concluded, ''Pope & Talbot is in a good position to achieve further growth in this new decade.''

Pope & Talbot Inc. is a publicly held, Portland-based paper, pulp and wood products company traded on the NYSE. Pope & Talbot was founded in 1849 and has operations throughout the United States and in Canada.

CHICAGO (JAN. 25) BUSINESS WIRE - The board of directors of UAL Corp. confirmed that it has received from the Airline Pilots Association, International, the Association of Flight Attendants and the International Association of Machinists a letter indicating that the unions are prepared as a group, to enter into negotiations for the acquisition by UAL's employees of a 75 percent interest in UAL through an employee stock ownership plan, with 25 percent to remain in public hands.

The participants in the employee stock ownership plan would include UAL's union and non-contract employees. The board stated that the letter indicated that the unions have agreed in principle to provide for significant reductions in labor costs and that the letter also contemplated a reduction in non-contract employee labor costs.

After reviewing the letter submitted by UAL's unions, the board instructed its legal and financial advisors to continue discussions with the representatives of the unions regarding the development of an acquisition proposal for UAL.

The board requested that its representatives keep the board informed as to progress in these discussions and that they report back to the board at the next regularly scheduled board meeting in February. The board also said that its financial advisors will continue to examine the possibility of a recapitalization.

The board stated that the letter received from the unions did not constitute an acquisition proposal and that it would consider any acquisition proposal made by the employee group or any third party when any such proposal is made.

The board also decided to release Marvin Davis and British Airways PLC from certain provisions of their Confidentiality and Standstill Agreements. They had previously been prohibited from making an offer at a price less than $300 per share.

There can be no assurance that any acquisition proposal will be made by the employee group or any other party or that, if made, the board will determine that such proposal is in the best interest of UAL shareholders.

#90025b0191 01/25/1990 ~Business Wire

HOUSTON (JAN. 25) BUSINESS WIRE - The board of directors of Union Texas Petroleum Holdings Inc. has approved a 1990 capital spending budget of $361 million, up from approximately $256 million spent in 1989, including funding for two major development projects in the U.K. North Sea.

''Our 1990 budget will allow us to pursue some attractive exploration and development opportunities around the world,'' said Chairman and Chief Executive Officer Clark Johnson.

''Over the past five years, Union Texas has spent more than $1.2 billion on high-quality capital projects worldwide. Our objective is centered on building our reserve base through a sustained and balanced capital program.''

The company plans to spend approximately $117 million in 1990 on the redevelopment of the North Sea's Piper field and the development of a nearby oilfield, the promising Saltire field (previously known as East Piper). Initial spending on these projects totaled $25 million in 1989.

When the two fields are placed onstream in 1992, they are expected to be major contributors to Union Texas' operating and financial performance in the years ahead, the company said.

In addition, Union Texas has allocated approximately $123 million for its other overseas oil and gas interests in 1990, including drilling programs in Indonesia and the North Sea's Claymore and Scapa fields and increased exploration activities in other international areas. The independent producer has earmarked $100 million for its U.S. oil and gas operations, with continued emphasis on its Gulf of Mexico holdings.

The company has budgeted $13 million for its hydrocarbon products business in 1990, down from $39 million in 1989 following the completion of a major expansion program at its jointly-owned ethylene plant near Baton Rouge, La.

Union Texas also plans to spend about $8 million for general corporate items in 1990, including expenditures for new exploration ventures.

#90025b0197 01/25/1990 ~Business Wire

MILPITAS, CA (JAN. 25) BUSINESS WIRE - Xicor (NASDAQ/NMS:XICO) Thursday reported results for the fiscal year and the 16-week fourth quarter ended Dec. 31, 1989.

Revenues for fiscal year 1989 were $90,185,000 compared with $90,138,000 for 1988. Net income for 1989 was $423,000 (2 cents per share) compared with $13,999,000 (79 cents per share) for 1988.

Revenues for the 16-week fourth quarter of 1989 were $25,014,000 compared with $27,738,000 for the 16-week fourth quarter of 1988. During the fourth quarter of 1989, Xicor incurred a loss of $5,626,000 (31 cents per share) compared with a profit of $3,314,000 (18 cents per share) for the comparable quarter 1988.

According to Raphael Klein, president: ''The 1989 fourth-quarter and fiscal-year results are in line with the advisory we issue to our shareholders in the early part of the fourth quarter.

''The 1989 fourth quarter loss and shortfall in revenues as compared to the fourth quarter of 1988 are principally due to factory underutilization lower margins on shipments of product manufactured in prior periods at higher costs, continued price erosion, and temporary shortages of certain products.

''During the third quarter, after careful analysis, we streamlined our executive structure and the manufacturing organization, and since then manufacturing has reported directly to the president.

''Immediately after the reorganization we embarked on an extensive program to shorten production cycle time, to remedy manufacturing inefficiencies and to linearize the production flow. The goal was to significantly improve response time to customers and to reduce product costs.

''We first attended to wafer fabrication. To reduce wafer scrap and improve output, we undertook an intensive effort to minimize human and equipment errors. A comprehensive communications program was inaugurated in wafer fabrication and daily 'stand-up' meetings inside the clean room were established in order to get active and direct partcipation of all employees involved in the wafer fabrication process.

''I am very pleased to report that our wafer fabrication team has achieved major improvements during the fourth quarter as evidenced by the results of the last 4-week period of the fourth quarter during which the average time to fully process wafers (cycle time) was cut in half and the wafer scrap rate was reduced to less than a third compared to the last 4-week period of the third quarter.

''These two key elements of the wafer fabrication process are now at a very high level, and we are proceeding with programs to further improve them.

#90025b0213 01/25/1990 ~Business Wire

DALLAS (JAN. 25) BUSINESS WIRE - Capstead Mortgage Corp. (NYSE:CMO) announced Thursday income from operations for the quarter and year ended Dec. 31, 1989, of $6,072,000, or 55 cents per common share, and $19,782,000, or $2.13 per common share, respectively, prior to the non-recurring write-down of its investment in marketable securities of $3,855,000.

The write-down reduces the carrying value of the marketable securities to market value at Dec. 31, 1989. After recording the write-down, net income was $2,665,000, or 15 cents per common share, and $16,375,000, or $1.73 per common share, for the quarter and year ended Dec. 31, 1989, respectively.

Net income for the corresponding periods of the preceding year were $4,916,000, or 57 cents per common share, and $21,128,000, or $2.43 per common share, respectively.

The write-down will not affect dividends related either to the December quarter or to subsequent periods because it will not be recognized currently for tax purposes and the board of directors of Capstead intends to continue to distribute 100 percent of the company's taxable income before considering the non-recurring write-down upon ultimate disposition. The company previously declared and paid a dividend of 56 cents per common share for the quarter. During the year ended Dec. 31, 1989, the

company distributed a total of $2.10 per common share in dividends.

The company also announced that the record date for determining stockholders entitled to notice of and to vote at the annual meeting of the company on April 19, 1990, will be the close of business on Feb. 20, 1990. The company's proxy statement and annual report will be mailed to the stockholders on or about March 12, 1990.

Capstead Mortgage Corp. invests in long-term, single-family residential mortgages for the purpose of offering investors the opportunity to participate in the income generated from the management of a portfolio of mortgage loans utilizing pooling and the issuance of collateralized mortgage obligations and other portfolio management strategies. It is managed by Capstead Advisers, a subsidiary of Lomas Mortgage USA.

SANTA CLARA, CA (JAN. 25) BUSINESS WIRE - VOICEMAIL International Inc. Thursday announced the installation of a VOICEMAIL system for Atlanta-based ATC, the sixth largest provider of long distance services in the United States.

The VOICEMAIL system will initially be used in conjuction with ATC's 800 product line to offer voice messaging services to its customer base.

''Our customers know ATC for providing high-quality telecommunications services,'' said Dale Gregory, ATC's president and chief operating officer. ''The VOICEMAIL system will allow us to satisfy a broader range of our customers' telecommunications needs while maintaining our high-service standards.''

''VOICEMAIL systems provide the reliability and flexibility required to meet the increasing demands of telecommunications companies,'' stated Alan Rossi, chairman and chief executive officer of VOICEMAIL. ''Our systems are in use by major telephone administrations in Asia, Europe and North America.

''As a result, VOICEMAIL systems have become the standard among leading telecommunications carriers throughout the world.''

VOICEMAIL is a publicly held company which markets voice messaging services and systems worldwide. The company's proprietary, patented VOICEMAIL systems allow callers to record and retrieve natural voice

messages and information from any telephone.

DAKOTA CITY, NE (JAN. 25) BUSINESS WIRE - IBP's 1989 fourth quarter results showed continued improvement over earnings generated by the company earlier in the year, IBP Chairman Robert L. Peterson announced Thursday.

Net earnings for the fourth quarter were $13.7 million, or 29 cents per share. That is up from the third quarter, but a decline of 40 percent from the same period in 1988 when earnings totaled $22.8 million, or 48 cents per share.

Sales for the fourth quarter were $2.2 billion, compared to $2.4 billion during the fourth quarter in 1988. Income from operations totaled $32.6 million, a decline of 33 percent from the $48.4 million recorded the previous year.

''Tight livestock supplies and excess production capacity within the meat industry are among the factors that have impacted our profit margins throughout 1989,'' Peterson said. ''However, given those conditions, our financial performance has been better than would be expected...and, we believe, significantly better than our competition.''

IBP recorded revenues of $9.1 billion for the 1989 fiscal year, which ended Dec. 31, 1989, equaling sales generated in 1988.

Income from operations for 1989 was $103 million, down from the $142 million the year before. Net earnings totaled $35.3 million, a decline from the $62.3 million generated in 1988. 1989 earnings per share were 74 cents, compared to the $1.32 per share earned in 1988.

IBP will expand its beef and pork operations in 1990 with the opening of two major meat processing plants. The company will open a state-of-the-art pork plant in Waterloo, Iowa in April and a modern beef slaughter and processing complex in Lexington, Neb. in early fall.

''We accelerated our emphasis on safety in all of our plants during 1989 '' Peterson said. ''The recognition by the National Safety Council of having 18 of the 29 safest meatpacking plants in the country, including

the top three, is an indication that we continue to be the best of the best in safety in our industry.''

IBP is the world's largest producer of fresh beef and pork with more than 23,000 employees nationwide and overseas.

#90025b0226 01/25/1990 ~Business Wire

IRVINE, CA (JAN. 25) BUSINESS WIRE - Signal Landmark, a leading developer specializing in the planning, construction, marketing and management of residential, commercial and industrial developments, has named Joe. J. Stucker as senior vice president, land development, according to an announcement made by President Peter Denniston.

Stucker will oversee the entitlement, planning, and development of masterplanned community projects in California and Hawaii.

''Joe's more than 18 years of development experience will greatly add to the Signal Landmark team,'' said Denniston. ''Our business, from infill to suburban building, is highly sensitive and complicated by nature. It is vital that we employ industry-recognized and seasoned veterans who understand the environmental, political and other varied constraints inherent in the business.

''Joe is an expert, well-respected throughout the development industry. I'm happy to welcome him to the team.''

Prior to joining Signal Landmark, Stucker was the general manager of Newport Beach-based Costain Homes' Mountain Cove Project in Riverside County, California. There, he was responsible for every aspect of the 776-acre masterplanned community.

Prior to that, Stucker served in such varied roles as president of the Kohala Joint Venture in Hawaii, partner and president of Dallas-based Tiburon Development, president of Dallas-based CCA Realty Corporation; vice president of Daon Corporation in Newport Beach; and project manager of the residential division of the Irvine company in Newport Beach.

He interrupted his early career as a civil engineer to complete an M.B.A. degree from the University of Southern California (U.S.C.) in 1972.

Signal Landmark is an Irvine-based full-service developer which specializes in the planning, construction, marketing and management of

residences, commercial and industrial developments. Signal Landmark has developed more than 18,000 residential units and 3 million square feet of commercial space.

Signal Landmark owns the Long Beach Marriott Hotel and over 300,000 acres of property in Michigan and Wisconsin, as well as its California and Hawaii holdings.

LAUGHLIN, NEV (JAN. 25) BUSINESS EDITORS - What has 25 high-speed elevators, three lighted tennis courts, a panoramic river view, and took 840 full-time workers to build?

A flamingo -- the new Flamingo Hilton Laughlin.

This newest Flamingo Hilton, which broke ground last spring occupies an 18-acre site on the banks of the Colorado River. The Flamingo Hilton Laughlin will feature a 50,000-square-foot casino, complete with 1,500 slot machines, video poker machines, blackjack, craps, roulette, pai gow poker, a poker room, keno, plus Laughlin's best-equipped race and sports book.

The twin towered, 18-story, 2,000 room Flamingo Hilton Laughlin will offer guests a Colorado River view from every room. Interiors and furnishings will be in keeping with the overall Southwestern theme in dramatic public areas.

Recreational facilities will occupy more than 150,000 square feet featuring lighted tennis courts and an 1,800-square-foot swimming pool and jacuzzi. The rugged beauty of the Southwest riverside location beckons water sportsmen, boaters, hikers, sightseers to nearby Lake Havasu and the Grand Canyon.

Fine dining in four differently themed restaurants awaits guests: the Italian Alta Villa, the western Steakhouse, Lindy's Deli, and the Flagship Buffet, which overlooks the Colorado.

Plenty of oversize vehicle parking will be available to accomodate recreational vehicles and motor homes.

Construction is right on schedule under the general contractor, Mardian Construction, who lay an average of 75,000 square feet of flooring each week. In order to maintain the pace of building, an on-site concrete

batch plant produces 137 yards of concrete per hour.

Throughout construction four tower cranes atop the twin towers have been testimony to the active construction program.

The Flamingo Hilton Laughlin is 90 miles south of Las Vegas, 300 miles from Los Angeles, 200 miles from Phoenix and serviced by highways and the Bullhead City/Laughlin Airport, just across the Laughlin bridge.

Slated to open this summer, the Flamingo Hilton Laughlin will offer room rates from $22 to $65 per night, single or double occupancy, with suites from $150 to $200.

For reservations call: 1-800/HILTONS.

#90025b0263 01/25/1990 ~Business Wire

LOS ANGELES (JAN. 25) BUSINESS WIRE - Lee Pharmaceuticals (ASE:LPH) reported its financial results for the first quarter ended Dec. 31, 1989.

The company is engaged in the research, development, purchase, manufacture and marketing of a range of professional dental products and consumer cosmetic products, including nail care products, depilatories and a feminine hygiene line.

In the quarter ended Dec. 31, 1989, the first quarter of our 1990 fiscal year, Lee Pharmaceuticals reported sales of $4.991 million as compared with sales of $7.255 million in the corresponding quarter of a year ago. The lower sales volume contributed to a $200,000 loss, or 5 cents per share loss, from net income of $18,000 in the same period of a year ago.

The decrease in sales was attributable to lower sales of selected items in the nail care category coupled with the off-season status for the company's seasonal depilatory products.

The above reductions were partially offset by the sales volume generated by the introduction of the Lee Eye Care Collection of products.

The company launched the Lee Eye Care Collection at the end of fiscal year 1989.

While the company is off to a slow start in the new fiscal year, the company expects a complete turnaround in the months ahead.

ALAMEDA, CA (JAN. 26) BUSINESS WIRE - The board of directors of Ingres Corp., (NASDAQ/NMS:RELY) formerly Relational Technology Inc. Thursday adopted a Common Share Purchase Rights Plan under which stockholders will receive one Right to purchase a share of Common Stock for each outstanding share of Ingres Common Stock of record held at the close of business on Feb. 12, 1990.

The Rights, which will initially trade with the Common Stock, become exercisable, at $55 per right, when someone acquires 20 percent or more of the company's Common Stock or announces a tender offer which could result in such person owning 20 percent or more of the Common Stock.

Prior to someone acquiring 20 percent, and in certain circumstances thereafter, the Rights can be redeemed for 1 cent each by action of the board. Under certain circumstances, if someone acquires 20 percent or

more of the Common Stock the Rights permit the holders to purchase Ingres Common Stock at a 50 percent discount.

In addition, in the event of a business combination, the Rights permit purchase of the Common Stock of an acquiror at a 50 percent discount.

The Rights expire on Feb. 12, 2000. The Rights distribution will not be taxable to stockholders and will be payable on Feb. 12, 1990. A Summary of the Rights Plan is attached.

The Plan is designed to enable all Ingres stockholders to realize the full value of their investment and to provide for fair and equal treatment for all Ingres stockholders in the event that an unsolicited attempt is made to acquire the company. The adoption of the Plan is intended as a means to guard against abusive takeover tactics and is not in response to any proposal to acquire Ingres.

Since its founding in 1980, Ingres Corp. has been recognized as a world leader in the development of relational database management systems. Ingres is one of a handful of major independents serving a market segment that has grown from virtually nothing to $2 billion in the past decade. Applications and markets include computer integrated manufacturing and management information systems. Ingres Corp. Rebounds From First-Quarter loss

Ingres Corp. Thursday announced net income of $1.5 million, or 12 cents per share, on revenues of $39.5 million, for its fiscal 1990 second quarter ended Dec. 31, 1989 after reporting a loss of $2.1 million, or 19 cents per share, for the prior quarter, on revenues of $28.9 million.

For the second quarter of fiscal 1989 the company reported net income of $2.1 million, or 17 cents per share, on revenues of $29.2 million.

MENLO PARK, CA (JAN. 25) BUSINESS WIRE - Raychem Corp. Thursday reported second-quarter fiscal 1990 net income of $5.3 million, or 15 cents per share, a decrease of 65 percent and 66 percent respectively from $15.2 million, or 44 cents per share, in the corresponding period last year.

Second-quarter sales increased 3.3 percent to $286 million from $277 million in the comparable period of the prior year.

Income in fiscal year 1989's second quarter included $7 million, or 14

cents per share, arising from the sale of two business units.

Raychem's pre-tax income, excluding the effect of Raynet and the sale of the two business units in fiscal 1989, mentioned above, was $26 million in the second quarter of fiscal year 1990 vs. $31 million in the same period of fiscal year 1989. Reported results were affected by an increase in the estimated annual effective tax rate to 50 percent compared with a tax rate of 33 percent in the corresponding period of the prior year.

Shipments in the second quarter of fiscal 1990 improved over the prior year's second quarter in Raychem's industrial ($89 million vs. $84 million) and telecommunications ($76 million vs. $72 million) markets, and declined in the electronics ($110 million vs. $115 million) market.

Second-quarter orders were modestly ahead of shipments in each of the company's major markets. Gross profit margin was 51.0 percent, compared with 52.8 percent in the second quarter of last year.

Reported sales for the second quarter would have been higher by approximately $7 million had foreign currency exchange rates been the same as in the corresponding period of fiscal 1989.

Raychem also announced its regular quarterly dividend of 8 cents per share payable on March 7, 1990, to stockholders of record as of Feb. 7, 1990.

Raychem is a broadly based materials science company serving international markets. The company develops and supplies high-performance products for the aerospace, automotive, construction, electronics, electrical power, process and telecommunications industries.

SAN JOSE, CA (JAN. 25) BUSINESS WIRE - CHIPS and Technologies Inc. (NASDAQ:CHPS) Thursday announced it is ready and able to ship 20 MHz versions of its industry standard NEATsx CHIPSet to personal computer manufacturers worldwide.

Currently, the 16 MHz version of the NEATsx CHIPSet is shipping in high volume to both desktop and laptop computer manufacturers.

CHIPS is currently sampling 20 MHz NEATsx CHIPSets and expects to commence volume shipments in February. In volume quantities, the 20 MHz NEATsx CHIPSet costs under $50 per CHIPSet.

Personal computer manufacturers currently using the 16 MHz NEATsx CHIPSet can immediately go into production with 20 MHz 80386sx-based systems by substituting faster DRAMs in existing designs. Thus current NEATsx customers can quickly bring 20 MHz 80386sx systems to market.

The NEATsx CHIPSet family is a key component to building high performance 80386sx-based personal computers. NEATsx is composed of four VLSI devices providing a high performance, enhanced implementation of the control logic required to build 100 percent compatible AT and OS/2 personal computers.

The NEATsx CHIPSet is fully supported by CHIPS BIOS, development boards and Turnkey Manufacturing Packages.

CHIPS and Technologies Inc. is the world's leading supplier of VLSI proprietary hardware and software solutions for the microcomputer industry based on evolving industry standards.

#90025b0611 01/25/1990 ~Business Wire

GREENWICH, CT (JAN. 25) BUSINESS WIRE - Stolt Tankers and Terminals (Holdings) S.A. (NASDAQ:STLT), the specialty bulk liquid shipping and distribution company, Thursday reported substantial increases in operating results for the fiscal year ending Nov. 30, 1989.

Net operating revenue for the year rose to $525 million, an 18 percent increase over the $442.9 million reported for fiscal 1988. Income from operations for fiscal 1989 increased 69 percent to $58.7 million or $2.16 per share, compared to $34.8 million or $1.44 per share for 1988.

Nonrecurring gains in fiscal 1989 totalling $12.2 million, or 45 cents per share, brought net income to $70.9 million or $2.61 per share. The gains include $5.0 million from an insurance settlement and a $7.2 million distribution from a former partner in the Stolt Tankers Joint Service. This compares with net income for fiscal 1988 of $65.3 million or $2.69 per share which includes a gain of $30.5 million or $1.26 per share on the sale of a property.

The improved operating results for fiscal 1989 reflect higher revenues achieved as parcel tankers purchased in 1988 and 1989 were absorbed into the fleet, combined with increased freight rates and more efficient fleet utilization. Although bunker fuel costs increased during the second half of 1989, much of the effect was diminished through hedging.

Net income for the fourth quarter ending Nov. 30, 1989, increased to $15.1

million or 56 cents per share on net operating revenue of $138 million, compared to net income of $12.5 million, or 47 cents per share on net operating revenue of $120.9 million for the fourth quarter 1988.

Stolt Tankers and Terminals (Holdings) S.A. is an international transportation company specializing in the distribution of bulk liquids, both by land and sea. The company operates worldwide, with 21 offices in 12 countries. Stolt-Nielsen provides total distribution services with its combination of more than 55 transoceanic and 30 coastal parcel tankers, totalling about 1.7 million deadweight tons; 2,300 intermodal tank containers in door-to-door service; five regional storage and distribution tank terminals in the United States, Northwest Europe and Brazil; as well as barges, railcars and trucks.

#90025b0613 01/25/1990 ~Business Wire

LOS ANGELES--(BUSINESS WIRE)--Jefferies Group Inc. (NASDAQ:JEFG) Thursday announced revenues and earnings for the quarter and year ended Dec. 31, 1989.

In the fourth quarter, revenues totaled $25,391,000 compared with 736,255,000 for the same period a year ago. There was a net loss of $3,161,000 compared with net earnings of $4,856,000 for the 1988 period.

On a fully diluted basis, the loss per share was 52 cents on 6,092,000 shares vs. earnings per share of 60 cents on 8,961,000 shares in 1988.

For the year, revenues totaled $130,627,000 compared with $144,633,000 in 1988. Net earnings were $3,659,000 vs. $15,986,000 in 1988 and fully diluted earnings per share were 58 cents on 6,315,000 shares vs. $1.96 on 9,204,000 shares in 1988.

The loss in the fourth quarter is mainly attributable to previously disclosed risk arbitrage losses.

The Jefferies Group Inc. is a holding company which, through its principal subsidiary, Jefferies & Company Inc. is one of the leading national firms in the distribution and trading of blocks of equity securities and conducts such activities primarily in the third market.

It also trades convertible bonds, high yield bonds, corporate bonds, options, futures, international securities and conducts mergers,

acquisitions and corporate finance services.

Jefferies maintains offices in Los Angeles, New York, Chicago, Dallas, Boston, Atlanta and London.

#90025b0614 01/25/1990 ~Business Wire

SANTA CLARA, CA (JAN. 25) BUSINESS WIRE - Masstor Systems Corp. (NASDAQ:MSCO) Thursday announced the appointment of Frank Cooper, 41, as chief financial officer, and John Jarvis, 45, as senior vice president of finance and administration for Masstor Systems International Inc.

Cooper will be based in New York City and Jarvis will be based at Masstor Systems International headquarters in Reading, England.

Cooper was previously the CFO of Software Sciences of America and held the position of treasurer of Thorn EMI North America Inc. Prior to that he was CFO of the English Electric Corp., USA.

Jarvis was previously with Prime Computer Inc. In his 10 years there, he was based in the United States as director of finance and administration of international marketing operations until 1987, when he returned to Europe as commercial director for Europe, the Middle East and Africa.

Matthew Hale, who has served as acting CFO, will resume his role as vice president of finance and administration, and will remain a corporate officer based in Santa Clara.

David Addison, chairman and chief executive officer, remarked that, ''As previously reported, one of the key thrusts for Masstor Systems over the next three years is to develop a stronger financial structure and organization. These appointments are part of our plan to achieve that objective.''

Founded in 1976, Masstor Systems Corp. manufactures and services mass storage systems for IBM, Cray, DEC and Honeywell Bull mainframe customers with very high volume applications. It has over 100 large company and institutional customers in 10 countries in North America and Europe.

Its focused business strategy helps MIS managers quickly leverage their huge installed mainframe investments by automating their storage processes and expanding their on-line systems.

#90025b0615 01/25/1990 ~Business Wire

LOS GATOS, CA (JAN. 25) BUSINESS WIRE - Caere Corp. announced a 64 percent increase in net revenues during 1989 to $19,591,000 from $11,937,000 in 1988.

Net income of $3,237,000 increased in 1989 from 1988 net income of $1,239,000. Net income per share was 83 cents, up from 37 cents per share in 1988. The company attributes these increases primarily to sales of OmniPage, its page-recognition software package, which commenced in September 1988.

Net revenues for the quarter ended Dec. 31, 1989, were $5,512,000, compared with $4,763,000 for the comparable quarter in 1988. Net income of $1,132,000, or 23 cents per share, in the quarter ended Dec. 31, 1989, compares with $734,000, or 21 cents per share, for the quarter ended Dec. 31, 1988.

Earnings per share in the quarter ended Dec. 31, 1989, were higher than the comparable 1988 quarter despite a substantially higher effective tax rate arising from the prior utilization of remaining tax loss carryforwards and the dilution resulting from the increased shares outstanding since the company's initial public offering in October 1989.

Commenting on the annual results, President and Chief Executive Officer Bob Teresi said: ''1989 was a momentous year for Caere. In addition to successfully completing our initial public offering in October 1989, we have achieved significant growth in both revenues and earnings during the year. Demand remains strong for OmniPage, our page-recognition product line.

''Sales of the higher-margin Macintosh version of OmniPage were particularly strong in the fourth quarter. Our traditional OCR and bar-code products continued to perform well in the marketplace and were well within our expectations.''

Caere designs, develops, manufactures and markets information recognition software and systems products that provide a low-cost, accurate means of converting text, numeric and bar-code data into computer-usable form.

There are currently two families of information-recognition products: OmniPage, a page-recognition software package with versions for the Apple

Macintosh II and the IBM PC AT and compatibles and 80386-based computers; and optical character recognition and bar-code data-entry products.

In November 1989 the company introduced four add-on products for the OmniPage product line: OmniProof, OmniDraft, OmniSpell, and OmniTrace.

#90025b0620 01/25/1990 ~Business Wire

BAKERSFIELD, CA (JAN. 25) BUSINESS WIRE - Cal Rep Bancorp Inc. (NASDAQ:CRBI), parent company of California Republic Bank, reported record earnings for the year 1989.

Leo J. Pierucci, chairman and president of both the bank and the holding company, states: ''1989 proved to be another successful year for our bank; we had a 15 percent gain in net income over 1988. Net income for 1989 was $7,076,249 compared with $6,154,326 in 1988.''

On an earnings-per-share basis, net income represents $2.55 for 1989 compared with $2.22 in 1988. Pierucci continued by stating, ''In addition to the increased earnings, considerable growth continued with total assets at year-end rising to $523.6 million a gain of 18.5 percent from a year ago.''

California Republic Bank's Chief Executive Officer Thomas H. Shaffer noted: ''Shareholders' equity at Dec. 31, 1989, was $35,416,000 an increase of 20.5 percent from 1988. For 1989, the return on average shareholders' equity was 21.86 percent. Additionally, during 1989 the shareholders also benefitted from a market value increase as Cal Rep Bancorp Inc. stock increased 69 percent.''

Commenting on growth, Shaffer states: ''The increase of loans and leases surpassed the total asset growth, rising 22.2 percent in 1989, to reach $333,539,000. Year-end deposits increased 16.7 percent over 1988, reaching $476,236,000.''

Pierucci and Shaffer attributed the earnings climb primarily to the increase in net interest income resulting from the significant loan growth. Net interest income gained 20.5 percent from $24,452,821 in 1988 to $29,474,215 in 1989.

Plans for 1990 include expanding in the communities which California Republic Bank presently serves. Groundbreaking of a new 15,000-square-foot CRB Banking facility will take place today in Lancaster. Our Southwest Branch is under expansion in order to

accommodate the growing demands of increased business.

Pierucci and Shaffer shared their thoughts for the future: ''We look forward to the new decade with a positive vision and determination to continually succeed in providing the very best to our highest priority...our customer.''

California Republic Bank, an independent bank, was founded in Greenfield, an agricultural community southeast of Bakersfield in 1953. The bank operates 16 branches, 12 in the Bakersfield Metropolitan area and in the communities of Frazier Park and Tehachapi, and four in Northern Los Angeles County, in the communities of Lancaster, Palmdale and Quartz Hill.

#90025b0623 01/25/1990 ~Business Wire

HONOLULU (JAN. 25) BUSINESS WIRE - R.J. Pfeiffer, chairman, president and chief executive officer of Alexander & Baldwin Inc. (NASDAQ:ALEX), announced Thursday that A&B's net income increased 32 percent in 1989 to $202,708,000, compared with $153,418,000 in 1988.

Earnings per share increased 43 percent to $4.38 a share, compared with $3.06 a share a year ago. Revenue for 1989 was $846,318,000, up 21 percent from $701,908,000 in 1988.

''We had a record year,'' said Pfeiffer. ''Earnings were boosted to a record level by the sale of Wailea assets and the sale of our investment in Pacific Resources Inc., which together contributed $120,112,000, or $2.55 per share, to net income.

''Events of this magnitude are not likely to occur in the near future. We particularly are pleased that, excluding these and similar events in 1988, the results for our continuing operations also improved,'' he said.

In the fourth quarter of 1989, A&B's net income decreased 37 percent to $16,824,000, or 37 cents a share, compared with $26,838,000, or 53 cents a share, in the like period a year ago.

That decline was the result of fewer property sales and higher operating expenses in our ocean transportation operations in the 1989 fourth quarter.

Total revenue in the fourth quarter of 1989 was $171,294,000, down slightly from $173,073,000 the previous year. In the 1988 fourth quarter, A&B sold a 21-acre oceanfront parcel at Wailea.

Matson Navigation Co. Inc., A&B's ocean transportation subsidiary, reported a 7 percent increase in operating profit (before interest expense corporate expenses and income taxes) for the year, compared with 1988.

Operating profit for the fourth quarter declined 25 percent, compared with the fourth quarter a year ago, reflecting increased costs for fuel, earthquake repairs at the Oakland terminal, information systems development, and cost absorptions at the Los Angeles terminal due to the departure in October of Nippon Yusen Kaisha Lines.

Headquartered in Honolulu, A&B's principal operations are in ocean transportation, property development and management, and agribusiness.

#90025b0626 01/25/1990 ~Business Wire

ST. LOUIS (JAN. 25) BUSINESS WIRE - Emerson Electric Co. announced Thursday that it has extended the expiration date in connection with the proposed acquisition of McGill Manufacturing Company, Inc., by Emersub XXVI, Inc., a subsidiary of Emerson, until 5 p.m. (New York City time) on January 31, 1990.

The tender offer was originally scheduled to expire on January 17, 1990 and was extended to January 24, 1990.

Emersub XXVI has commenced a cash tender offer for all outstanding shares of common stock of McGill for $93 per share of common stock. Emerson reported that as of January 24, approximately 1.14 million shares of McGill common stock had been tendered which, when combined with the approximately 279,000 shares not yet tendered but subject to option agreements, represent 98 percent of the McGill shares outstanding.

The extension is due to the previously announced Federal Trade Commission request for additional information to Emersub XXVI and McGill in connection with the acquisition of McGill. Emerson has completed its response to the Commission's request and has agreed with the staff of the Federal Trade Commission that the waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976 will expire on February 7, 1990.

McGill, based in Valparaiso, Indiana, manufactures bearings and electrical products primarily for industrial use.

Emerson Electric Co., based in St. Louis, manufactures a broad range of electronic, electrical and other products for consumer, commercial,

industrial and government and defense markets.

#90025b0629 01/25/1990 ~Business Wire
CALABASAS, CA (JAN. 25) BUSINESS WIRE - Dynatech Microwave Technology Inc. (NASDAQ:DYTC) a leading supplier of electromechanical switches and RF integrated assemblies, announced Thursday that it will supply Page Avjet, an Orlando, Fla.-based company, with a few hundred Mode S T/CAS (Traffic Alert and Collision Avoidance System) switches.

Page Avjet initially plans to use the Dynatech switch, model D2-729B002, to retrofit a fleet of aircraft owned and operated by Southwest Airlines in accordanced with the federally mandated T/CAS program.

''Our Mode S T/CAS switch allows Page Avjet to retrofit planes from the various airlines they serve with the same high-quality switches which will be standard equipment on new aircraft,'' said Walter Reed, vice president, sales and marketing for Dynatech.

The T/CAS safety system has been mandated by the FAA. This system helps airplanes avoid potential collisions by scanning the surrounding airspace for nearby planes.

Dynatech Microwave Technology's switch, which has patented internal terminations, is currently the only Mode S T/CAS switch to be environmentally tested and qualified to FAA certification requirements (RTCA/DO-160B).

Over the past four months Dynatech Microwave Technology has been chosen to supply Mode S T/CAS switches for Boeing Corp., Pan American Airlines, Quantas Airways of Sydney, Australia, Ltd., Northwest Airlines, and others.

The value of the Page Avjet contract approached $80,000. Other terms were not disclosed.

Dynatech Microwave Technology, a leading manufacturer of electromechanical high-frequency switches and components for the aerospace, defense and commercial marketplace, has more than 50 major customers in the aerospace/defense industry.

The company is a subsidiary of Massachusetts-based Dynatech. With reported annual sales of $400 million, Dynatech's 40 manufacturing subsidiaries supply electronic products worldwide to highly diversified niches of the communications, scientific, automotive, aviation and medical markets.

COSTA MESA, CA (JAN. 25) BUSINESS WIRE - PDA Engineering reported its results for the second quarter and six month period ended Dec. 31, 1989.

Net earnings increased to $511,000, or 12 cents per share, for the second quarter of fiscal year 1990, as compared with $446,000, or 11 cents per share, for the second quarter of fiscal year 1989. For the six month period, earnings were 20 cents per share, for the current fiscal year compared with 17 cents per share, for the first six months of fiscal year 1989.

Revenues for the second quarter were $7,560,000, an increase of 19 percent over the second quarter of the previous fiscal year. This is the twentieth consecutive revenue increase compared with the prior year's quarter since PDA Engineering became a publicly owned company in 1985.

Software Products revenues for the second quarter were up 28 percent over the same period last year, resulting from decreased outside subcontracting. The company's operating income for the current quarter increased 36 percent, to $645,000, compared with $474,000, for the second quarter of the previous fiscal year.

PDA is a publicly owned company (NASDAQ:PDAS). Formed in 1972, the company provides advanced technology products and engineering services to commercial and government customers.

PDA designs, develops and markets a system of mechanical engineering software under the PATRAN brand name, which provides engineers with the ability to model and analyze engineering designs during the product design and development process. The company has headquarters at 2975 Redhill Ave., Costa Mesa, Calif., 92626.

NEWPORT BEACH, CA (JAN.25) BUSINESS WIRE - CommerceBancorp (NASDAQ/NMS:CBNB), announces both record earnings and the company's 10th annual stock dividend and sixth consecutive cash dividend.

Chief Executive Officer Clyde Gossert announced record net income of $3,567,000, for the year ended Dec. 31, 1989. Net income increased $1,030,000, or 41 percent over the $2,537,000, for the year ended Dec. 31, 1988. Fourth quarter net income was $942,000, compared with $818,000 for the fourth quarter 1988.

Total assets were $254,415,000, at Dec. 31, 1989, which represents a 10 percent increase over total assets of $231,629,000, at Dec. 31, 1988.

Total loans (net of unearned income) were $185,242,000 at Dec. 31, 1989, compared with $142,641,000, reported at Dec. 31, 1988.

Gossert also announced both record earnings per share for the year ended Dec. 31, 1989 and the 10th annual 5 percent stock dividend and sixth

consecutive 10 cents per share cash dividend the company has paid on shares of its common stock.

The 10 cents per share cash dividend will be paid on outstanding shares after which the company will issue a 5 percent stock dividend. Both dividends apply to shareholders of record as of Feb. 20, 1990 and will be distributed on or about March 13, 1990.

Based upon these record profits and adjusted for this stock dividend, the company posted primary earnings per share of $1.92 with fully diluted adjusted earnings per share of $1.67. Earnings per share for 1988, retroactively adjusted for the 5 percent stock dividend to be paid in 1990 are $1.59 primary and $1.42 fully diluted.

CommerceBank, the wholly owned subsidiary of CommerceBancorp, specializes in loans to small and medium-sized businesses, construction lending and international trade finance.

CAMBRIDGE, MA (JAN. 25) BUSINESS WIRE - In line with expectations, Interleaf Inc. (NASDAQ:LEAF) Thursday reported a loss of $15.3 million ($1.11 per share), including a one-time $13.5 million after tax restructuring charge for the third quarter (ending Dec. 31, 1989) of its 1990 fiscal year.

The company earned $82,000 (1 cent per share) for the same period a year ago. Revenues for the quarter were $21.5 million, compared with $21.3 million for last year's period.

The above one-time charge, announced in November, was a result of the company's decision to exit the turnkey systems business and focus on providing software and services.

WESTBORO, MA (JAN. 25) BUSINESS WIRE - Data General Corp. Thursday reported a loss of $20.5 million, or $.69 per share, for its first quarter ended Dec. 30, 1989.

For its first quarter last year the company reported a loss of $19.5 million, or $.69 per share.

Revenues for the first quarter were $290.7 million, compared with revenues of $308.6 million for the first quarter last year.

Operating loss for the quarter was $18.4 million, compared with an operating loss of $17.5 million for the first quarter last year.

During the past quarter the company received its largest AViiON contract to date. The Department of Interior announced that it had chosen Data General to establish a nationwide computer network for the department's Water Resources Division. The contract has a procurement value of $127 million.

#90025b0645 01/25/1990 ~Business Wire

CAMBRIDGE, MA (JAN. 25) BUSINESS WIRE - Lotus Development Corp. Thursday reported significant increases in sales and net income in its fourth quarter and 1989 fiscal year-end results.

In the fourth quarter ended Dec. 31, 1989, the Cambridge, Mass-based applications software developer posted net sales of $150 million, a 33 percent increase compared to sales of $112.4 million in 1988's fourth quarter.

Net income for the quarter was positively affected by the company's December divestiture of the Lotus Information Network Corporation (LINC), the real-time financial quote service, which contributed 11 cents to earnings. Net income, including the LINC sale, totaled $29.4 million, or 69 cents per share, a 227 percent increase over income of $9 million, or 21 cents per share, in the previous year's corresponding quarter.

For the full fiscal year also ended Dec. 31, 1989, Lotus' net sales increased 19 percent to $556 million, from $468.5 million in 1988. Net income jumped 15 percent to $68 million, or $1.61 per share, from $58.9 million, or $1.29 per share, in fiscal 1988.

''We are particularly pleased with our fourth-quarter results as they represent strong global demand for the 1-2-3 product family and a significant increase in demand for Freelance Plus, our business graphics package,'' said Jim Manzi, Lotus' president and chief executive officer. ''We also saw an increase in the number of major customers who completed

their evaluations of 1-2-3 Releases 2.2 and 3 and made the decision to upgrade.''

Robert Schechter, Lotus' chief financial officer and senior vice president added: ''This has been another good quarter for the company from just about every perspective. We believe we have established the right balance between investment initiatives and cost-control measures to position us for continued profitable growth in the 90s.''

Several significant product announcements occurred during Lotus' fourth quarter. In November, the company said it had begun customer testing of 1-2-3/G, the graphical version of its best-selling spreadsheet for the OS/2 and Presentation Manager personal computer operating system.

Less than a month later, the company announced that it had begun shipping Lotus Notes, a new group communications product that allows people to create and access shared information using personal computers with local- and wide-area networks. The company simultaneously announced some significant sales of Notes, including 10,000 copies to Price Waterhouse, a business advisory firm.

In addition, the company shipped personal computer network versions of 1-2-3 Releases 2.2 and 3, the Lotus Spreadsheet for Deskmate from Tandy, a version of Freelance Plus for Japan and CD/Investment, a major enhancement to the Lotus One Source product line.

''The past year can best be characterized as one of product and organizational development as we continued to build upon a very solid foundation,'' Manzi said. ''In addition to shipping 1-2-3 Releases 2.2 and 3, we delivered 17 new products and upgrades in 1989, and readied our 1-2-3 cross-platform product line for delivery this year. At the same time we added several senior managers with a breadth of industry and management experience, and we increased our investment in management development and organizational training. These and other developments position us well for the future as we move forward in delivering truly useful technology that meets customers' needs across a broadened computing landscape.''

Lotus Development Corporation (NASDAQ:LOTS), founded in 1982, is the leading developer of applications software and the leading provider of information services delivered on compact disk.

#90025b0651 01/25/1990 ~Business Wire

SUNNYVALE, CA (JAN. 25) BUSINESS WIRE - Amdahl Corp. announced Thursday that net income for the year ended Dec. 29, 1989, amounted to $152,972,000 or $1.39 per share, compared to $219,039,000, or $2.01 per share, the year before.

Revenues totaled $2,101,121,000 in 1989, up from $1,801,807,000 in 1988.

In the fourth quarter, net income was $41,630,000, or 38 cents per share, on revenues of $625,847,000 in 1989 and $71,500,000, or 66 cents per share on revenues of $545,711,000 in 1988.

Income in 1988 included an extraordinary tax credit of 9 cents per share in the fourth quarter for prior years' losses in certain foreign subsidiaries.

Demand for Amdahl products remained strong in 1989. As a result, revenues reached record levels in the fourth quarter and for the year as a whole, surpassing the $2 billion mark for the first time. Earnings, however, were lower than a year ago for a variety of reasons.

Gross margins were negatively affected in 1989 by several factors, including competitive pressure on prices, less favorable foreign exchange translation rates, reserves set aside to pay for future changes in computer architecture, and higher manufacturing costs and trade-in

allowances attributable to new product transitions.

Operating expenses also rose as the company continued to invest heavily in new product development and in the expansion of its field marketing organization.

Particularly notable was the increase of over $50 million in research and development expenditures, an amount equal to more than half the decline in pretax profits.

According to John C. Lewis, Amdahl chairman and chief executive officer, perhaps the most significant accomplishment of 1989 was the substantial increase in the company's customer base.

Amdahl Corp. is a major supplier of large-scale mainframe computers, data storage subsystems and data communications products.

The company also develops systems software and provides educational and consulting services.

NEW YORK (JAN. 25) BUSINESS WIRE - James J. Morgan has been appointed senior vice president, planning for Philip Morris U.S.A.

The announcement was made by Ehud Houminer, president and chief executive officer.

He had served as senior vice president, corporate marketing for the Kraft General Foods Inc. unit of Philip Morris Cos. Inc. since June 1989. In his new position, Morgan is responsible for overseeing the direction of all aspects of Philip Morris U.S.A. operations, strategic planning and program evaluation. He will report to Houminer.

Morgan joined Philip Morris U.S.A. in 1963 as assistant to the advertising production manager, and a year later he was named assistant to the media manager. Morgan served as sales representative from 1965 to 1966.

During the next six years, he served successively as assistant brand manager, Parliament and Philip Morris cigarettes; brand manager, parliament; brand manager, Virginia Slims; and brand manager, Marlboro. He was appointed assistant director, brand management in 1972 and director, brand management the following year. Morgan was appointed vice president, brand management in 1975.

He served as assistant director, marketing from 1976 to 1978, and executive vice president, marketing from 1978 to 1983. Morgan was appointed staff vice president, marketing planning for Philip Morris Cos. Inc. in September 1988.

Morgan is director of The Forschner Group Inc.; International Service Systems Inc.; and the National Multiple Sclerosis Society.

He earned a bachelor of arts degree cum laude in American History from Princeton University in 1963.

Morgan was born in Washington, D.C., and currently lives in Greenwich, Conn.

Philip Morris U.S.A., an operating company of Philip Morris Cos. Inc., produces a number of leading cigarette brands: Marlboro, the largest selling cigarette in the United States and the world; Benson & Hedges 100's, the largest selling free-standing 100 mm brand in the USA; Merit, the largest selling free-standing low-tar cigarette; Virginia Slims, the leading cigarette made especially for women; and Superslims from Virginia Slims, the first ultra-thin, low-smoke, low-tar cigarette made especially for women. Other cigarette brands include Parliament Lights, Players, Cambridge, Alpine and Saratoga 120's.

PLEASANT HILL, CA (JAN. 25) BUSINESS WIRE - Giga-tronics Inc. Wednesday announced that John W. Scheck was retiring as president and chief executive officer effective Jan. 29, 1990.

He will continue in a full-time advisory position until March 31, the end of the company's current fiscal year, and as a director and consultant thereafter.

Chairman of the board, G.H. Bruns Jr., in announcing Scheck's retirement, said: ''John has made an outstanding contribution both as a founder and in driving the company from start-up to a real position of leadership in microwave instrumentation. We are pleased that he will continue to contribute both as a director and as a consultant.''

Bruns pointed out that Scheck, who will be 60 this year, had been contemplating retirement for some time but that they had only recently agreed on timing.

Donald F. Bogue will succeed Scheck as president and CEO and will join the board of directors. Bogue, 38, previously spent 12 years with Ampex Corp., a diversified electronics manufacturing concern, in marketing, finance and general management positions. His last five years with Ampex Corp. were as vice president and general manager of its two largest divisions.

In announcing Bogue's appointment, Bruns commented: ''The board has had an opportunity to get to know Don Bogue well over the past several months. His extensive experience managing electronic businesses under tough competitive circumstances and very demanding market conditions should serve him well in leading Giga-tronics into new growth areas while maintaining its excellent reputation for customer service and technical innovation.''

Giga-tronics designs, manufactures and markets a broad line of synthesized microwave signal sources, generators and sweepers for customers in the defense and telecommunications industry around the world. The company is located in Pleasant Hill.

#90025b0656 01/25/1990 ~Business Wire

OAKLAND, CA (JAN. 25) BUSINESS WIRE - American President Companies Ltd. Thursday announced 1989 earnings of $11.3 million, or 23 cents per share, fully diluted, compared with $81.3 million, or $3.26 per share in 1988.

Revenue increased 5 percent to $2.2 billion in 1989 from $2.1 billion in 1988. Chairman W.B. Seaton said he was disappointed with the financial results for 1989, which produced a loss of 4 cents per primary share after the payment of $12 million in dividends to the company's preferred stockholders.

In the fourth quarter of 1989, the company had a loss of $8.3 million, or 50 cents per share, fully diluted, compared with earnings of $15.5 million or 60 cents per share, in the fourth quarter of 1988. Fourth quarter revenue decreased 4 percent to $591 million, from $619 million for the comparable quarter in 1988.

The company's transportation operations had a pretax loss of $12.8 million in the fourth quarter 1989 and pretax income of $8.2 million for the full year. This compares unfavorably with pretax income of $23.3 million and $98.2 million for the like periods in 1988.

International transportation revenue decreased 1 percent to $416 million for the quarter but increased 10 percent to $1.6 billion for the full year principally due to a 13 percent improvement in volumes.

Domestic revenue decreased 12 percent and 2 percent to $175 million and $637 million for the quarter and full year, respectively, due primarily to declines in intermodal third party freight brokerage and automotive distribution revenue.

Seaton said the loss in the fourth quarter of 1989 and the decline in net income for the full year is due to lower average revenue per forty-foot equivalent unit in the company's import, intra-Asia and domestic stacktrain markets this year compared with 1988.

Also contributing to the decline were increases in operating expenses, depreciation and net interest expense related to the company's capacity expansion program, which was substantially completed in 1988.

He remarked that the expansion program positions APC to capitalize on long-term growth opportunities in each of APC's markets, although in the short term, it was overly ambitious given developments in those markets.

American President Companies Ltd. provides container distribution and transportation services within and between Asia and North America through an intermodal system combining ocean, rail and truck transportation.

#90025b0657 01/25/1990 ~Business Wire

SANTA MONICA, CA (JAN. 25) BUSINESS WIRE - FirstFed Financial Corp. (NYSE:FED), parent of First Federal Bank of California, Thursday reported net earnings of $20.5 million, equivalent to $2.34 per share of common stock for the year ended Dec. 31, 1989, the highest profits in the firm's 60-year history.

These earnings represent a 10 percent increase over $18,637,000, or $2.13 per share, for the previous year.

The bank's net earnings for the fourth quarter were $6.3 million, or 72 cents per share, a 23 percent increase over $5.1 million, or 59 cents per share, for the fourth quarter of 1988.

Loan originations totaled $311.4 million for the fourth quarter and $1.0 billion for the year. The 1989 level of loan originations nearly matches the record $1.1 billion level achieved during 1988. The total loan

portfolio at Dec. 31, 1989, reached $2.3 billion with a non-performing assets ratio of only 33/100 of 1 percent, which is one of the lowest in the industry.

FirstFed reported that it exceeded all current capital requirements instituted by new federal regulations. Mortensen said that FirstFed expects to meet all capital levels mandated for 1992 by the close of fiscal 1990.

The interest rate spread for the fourth quarter was 2.81 percent, compared with 2.04 percent for the fourth quarter of 1988. On a year-to-date basis, interest rate spreads were 2.22 percent for 1989 and 2.32 percent for 1988. Since FirstFed maintains high levels of adjustable loans in its portfolio, the ''lag effect'' from shifting interest rates temporarily affects interest rate spreads.

On this basis, reported spreads for the first half of 1989 were adversely affected but improved as interest rates leveled off in the latter part of the year.

Net interest income for the fourth quarter was $18.7 million, a 45 percent growth from the comparable period of 1988. For fiscal year 1989, net interest income reached $60.0 million, 15 percent greater than $52.3 million recorded last year.

#90025b0658 01/25/1990 ~Business Wire

LOS ANGELES (JAN. 25) BUSINESS WIRE - The Royal Canadian Mint on Thursday released preliminary results for the 1989 worldwide sales of its Maple Leaf family of precious metal coins.

In 1989, the Gold Maple Leaf continued a strong and balanced sales pattern among the world's major gold markets with global sales of 1,121,700 troy ounces, the seventh consecutive year sales have surpassed the 1 million ounce mark.

This total mirrors global market conditions for precious metals through much of the year, representing a decrease of about 75,000 ounces (approximately 6 percent) compared with 1988. The Gold Maple Leaf will again place as the clear market leader among the world's major gold bullion coins.

The Silver Maple Leaf, in its first full year of availability, booked sales of 3,325,000 troy ounces, an increase of over 200 percent compared

with a 1988 total of 1,062,000 troy ounces.

The Platinum Maple Leaf registered sales of 15,000 troy ounces in 1989, continuing to appeal to the market niche desiring a diversification into a precious metal with a high degree of speculative potential. International market conditions for investment platinum have continued to fall short of those that existed prior to December 1988.

Total Maple Leaf precious metal sales during 1989 thus amounted to 4,461,700 troy ounces and over 17,500,000 troy ounces since the introduction of the Gold Maple Leaf in 1979.

Gold Maple Leaf sales in the United States through 1989 increased over 1988, benefiting from both a general increase in market demand and a stepped-up level of marketing activity through programs such as the ''Gold for Life'' promotion being undertaken by the mint and many of its dealers.

The Royal Canadian Mint is the national mint of Canada and a world leader in its bullion and collector coin products. The Gold, Silver and Platinum editions of the Maple Leaf are bullion investment coins produced in unlimited quantities. The mint's commemortive products are well respected by collectors around the world.

The mint also strikes circulation and numismatic coins for other countries producing well over 1 billion coins in 1988. It is the third-largest refiner of gold in the world and Canada is among the top five producers of gold, silver and platinum in the world.

#90025b0667 01/25/1990 ~Business Wire

CARNO, Wales (JAN. 25) BUSINESS WIRE - Trading in the second half of the year was substantially below expectations which will result in a breakeven level for the year ended January 27th, 1990 before exceptional costs of re-organization and redundancy in the region of 2.5 million pounds sterling.

The major reasons for this downturn are a poor performance in the USA in garments, mainly due to poor supply from our in-house manufacturing of our Autumn/Winter season ranges and lower margins on sales generally, reflecting the poor trading conditions. The United Kingdom has suffered from a downturn in demand for our fabric and wallpaper which has led to lower profits in retail and, through our high operational leverage, losses in the second half in our printing business. Remedial action taken in apparel manufacturing during November came too late to affect the position this year. Generally high interest rates have also adversely affected the results.

Revman Inc., acquired earlier this year, has recently moved into profit and is projected to be on a rising trend through 1990/91. This acquisition has added over 25 percent to our leverage which, in total,

will be in the region of 100 percent of shareholders funds at the year end. Steps are being taken to reduce this level.

Willis & Geiger Inc. has traded at a loss throughout the year and as substantial investment was needed to bring it into profitability it was sold earlier this month.

Within our overseas retail businesses we have identified a number of initiatives which will result in an increase in sales of our home furnishing range through the year.

Our review of Laura Ashley Industries has resulted in annual savings of around 3 million pounds sterling a year. The review of all other operations still continues and efficiency gains already identified by outside consultants are being put into place which should result in a significant improvement in performance in 1990/91. The emphasis through the coming year will be on improved margins and stringent cash control and will focus on the opportunities available to us from the Laura Ashley brand.

#90025b0669 01/25/1990 ~Business Wire

WOODLAND HILLS, CA (JAN. 25) BUSINESS WIRE) - Dataproducts Corp. (ASE:DPC) Thursday announced the sale of its corporate headquarters and manufacturing facilities in Woodland Hills to Trizec Warner Inc. for $59.5 million.

Dataproducts also announced the commencement of a cash tender offer for up to 4 million shares (or approximately 20 percent of the outstanding shares) of Dataproducts' common stock at a price of $10 per share.

The company also reported for the 1990 third quarter a small pre-tax operating profit and an after-tax loss caused by taxes on foreign operations and a one-time adjustment in the previously reported gain on the sale of the California real estate.

Dataproducts also reported revenues of $79,280,000, and pre-tax profit from operations of $426,000, for the quarter ended Dec. 23, 1989.

Taxes on foreign operations were approximately $1 million resulting in an after-tax loss from operations of $569,000, or 3 cents per share. However as a result of a reduction in the purchase price of the Woodland Hills real estate, Dataproducts reduced its previously reported gain of $40.2 million on the sale by $3.5 million and therefore reported a net loss for the quarter of $4,069,000, or 21 cents per share.

Dataproducts is one of the world's leading computer printer manufacturers.

Its product line includes band, line matrix, laser, solid ink, thermal transfer and TEMPEST printers, as well as printer supplies.

Dataproducts' products are sold through the company's large OEM customer base, extensive VAR and distribution network, plus 27 domestic and international offices.

SAN FRANCISCO (JAN. 25) BUSINESS WIRE - AT&E Corp. (ASE:ATW) announced that it has entered into an agreement under which Groupe France Telecom and AT&E will conduct a joint technical and business evaluation of AT&E's RECEPTOR System in France.

TeleDiffusion de France, a member of Groupe France Telecom which operates a nationwide FM radio network in France, will also participate. In addition, Groupe France Telecom, through its Compagnie Generale des Communications subsidiary, has made an investment in AT&E's common stock.

Don G. Hoff, AT&E's chairman of the board and chief executive officer, said: ''AT&E is proud to be working with Groupe France Telecom, which is recognized around the world as being at the forefront of telecommunications service and technology.

''Initial field tests of the RECEPTOR System are achieving excellent results, and we look forward to developing RECEPTOR internationally. Our relationship with Groupe France Telecom represents an important step toward introducing RECEPTOR services in Europe.''

AT&E, through its subsidiaries, is engaged in the business of implementing a local, regional, national and international wireless personal communications system designed to provide a low-cost link between standard telephones and subscribers using RECEPTOR Messagewatches. RECEPTOR Messagewatches incorporating AT&E's proprietary technology are being manufactured by Hattori Seiko Co., Ltd.

#90025b0672 01/25/1990 ~Business Wire
LAGUNA HILLS, CA (JAN. 25) BUSINESS WIRE - Hart Industries Inc. (NASDAQ:HRTI) announced the installation and completion of programming on their new ''TANKWATCH'' system.

TANKWATCH gives Hart amazing nationwide, computerized access to all underground storage tanks installed in Hart's UST Compliance Program. In conjuction with its TANKWATCH system, Hart will use Veeder Root monitoring equipment. Veeder Root is the leader in monitoring systems in the United States. Veeder Root recently granted Hart national account status.

The system capabilities are multiple, with automatic reporting, on-site and remote diagnostics, continuous leak sensing (where sensors detect as little as 1/16'' of fuel, even fuel floating on water) and audible and visual leak detection indicators.

The system will notify Hart's TANKWATCH center of low inventory, overfills high water, theft and information from external inputs. Hart's TANKWATCH system can identify immediately gallons of fuel, inches of water, temperature of fuel and compiles automatic inventory increase reports.

Hart's UST Compliance Program includes: state-of-the-art doubled-walled UST systems, complete maintenance and monitoring services, all future compliance upgrades, as well as the Federal Financial Responsibility requiremnents, in an all-encompassing 15-year lease package.

A spokesman for Hart stated that now TANKWATCH is completed the company is actively qualifying applicants for their UST Compliance Program.

Hart will present its UST Compliance Program at the Western Petroleum Marketing Association Convention to be held late February at the Mirage Hotel in Las Vegas.

Hart, who is the industry leader in packaged UST compliance programs, stated that federal estimates indicate there are 1.6 million registered tanks which need to comply. The market for 1990 is estimated at $4.5 billion and the total market in excess of $40 billion.

#90025b0673 01/25/1990 ~Business Wire

EL SEGUNDO, CA (JAN. 25) BUSINESS WIRE - Computer Sciences Corp.'s (NYSE:CSC) third-quarter net earnings were up 24 percent to $14.9 million from $12 million for the prior-year period.

Earnings per share were 92 cents, compared with 75 cents a year ago.

Revenues for the fiscal year 1990 third quarter, ended Dec. 29, 1989, rose to $368.9 million from $345.5 million last year.

Revenues from ongoing operations were up 15 percent. The year-ago quarter included revenue of $25.1 million from CSC's Infonet and Compufact subsidiaries. In January 1989 CSC reduced its ownership of Infonet to a minority interest, which resulted in the removal of Infonet revenue and costs from CSC's financial statements effective with the fourth quarter of fiscal 1989, and the consolidation of its share of Infonet earnings on an equity basis. The company also sold Compufact in the fourth quarter of fiscal 1989.

Growth prior to the effect of these acquisitions was 16 percent. The Industry Services Group also posted a strong revenue gain of 22 percent to $58.4 million.

Revenue of $232.9 million from the company's federal government-oriented Systems Group was essentially flat with that of the third quarter last year, in which revenue surged due primarily to the commencement of operations on two large federal contracts for services to military test ranges.

Third-quarter operating income was $26.9 million, compared with $26.2 million the prior year, with all three operating groups contributing to the increase. Margins of CSC Consulting were less than those of a year ago due to continuing investment in the group's expansion and low margins in its European operations.

This decline more than offset margin improvements in the other two groups, resulting in an overall operating income margin of 7.3 percent, compared with 7.6 percent a year ago.

Pre-tax income of $23.5 million was up by 21 percent from $19.3 million for last year's third quarter. Included in the quarter just ended was an after-tax gain of $1.9 million from CSC's sale of a 10 percent share of its Infonet affiliate.

#90025b0680 01/25/1990 ~Business Wire

PITTSBURGH (JAN. 25) BUSINESS WIRE - Mylan Laboratories Inc. (NYSE:MYL) the leading independent generic drug manufacturer announced results of their third quarter ended Dec. 31, 1989.

Sales for the three month period were $24,101,000 vs. $22,228,000 for the same quarter last year. This figure does not reflect the sale from Eldepryl.

Net income rose to $8,192,000 from $3,758,000 and earnings per share increased to 23 cents vs. 10 cents for the comparable period last year. The dramatic increase in net earnings and earnings per share include revenues from the Eldepryl joint venture and reflect the type of continued contribution we can expect from this product.

For the nine months ended Dec. 31 sales were $68,313,000 vs. $66,352,000 and net earnings $16,535,000 against $14,510,000 last year. Earnings per share are 46 cents and for the same nine months last year they were 40 cents.

Even though no new approvals have been received during this third quarter, Mylan Management commented that they are very pleased with the strength and growth in core business and the added revenues from Eldepryl, this combination has produced the highest earnings ever in any quarter of Mylan's history.

A cash dividend of 5 cents per share was paid on July 17, 1989 and Jan. 15 1990 on approximately 36,150,000 shares and 36,190,000 shares respectively.

Mylan's 50 percent share of the net sales of Somerset for the three months ended Dec. 31, 1989 and the period since acquisition are $7,474,000 and $10,687,000. Earnings were subject to a 39 percent effective tax rate.

#90025b0685 01/25/1990 ~Business Wire

HOUSTON (JAN. 25) BUSINESS WIRE - Team Inc. (ASE:TMI) Thursday announced that it has called for redemption its $5 million original principal amount of 13 percent convertible subordinated debentures due 2004 (the ''debentures'') on Feb. 26.

Until Feb. 26 each debenture holder has the option to redeem the debentures at 106.5 percent of the principal amount plus accrued interest or convert the debentures into Team Inc. common stock. The debentures are convertible at $7.50 per share or 133.33 shares for each $1,000 principal amount of debentures.

The market price of the company's common stock at the close of business on Jan. 24 was $10-7/8.

Team's Chairman and President, H. Wesley Hall, stated that, ''Following our recent equity offering, management believes that calling the debentures is advantageous to the company. If the call results in conversion of the debentures, the balance sheet will be further strengthened and future interest costs will be reduced.

''It is also important to note that since fiscal 1988, earnings per share calculations have been reported on a fully diluted basis as if the debentures had been converted.''

Team Inc. provides repair, specialty and transporation services primarily to industrial customers and privatized services to governmental entities.

The company has 50 operating locations in 23 states and serves the international market through licensee arrangements in 10 countries. Team Inc. common stock and the debentures are traded on the American Stock Exchange under the symbols TMI and TMIA.A, respectively.

#90025b0686 01/25/1990 ~Business Wire

ROCHESTER, N.Y. (JAN. 25) BUSINESS WIRE - Rochester Gas & Electric Corp. (RG&E) Thursday (Jan. 25) reported earnings for the 3 and 12 month periods ending Dec. 31, 1989.

Earnings per share for the fourth quarter of 1989 were 64 cents compared with 29 cents for the comparable period in 1988. For the 12 month period ending Dec. 31, per share earnings were $2.10 compared with per share earnings of $2.25 for 1988.

The marked increase in fourth quarter 1989 earnings per share is attributable to a change in the accounting method used by the company to record customer revenues. As previously reported, the company includes an estimate for unbilled revenues for energy delivered but not yet billed to customers.

The adoption of this accounting method has made 1989 quarterly earnings comparisons less meaningful because it resulted in the recognition of customer revenue in different months than in the past. However, the accounting change will have no effect on earnings comparisons for quarterly and annual periods after 1989.

The new accounting procedure increased earnings per share by approximately 63 cents for the quarter and 36 cents for the year. When normalized for weather, the accounting change would have increased earnings per share by approximately 29 cents for the quarter and two cents for the year. Net of the weather-normalized accounting change, earnings increased six cents per share for the quarter and decreased by 17 cents for the year.

Rochester Gas and Electric Corp.
Earnings Report
For The Periods Ending Dec. 31

	Three Months		12 Months	
	1989(a)	1988(b)	1989(a)	1988(b)
Operating revenues	$233,001,000	$193,465,000	$845,697,000	$775,820,000
Net income	$ 21,627,000	$ 10,577,000	$ 71,444,000	$ 76,114,000
Earnings applicable to common stock	$ 20,121,000	$ 9,071,000	$ 65,419,000	$ 68,766,000
Average shares outstanding	31,243,015	30,743,756	31,089,878	30,512,804
Earnings per share	.64	.29	2.10	2.25

(a) Earnings for the three and twelve month periods ended Dec. 31, 1989 were increased by approximately 63 cents and 36 cents per share, respectively, as the result of a change in the accounting method used by the company to record customer revenues in the current year. When

normalized for weather, the accounting change would have increased earnings per share by approximately 29 cents for the quarter and 2 cents for the year. Under a 1988 rate agreement, the company now inlcudes an estimate for unbilled revenues on its Statement of Income to recognize revenues for energy delivered but not yet billed to customers. The adoption of this accounting method has made 1989 quarterly earnings comparisons less meaningful because it resulted in the recognition of customer revenue in different months than in the past. However, the change in accounting will have no effect on earnings comparisons for quarterly and annual periods subsequent to 1989.

(b) Deferred fuel expense was reclassified for comparative purposes

#90025b0687 01/25/1990 ~Business Wire

BLOOMFIELD HILLS, Mich.(JAN. 25) BUSINESS WIRE - Cross & Trecker Corp. Thursday reported a net loss of $3.8 million, or 36 cents per common share for the first quarter of fiscal 1990 ended Dec. 31.

This compares with a net loss of $7.5 million, or 61 cents per common share, in the first quarter of fiscal 1989.

Operating revenues were $99 million in the 1990 quarter and $111.2 million a year ago. Providing for dividends on preferred stock issued in November 1989 incresed the net loss per common share by 5 cents in the 1990 first quarter.

Results in the 1990 period do not include operations of three companies that were put up for sale by Cross & Trecker in a reorganization begun last year.

These units contributed $21.2 million to revenues in the 1989 quarter and had an operating loss of $.6 million, the company said.

Orders in the 1990 first quarter were $107.7 million. The comparable number in 1989 was $101.8 million. The order backlog on Dec. 31, was $277 million. The total a year ago, on a comparable basis, was $221 million.

Norman J. Ryker, vice chairman and chief executive officer, said that the first quarter loss had been anticipated. ''You don't like to report losses,'' Ryker said, ''but we believe we are on track in our program to turn around Cross & Trecker and return the company to profitability in this fiscal year. We have work to do to improve margins, and that's a center of attention. The goal for 1990 at all units is to reduce costs by

5 percent and the time it takes to build and ship products by 20 percent. If we achieve those objectives, and we believe we can, then we will boost margins and reach the profit goal for this year.''

Ryker pointed out that Cross & Trecker has substantially improved its financial position since the fiscal 1990 year began. Key factors were the issuance of $57.5 million of preferred stock, the sale of one non-core business unit for $22 million and better working capital management, he said.

''We had $108 million in total debt at the end of fiscal 1989, and this amount had been reduced to $39 million at the end of the first quarter, with virtually no short-term debt,'' Ryker said. ''Cash needs will increase throughout the year because of major programs both in the United States and Europe, but we're planning to generate part of that cash internally.''

Cross & Trecker also announced that the board of directors declared a dividend of 79.2 cents per share on its depository convertible exchangeable preferred stock, payable March 15, 1990, to shareholders of record on March 1. The dividend covers the period from Nov. 22, 1989, the date of issue, to March 15.

Cross & Trecker Corp.
Summary of Consolidated Operations
(In thousands, except per share)

	First Quarter Ended Dec. 31	
	1989	1988

#90025b0688 01/25/1990 ~Business Wire

CAMPBELL, CA (JAN. 25) BUSINESS WIRE - Fast packet company StrataCom has announced the second generation of FastPacket switching.

This next generation of StrataCom's successful IPX system moves beyond bandwidth management to provide the high-performance packet services demanded by today's new distributed processing applications. Furthermore, the new architecture will support packet and broadband interface standards being set by CCITT, ANSI and IEEE.

StrataCom's Second Generation IPX delivers packet mode services, such as Frame Relay interface, and provides a platform for future asynchronous transfer mode (ATM) services, as well as the circuit mode services currently offered by T1 bandwidth management systems.

In addition, FastPacket will be available worldwide for the first time, with the introduction of E1 (2.048 Mbps), subrate (n X 64kbps) and fractional T1 support.

The Second Generation IPX will be delivered to customers from second-quarter 1990 and all features will be available during 1990 as an easy upgrade to the installed base and new customers alike.

Features of the Second Generation IPX include: The Industry's First Implementation of Frame Relay Interface

Conforming with CCITT standards, this new interface will significantly increase the speed, efficiency and cost-viability of inter-LAN traffic. Frame Relay offers LAN traffic access to the full bandwidth of the network on demand, direct connectivity to all other points in the network and consumption only of bandwidth used. The interface will be available in mid-1990.

Bill Stensrud, StrataCom's vice president of marketing and strategic planning, said: ''The Frame Relay-FastPacket solution to LAN connectivity gives much higher performance at lower cost than will ever be possible with circuit switching hybrid solutions because, unlike the hybrid solutions, FastPacket pools the entire network's bandwidth and makes it available to all applications.

StrataCom Inc., is based in Campbell. The company manufactures, markets and services the IPX FastPacket family. The IPX integrates voice, data, video and image over high-speed digital lines in private networks.

HOUSTON (JAN. 25) BUSINESS WIRE - Galveston-Houston Co. (NYSE:GHX) announced that its registration statement with the Securities and Exchange Commission for the public offering by the company of 4 million shares of common stock at a price per share of $5 has become effective.

An additional 600,000 shares will be available for purchase by the underwriters to cover over-allotments. After underwriting discounts and commissions of 34 cents per share, net proceeds to the company (before estimated expenses, and before the exercise of the over-allotment provision) are estimated at $18.6 million.

The company will use the net proceeds of the sale to repay bank indebtedness with any remaining net proceeds being used for general corporate purposes. The offering is being managed by Wertheim Schroder & Co. Inc.

Galveston-Houston Co. manufactures valve actuators and custom steel castings for the energy and other industrial markets and replacement wear parts and excavation buckets for the construction, mining and other earthmoving industries.

A registration statement relating to these securities has been filed with the Securities and Exchange Commission and has become effective. This announcement shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there by any sale of these securities in any State in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such State.

A prospectus may be obtained from Wertheim Schroder & Co. Inc., Equitable Center, 787 Seventh Ave., New York, N.Y. 10019.

#90025b0691 01/25/1990 ~Business Wire

SCOTTSDALE, AZ (JAN. 25) BUSINESS WIRE - Go-Video Inc. (NASDAQ:GOVO)

Thursday announced the filing of a second lawsuit against six major Japanese consumer electronics companies and two of their American subsidiaries.

Sued for antitrust and trademark violations were Matsushita Electric Industrial Co. Ltd.; its Panasonic division; Victor Company of Japan Ltd.; its subsidiary US JVC Corp.; Sony Corp.; NEC Corp.; Sharp Corp.; and Sanyo Electric Co. Ltd.

In 1987, Go-Video sued these Japanese companies and others for engaging in a conspiracy to block Go-Video in its efforts to market a dual-deck VCR. The new suit filed yesterday repeats and updates the allegations of a dual-deck conspiracy, but further claims that the defendants and others have engaged in a world-wide conspiracy and cartel to monopolize consumer electronics products in general, including single-deck VCRs, digital audio tape recording equipment, and high-definition television, the next generation of television and video products.

Said Joseph M. Alioto, antitrust attorney for Go-Video: ''We are filing this new lawsuit for two reasons. First, since we filed our first lawsuit we have uncovered facts that we believe suggest the existence of a conspiracy that is much more extensive than what we knew about or suspected when we started the first case. Second, we need to update our claims to encompass everything that has happened since we began the first case in 1987.''

R. Terren Dunlap, chairman of Go-Video, stated that the filing of the new lawsuit will have no effect on the introduction of the VCR-2, Go-Video's patented dual-deck VCR, which is scheduled for introduction to consumers this year. In December, Popular Science magazine designated the VCR-2 as one of the 100 best new products of the year. The VCR-2 is the world's only dual-deck VCR, and will be available to consumers at a suggested selling price of $995.

Go-Video is represented by Joseph M. Alioto of San Francisco, and Daniel R. Shulman of Minneapolis.

#90025b0692 01/25/1990 ~Business Wire

SYLMAR, CA (JAN. 25) BUSINESS WIRE - At the annual meeting of shareholders of Sierracin Corp. held on Jan. 24, the shareholders approved the merger agreement between SCS Acquisition Corp. (SCS) and the company.

This agreement provides for a merger of a subsidiary of SCS into Sierracin in which the stockholders of Sierracin would receive $15 per share in cash and whereby Sierracin would become a privately held company. The company has signed the bank credit agreement providing the financing required to complete the merger.

The merger is subject to a settlement of pending derivative litigation commenced by a Sierracin stockholder against the company and certain members of its board of directors. The settlement hearing will be held on Feb. 5, 1990, in the Delaware Court of Chancery. Notice of such hearing was mailed to all shareholders entitled to notice.

The merger agreement was previously approved by the board of directors of the company on the recommendation of a special committee and an opinion from the committee's financial advisor that the $15 per share is fair.

In addition, two directors of the company were elected to serve until the 1992 annual meeting of stockholders.

Sierracin Corp., which is listed on the American Stock Exchange, manufactures high technology products for the aerospace and industrial markets.

#90025b0698 01/25/1990 ~Business Wire

GALVESTON, TX (JAN. 25) BUSINESS WIRE - Hornbeck Offshore Services Inc. (NASDAQ:HOSS) Thursday announced that it has signed a definitive agreement to acquire a majority of the common stock of Point Marine Inc., which is headquartered in Morgan City, La.

Other definitive agreements, which will allow the company to acquire the balance of the common stock of Point Marine and control of a related entity, are expected to be in place prior to closing, which is scheduled to occur before the end of January.

To finance the transaction, the company will issue a convertible note with a face value of $5 million and make cash payments of approximately $10 million to the selling stockholders. In addition Hornbeck will assume approximately $18 million of Point Marine's primarily long-term debt.

The company will raise the funds necessary to meet the cash payments due at closing by issuing, in a private placement transaction, two series of preferred stock, 500,000 shares of Hornbeck common stock and warrants to subscribe for one million shares of common stock at $7.50 per share.

Larry D. Hornbeck, chairman of the board and president of Hornbeck Offshore Services Inc., stated that Arthur I. Levy Jr., the current president of Point Marine, will resign that position and serve as a consultant to Hornbeck Offshore. It is anticipated that he will join Hornbeck's board of directors. The existing operating management of Point Marine will remain in place.

Hornbeck stated that the acquisition will be a major step forward for the company, adding 13 vessels to the company's currently existing fleet of 16 vessels and positioning it as one of the largest supply vessel operators in the Gulf of Mexico. It will also give the company the ''critical mass'' necessary to better serve its base of nationally-recognized customers with a greater diversity of equipment and two bases of operations on the Gulf Coast.

Hornbeck Offshore Services Inc., through its subsidiaries, is engaged in the ownership and operation of offshore service vessels primarily operating in the offshore oil service industry.

#90025b0699 01/25/1990 ~Business Wire

NEW YORK (JAN. 25) BUSINESS WIRE - Phoenix Re Corp. Thursday announced that fourth quarter earnings will be lower than anticipated because of an unusual number of catastrophic events which occurred during the period.

The company's third quarter report indicated that the California Earthquake and Phillips Petroleum explosion in Texas could affect fourth quarter earnings to approximately the same extent that Hurricane Hugo affected the third quarter, which was approximately $1,320,000 after taxes.

Third quarter earnings per share were 1 cent. Subsequently, the company incurred losses from the Australian Earthquake in Newcastle, a large fire loss, and anticipates that the severe winter freeze of last month will produce additional claims.

While the company is still collecting information on these losses, it appears that the aggregate cost, net of reinsurance, of the losses discussed above could be as much as $3,100,000 after taxes, which would result in a loss for the quarter. In keeping with its conservative philosophy, Phoenix Re recognizes its best estimate of ultimate losses for significant catastrophes during the quarter in which they occur. Phoenix Re still anticipates a modest profit for the 1989 year, however.

The company emphasizes that the 1989 figures are preliminary and subject to review by independent auditors and actuaries. Final earnings for the year will be released on Feb. 8, 1990, after review by the board of directors.

Phoenix Re provides reinsurance products and services to a national and international marketplace, with principal emphasis on commercial and personal property risks. The company's common shares trade on the NASDAQ National Market System under the symbol PXRE.

#90025b0702 01/25/1990 ~Business Wire
AUSTIN, TX (JAN. 25) BUSINESS WIRE - SEMATECH and Applied Science and Technology Inc. (ASTeX) of Woburn, Mass., have signed a joint development contract to develop a semiconductor manufacturing tool that will utilize advanced plasma etch technology.

The resulting technology will then be transferred to a U.S. equipment

manufacturer who will incorporate the new technology into a prodution etch tool.

SEMATECH's joint development program was established in an effort to regain America's leading role in semiconductor manufacturing. To accomplish this objective, SEMATECH works with U.S. suppliers to develop new equipment, materials and processes that support manufacturing requirements for future generations of technology.

A major benefit of plasma etch technology lies in its ability to etch submicron patterns on silicon wafers which form the foundation of semiconductor processing. Plasma etching can quickly and efficiently pattern wafers with high etch directionality, selectivity, and linewidth control.

The resulting production etch tool should be able to process more wafers in a shorter period of time with fewer tool errors.

ASTeX is a major manufacturer of ''sources,'' i.e. the reactor which will drive the plasma etching tool.

ASTeX' joint development effort with SEMATECH will focus on selecting the best available plasma processing reactor design, developing a processing chamber and supporting subsystems that will be integrated into the system, and demonstrating the manufacturability of the tool by characterizing, evaluating and improving a pre-production prototype in SEMATECH's development lab.

ASTeX has selected PlasmaQuest Inc., of Richardson, Texas, to be its major subcontractor for the project. PlasmaQuest will manufacture the fully integrated wafer processors to be used in the program. PlasmaQuest is a recognized innovator in the development of process technology and research reactors employing plasma technology.

SEMATECH is a consortium of 14 U.S. semiconductor manufacturers with an annual budget of $200 million. Half of SEMATECH's funding is derived from member firms and the remainder from the federal government through the Defense Advanced Research Projects Agency (DARPA).

WEST NEWTON, Mass.(JAN. 25) BUSINESS WIRE - West Newton Savings Bank (NASDAQ:WNSB) announced Thursday a net loss of $5.7 million or $3.35 per share for its year ended Dec. 31, 1989 compared to net income of $1.1 million or $.61 per share for 1988.

For the fourth quarter ended Dec. 31, 1989 the bank reported a net loss of $4.8 million or $2.81 per share compared to net income of $91,000 or $.05 per share in the fourth quarter of 1988.

Net interest income for 1989 was $7,263,000 compared with $7,340,000 in 1988. The bank recorded a provision for loan losses of $7,380,000 in 1989 compared to $700,000 in 1988. The increase in the provision for possible loan losses reflects the sharp deterioration in the New England real estate market and to a lesser extent the New England economy generally and an increase in non performing assets.

As of the end of 1989 the bank had a total of $6.6 million in non performing assets and the allowances for loan and advances to joint venture losses amounted to $5.4 million, 82 percent of non performing assets.

Other charges totaled $1,349,000 compared with other income of $516,000, a year ago. Other charges in 1989 includes operating losses from real estate joint ventures of $547,000 and securities losses of $1,095,000, compared with joint venture income of $50,000 and securities gains of $191,000 in 1988. Operating expenses decreased to $4,987,000 in 1989 from $4,994,000 in the preceding year.

Net interest income for the fourth quarter of 1989 was $1,834,000 compared with $1,923,000 in the fourth quarter of 1988. The bank recorded a provision for loan losses of $5,055,000 in 1989 compared to $410,000 in 1988. Other charges totaled $1,087,0000 compared with other income of $71,000 a year.

Other charges in 1989 included operating losses from real estate joint ventures of $97,000 and securities losses of $1,092,000 compared with no activity in these categories in the fourth quarter of 1988. Operating expenses decreased to $1,151,000 in the 1989 quarter from $1,176,000 in 1988.

The bank's assets totaled $235 million at Dec. 31, 1989, up from $225 million a year ago. At the end of 1989 the bank's ratio of stockholders, equity to assets was 8.4 percent and book value per share was $11.49.

West Newton Savings Bank is a Massachusetts savings bank founded in 1887. The bank has branch offices in Wayland, Sudbury, Lincoln and Sherborn. The bank converted to stock from Oct. 23, 1986.

BOCA RATON, FL (JAN. 25) BUSINESS WIRE - SK Technologies Corp. Thursday announced that the company has signed a joint marketing agreement with E.K. Williams & Co., an accounting services franchise.

The agreement calls for SK Technologies to market E.K. Williams' monthly business services which include business consultation, tax preparation, financial reports and related services to customers in the fast food and restaurant businesses. Conversely, E.K. Williams will market SK Technologies' computer software and hardware packages to clients in the fast food and restaurant businesses.

E.K. Williams will be utilizing their direct sales force which includes 600 consultants for this marketing effort. E.K. Williams has over 300 franchised accounting offices throughout the United States and is one of the largest firms in the accounting services field.

Randy Selman, president of SK Technologies commented, ''We are extremely pleased to be working with E.K. Williams and feel strongly that this relationship will prove very beneficial to both parties.''

SK Technologies Corp. develops and markets point-of-sale and data communications software specifically designed for fast food, restaurant and reatil operations as well as other franchise businesses.

#90025b0708 01/25/1990 ~Business Wire

CLIFTON, NJ (JAN. 25) BUSINESS WIRE - Valley National Bancorp (NASDAQ:VNBP) Thursday reported earnings of $2.67 per share for 1989, a 5 percent increase from the $2.54 per share earned in 1988.

On this basis, net income was $33.9 million, compared with $32.3 million

in the previous year.

The performance returned 1.95 percent on average assets and 20.47 percent on average shareholders' equity for 1989.

For the three month period ended Dec. 31, 1989, earnings rose to 67 cents per share, up 8 percent from 62 cents per share for the year-ago period. Net income for the fourth quarter of 1989 was $8.5 million vs. $7.8 million in the 1988 fourth quarter.

Commenting on the fourth quarter and year-end results, vice chairman and chief executive officer Gerald H. Lipkin stated, ''Our prudent expense controls and conservative lending to middle market customers have once again proven to be the prevailing ingredients in the bank's profitability.''

Net interest income grew 8.1 percent for both the twelve months and fourth quarter of 1989 to $74.6 million and $19.5 million respectively. Excluding securities gains, non-interest revenues advanced 20.3 percent for the year to $8.3 million and 34.3 percent for the quarter to $2.2 million.

Securities transactions produced net gains of $504 thousand and $63 thousand for 1989 year to date and three months, respectively versus $925 thousdand and $4 thousand recognized in 1988.

Non-interest expense increased to $35.6 million from $32.2 million for the year and to $9.6 million from $8.7 million for the fourth quarter and includes one-time charges incurred in relocating Valley's administrative and loan offices to a new facility in Wayne, N.J.

The continued quality of Valley's loan portfolio produced lower annual and fourth quarter loan loss provisions of $2 million and $650 thousand, as compared to charges of $2.6 million and $900 thousand in the year-ago periods.

Net charge-offs at Dec. 31, 1989 amounted to $1.4 million or .11 percent of total loans. The level of non-performing assets, including non-accrual loans and other real estate owned, continued to show improvements decreasing to $3 million or .22 percent of total loans at year-end 1989.

Commenting on the loan portfolio, Lipkin indicated, ''The quality of our loan portfolio is indicative of the fact that we know our customers and concentrate our lending activities within our primary market area of Northeastern New Jersey. As a matter of policy, Valley has never made a foreign loan, does not finance leveraged buy-outs and avoids speculative projects and over reliance on inflated real estate values.''

Lipkin also noted that a definitive agreement to purchase the $48 million

asset Meadowlands National Bank headquartered in North Bergen, N.J. had been signed in late December. The acquisition of Meadowlands will allow Valley to expand its market presence through three additional offices in Hudson County and one in Middlesex County. Valley expects to receive approval for the merger during the second quarter of 1990.

At Dec. 31, 1989, VAlley's total assets reached $1.8 billion, up 7 percent from 1988. Loans, net of unearned income, advanced over 1988 levels by 16.1 percent to $1.4 billion. Total deposits grew 5.8 percent to $1.6 billion while shareholders' equity increased to $171.5 million, equivalent to a book value of $13.53 per share.

Valley National Bancorp, a regional bank holding company, provides traditional commerical banking services through its prinicpal subsidiary, VAlley National BAnk.

Established in 1927, Valley National Bank operated 27 full service offices located throughout the northeastern New Jersey counties of Passaic, Bergen Hudson, Essex and Morris.

#90025b0710 01/25/1990 ~Business Wire

ROCHESTER, N.Y.(JAN. 25) BUSINESS WIRE - Eastman Kodak Company announced Thursday a new formula for its wage dividend, designed to link wage dividend payments to employees to the company's financial performance.

The new formula was announced in Kodakery, the company's employee newspaper, and becomes effective with any wage dividends declared in 1990 and beyond. The new forumla is also effective with the wage dividend payment to be made March 9 for senior Kodak management. Kodak had previously announced last August that it would revise the wage dividend formula as part of its Action Plan to improve company performance.

''When George Eastman established the Wage Dividend, he viewed it as a means by which employees would share in the company's success," said John R. McCarthy, senior vice-president and director, Corporate Relations. "These changes in Kodak's wage dividend will help reestablish that relationship and provide Kodak people with new opportunities to truly share in the success they help create.''

The new formula will provide individual employees with a cash wage

dividend ranging from five percent to 15 percent of annual pay. Traditionally, wage dividend payments have averaged between nine and 10 percent of annual pay.

Under the new formula, payment will be based on the employee's annual pay for the year in which the wage dividend is declared. Previously, it was based on the employee's pay over a five-year period.

The new formula links the total wage dividend payment to the company's earnings as a percent of average assets, excluding unamortized goodwill (ROA). The formula produces a "multiplier" which can be used by individual employees to calculate their personal
3% plus 80% of ROA.

Thus, if return on assets were to amount to 10 percent, three percent plus eight percent would provide a multipler of 11 percent. Employees would then multiply their annual pay by 11 percent to determine individual wage dividend payments.

Previously, changes in total wage dividend payments from one year to the next were the same as the change in cash dividends declared on the company's stock. A more complex multiplier was calculated by dividing the wage dividend payment by total employee earnings over the previous five-year period.

''We studied a number of alternatives, but this formula best meets the goal," McCarthy said in Kodakery. "Using a percentage of ROA as the basis for the formula allows the wage dividend to change with company performance. Adding three percent to the formula provides a stable base for ROA to build upon.''

An accompanying chart in Kodakery compared the wage dividends paid in 1979-88 with the wage dividends that would have been paid with the new formula. The new formula would have increased the total payout over the ten-year period by 1.5 percent. The old formula provided a higher payout in only three years - 1983, 1985 and 1986. Those were years in which Kodak's financial performance lagged.

CONCORD, NH (JAN. 25) BUSINESS WIRE - Community Bankshares Inc. (NASDAQ:CBNH), holding company for Concord Savings Bank, Thursday reported a loss of $8,250,000, or $4.93 per share, for its second fiscal quarter ended Dec. 31, 1989, and $8,068,000, or $4.80 per share, for its fiscal year-to-date.

This compares with net income of $610,000, or 36 cents per share, and $1,212,000, or 72 cents per share, respectively, for the same periods of the prior fiscal year.

On Jan. 10, 1990, the company announced its intention to make a provision of $10,000,000 into its allowance for possible loan losses for the quarter ending Dec. 31, 1989. The company also announced that this action would result in a loss for the quarter and fiscal year-to-date of approximately $8,600,000 and $8,500,000 respectively.

During the second quarter of the prior fiscal year, the company's provision into the allowance for possible loan losses totalled $371,000.

Community Bankshares Inc. is traded on the NASDAQ National Market System under the symbol ''CBNH.'' The company's principal subsidiary, Concord Savings Bank, is a member of the Federal Deposit Insurance Corp. and offers a wide range of consumer and commercial financial services throughout New Hampshire from three offices in Concord, N.H.

SAN ANTONIO, TX (JAN. 25) BUSINESS WIRE - The board of directors of Valero Energy Corp. (NYSE:VLO) Thursday declared a regular quarterly cash dividend of 5 cents per share on the company's common stock.

The dividend is payable March 8, 1990 to holders of record at the close of business Feb. 5, 1990.

The board also declared a regular quarterly cash dividend of 86 cents per share for its depositary preferred shares, 1983 series. Each depositary preferred share represents one-twentieth share of the company's $68.80 series B cumulative preferred stock. The dividend is payable March 1, 1990 to holders of record at the close of business Feb. 9, 1990.

Valero Energy is involved primarily in specialized refining of high-sulfur atmospheric residual oil into premium products, such as unleaded gasoline, through its specialized refinery in Corpus Christi, Texas and in the marketing of those products.

In addition, a wholly owned subsidiary of Valero is general partner of and has an approximate 49 percent interest in Valero Natural Gas Partners L.P. which owns a 7,100-mile network of natural gas transmission and gathering lines throughout Texas, purchases and sells natural gas to markets throughout Texas and the United States, provides third party gas transportation services, owns 11 natural gas processing facilities and markets natural gas liquids.

#90025b0722 01/25/1990 ~Business Wire

LOS ANGELES (JAN. 25) UPI - Occidental Petroleum Corp. Thursday announced fourth quarter net income of $30 million (10 cents per share) on sales of $5 billion in 1989, compared with $7 million (2 cents per share) on sales of $5.3 billion in 1988.

The fourth quarter 1988 earnings were reduced by an after-tax provision of $45 million in connection with the settlement of an administrative proceeding by the Department of Energy (DOE).

Net income for 1989 was $285 million ($1.03 per share) on sales of $20.1 billion, compared with 1988 net income of $302 million ($1.21 per share) on sales of $19.4 billion. The year's results included net after-tax gains from asset dispositions of approximately $49 million in 1989 and net after-tax gains from the issuance of stock by a subsidiary and asset dispositions of $190 million in 1988.

The 1989 results also included a net extraordinary gain of $29 million (11 cents per share), which resulted from the federal income tax benefit realized from the application of a capital loss carryforward to offset capital gains, partially offset by extraordinary losses resulting from the early extinguishment of debt. The 1988 results included a net extraordinary loss of $11 million (5 cents per share), which resulted from the early extinguishment of debt.

Oil and gas divisional earnings decreased to $91 million in 1989 from $210 million in 1988. The 1989 results included the net gain from asset dispositions, primarily from the sale in the third quarter of an interest in the Hartzog Draw Unit, located in Wyoming. The 1989 results also

reflected higher worldwide crude oil and natural gas prices.

Partially offsetting the effect of higher prices were lower crude oil sales volumes, primarily resulting from the July 1988 North Sea Piper platform accident and lower natural gas and natural gas liquids sales volumes. The 1989 results also reflected an after-tax charge of $35 million for the restructuring of domestic oil and gas operations.

The 1988 earnings included gains of $176 million on the issuance of a 25 percent stock interest in the Occidental subsidiary owning the Colombian operations, and $26 million from the reversal of a windfall profits tax reserve no longer required. These benefits were partially offset by a charge in connection with settlement of the administrative proceeding by the DOE.

#90025b0733 01/25/1990 ~Business Wire

FORT LAUDERDALE, FL (JAN. 25) BUSINESS WIRE - Encore Computer Corp. Thursday reported a profitable fourth quarter ending Dec. 31, 1989.

Revenues for the quarter were $60,107,000 with a net profit of $255,000 or one cent per share, compared to revenues of $8,758,000 with net income of $134,000 or one cent per share for the prior year's fiscal quarter ended Jan. 28, 1989. The 1989 fourth quarter results include the operations of the Gould computer systems business, acquired on April 27, 1989.

Kenneth G. Fisher, Encore's chairman and chief exeutive officer, stated, ''Our fourth quarter profit is a result of our successful integration of the Gould real-time computer organization with Encore's UNIX-based parallel processing business.

''As reported, our plan was to return to profitability in three quarters and we made it. We are positive about the future.''

Fisher added, ''The integration of our business is going well. Our people are excited, our new product line is progressing on plan and our customers have been responsive to our new products and business direction.''

Encore Computer Corp. and McDonnell Douglas Information Systems International recently announced an OEM agreement following their joint R & D agreement in September 1989. McDonnelll Douglas will OEM Encore Multimax parallel/multiprocessing systems to commercial markets on a

worldwide basis.

The collaboration between Encore and McDonnell Douglas is expected to generate $100 million in revenue over the next five years.

In November 1989, Encore's Mach Multiprocessing Operating System was selected by the Open Software Foundation as a standard for their OSF/1 Operating System. OSF has 180 member computer companies worldwide.

Encore Computer Corp. is a Fort Lauderdale, Florida-based company that designs, manufacturers, sells and supports the CONCEPT family of real-time computer systems and the UNIX-based Multimax family of parallel/multiprocessing systems and solutions for the commercial, technical and government markets worldwide.
